**Exhibit B** – Mitigation Monitoring Plan

# INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires that all state and local agencies establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of an Environmental Impact Report (EIR).

The mitigation monitoring program (MMP) contained herein is intended to satisfy the requirements of CEQA as it relates to the portion of the Hewlett Packard Roseville Campus Master Plan (HPMP) subject to the Campus Oaks Master Plan Amendment (HPCO Amendment). This MMP is intended to be used by City Staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Many of the mitigation measures identified in this MMP were first developed in the Draft EIR and Final EIR prepared in 1996 for the original HPMP. Additional mitigation measures, applicable only to part of the HPMP site, were developed in the addendum prepared in May 2015 for the Hewlett Packard Campus Oaks Master Plan Amendment (HPCO Amendment) project and were adopted as part of the City Council's approval of that project in August 2015. These measures only apply within the boundaries of the Campus Oaks Master Plan area.

The intent of this MMP is to ensure the effective implementation and enforcement of all adopted mitigation measures. The MMP will provide for monitoring of construction activities, as necessary, and in the field identification and resolution of environmental concerns.

## Mitigation Monitoring Program Description

### *Compliance*

The City of Roseville will coordinate monitoring activities and document the implementation of mitigation measures. The table below identifies the mitigation measures, the monitoring actions, the implementing entities, the responsible parties for monitoring actions, and the timing of mitigation actions. The entity identified as having implementing responsibility has the primary duty to execute the mitigation measures. The "applicants" shall refer to any entity that seeks entitlements for development of a project in the project area. In some instances this may require contracting for specialized consultant services. In instances where the implementing responsibility is shared between the City and Construction Contractors, the City would be responsible for ensuring that the mitigation requirements are implemented.

## *Field Monitoring of Mitigation Measures*

Prior to the issuance of grading and building permits, while detailed development plans are being prepared for approval by City staff, City staff will be responsible for ensuring compliance with mitigation monitoring applicable to the project design phase.

During construction and following the project, the City's Public Works Department will assign inspectors who will be responsible for monitoring the implementation of the mitigation measures. The inspectors will report to the City's Public Works Department and will be thoroughly familiar with the mitigation measures in the MMP. In addition, the inspectors will be familiar with construction contract requirements, schedules, standard construction practices, and mitigation techniques. The City will be responsible for onsite, day-to-day monitoring of construction activities, reviewing construction plans and equipment staging/access plans to ensure conformance with adopted mitigation measures. The City will also have the authority to enforce mitigation measures by suspending particular construction activities.

Once construction has been completed, the City will monitor the project as necessary.

If any mitigation measures are not being implemented, the City may pursue corrective action. Penalties that may be applied include, but are not limited to, the following: (1) a written notification and request for compliance; (2) withholding of permits; (3) administrative fines; (4) a stop-work order; (5) criminal prosecution and/or administrative fines; (6) forfeiture of security bonds or other guarantees; (7) revocation of permits or other entitlements.

## *Changes to Mitigation Measures*

The City Council authorizes staff to make minor changes to this Mitigation Monitoring Program in limited instances. Any such changes made by City Staff shall be reported in writing to the Planning Division of the City's Development Services Department, and a copy shall be forwarded to the Clerk of the City Council for the Council's records. Modifications to the mitigation may be made by City Staff subject to one of the following findings, documented by evidence included in the record:

a. The mitigation measure included in the Final EIR or Addendum and Mitigation Monitoring Program is no longer required because the significant environmental impact identified in the Final EIR or Addendum has been found not to exist or to occur at a level which makes the impact less than significant as a result of changes in the project, changes in conditions of the environment or other factors.

   Or

b. the modified or substitute mitigation measure to be included in the Mitigation Monitoring Program provides a level of environmental protection equal to or greater than that afforded by the mitigation included in the Final EIR or Addendum and the Mitigation Monitoring Program; and the modified or substitute mitigation measures do not have significant adverse effects on the environment in addition to or greater than those which were considered by the responsible hearing bodies in their decisions on the Final EIR or Addendum and the proposed project; and the modified or substitute mitigation measures are feasible, and the City through measures included in the Mitigation Monitoring Program or other City procedures can ensure their implementation.

Findings and related documentation supporting the findings involving modifications to mitigation measures shall be maintained in the project file with the Mitigation Monitoring Program and shall be made available to the public upon request.

## Mitigation Monitoring Program

The table presented on the following pages provides the MMP for the proposed project. The MMP identifies:

1. an explanation of each impact by issue area, summarized as an impact statement;
2. the full text of the mitigation measure(s) applicable to each impact statement;
3. the method and/or process by which the mitigation measure will be implemented;
4. the timing of implementation of each mitigation measure; and
5. the party responsible for ensuring implementation of each mitigation measure.

As individual projects consistent with the Hewlett Packard/Campus Oaks Master Plan Amendment are proposed, City staff will review the project for consistency with the HPMP Final EIR and Addendum. In doing so, all relevant HPMP Final EIR mitigation measures and all Addendum mitigation measures will be reviewed, and those that apply to the proposed project will be identified and monitoring and reporting will be conducted consistent with this plan. Following completion of the monitoring and reporting process, the final monitoring results will then be entered into the City's Mitigation Monitoring and Reporting database maintained by the Environmental Coordinator.

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| **Aesthetics** | | | | |
| **1996 Mitigation Measure 4.7-3. Use building orientation and materials that minimize glare.**<br>For large buildings, building surfaces and materials, orientation, and landscaping shall be designed to ensure that roadways and walkways are not subjected to disruptive glare. The City shall review building plans to ensure that this condition is met. | Applicant. | Prior to approval of design review. | Planning Division of Development Services Department/ Design Review Commission. | |
| **Air Quality** | | | | |
| **1996 Mitigation Measure 4.10-1: Provide Dust Controls.**<br>In order to reduce construction-generated PM10 emissions, the contractor shall comply with the dust control strategies developed by the Placer County APCD. The developer shall include in construction contracts the following requirements or measures shown to be equally effective:<br>a) The contractor shall water as indicated by City inspectors to keep all earth surfaces most during clearing, grading, earthmoving and other site preparation activities.<br>b) The contractor shall use tarpaulins or other effective covers for haul trucks that travel on public streets.<br>c) The contractor shall sweep streets within and adjacent to the project as needed or as directed by City inspectors.<br>d) The contractor shall schedule clearing, grading and earthmoving activities during periods of low wind speeds, and restrict those construction activities during high wind conditions with wind speeds greater than 20 mph average during an hour.<br>e) The contractor shall control construction and site vehicle speed to 15 mph on unpaved roads.<br>f) The contractor shall minimize open burning of wood and vegetative waste materials from both construction and operation of the project. No open burning shall occur unless it can be demonstrated to | Applicant through its Contractor. | During construction. | Applicant and Public Works Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| the Placer County APCD that alternatives have been explored. These alternatives may include, but are not limited to, chipping, mulching and conversion of biomass fuel. For any open burning, an APCD permit must be obtained in conformance with APCD Regulation 3 (Open Burning), Rules 301-325. | | | | |
| **1996 Mitigation Measure 4.10-2(a): Maintain construction equipment and vehicles.**<br>The contractor shall reduce NOx, ROG and CO emissions by complying with the construction vehicle air pollutant control strategies developed by the Placer County APCD. | Applicant, City Inspector. | Prior to the issuance of grading permits, and periodically throughout construction | Planning Division of Development Services Department | |
| **1996 Mitigation Measure 4.10-2(b): Develop and Implement Construction Employee Trip Reduction Plan.**<br>Consistent with the City's TSM Ordinance, the construction contractor shall develop and implement a trip reduction plan designed to reduce construction-phase employee vehicle trips. Elements of this plan could include the following:<br>1. Providing all construction employees with information relating to public transit facilities serving the site, such as bus routes and schedules;<br>2. Carpooling incentives, including incentives for carpool participants such as preferred on-site parking; and<br>3. Carpool rider matching services. | Applicant through its Contractor. | During construction. | Applicant and Applicant's Contractor. | |
| **1996 Mitigation Measure 4.10-3: CO Concentration Increases at Intersections.**<br>The following measures shall be implemented in order to reduce the Proposed Project's contribution to regional air pollution:<br>1. Employers within the project area shall consider employer-sponsored staggered work schedules, flexible work hours, compressed work week, ride matching services, carpool, vanpool, and buspool programs. | Applicant, Employers. | Prior to issuance of first light industrial or commercial site review permit. | For employee-related measures, TSM Coordinator. Planning Division and Building Division of Development Services Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| 2. Employers with more than 100 employees within the project area shall create educational programs to inform employees about combining vehicle trips, thereby limiting vehicle miles traveled and air pollutant emissions.<br><br>3. Employers shall improve the thermal integrity of the buildings and reduce the thermal load with measures such as with automated time clocks or occupant sensors, and in compliance with City guidelines. | | | | |
| **1996 Mitigation Measure 4.10-4: Implement Mitigation Measure 4.10-3.** | See Mitigation Measure 4.10-3 | See Mitigation Measure 4.10-3 | See Mitigation Measure 4.10-3 | |
| **1996 Mitigation Measure 4.10-6: Implement Mitigation Measures 4.10-1, 4.10-2, and 4.10-3.** | See Mitigation Measures 4.10-1, 4.10-2, and 4.10-3 | See Mitigation Measures 4.10-1, 4.10-2, and 4.10-3 | See Mitigation Measures 4.10-1, 4.10-2, and 4.10-3 | |
| **2015 Mitigation Measure 3-1. Participation in Mitigation Program.**<br><br>The Applicant shall participate in the District's Offsite Mitigation Program by paying the equivalent amount of money, which is equal to the projects contribution of pollutants (ROG and NOx), which exceeds the cumulative threshold of 10 lbs per day. The estimated payment for the proposed project is $65,274 based on $16,640 per ton for a one year period. The actual amount to be paid shall be determined, and satisfied per current California Air Resource Board guidelines, at the time of recordation of the Final Map (residential projects), or issuance of a Building Permit (non-residential projects). | The Applicant shall pay the mitigation fee. | Prior to approval of grading permits. | The Public Works Department shall confirm payment prior to approval of grading permits. | |
| **Biological Resources** | | | | |
| **1996 Mitigation Measure 4.5-5 – Develop and implement construction protocols.**<br><br>The Proposed Project shall include policies that require the implementation of construction protocols that include, but may not be limited to, the following:<br><br>• Restrict construction activities to areas away from preserved oak and riparian habitat<br><br>Construction activities in the vicinity of oak trees shall | Applicant through its Biologist and Contractor | Incorporate measures into grading/ improvement plans and tree permit exhibits, and identify the extent of construction. | Roseville Public Works Department and Planning Division of Development Services Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| be minimized. Laydown, staging, refueling and parking areas shall not be located adjacent to open space oak or riparian zones. Construction activities that by necessity occur in the vicinity of oak woodlands and riparian zones to be preserved. Encroachments or damage that have not been authorized by a tree permit shall be implemented as detailed in the Tree Preservation Ordinance.<br><br>• Provide for construction parking away from sensitive habitat resources.<br><br>Parking areas for construction personnel shall be located a minimum of 350 feet from the drip line of any mature oak tree intended for preservation, where parking will not compact or contaminate soils, damage tree roots, or otherwise degrade trees intended for open space or landscape preservation.<br><br>• Erect temporary barrier fencing to delimit protected areas.<br><br>Temporary fencing, consisting of five-foot orange construction drift fence, flagging, signs or other markings shall be erected around open space areas and restricted areas, and maintained for the duration of construction, to prevent inadvertent damage to natural resources. Fencing shall be maintained bi-weekly, and shall be the responsibility of an on-site compliance officer designated by the developer.<br><br>The Applicant shall monitor and prepare annual reports as required by USCOE. | | Orient construction workers and erect temporary fencing prior to first day of construction. Visual inspections once a week. | | |
| **1996 Mitigation Measure 4.5-7 – Conduct pre-construction survey and implement restrictions.**<br><br>To ensure that fully protected and raptor species are not injured or disturbed, the Applicant shall implement one of the three following measures:<br><br>a. All tree removal shall occur between August 30 and March 15 to avoid the breeding season of any raptor species that could be using the area. This period may be modified with the authorization of the DFG [DFW]. | Applicant through its Biologist. | Prior to issuance of tree permit, tree removal or grading permits for construction within 350 feet of trees; prior to site disturbance and during the appropriate season. | Planning Division of Development Services Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| -OR-<br><br>b. Prior to the beginning of construction during the period between March 15 to August 30, all trees within 350 feet of any grading or earthmoving activity shall be surveyed for active raptor nests by a qualified biologist. If active raptor nests are found, a fence or equally effective demarcation shall be erected around the tree at a distance of 350 feet from the edge of the canopy to prevent construction disturbance and intrusions on the nest area.<br><br>-OR-<br><br>c. The Applicant shall confer with CDFG [CDFW] and develop measures that satisfy the requirements of CDFG [CDFW] and the City.<br><br>Any raptor nest should be relocated according to CDFG [CDFW] protocol, or in consultation with CDFG [CDFW], to the nearest suitable nest tree. Alternatively, the Applicant could develop protocol to the satisfaction of CDFG [CDFW] and the City. | | | | |
| **Cultural Resources** | | | | |
| **1996 Mitigation Measure 4.6-1. Unidentified Cultural Resources.**<br><br>In the event of the discovery of buried archaeological deposits it is recommended that project activities in the vicinity of the find should be temporarily halted and a qualified archaeologist consulted to assess the resource and provide proper management recommendations. Possible management recommendations for important resources could include resource avoidance or data recover excavations. | Applicant through its Contractor. | During construction activities. | Roseville Public Works Department/Planning Division of Development Services Department/Applicant/ Contractor. | |
| **2015 Mitigation Measure 5-1. Paleontological Mitigation Program.**<br><br>Prior to earthmoving activities associated with mass grading, a qualified supervising paleontologist shall be contracted to conduct a field survey of the proposed construction area to identify areas of likely sensitivity for paleontological resources. The supervising | Applicant through qualified paleontologist. | Prior to approval of grading permit and/or improvement plans. | The Public Works Director will ensure that preconstruction surveys have been completed and ongoing monitoring taking place throughout | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| paleontologist shall also conduct construction crew training in identification of paleontological resources that may be discovered during the course of excavation. The paleontologist will also conduct paleontological monitoring during ground disturbing activities in areas identified through survey and archival review as sensitive for paleontological resources. In the event of discovery of vertebrate, plant, or invertebrate fossils, the paleontologist shall have the authority to halt or redirect excavation operations until the probable significance of the find can by assessed, and the resource salvaged as appropriate. Any significant fossils recovered during monitoring and salvage shall be cleaned, repaired, and hardened, and then donated to a repository institution. | | | construction as warranted by survey results. | |
| **Geology and Soils** | | | | |
| **1996 Mitigation Measure 4.3-2. Site-specific geotechnical evaluation to assess development on soils characterized by slow permeability, low strength and high shrink-swell potential.**<br>To comply with General Plan Policies SA-2 and SA-3, a site-specific geotechnical evaluation shall be conducted as part of the development review process per the determination of the Public Works Director. Additionally, the site-specific geotechnical evaluations shall provide recommendations for development in areas with identified soil constraints, which shall be implemented during construction. | Applicant through its Contractor. | Prior to approval of any improvement plans for the Proposed Project. | Public Works Department - Engineering Division. | |
| **Hydrology and Water Quality** | | | | |
| **1996 Mitigation Measure 4.4-2(a). Identify adequate detention facilities locations.**<br>Mitigation Measure 4.4-2(a) requires landowners to prepare a plan for on-site detention prior to project approval. The plan for detention facilities would be part of the Master Drainage Plan and must identify specific locations, capacity, and feasibility of all detention facilities required to maintain post-development flows at pre-development levels. | Applicant, Contractor. | Prior to approval of a building permit for development in the north watershed, south watershed or a grading permit and any improvement | Public Works Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| | | plans. | | |
| **1996 Mitigation Measure 4.4-2(b). Contribute fair share fees to regional flood control facilities.**<br>The Proposed Project must construct on-site drainage facilities to the City's satisfaction to limit the project's contribution to increased flows and contribute its fair share in mitigation fees to the City's regional flood control projects. | Applicant. | The Applicant must agree to pay the fees prior to approval of Development Agreement. Fees must be paid concurrent with issuance of building permits. | Public Works – Engineering. | |
| **1996 Mitigation Measure 4.4-4. Implement erosion control plan.**<br>Mitigation Measure 4.4-4 requires that for any construction activities that would disturb fewer than five acres of land, all contractors must prepare and retain on site an erosion control plan that includes a description of post-construction sediment, erosion control measures and maintenance responsibilities, and non-storm water management controls. The State General Permit requires implementation of BMPs. BMPs include schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce pollution (e.g., straw bales, dikes, silt fences, sediment traps, or similar methods). These measures would reduce water quality impacts associated with construction activities to a less-than-significant level. | Applicant through its Contractor | Prior to issuance of a grading permit, or approval of improvement plans. | Public Works Department-Engineering Division | |
| **Noise** | | | | |
| **2015 Mitigation Measure 12.1a:**<br>Construction contractors shall be required to limit construction activities to daytime hours from 7:00 a.m. to 7:00 p.m., Monday through Friday, and 8:00 a.m. to 8:00 p.m. on Saturday and Sunday. | Applicant through its contractor, chief building inspector, code enforcement inspector. | Prior to approval of building permits. | Chief building inspector, code enforcement inspector, building official. | |
| **2015 Mitigation Measure 12.1b:**<br>Construction contractors shall post signs at construction sites that include information on permitted construction days and hours, a day and evening | Applicant through its contractor, chief building inspector, code enforcement | Prior to approval of building permits. | Chief building inspector, code enforcement inspector, building | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| contact number for the job site, and a contact number in the event of problems. An onsite complaint and enforcement manager shall respond to and track complaints and questions related to noise. | inspector. | | official. | |
| **2015 Mitigation Measure 12.1c:**<br><br>The applicant shall require construction contractors working within 800 feet of an occupied residence to implement the following measures:<br><br>• Equipment and trucks used for proposed project construction shall use the best available noise control techniques (e.g., improved mufflers, equipment redesign, use of intake silencers, ducts, engine enclosures, and acoustically-attenuating shields or shrouds, wherever feasible).<br><br>• Impact tools (e.g., jack hammers, pavement breakers, and rock drills) used for proposed Project construction shall be hydraulically or electrically powered where feasible to avoid noise associated with compressed air exhaust from pneumatically powered tools. Where use of pneumatic tools is unavoidable, an exhaust muffler on the compressed air exhaust shall be used; this muffler can lower noise levels from the exhaust by up to about 10 dBA. External jackets on the tools themselves shall be used where feasible; this could achieve a reduction of 5 dBA. Quieter procedures, such as use of drills rather than impact tools, shall be used whenever feasible.<br><br>• Stationary construction noise sources shall be located as far from adjacent receptors as possible, and they shall be muffled and enclosed within temporary sheds, incorporate insulation barriers, or other measures to the extent this does not interfere with construction purposes. | Applicant through its contractor, chief building inspector, code enforcement inspector. | Prior to approval of building permits. | Chief building inspector, code enforcement inspector, building official. | |
| **2015 Mitigation Measure 12-2a:**<br><br>Prior to issuance of a building permit for uses within 300 feet of existing or planned residential uses, a qualified acoustical consultant shall review the final specifications of proposed rooftop mechanical equipment to confirm that operational noise levels | Applicant. | Prior to approval of building permits. | Chief building inspector, code enforcement inspector, building official. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| would not exceed 60 dBA Ldn/CNEL at exterior project residential uses and would not exceed 45 dBA Ldn/CNEL inside the residences. | | | | |
| **2015 Mitigation Measure 12-2b:**<br>At loading docks located within 280 feet of a residential property boundary, truck delivery trips and dock loading activities shall be limited to the daytime hours of 7:00 a.m. to 10:00 p.m., unless site-specific analysis identifies no impacts to sensitive receptors. | Applicant. | Prior to approval of building permits. | Chief building inspector, code enforcement inspector, building official. | |
| **2015 Mitigation Measure 12-3(a):**<br>The 2015 HPMP Design Guidelines shall include a requirement for inclusion of a six-foot masonry soundwall along Woodcreek Oaks Blvd., or other equally effective means of blocking or intercepting the noise. | Applicant. | Prior to approval of grading or building permits. | Roseville Planning Division of Development Services Department. | |
| **2015 Mitigation Measure 12-3(b):**<br>The 2105 HPMP Design Guidelines shall prohibit second story balconies on the west face of units that front on Woodcreek Oaks Blvd. (i.e., the first unit only facing Woodcreek Oaks Blvd.), or other equally effective means of blocking or intercepting the noise. | Applicant. | During design plan review and approval process. | Roseville Planning Division of Development Services Department. | |
| **2015 Mitigation Measure 12-4:**<br>The 2015 HPMP Design Guidelines shall include measure to protect outdoor activity areas from excessive noise. This could include such measures as soundwalls, building orientation, or other equally effective means of blocking or intercepting the noise. | Applicant. | Prior to approval of grading or building permits. | Roseville Planning Division of Development Services Department. | |
| **2015 Mitigation Measure 12-5:**<br>Prior to approval of the tentative subdivision map for residential use along HP Way, the applicant shall submit to the City an acoustical study demonstrating that noise attenuation features would reduce noise levels in outdoor activity areas or indoor areas to less than the City's 60 dBA Ldn standard. Noise attenuating features may include, but are not limited to, berms, building orientation, setbacks, or rubberized pavement. | Applicant. | Prior to approval of the tentative subdivision map for residential uses along HP Way. | Roseville Planning Division of Development Services Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| The noise study shall identify the measures to be utilized, the noise attenuation attributable to each feature, and This could include such measures as soundwalls, building orientation, or other equally effective means of blocking or intercepting the noise. | | | | |
| **Transportation/Traffic** | | | | |
| **1996 Mitigation Measure 4.9-3. Construct additional lanes on Blue Oaks Boulevard:**<br><br>To accommodate the projected traffic demands from the Proposed Project, the current CIP should be amended to include a four lane section of Blue Oaks Boulevard is required between Foothills Boulevard to HP's collector "B" and a six lane section between Foothills Boulevard and Washington Boulevard, including a five lane overcrossing of the SPRR tracks. The Future Baseline condition requires only two lanes west of Foothills Boulevard and four lanes east. [As of 2015, improvements west of the Industrial Blvd./railroad bridge have been completed.]<br><br>The Proposed Project should contribute its fair share to implementation of the full improvements needed on these roadways under a revised traffic fee program that includes the Proposed Project. | Applicant, Roseville Public Works Department | The CIP shall be updated to reflect the need for additional lanes. The fee shall be collected concurrent with the issuance of building permits and as dictated in the development Agreement. | Roseville Public Works Department | |
| **2015 Mitigation Measure 4.9-8(a)**<br><br>The City of Roseville shall modify its CIP to include the following modification at the Foothills Boulevard/HP Way/Roseville Parkway intersection:<br><br>• Restripe/reassign the westbound approach from triple left-turn lanes, one through, and one right lane (as currently assumed in the City's CIP) to consist of two left-turn lanes, two through lanes, and one right-turn lane.<br><br>It is necessary to restripe the westbound approach to include two through lanes as a result of the extension of HP Way through the HP Campus and Campus Oaks to Blue Oaks Boulevard. The PM peak hour through volume of 1,064 vehicles under 2025 CIP conditions cannot be accommodated by a single through lane. With this improvement in place, operations would | Applicant. | Prior to approval of grading or building permits. | Roseville Public Works Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| improve from LOS F (v/c ratio = 1.27) to LOS D (v/c ratio = 0.90) during the PM peak hour. Since this improvement would not require any net increase in right-of-way, it is considered feasible. Since this improvement is necessary to accommodate the extension of a public street arterial (Roseville Parkway/HP Way), it is reasonable to include this in the City's CIP, into which the project will be paying traffic mitigation fees. | | | | |
| **2015 Mitigation Measure 4.9-8(b)**<br><br>The project applicant shall cause the following improvements to be constructed at the Blue Oaks Boulevard/Wood Meadow Drive/HP Way intersection, which are beyond what is currently included in the City of Roseville CIP:<br><br>• Design the northbound HP Way approach to be able to ultimately be widened to provide two left-turn lanes, one left/through lane, and one dedicated right-turn lane.<br><br>• Operate the northbound and southbound approaches with split phase.<br><br>A third left-turn lane is necessary to accommodate the 2025 CIP PM peak hour traffic volume of 795 vehicles (though initially only two left-turn lanes are required). The recently constructed shopping center access on the north leg consists of exclusive outbound left- and right-turn lanes and a single inbound lane separated by a narrow striped median. HP Way should be designed such the ultimate widening to include three northbound left-turn lanes would result in a ½-lane shift (5 or 6 ft.) for northbound and southbound through movements through the intersection. Given the substantial width of Blue Oaks Boulevard (nine lanes), motorists would have a considerable distance within the intersection in which to make this transition. With this improvement in place, operations would improve from LOS F (v/c ratio = 1.11) to LOS C (v/c ratio = 0.77) during the PM peak hour. Since this improvement would be constructed entirely within the Campus Oaks property boundary, it is considered feasible | Applicant. | Prior to issuance of building permits. | Roseville Public Works Department. | |

| MITIGATION MEASURE | IMPLEMEN-TATION | TIMING | REVIEWING PARTY | INITIAL/ DATE COMPLETE |
|---|---|---|---|---|
| **2015 Mitigation Measure 4.9-8(c)**<br><br>The City shall modify its CIP to include the following modification at the Pleasant Grove Boulevard/Hallissey Drive intersection:<br><br>• Restripe the northbound and southbound approaches from dedicated left, through, right lanes to left, shared left/through, and right lanes.<br><br>This improvement would require restriping of the approach lanes and minor signal system modifications, which are considered feasible. The intersection would be operated using split phase on the north and south approaches. This improvement would restore operations to LOS C conditions | City of Roseville. | Prior to roadway improvements. | Roseville Public Works Department. | |

# LAND USE

Existing Conditions and Projections
Land Use Designations, Definitions and Standards
Community Form
Community Design
Growth Management
Relationship to Specific Plans

## Land Use Element Purpose and Setting

As prescribed by State law, the purpose of the Land Use Element is to designate "the proposed Plan elements, and plays the central role in correlating all land use issues into a set of coherent development policies. The Land Use Element's goals, policies and implementation measures relate directly to the other elements of the General Plan.

A City's land use distribution and pattern are influenced by a number of factors. These include projected capacity of local and regional infrastructure and services, maintenance of desired service levels, natural and environmental constraints, market opportunities and constraints, social factors, and hazard considerations. In addition, land uses are influenced by and impact a number of less measurable considerations. These include the character and identity of the community.

The land use pattern and various influencing factors have a complex interrelationship, each impacting the other. As an example, resource capacities and the desired character of a community influence the mix and distribution of planned land uses. At the same time, the mix and distribution of land uses influence the amount and type of needed resources and represent a primary factor in determining the character of the community.

Roseville, along with the entire South Placer/ Sacramento region, has and continues to experience significant growth. This has led to a transition of the City from a relatively small residential community to a larger center with a mix of uses and increasingly urban character. The city's population has multiplied over the past 3033 years, from 26,127 in 1982 to ~~122,060~~128,3832 in ~~2012~~2015. In addition, Roseville has experienced significant non-residential growth including commercial, office and industrial development. As a result, the City has had the challenge of accommodating and providing for growth, while attempting to retain its character and identity.

There are a number of underlying principles that form the foundation for the goals and policies of the Land Use Element. These principles are based on input the City has received

from its residents through various forums such as surveys, tasks forces, and committees. Some of the primary directing principles include the following:

- Promote and enhance Roseville's unique character and identity.
- Distinguish Roseville from adjacent communities through the quality of development and design, and the level of public services and facilities provided.
- Protect and enhance Downtown and the City's established neighborhoods.
- Promote new development, which is an integrated and connected part of the City's land use pattern.
- Provide a variety of housing types and opportunities, including those for all income groups.
- Create a balanced land use pattern with an appropriate mix of uses to accommodate resident employment, service and social needs within the community.
- Promote a land use pattern that provides a high level of open space and recreational amenities and is sensitive to the natural environment.
- Create a land use mix and pattern which accommodates and promotes alternative transportation modes for ease of access and improved air quality.
- Proactively manage and plan for growth.

While not all of the above principles convert directly into a specific land use goal or policy, they have impacted the overall policy direction and the land use pattern. The principles are further carried out through the goals and policies of the other elements of the General Plan.

The Land Use Element consists of the land use map and land use polices. The land use map visually illustrates the City's existing and planned land use mix and pattern. A copy of the land use map is available through the Planning Department at 311 Vernon Street. A land use "diagram," which schematically reflects the uses from the land use map, is included in the back of the General Plan. This diagram should be utilized as a general reference only.

State law is also addressing the issue of Climate Change, in terms of both the cause and the potential effects. Resource conservation achieved through land use design has been identified as effective way to reduce greenhouse gas emissions and counteract the effects of climate change.[1] Such sustainable policies in the Land Use Element, and throughout the General Plan are designated with the following icon:

Commented [ST1]: Delete extra icon.

Also, a more focused discussion of Climate Change can be referenced in the Air Quality element of the General Plan.

Land use decision-making is guided by the goals, policies and implementation measures contained in the text of the Land Use Element. While the land use map is an illustration of policy, it only reflects those policies that can be graphically shown. As a result, the land use map and land use policies should be used in combination with each other, and the policies from the other elements, to determine consistency with the General Plan.

The Land Use Element text and policies are organized into the following six components:

***Existing Conditions and Projections*** provides a description of the planning area, existing land use inventory, and future projections.

***Land Use Designations, Definitions and Standards*** identifies and defines the City's land use categories, incorporating general use, development, intensity, and siting and compatibility standards.

***Community Form*** provides goals and polices to define and direct the future form and pattern of the City. Issues addressed include community character; relationship to transit, pedestrian, air quality; downtown/neighborhoods; relationship of new development; jobs/housing; economic development; community involvement; and inter-jurisdictional coordination.

[1] California Energy Commission. "The Role of Land Use in Meeting California's Energy and Climate Change Goals" June 2007.

**North Industrial Area**

The North Industrial area, while not subject to a specific plan, is a recognized planning subarea of the City. The area consists of 2,045 gross acres west of Washington Boulevard and north of the Northwest Roseville Specific Plan. Devoted primarily to industrial uses, the area is intended to provide a major employment/ industrial center for the South Placer region. Integrated within the North Industrial Area is a mix of housing, commercial services and community amenities to support the industrial uses. The Hewlett-Packard Roseville Campus Master Plan and the Hewlett-Packard|Campus Oaks Master Plan are located within this area. The North Industrial area will accommodate approximately 2,7225,196 residents and provide 31,34628,000 jobs at buildout.

**Del Webb Specific Plan**

The Del Webb Specific Plan was adopted in December 1993 and includes 1,203 gross acres north of Pleasant Grove Boulevard and east of Fiddyment Road. The Plan is an age restricted "active adult" community. It consists primarily of single-family homes focused around recreational facilities. Included are 27 holes of golf, private recreation centers, public parks and park preserves, two community commercial centers, a religious facility, and a fire station. The Plan accommodates approximately 5,859 residents and provides for 403 jobs.

**Highland Reserve North Specific Plan**

The Highland Reserve Specific Plan was adopted in May 1997 and includes 676 acres previously identified as urban reserve in the North Central Roseville Specific Plan. The Specific Plan includes 1,669 single and multi-family units, including approximately 162 acres of commercial use, and a 39-acre church/private school site. At buildout, the plan area is expected to accommodate approximately 4,356 residents and provide 4,900 jobs.

**North Roseville Specific Plan**

The North Roseville Specific Plan (Phase I) was adopted in August 1997 and includes approximately 749 acres previously identified as urban reserve and light industrial.

The North Roseville Specific Plan (Phase II) was adopted in May 1999 and includes approximately 659 acres previously identified in the urban reserve. The North Roseville Specific Plan (Phase III) was adopted in July 2000 and includes approximately 161 acres previously located within Placer County with a land use designation of Agriculture. Combined, the three phases of the NRSP include 6,072 single and multi-family dwelling units, including approximately 82 acres of commercial, 118 acres of parks, 183 acres of open space, and 68 acres of public/quasi-public. At buildout, the plan anticipates approximately 15,848 residents and 1,215 jobs.

**Stoneridge Specific Plan**

The Stoneridge Specific Plan was adopted in March 1998 and includes 1,118 acres, a majority of which (699 acres) was previously designated as urban reserve in the Northeast Roseville Specific Plan, with the remainder (390 acres) annexed into the City from unincorporated Placer County. The Specific Plan includes 2,861 single and multi-family units, including approximately 35 acres of Commercial, 5 acres of Business Professional, 78 acres of Park, 270 acres of Open Space, a 15-acre school site and a fire station. At buildout, the Plan area is expected to accommodate approximately 7,467 residents and provide 1,563 jobs.

**West Roseville Specific Plan**

The West Roseville Specific Plan was adopted in February 2004 and includes 3,141 acres west of Fiddyment Road, generally north of Pleasant Grove Boulevard. The Plan area was annexed into the City of Roseville from unincorporated Placer County. The Specific Plan includes 10,478 single and multi-family units, including approximately 704 age-restricted units, 62 acres of Commercial, 88 acres of Industrial, 251 acres of Park, 705 acres of Open Space, and 110 acres of Schools. At buildout the Plan area is expected to accommodate approximately 26,551 residents and provide 3,952 jobs.

**Riverside Gateway Specific Plan**

The Riverside Gateway Specific Plan was adopted in March 2006. The Riverside Gateway Specific Plan was the City's first attempt at using the Specific Plan process in conjunction with a

streetscape enhancement project within the Infill area. The Specific Plan and Streetscape project consists of a six-block area between Douglas Boulevard and Darling Way. By integrating the streetscape and infrastructure improvements with a modified land use plan, it is envisioned that new opportunities will be created for private investment, in both residential and commercial markets. At buildout, the Plan area is expected to accommodate approximately 1,190 residents and increase the amount of development on Riverside Avenue from 220,300 square feet to ±510,000 square feet (0.60 average FAR for properties designated as Commercial Mixed Use within the Plan area).

**Downtown Specific Plan**

The Downtown Specific Plan (DTSP) was adopted in April 2009. The Specific Plan encompasses 176 acres and includes the Historic Old Town, Vernon Street District, and Royer and Saugstad Parks. The Plan area is divided into 11 districts and emphasizes the addition of mixed-use and residential development. At buildout, the Plan area is expected to accommodate 900,000 square feet of new ground floor retail development, 1,020 new residential units, and a cumulative total of 4.4 million square feet. The DTSP is the overriding policy document and contains the guiding principles for development of the plan area. The associated Downtown Code is the implementing document that takes the polices from the DTSP and physically applies them to the parcel/districts. The Downtown Code has been adopted in Chapter 19.31 of the Roseville Municipal Code, and includes development and sign regulations, regulatory incentives and design guidelines that are unique to the plan area.

**Sierra Vista Specific Plan**

The Sierra Vista Specific Plan was adopted in May 2010 and amended in 2012, and includes 2,066 acres west of Fiddyment Road, north of Baseline Road. The Plan area was annexed into the City of Roseville from unincorporated Placer County. The Specific Plan includes 8,679 single and multi-family units, including approximately 259 acres of Commercial, 106 acres of Park, 317 acres of Open Space, 46 acres of Schools and 40 acres of Urban Reserve. At buildout, the Plan area is expected to accommodate approximately 22,652 residents and provide 9,000 jobs.

**Creekview Specific Plan**

The Creekview Specific Plan was adopted in August 2012 and includes 502 acres northwest of the West Roseville Specific Plan. The plan area was annexed into the City of Roseville from unincorporated Placer County. The Specific Plan includes 2,011 single and multi-family units, 19 acres of Commercial and Commercial/Business Professional, 16 acres of Parks, 133 acres of Open Space, 10 acres for schools and other Public/Quasi-Public uses, and 40 acres of Urban Reserve. At buildout the plan area is expected to accommodate 5,249 residents and provide 5,500 jobs.

## SPHERE OF INFLUENCE

Included within Roseville's primary planning area are approximately 856 acres of land within the City's sphere of influence as reflected on Figure II-1 and Table II-1. These lands, while not within the City's incorporated boundaries, do bear relation to Roseville's planning efforts. Lands within the City's sphere of influence are considered likely to be within the ultimate physical boundaries and service area of Roseville. Although it is not required that the city annex these areas, it is probable that these areas will be considered for annexation in the future.

The City does not have the jurisdiction or ability to control projects within its sphere, but it does receive notices and may comment on any such projects. All potential annexations, and expansions of the sphere of influence, are considered by the City in accordance with the policies of the Growth Management component of this element, and are subject to approval by the Placer County Local Agency Formation Commission (LAFCO).

In addition, the City has an expanded cooperation agreement in place with Placer County for the area within it's sphere of influence to the west. This area is commonly referred to as the City/County Memorandum of Understanding (MOU) area, which provides

| P/QP | OS<br>PR<br>P/QP<br>UR | PD | |

[1] Land use designation implementation is not necessarily limited to these zones, especially when combined with an RS or PD zone. Additional zones may be consistent for transitional or interim land uses consistent with General Plan policies. Mixed land use designations may require a variety of land use designations and/or a PD zone.

***Secondary Uses:*** Medical offices, veterinary clinics, other professional offices and commercial child care facilities.

***Standards:*** The neighborhood commercial land use should be applied to lands that are adjacent to collector and/or arterial streets, and residential neighborhoods. Goods and services may be provided in stand-alone buildings, or in small centers, on three to seven acres, with a floor area ratio between 20% and 40%. Project designs in this category will have a pedestrian scale and orientation, and provide convenient pedestrian and bicycle access thereby reducing the need for an automobile trip.

**COMMUNITY COMMERCIAL (CC)**

***Purpose:*** The community commercial land use category is distinguished from the neighborhood commercial designation by providing a broader range of goods and services to an expanded service area.

***Primary Uses:*** Retail stores and businesses selling a full range of goods and services including auto sales and repair, and commercial child care facilities.

***Secondary Uses:*** Professional offices uses, including medical offices and clinics.

***Standards:*** Due to the larger service area, the acreages are larger than in the neighborhood commercial land use category. The acreages range from 5 to 25 acres, the square footage ranges from 50,000 to 250,000 square feet, and the floor area ratio ranges from 20% to 40%. Appropriate areas for community commercial land use are the corners of, and adjacent to, arterials.

**REGIONAL COMMERCIAL (RC)**

***Purpose:*** The regional commercial land use category is intended to accommodate the larger shopping centers and commercial activities where uses provide goods and services to a citywide and regional service area.

***Primary Uses:*** Major department and discount stores, automalls, hotels and motels, and commercial recreation or entertainment.

***Secondary Uses:*** Office and financial institutions.

***Standards:*** Lands with this designation should be larger than 25 acres, and located adjacent to and with immediate access to major transit linkages, arterials, regional roadways, and highways. Sites should possess good automobile and truck access to accommodate the larger traffic volumes that normally occur in this land use category. Shopping centers in the regional commercial land use should exceed 250,000 square feet with a floor area ratio between 20% and 40%.

## OFFICE

**BUSINESS PROFESSIONAL (BP)**

***Purpose:*** To provide areas for small and large office uses, including uses supportive of offices.

***Primary Uses:*** The business professional land use category includes administrative, professional, government and medical offices, and research and development (not including any assembly or manufacturing). Hospitals and clinics may also be permitted by this land use designation.

***Secondary Uses:*** Limited service commercial uses (e.g. banks, restaurants, day care centers, travel agencies, florists, etc.) are encouraged where they would minimize the need for vehicle travel for convenience trips, but only as secondary uses in proximity to large office parks and complexes. In association with clinics and hospitals, pharmacies and other medical related retail may be permitted.

***Standards:*** Offices developed in stand-alone buildings or in a business park or campus setting. The business professional land use designation may be applied to lands that are adjacent to regional and community commercial. This designation may also be used as a buffer between residential areas; and arterials, community commercial and light industrial. Floor area ratios should range between 20% and 40%.

***Standards:*** A caretaker's residence may be established at a density of one unit per 300 acres. Prior to the allocation of any urban land use entitlements, the applicable constraints must be resolved consistent with the policies contained in the Growth Management Component of this element.

## COMBINING DESIGNATIONS

These designations are only applied in combination with another land use designation and modify the uses and standards of that designation.

**FLOODPLAIN (FP)**

***Purpose:*** The floodplain designation identifies those lands that are within the City's Regulatory Floodplain boundaries as defined in the Safety Element. Development of lands with a floodplain land use designation is strictly regulated by the City of Roseville. In areas with existing development, the floodplain designation is an overlay or combining land use. As part of a specific plan, the land use designation may be combined with an open space or parks designation, if found consistent with the policies of the Safety Element.

***Permitted Uses and Standards:*** Uses are limited to those that minimize impacts on upstream and downstream areas and are consistent with both the policies of the Safety Element and the underlying land use designation.

**STUDY AREA (SA)**

***Purpose:*** The study area land use designation is used as a combining land use to identify future General Plan or neighborhood study areas. This combining designation may be applied to any area where the City believes that additional land use analysis and amendment of the General Plan may be desirable to resolve specific neighborhood or land use issues.

***Permitted Uses and Standards:*** Concurrent with a land use map amendment to apply this combining designation, the City shall also adopt an ordinance regulating interim land use development. Such regulations shall relate to the land use issue necessitating such regulations and shall include an expiration date.

**VILLAGE CENTER (VC)**

***Purpose:*** The Village Center land use designation is intended allow for a mix and density of land uses common to a traditional downtown, urban setting. It allows for flexibility and deviation from the standards and permitted uses contained in the primary land use designation for which it is combined.

***Permitted Uses and Standards:*** Use of this combining designation requires comprehensive land use planning through approval of a Specific Plan area. The permitted uses, standards, and extent of deviation are to be defined in the Specific Plan.

**8. Civic Center Master Plan**
*(Adopted)*

Implement the Civic Center Master Plan as specified in the Public Facilities Element. The Plan assesses the staffing and facility needs for the City's central administrative and community functions. *(Policies DN 1-8)*

**9. Housing Rehabilitation Programs**
*(Ongoing)*

Through the Housing Division, continue to pursue and implement housing rehabilitation programs as specified in the Housing Element. These programs provide financial assistance to low-income households for the purpose of repairing health and safety defects and making general property improvements. *(Polices DN 1-8)*

**10. Economic Development Studies**
*(Proposed)*

Regularly update the Economic Development Studies, as specified in the Growth Management Component of this element that includes a jobs/housing analysis and a citywide fiscal impact analysis including a mechanism by which new development can be analyzed. *(Policies JH&ED 1-6)*

**11. Annual Demographic, Development and Employment Profile**
*(Ongoing)*

Continue the City's commitment to supplying current housing development information. This report summarizes new housing prices, resale housing prices and rental rates for multi-family and single-family units. *(Policies JH&ED 1-6)*

**12. Density Bonus Ordinance**
*(Ongoing)*

Through the Housing Division and the Planning Department, continue to implement the Density Bonus Ordinance as specified in the Housing Element. This program provides the incentive of allowing a property owner to develop more units than designated by adopted land use, in return for the provision of affordable units. *(Policies JH&ED 1-6)*

**13. Inter-agency and Inter-jurisdictional Coordination**
*(Ongoing)*

Continue City coordination with other agencies and jurisdictions. Coordination between the City and adjacent jurisdictions occurs through several mechanisms including the distribution of development proposals for review and comment. The City will continue to be involved in regional planning efforts with the counties of Placer, Sacramento and Sutter, as well as local cities, including Rocklin, Lincoln and Sacramento. The City will continue its cooperation with federal, state and local agencies in meeting the goals and polices of the General Plan. *(Policies CI&IC 1-5)*

**14. Blueprint Implementation Strategies**
(Ongoing)

Through the Blueprint Implementation Strategies continue implement the strategies in order to provide walkable communities to ensure that options to automobile travel are provided.
*(Policies G 1-6, TPAQ 1-6, DN 1-8, RND 1)*

When the West Roseville Specific Plan was approved in 2004, the General Plan land use allocation was adjusted to 56,441 dwelling units. This does not include the dwelling units in the reserve. In 2005 and 2006, the unit allocation was adjusted with approval of the Longmeadow rezone, Fiddyment 44 rezone, and Riverside Gateway Specific Plan. In addition, 8,727 acres of commercial, business professional, industrial and other non-residential uses have been allocated. With the exception of the reserve units, land use entitlements have been allocated to all properties on the land use map.

With the adoption of the ~~Creekview Specific~~Hewlett-Packard|Campus Oaks Master Plan in ~~2012~~ 2015 the General Plan dwelling unit allocation was adjusted for a total unit allocation as shown in Table II-4.

Person-per-household (PPH) estimates for Roseville have varied from an average of 2.65 to 2.54 since 1984. In addition, there are 3,814 units associated with the age restricted low density residential units in the Del Webb and West Roseville Specific Plan areas with a lower estimated PPH of 1.8. Because the PPH figures are inexact and fluctuate over time, the General Plan focuses on units rather than population. The total population estimate at buildout is shown in Table II-4.

## GROWTH TASK FORCE

During the late 1980's, the City of Roseville grew into a recognized urban center and has been designated as a "Central City" of the Sacramento Metropolitan Statistical Area (MSA) since 1985. This transformation has brought concerns about growth within the City and its effects on the quality of life, ability to provide services, and preservation of community character and identity. These concerns resulted in the formation of a City Council appointed "Growth Task Force" in 1989/90 to examine how the City can best influence and direct growth.

While the Growth Task Force Report was prepared in 1990, its principles still remain valid today. The Growth Task Force identified a number of assumptions about growth, including the following:

- Growth will occur
- Growth is not necessarily bad
- Uncontrolled growth is undesirable
- No growth or excessively slow growth is undesirable because it would lead to greater growth in surrounding areas, leaving Roseville a "pass through City"
- Growth should pay its own way and those responsible for growth shall mitigate the adverse impacts caused by it
- Growth must be managed and prepared for
- Growth must be evaluated in a regional context, not in isolation
- Growth has both tangible and intangible benefits
- Communication between City residents and the City Council is effective in monitoring the intangible effects of growth

The concerns and recommendations identified by the Growth Task Force form the basis for the goals and policies of this component. The full findings of the Task Force are contained in the "Growth Task Force Report" dated October 1990 and available through the Planning Department.

## GROWTH MANAGEMENT VISIONING COMMITTEE

Due to a number of significant growth proposals for nearby unincorporated lands, there is a high level of interest in the Roseville community concerning the potential impacts of growth on community character, quality of life, boundaries, and population. In response to this interest, the City Council felt it was appropriate to update the City's vision and review the current policy framework via citizen dialogs. With this in mind, the City Council appointed a 20 member Growth Management Visioning Committee (GMVC) in September 2004. The GMVC was charged with reviewing current General Plan Growth Management Policies, and developing a vision and policy recommendations to guide the City's physical development to 2025.

The GMVC recommendations were adopted by the City Council in April 2005 and included the following elements: 1) Findings, 2) Vision for the Future Growth and Development of Roseville, 3) Core Growth Management Policy Concepts, and 4) Committee Recommended Action Steps. Copies of the GMVC Report and Recommendations are available at the Planning and Redevelopment Department.

## GMVC FINDINGS

The GMVC's Findings synthesize the challenges and opportunities facing the City of Roseville over the next 20-years and lay the foundations for the GMVC Recommendations.

1. Growth will occur in the region and it will change Roseville and its' character. Proposed development will add an estimated 144,000 people to the tri-county area immediately to the west, south, and north of the City.
2. Growth can be shaped and managed, but not stopped on a regional scale.
3. There will be a demographic change in the region in the next 20-50 years, with an increase in the share of the population over 55 years of age or older, and smaller average household size.
4. Land use and transportation are highly interdependent: they have a direct relationship/influence on each other. There is currently significant public concern over traffic congestion in Roseville, and future growth will increase traffic if not properly addressed.
5. Housing is a key determinant of community character.
6. In a growing area, if housing supply is constrained, prices will increase at a rate that may limit the range of people who can afford to live in the community.
7. A growing and diversified economy attracts investment that adds value to the community. Professional, light industrial, communications, high tech, and education facilities at all levels attract educators, students, and employees, who all support the economy.
8. Environmental resources, such as water and energy, and associated infrastructure (i.e., water and waste water treatment plants, roadways, electric sub-stations, and landfill) will influence and shape growth.
9. Local and regional actions are mutually dependent.

## GMVC VISION FOR FUTURE GROWTH AND DEVELOPMENT

The GMVC's Vision includes eleven characteristics that define the preferred future:

- A Distinct Community Identity;
- Well Planned Neighborhoods and Communities;
- A Vibrant Downtown;
- A Balance Between New growth and Revitalization;
- Abundant Parks and Open Space;
- A Diverse Range of Housing Types;
- Mobility and Transportation Choices;
- Economic Vitality;
- Convenient Access to Higher Education;
- Sustainable Environmental Resources and Infrastructure;
- Innovative Design and Land Use Planning; and,
- On-going Partnerships with Neighboring Communities.

## GMVC CORE GROWTH MANAGEMENT POLICY CONCEPTS

The GMVC validated the existing General Plan Growth Management Polices and recommended incorporation of three additional policy concepts: Maintain Roseville's Identity and Character; Promote Stakeholder Involvement and Ensure Accountability; and Work Aggressively to Address Traffic Generated Outside of Roseville. Further, the GMVC recommended that the following Policy Concepts be used to evaluate and influence potential growth that could affect the City within the City, in its spheres of influence, and in unincorporated land where the development will impact the City:

- Maintain an Open Space Transition Buffer;
- Ensure Fiscal Sustainability;
- Encourage High Quality Infrastructure, Programs, and Services;
- Promote Comprehensive Large Scale Planning;
- Use Performance Based Standards to Manage Growth;
- Ensure Community Benefit;
- Maintain Roseville's Identify and Character;

lanes, but there may be occasions where they are used in lieu of on-street bike lanes.

The City continues to develop Class I bike paths in parks, greenways, paseos, and open space/recreational/creek corridors. The City develops Class II bike lanes on collector streets and arterials, and Class III routes continue to develop along local streets.

Figure III-6 shows the existing bikeways within the Roseville City limits by facility class. It shows that bikeway connections are currently limited in the City, especially in the older infill areas. Most of the existing bikeways are located in recently developed areas since bikeways were included in the City's nine specific plans. Figure III-7 shows Roseville's planned bikeway system, which includes the existing bikeway system. It also shows existing and proposed regional connections.

## B. OUTLOOK

The popularity of the bicycle has grown and will certainly increase in the City of Roseville for both recreational and transportation/commuter uses. This growth in popularity is due to many factors: social and economic as well as new City and regional programs, such as the Sacramento Area Council of Governments Blueprint as implemented by the City of Roseville's Smart Choices for Roseville policy document.

There is renewed interest in physical fitness and better health among a large portion of the population that has fueled the popularity of the bicycle. Bicycling is also a "clean" form of transportation that appeals to a large and growing part of the population. In addition, the bicycle is gradually proving itself in many communities to be a viable alternative to automotive transportation, often being used in conjunction with transit service. The current and projected growth of the City and the rest of South Placer County will necessitate the development of safe and efficient facilities to handle current and long-range increases in bicycle usage.

Demand for safe and convenient routes for recreational and transportation-related bicycling is growing. The City's Bicycle Master Plan provides a prioritized list of bike routes and paths to systematically expand and improve Roseville's bikeway system. The Plan ultimately provides a blueprint for a bikeway system that will make bicycling safer, more convenient, and enjoyable for all bicyclists.

One of the greatest challenges in accomplishing the goals and objectives identified in the Bicycle Master Plan is obtaining adequate funding, particularly for projects in the City's infill area. While federal, state and local funding sources are available for bikeways and related facilities, most grant sources require matching funds and the grant application process can be highly competitive. In addition to aggressively pursuing existing sources of funding, such as grants, the City needs to develop innovative new sources of funding.

The success of the bikeway/trails component is predicated on implementation. Implementation is possible through the development of policies that will ensure that the goals for bicycle transportation can be achieved. The most important policy will be a commitment by the City to implement the Bicycle Master Plan.

# OPEN SPACE SYSTEM

## A. SETTING

Open space provides both relief from urbanization and access to natural areas in and around the community. In addition, open space lands provide an opportunity for habitat preservation and enhancement. Roseville has numerous natural areas that serve open space functions. A majority of these focus on the oak and riparian environments along the City's creek systems.

Roseville's overall open space system consists of a variety of natural and man-made elements. At the present time there are approximately ~~3,291~~2,984 acres of land in the City designated for open space use[1]. A majority of this acreage consists of floodplains, wetland preserves, watershed areas, and associated woodlands. This total does not include traditional developed parks or golf courses.

The City's open space system includes 2,361 acres of wetland preserve areas that were created as on-site mitigation. The preserve areas are monitored and managed in accordance with the permit conditions of the U.S. Army Corps of Engineers and the U.S. Fish and Wildlife Service.

The General Plan Land Use Element identifies two land use categories, Open Space and Parks & Recreation, to be applied to the various types of open space lands. These designations are generally reflected on Figure V-1, Open Space Areas. Definitions for the categories above can be found in the Land Use Designations, Definitions and Standards Component of the Land Use Element. The open space land use categories will be overlaid by corresponding zoning districts that will further define their uses and limitations.

Open space of all types, including natural and man-made, are to be preserved throughout the City. It is intended that these resources will be primary factors in defining the City's identity and character.

The City has assigned priority to the development of a comprehensive open space network, connecting public and private open space lands, and providing access to destinations throughout the City and surrounding areas. Although some of the designated open space resources may not be naturally contiguous, they bear a positive and direct relation to each other through the formation of connecting corridors. Providing linkages between these components allows for wildlife, pedestrian, and bicycle circulation as well as other potential passive recreation and educational opportunities. A regionally linked system also allows for connections to adjacent communities.

## B. OUTLOOK

Preservations of open space and natural areas for habitat protection, as well as the enjoyment of Roseville citizens, is a basic goal of the Roseville General Plan. Current and planned development presents a challenge to the City in achieving this goal. However, proper implementation of supporting programs, development standards and guidelines will help preserve and enhance designated open space and natural habitat areas and insure that such areas are properly considered and conserved when analyzing future development.

Should the City decide to expand beyond its current urban land use allocation, the exact boundaries and methods of preservation for open space resources would need to be determined consistent with the goals and policies of this element and the remainder of the General Plan.

State and federal resource agencies have indicated a preference for large-scale off-site preservation for certain wetland habitats. In addition, future open space and resource preservation strategies may require close coordination with large-scale County open space preservation programs or state and federal Natural Communities Conservation Plan/Habitat Conservation Plan efforts. These issues will require close inter-agency coordination.

# FIRE PROTECTION

## A. SETTING

The City of Roseville provides primary fire protection services within the City limits. As of ~~2012~~ 2015 the Department has eight existing fire stations and ~~two~~ three planned fire stations throughout the community (Figure VIII-4). Additional fire stations will be planned as future specific plans and/or annexations occur. The front line fire apparatus fleet consists of an appropriate number of strategically located and staffed engines, aerial ladder trucks, wildland engines, a hazardous materials response vehicle, a technical rescue vehicle, and command vehicles. In addition, the department maintains an appropriate number of reserve apparatus and one engine is dedicated to the Fire Training Center.

As of January 2009, there were 122 Fire Department personnel assigned to the following divisions: Administration – 8, Operations – 103, Training – 1, Fire Prevention – 10.

The Fire Training Center is located at the Corporation Yard on PFE Road. It includes a storage building, training tower, classrooms, and field training facilities.

Fire Department responses can generally be grouped into three categories. The first, fire calls, are defined as those related to fires, including structural, grass, and vehicle. Emergency medical service (EMS) calls are identified as those calls related to medical emergencies. Non-fire calls refer to all other calls, such as investigations of possible fire hazards, false alarms, and other miscellaneous calls.

Over the last several years the Fire Department's incident response has been maintained at one hundred calls per thousand in population. EMS incident continue to be the majority of those responses. Structure fire responses show a decrease during the same time period representing 0.11 per thousand which is significantly under the national average of 0.19 per thousand. Fire prevention activities and public education programs along with high building standards can be credited for these statistics. This trend is expected to continue for the short term. However, it is anticipated that these numbers will increase in the future as newer residential and commercial development ages.

The City has carried an excellent Insurance Service Office (ISO) rating since 1980. As a measure of a fire department's effectiveness, ISO's rating system is based on a municipality's facilities and equipment, personnel, and quantity of water available for fire fighting. Roseville rates high for urban areas among its neighboring jurisdictions, with an ISO rating of 3 on a scale of 1 to 10. The lower the number, the higher the rating.

In the early 2000's, the Roseville Fire Department underwent a rigorous Self-Assessment study process established by the Commission on Fire Accreditation International. This process allowed the department to perform a thorough analysis of all aspects of the organization, including all programs and services provided. The Department obtained full International Accreditation in 2005.

Roseville's supply and availability of water for firefighting needs is sufficient to serve the demands at build-out of the infill and specific plan areas. Water pressure must be sufficient; however, quantity rather than increased water pressure is the key to effective fire suppression. The specific quantity of water needed for fire protection of individual buildings is set forth in the California Fire Code. (California Code of Regulations Title 24, Part 9).

The Fire Department has traditionally received its budget from the City's General Fund. As Roseville began to develop at a rapid rate, there was concern as to whether the Fire Department could obtain adequate financial resources to meet the increase in demand for services.

As a result, Roseville citizens approved a Fire Service Construction Tax in 1984 that requires that one-half percent of the value of any new construction be collected as part of the building permit fee and designated for fire suppression and protection. These funds must be spent on capital improvements, such as fire stations, fire trucks, and other departmental equipment. The funds may not be allocated to operational expenses, such as salaries or training. The Fire

# Preface

The *Hewlett-Packard Roseville Campus Master Plan* established development regulations for approximately 500 acres at the southwest corner of Blue Oaks and Foothills Boulevards within the City of Roseville's North Industrial Planning Area. Originally adopted in June 1996, the Master Plan envisioned a manufacturing and office campus to accommodate Hewlett-Packard's existing and planned operations. Hewlett-Packard has subsequently adjusted its facilities needs for the Roseville campus, divesting its ownership in all but a portion of the Master Plan Area. While substantial development has occurred on the eastern portion of the Master Plan Area, including Hewlett-Packard's facilities, the western portion has remained undeveloped.

This amendment to the Master Plan incorporates the **Hewlett-Packard | Campus Oaks (HPCO) Master Plan**, providing for a mixed use community on a 375.7 acre portion of the original Master Plan Area. The HPCO Project Area is organized into two physically and functionally integrated sub-areas: the **Hewlett-Packard Campus** accommodating existing and planned light industrial, recreation and related uses; and **Campus Oaks** planned for a new mix of tech/business park (LI), office, commercial, residential, park and recreation, open space and public uses.

The HPCO Master Plan supersedes all prior Master Plan requirements for the HPCO Project Area. All development projects, infrastructure improvements and other activities within the Project Area are required to be consistent with this Master Plan and related documents. The HPCO Master Plan is intended to provide a framework for development while maintaining flexibility.

## Project Objectives

The following objectives build upon and broaden those established by the original 1996 Master Plan:

- Accommodate the intended dynamic growth of the Hewlett-Packard Campus
- Enable Hewlett-Packard to continue locating its buildings and operations on a single consolidated campus providing for operational and logistical efficiency
- Satisfy the needs of Hewlett-Packard to maintain facility siting and sizing flexibility and the ability to respond quickly to changing business conditions in the dynamic markets in which it competes

- Support the aspirations of Hewlett-Packard to build and operate its facilities within a mixed use master planned community that provides opportunities for convenient and sustainable relationships between employees and nearby housing opportunities, commercial services, and open-space and recreational amenities
- Continue to provide sufficient land designated for employment uses to meet the City's goals for employment generation, a positive jobs/housing balance, and economic sustainability
- Construct infrastructure improvements that support development of the HPCO Project Area, and compliment and complete the larger circulation network and utility systems in the project vicinity
- Develop the HPCO Project Area in a manner consistent with the intent of the Sacramento Region Blueprint and Sustainable Communities Strategy, Roseville's Blueprint Implementation Strategies, and other smart growth principles

## HPCO Master Plan Organization

### PLANNING FRAMEWORK

Setting, planning principles, and land use, mobility, utility and public services components.

### HEWLETT-PACKARD CAMPUS DEVELOPMENT PLAN

Hewlett-Packard Campus land use, zoning, development guidelines, and development review.

### CAMPUS OAKS DEVELOPMENT PLAN

Campus Oaks land use, zoning, design guidelines, affordable housing and density transfers.

### ADMINISTRATION

Related documents, subsequent entitlements, and interpretations, modifications and amendments.

# Planning Framework

CITY OF ROSEVILLE

A BLUEPRINT COMMUNITY

# 01 The HPCO Project Area

*The HPCO Project Area has been designated for development since 1978. Surrounded by established employment, commercial and residential uses, the eastern portion of the Project Area is partially developed by Hewlett-Packard, one of Roseville's largest employers. Adjacent roadway and utility improvements serving the site have long been accounted for in the City's infrastructure planning and where applicable within associated funding programs, and natural resource impacts have been addressed, including Section 404 wetland permitting. On all accounts, the HPCO Project Area is "shovel ready" for an updated development approach.*

## 1.1 Strategic Location

The HPCO Project Area encompasses the southern and western portions of *Hewlett-Packard Roseville Campus Master Plan Area* located within the City of Roseville's North Industrial Planning Area (Figure 1-1). The 375.7 acre HPCO Project Area is bounded by Blue Oaks Boulevard to the north, Foothills Boulevard to the east, and Woodcreek Oaks Boulevard to the west. The Project Area is situated to take advantage of its desirable central location, high visibility, ease of regional access, and favorable market position to attract renewed growth opportunities to the City.

The HPCO Project Area is organized into two mutually supportive and intimately connected planning sub-areas; the Hewlett-Packard Campus and Campus Oaks (Figure 1-2):

- **Hewlett-Packard Campus.** Covering the eastern 141.2 acres of the Project Area, this sub-area currently includes Hewlett-Packard's facilities. The Hewlett-Packard Campus is planned for continued light industrial, recreation and related development.
- **Campus Oaks.** Covering the western 234.5 acres of the Project Area, this sub-area is currently undeveloped, with the southern portion established as a City open space preserve. Campus Oaks is planned for a mix of tech/business park (LI), office, commercial, residential, park and recreation, open space and public uses.

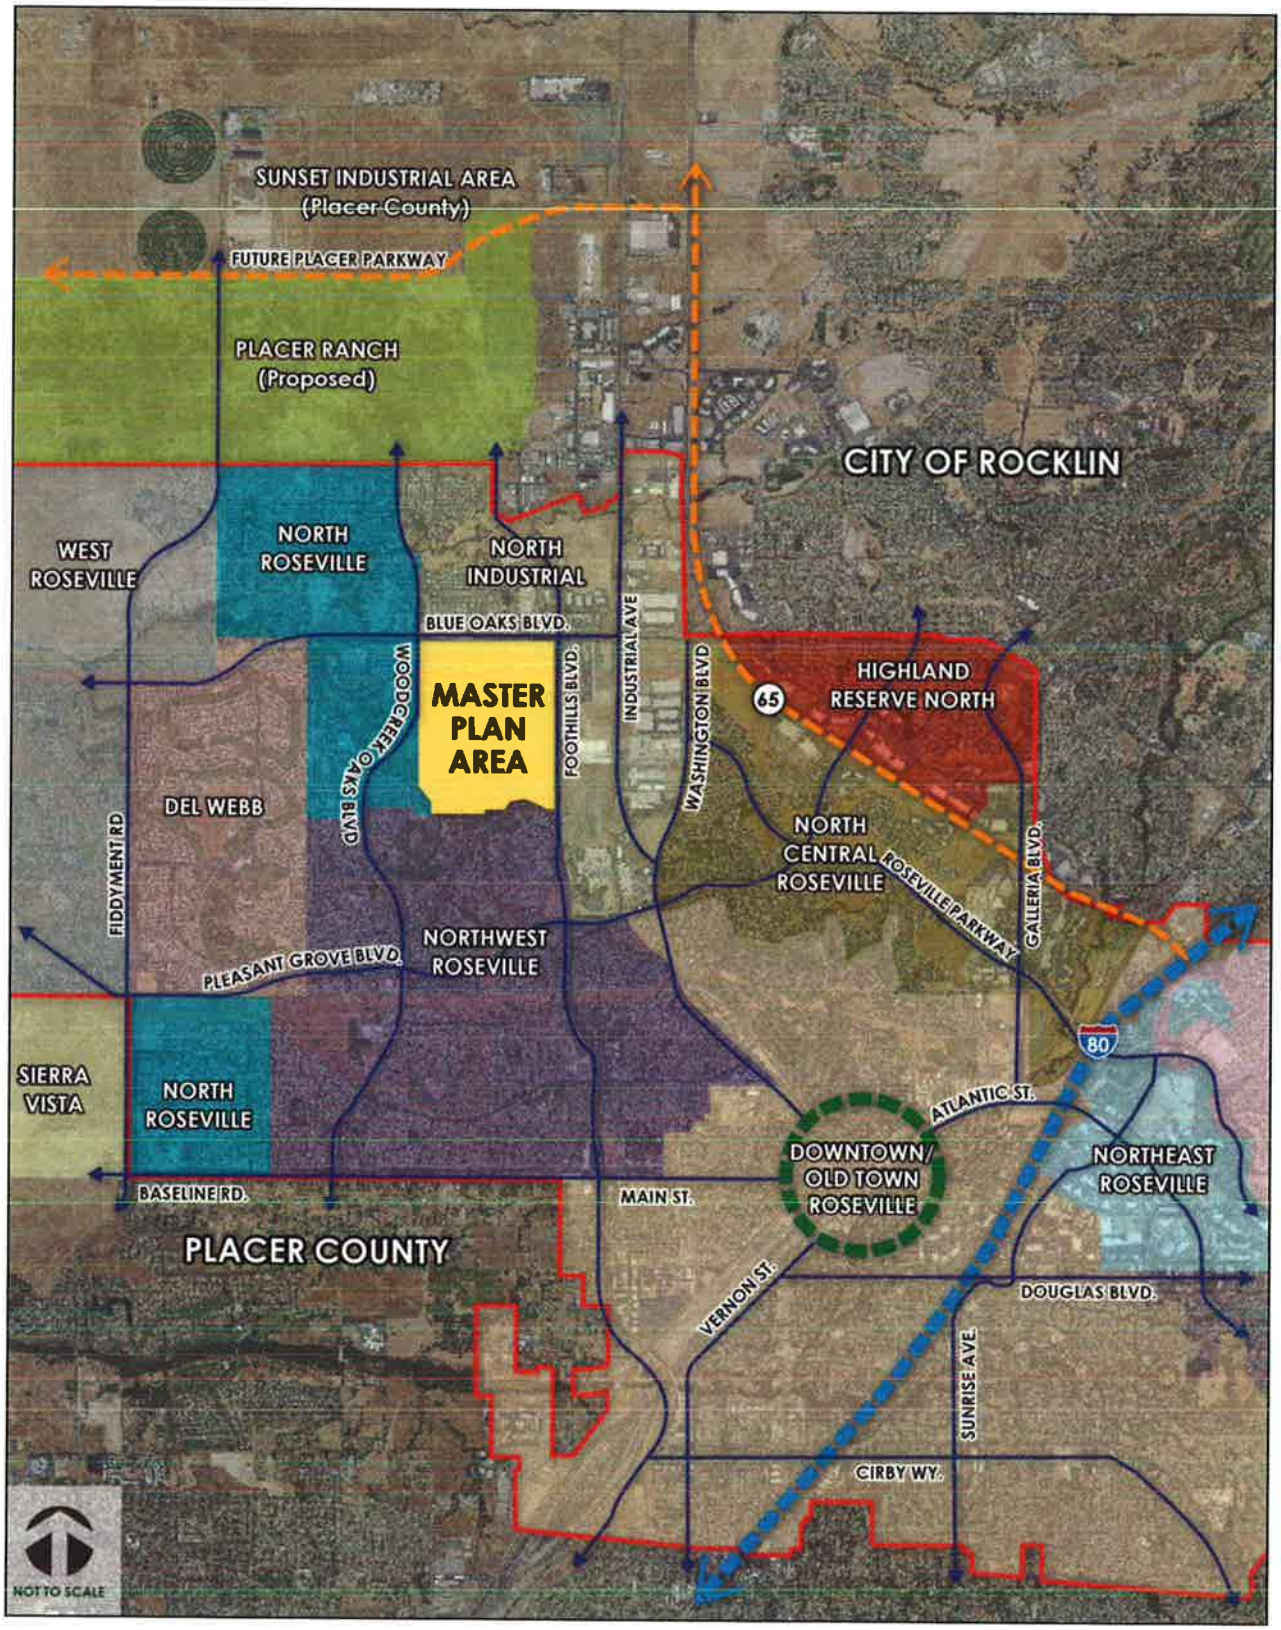

**FIGURE 1-1:** Original Master Plan Area

**FIGURE 1-2:** HPCO Project Area and Planning Sub-Areas

## 1.2 Shovel Ready Site

As one of the largest infill sites in the South Placer Region, the HPCO Project Area has a number of unique advantages that are conducive to development:

*Hewlett Packard*

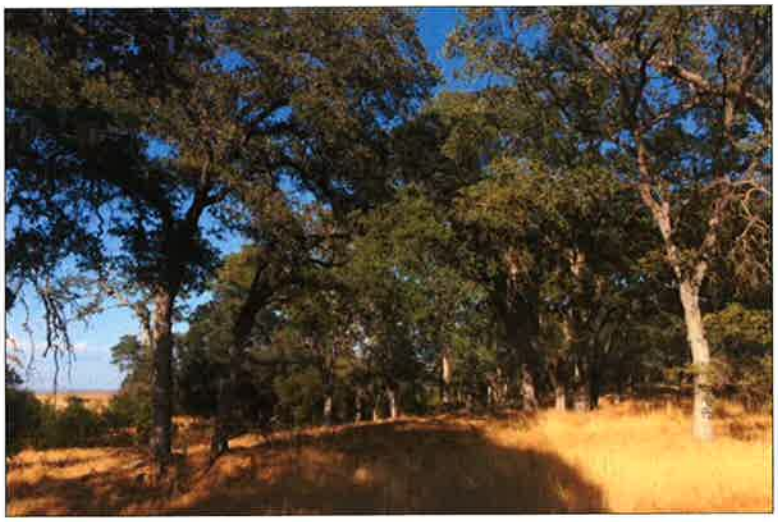
- **Prior planning and development.** The HPCO Project Area has been designated for development for over 35 years, with a portion of the Hewlett-Packard Campus partially developed with light industrial and office uses along with parking lots, internal roadways, and recreation facilities. Prior planning efforts and analysis have long contemplated development of the site.
- **Limited resource constraints.** The undeveloped portions of the HPCO Project Area consist primarily of annual grasslands with gently rolling topography that has been highly disturbed over time through bi-annual disk plowing. There are limited environmental constraints outside of the City owned open space preserve located along the South Branch of Pleasant Grove Creek within the southern portion of Campus Oaks. This preserve was created as part of a previously approved Section 404 (Clean Water Act) nationwide permit agreement to grade and fill waters of the U.S within the larger Plan Area.
- **Existing utility connections.** Water, wastewater, recycled water, drainage, electric, natural gas, and telecommunications infrastructure exist within and adjacent to the HPCO Project Area. Included is an electric substation on the Hewlett-Packard Campus, a 16-inch Pacific Gas and Electric (PG&E) high-pressure gas line that runs north-south through the Project Area, as well as overhead power lines along adjacent arterials. Adequate capacity for development has been accounted for in the City's infrastructure planning and, where applicable, within current funding programs.
- **Regional roadway connections.** Existing roadways provide direct local and regional access to the HPCO Project Area. Blue Oaks Boulevard, located along the northern edge of the Project Area, is the primary east-west transportation corridor in the northern portion of Roseville and is projected to be one of the City's

most traveled roads in the future. Blue Oaks connects the western sections of Roseville to Highway 65 just east of the Project Area, which then intersects with Interstate 80 approximately 3 miles further to the east. Foothills and Woodcreek Oaks Boulevards, along the eastern and western edges of the Project Area, are key north-south connections planned to eventually extend north into the Sunset Industrial/potential future Placer Ranch development area(s). Foothills Boulevard is planned to connect to future Placer Parkway.

- **Compatible surrounding development.** The HPCO Project Area is surrounded by a broad range of compatible uses. Adjacent development includes existing light industrial, as well as vacant parcels zoned for light industrial use, to the east within the North Industrial Planning Area; commercial and residential uses to the north also within the North Industrial Planning Area; residential uses, a retail center and the Pleasant Grove Creek open space to the west within the North Roseville Specific Plan (1997); residential uses and the Woodcreek Oaks Golf Course to the south within the Northwest Roseville Specific Plan (1989); and the City's pump station and recycled water tank to the southwest.

Existing conditions and surrounding uses are illustrated on Figure 1-3.

*Campus Oaks*



*Open Space Preserve*

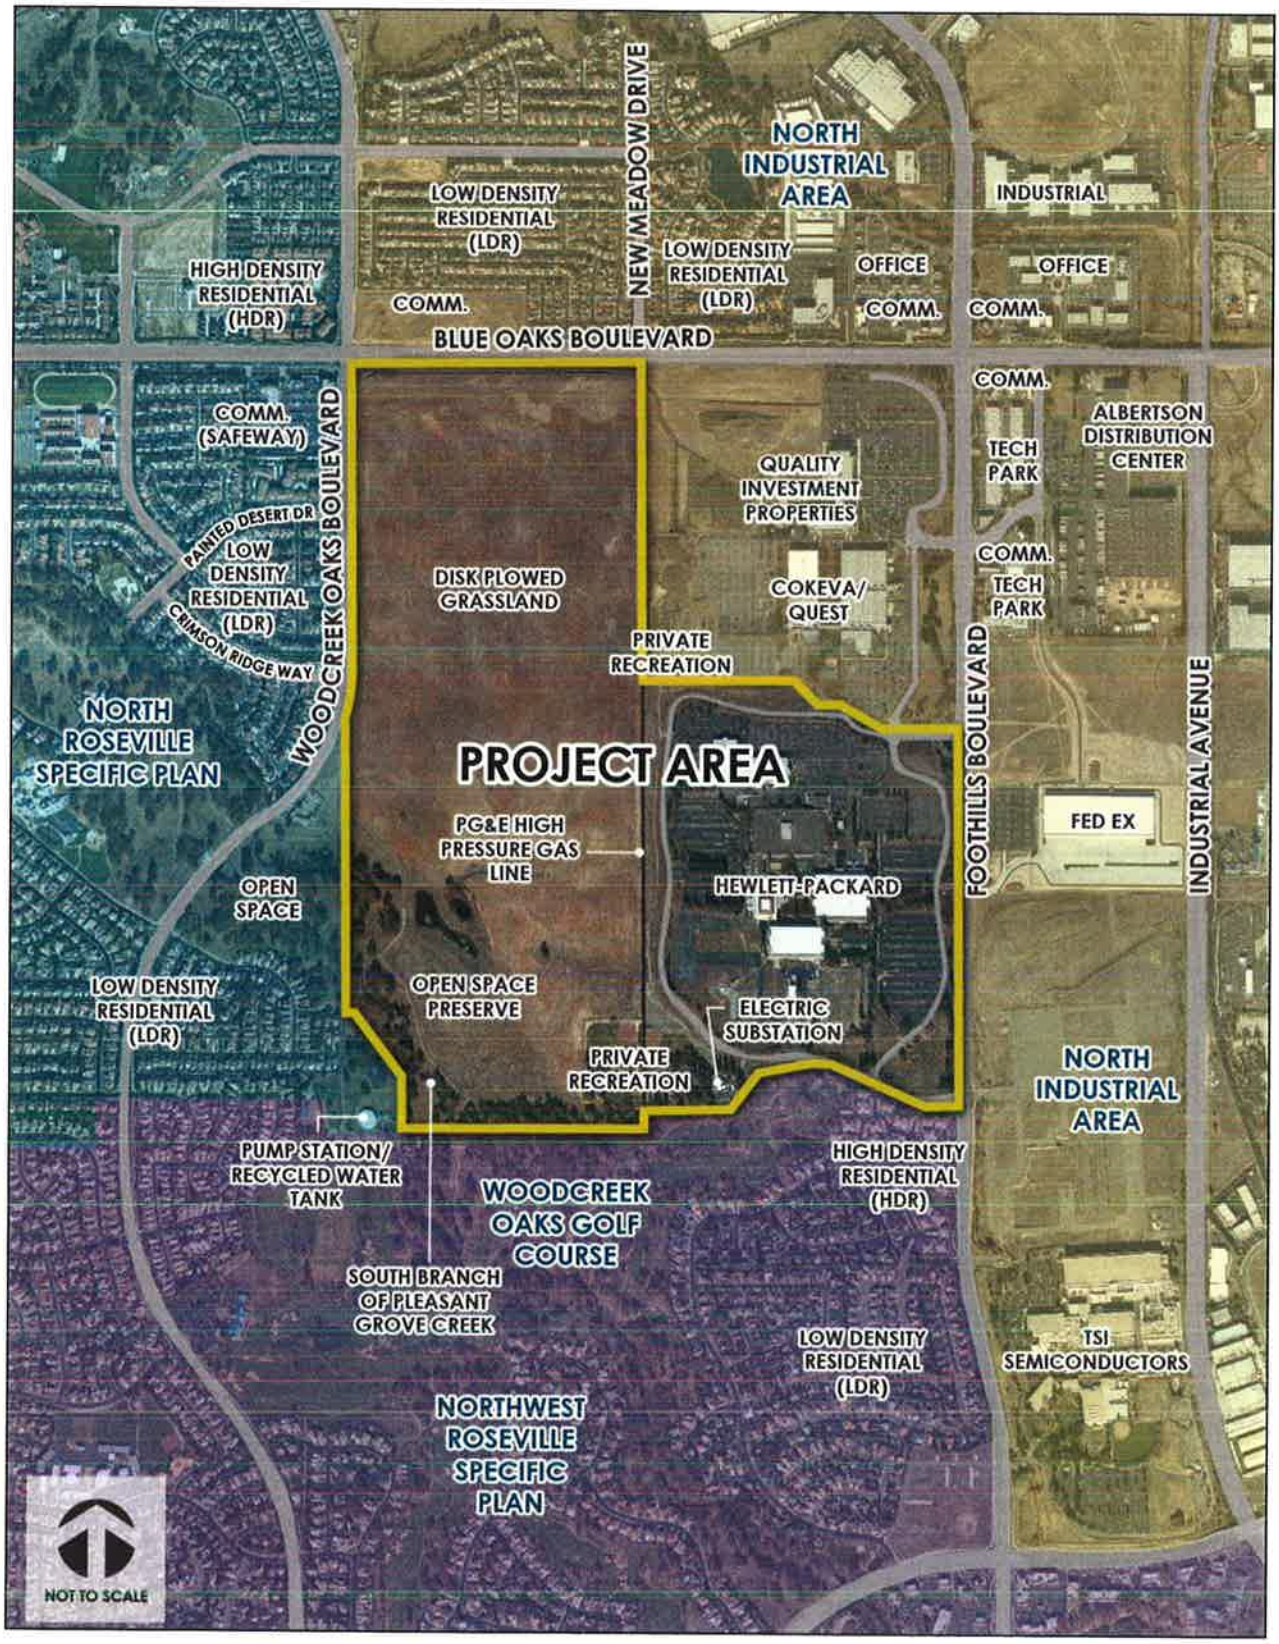


**FIGURE 1-3:** Existing Conditions and Surrounding Uses

## 1.3 History of Thoughtful Planning

The original 500 acre Master Plan Area was initially designated with light industrial land use in 1978. Hewlett-Packard purchased the Master Plan Area in early 1979 and was granted an initial Use Permit approval (UP 79-04) to develop 1.4 million square feet for computer manufacturing and distribution facilities on the southeast corner of the site adjacent to Foothills Boulevard. Construction began in 1981, with Use Permits for reconfiguration and an additional 1 million square feet of development subsequently approved in 1987 (UP 87-39 and SUP 87-40). Combined, a total of 2.4 million square feet of development was approved.

In 1996, the City adopted the *Hewlett-Packard Roseville Campus Master Plan*, including an Environmental Impact Report and Development Agreement, to guide buildout of the Master Plan Area. The Master Plan contained land use and zoning regulations, infrastructure plans, development guidelines, traffic and utility thresholds, and a streamlined development approval process. The objectives of the Master Plan were to accommodate Hewlett-Packard's intended growth and expansion; locate this growth contiguous to the business activities already established on the site; and provide flexibility to respond quickly to changing business conditions in the dynamic markets in which the company competes.

*Hewlett-Packard Roseville Campus Initial Construction, 1981*

The 1996 Master Plan provided for 4,239,000 square feet of light industrial and commercial land uses, as well as establishment of a wetland preserve on the southwest portion of the Plan Area. The Master Plan assumed a 25 year buildout. At the time of Master Plan approval, the Plan Area contained 1.3 million square feet of development in ten manufacturing, distribution, support, maintenance and office buildings on approximately 195 acres. An estimated 4,100 full and part-time workers were employed on the site.

In 2001, the Master Plan was amended to replace all commercial uses within the Plan Area with a light industrial land use, and remove the Woodcreek Oaks right-of-way reducing overall Master Plan Area acreage to 497.7 acres. The City subsequently exercised an option to purchase the southwest corner of the Plan Area to support a 1.5 million gallon recycled water tank and pumping station. This site was also removed from the Master Plan Area, further reducing its size to 492.17 acres.

In 2008, the 45.9 acre wetland preserve was dedicated to the City. Upon acceptance, the City formed a Community Facilities District (CFD) to fund preserve area monitoring, reporting and maintenance. The agreement for the City to accept the preserve included a requirement that Hewlett-Packard back-up the CFD funding mechanism.

In the intervening years, Hewlett-Packard has continued to adjust its facilities needs for the Roseville campus and has divested its ownership of a majority of the Master Plan Area. Despite efforts to promote a single use light industrial campus, a significant portion of the Plan Area has remained undeveloped. Undeveloped industrial properties and vacant built space also exist within the remainder of the North Industrial Planning Area, as well as within the expansive 8,800 acre Sunset Industrial Area to the north within unincorporated Placer County.

The HPCO Master Plan encompasses 375.7 acres of the original 500 acre Master Plan Area. This amendment followed the Hewlett-Packard Foundation's sale of the western 189 acres of the Master Plan Area. In response to updated market opportunities and development preferences, the HPCO Master Plan provides for a revised mix of employment, commercial, residential, park and recreation, open space and public uses. The HPCO Master Plan capitalizes on the unique opportunity to create a mixed use infill community that locates jobs, housing choices, and services in close proximity to one another. The intent is to stimulate mutually supportive land use, economic and social interactions, thereby reenergizing the Master Plan Area.

The history of the Master Plan's entitlements and corresponding development intensities is summarized in Table 1-1.

**TABLE 1-1** Master Plan Entitlement History

# 02 A Blueprint Community

*The HPCO Master Plan provides for an integrated mix of jobs, housing, services, and amenities. The Project Area presents a one of a kind opportunity to create a landmark infill project that furthers the City's commitment to the* ***Sacramento Regional Blueprint*** *and other "smart growth" principles. The HPCO Master Plan builds upon the City's planning documents including the General Plan, Blueprint Implementation Strategies, Communitywide Sustainability Action Plan, Pedestrian Master Plan and Bicycle Master Plan to deliver an environmentally sound project that enhances livability and quality of life, and contributes economic benefits to the community.*

## 2.1 Sacramento Region Blueprint

Since initial construction began on the Hewlett-Packard Campus in 1981, Roseville and the surrounding region have grown substantially. With continued growth, there has been increasing emphasis on the need to develop in smart and responsible ways. Where employers prefer to locate and employees desire to live and work is different today than it was in years past when job centers were planned separate from residential and other uses. As illustrated in the booming Silicon Valley, "campuses" are prospering that provide for an integrated mix of uses and apply smart growth principles. Smart Growth seeks to align housing, employment, services, mobility and other factors to create livable, environmentally sensitive and economically vibrant communities.

Within the Sacramento Region, the key tenets of smart growth are embodied within the Sacramento Area Council of Governments Regional Blueprint Project. Establishing a framework for future growth, the Blueprint focuses on reducing congestion and associated air quality and greenhouse gas emissions, providing for a greater range of housing choices, encouraging reinvestment in already developed areas, and better integrating the proximity of jobs to housing. As a mixed use infill project, the HPCO Master Plan presents a unique opportunity to meaningfully implement the Blueprint's growth principles.

## Sacramento Region Blueprint

Roseville has been a leader in implementing the Sacramento Region Blueprint Project. The City collaborated with the Sacramento Area Council of Governments (SACOG) and its member agencies in the six-county Sacramento region to agree on a policy framework to accommodate growth over the next 50 years. Adopted in 2004, the Blueprint advances seven growth principles:

1 TRANSPORTATION CHOICES. Designing development to encourage people to walk, ride bicycles, use public transit and carpool.

2 MIXED USE DEVELOPMENTS. Establishing places where mixed use development can occur to provide a variety of jobs, residences, goods and services in close proximity.

3 COMPACT DEVELOPMENT. Creating more compactly built environments that use the land in an efficient manner.

4 HOUSING CHOICES. Providing a variety of places where people can live in response to multiple socio-economic needs.

5 USE OF EXISTING ASSETS. Developing vacant or underutilized infill lands that make better use of existing infrastructure and resources.

6 QUALITY DESIGN. Furthering urban design that creates attractive and connected communities with a strong sense of place.

7 NATURAL RESOURCES CONSERVATION. Incorporating public use open space, habitat and agricultural preservation, and environmentally friendly developments practices.

Roseville was the first city in the region to adopt a Blueprint Implementation Strategy, outlining a menu of strategies to achieve Blueprint's growth principles.

# 2.2 Community Form

The HPCO Project Area's physical form is organized into four distinct "districts" each distinguished by its mix of uses and intended built character (see Figure 2-1). While each district has a unique purpose, the districts are interrelated and functionally overlap, creating a mutually supportive mix of uses. These interrelationships are enhanced by the compact development pattern and interconnected street and trail systems that place jobs, housing and services in close proximity to each other.

## EMPLOYMENT CENTER

The Employment Center includes existing and planned light industrial uses within the Hewlett-Packard Campus, as well the Tech/Business Park (LI) uses within Campus Oaks. When combined with other employment uses within the larger Master Plan Area, these uses comprise a major integrated job center in the City providing for 3 million square feet of existing and planned employment uses. The Employment Center addresses the City's desire to retain employment opportunities within the Project Area to support the jobs/housing balance in the City, as well as to continue to position the North Industrial Planning Area as a major employment/industrial center for the South Placer region.

The proximity of a diverse range of housing and available services for employees is one of the first factors considered when businesses contemplate locating in a community. By providing for a closely integrated mix of jobs, housing, services and amenities, the HPCO Master Plan enhances the appeal of the Project Area and nearby industrial uses for employment attraction and retention, further strengthening Roseville's position as the region's community of choice for business investment.

## RESIDENTIAL NEIGHBORHOODS

The Residential Neighborhoods provide for comfortable, well connected and walkable living environments attractive to residents and accommodating the nearby workforce. Included are lower density, medium density and higher density attached and detached housing types within Campus Oaks that support a diversity of living options and lifestyles.

The form and diversity of the neighborhoods furthers the direction of the City's General Plan and Blueprint Implementation Strategies to deliver a variety of housing choices in proximity to jobs and services, address the need for additional housing to support employees and job generation, supply new opportunities for the City to meet its Regional Housing Needs Allocation, and advance the City's goal for a jobs/housing balance.

*"Without the addition of residential opportunities, or the reduction of employment generating land uses within Roseville and/or the adjacent jurisdictions, sufficient employees will not exist to fill potential job generation within reasonable commute distances."*

CITY OF ROSEVILLE GENERAL PLAN 2025

**FIGURE 2-1:** Community Form Districts

## CAMPUS OAKS TOWN CENTER

The Campus Oaks Town Center is envisioned as a destination where residents, employees and passers-by can shop, eat, recreate, obtain services and meet their everyday needs. Integrating an interactive mix of retail, office, and high density residential uses, emphasis is placed on creating a pedestrian friendly environment with easy access between uses and connectivity to the adjacent Residential Neighborhoods and Employment Center.

The Campus Oaks Town Center has been strategically located at the northern entry into the HPCO Project Area to create a sense of arrival and enhance its visibility, access, and standing as an integral and defining component of the community.

## PARKS & OPEN SPACE

Incorporated within the HPCO Project Area is a green network of parks, paseos, open spaces, trails, and active tree-lined streetscapes that enhance community interaction, character and sense of place. Parks and open space in the Project Area provide for passive/informal/self-directed and active/formal/programmable recreational opportunities, serve as gathering places for residents and employees, help to establish a communal sense of identity and ownership, and provide for natural resource protection.

# 2.3 Planning Principles

## REENERGIZE EMPLOYMENT GROWTH

Instill renewed "open for business" energy encouraging new employment growth and investment:

- Open up the Hewlett-Packard Campus by enhancing public access, connectivity and visibility into and through the Master Plan Area
- Accommodate the desire of Hewlett-Packard to build and operate their facilities within a mixed use community by integrating an array of housing choices, convenient services, and accessible community amenities that collectively support the success of adjacent employment uses
- Accommodate the growth and expansion of Hewlett-Packard in a manner that allows for operational synergies and efficiencies
- Provide for substantial employment development in a consolidated campus setting
- Establish a flexible regulatory structure for businesses to quickly respond to changing conditions, including a streamlined development review process for the Hewlett-Packard Campus

## BUILD UPON EXISTING ASSETS

Capitalize on the HPCO Project Area's central location to efficiently support new development:

- Target new development on property that is surrounded by existing industrial, residential and commercial uses
- Tie into existing roadway and utility systems, lowering the capital investment and infrastructure burdens required to support development
- Replace long-standing undeveloped properties with market ready, economically productive uses that strengthen land values and the tax base

## PROVIDE DIVERSE HOUSING CHOICES

Create distinct neighborhoods within Campus Oaks that offer socio-economic vitality and support the workforce:

- Include a wide range of housing densities, lot sizes and product types appealing to different economic and life-style segments
- Address the desire for housing nearby and conveniently connected to jobs
- Integrate densities, innovative product types and public amenities that support "urban" living options attractive to a growing market segment
- Contribute to the City's Regional Housing Needs Allocation and affordability goal

## ESTABLISH A MIXED USE TOWN CENTER

Provide for a vibrant mixed use Town Center within Campus Oaks as a destination for residents, employees and visitors:

- Create a commercial setting along the northern community entry (HP Way) enhancing sense of arrival and identity
- Overlap interfaces and access between retail, office and high density residential uses
- Provide for convenience retail, grocery, restaurant and service uses to meet residents' and employees' daily needs
- Position the Town Center along Blue Oaks Boulevard expanding its ability to attract activity, users and sales tax revenue

## OFFER MEANINGFUL PUBLIC SPACES

Include an enhanced network of public spaces to inspire community activity, interaction, and identity:

- Provide interconnected parks, paseos and open space areas to support recreational activities and social gathering
- Encourage resident and employee interactions through a variety of facilities that support performance arts, farmers markets, arts and craft shows and other activities
- Enhance access to and through the open space preserve to promote passive recreation, and environmental stewardship and education

## MAXIMIZE MOBILITY OPTIONS

Maximize connectivity, walkability and convenience to support a variety of mobility choices:

- Establish a mixed use, compact development pattern that creates proximity and interactions between uses, reducing trip lengths and the need for travel outside of the HPCO Project Area for daily needs
- Incorporate a safe and interconnected network of paths, sidewalks and bike lanes for use by both residents and employees
- Provide a modified grid street pattern that includes a long sought after public roadway connection (HP Way) through the Master Plan Area from Foothills Boulevard to Blue Oaks Boulevard
- Designate the central portion of HP Way as a local oriented, pedestrian friendly "complete street" that presents a highly walkable and bikeable environment

## FACILITATE RESPONSIBLE LIVING

Facilitate healthy lifestyles, resource conservation and efficiency, and a reduced carbon footprint in new development:

- Integrate a mix of land uses, mobility systems and public spaces that encourage walking, biking, and community activity
- Incorporate solar powered homes, encourage LEED or similar green building standards, and include electric vehicle charging stations
- Provide recycled water for irrigation, incorporate native and adaptive drought tolerant plants, and integrate efficient irrigation systems
- Use Low Impact Development techniques such as natural bio-swales and water quality basins to increase stormwater filtration and reduce run-off
- Incorporate relevant and cost effective measures from the City's Communitywide Sustainability Action Plan to lower emissions, increase energy and water efficiency, and reduce the waste stream

## ENSURE QUALITY DESIGN

Ensure attractive and creative urban design that enhances community identity, livability and marketability:

- Retain and take advantage of the natural rolling topography on Campus Oaks
- Create pleasant streetscapes with landscaping, tree canopies, separated sidewalks, bulb-outs, enhanced crossings, street furnishings and other pedestrian amenities
- Encourage innovative and creative building, landscape and site designs that are attractive, create visual interest and variety, enhance walkability, and are in scale with and functionally related to adjacent development
- Establish gateways to provide a sense of identity and arrival into the Plan Area

## ENABLE EFFICIENT IMPLEMENTATION

Enable implementation in an efficient and flexible manner that maximizes the HPCO Project Area's full potential:

- Apply financial resources and funding mechanisms to maintain an economically self-sufficient plan that provides a positive contribution to the City's General Fund, incorporates community facilities services funding, and fully funds Project Area infrastructure
- Construct infrastructure improvements that compliment and help to complete the City's larger circulation network and utility systems
- Provide for expedited approval of light industrial projects determined consistent with this Master Plan
- Maintain flexibility to adapt to evolving land use, market and other opportunities over time

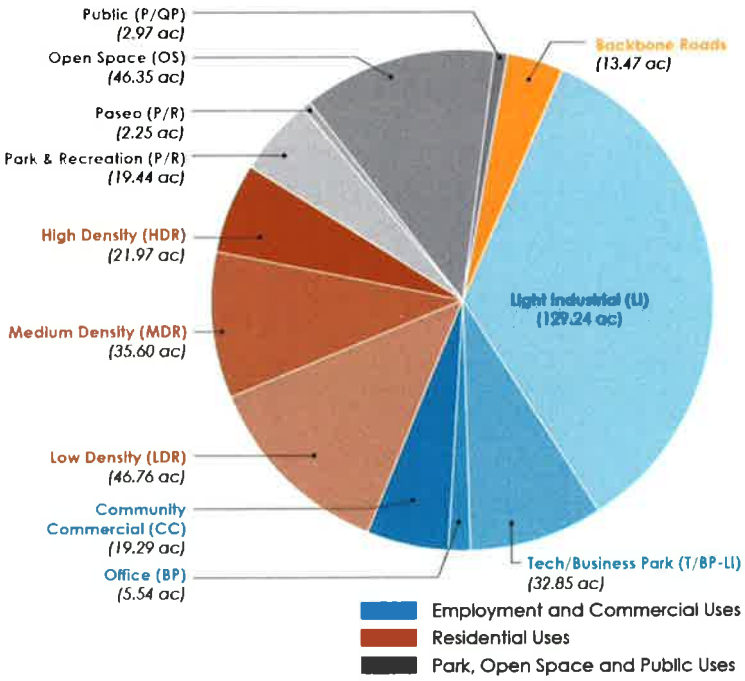
# 03 Project Components

*The HPCO Master Plan provides for the coordinated development of the Hewlett-Packard Campus and Campus Oaks as an integrated community. The intent is to ensure that development, public improvements and other activities successfully realize the project's Planning Principles. The following summarizes Project Area land use, mobility, utilities and public services components that form the overall framework for development. Land use designations, zoning districts, design guidelines and other provisions specific to the Hewlett-Packard Campus and Campus Oaks are included in Section 04, Hewlett-Packard Campus Development Plan, and Section 05, Campus Oaks Development Plan, respectively.*

## 3.1 Land Use

The HPCO Master Plan provides for a broad mix of employment, commercial, residential and public uses. Approximately 50 percent of Project Area acreage is designated for employment and commercial land uses, 28 percent for residential land uses, and 22 percent for parks, open space and public land uses. At buildout, the Project Area will support 1.73 million square feet of non-residential development generating approximately 2,500 to 4,100 jobs[1] depending upon the ultimate composition and operations of employment uses. The Project Area also supports 948 dwelling units providing for approximately 2,474 residents[2].



[1] Based upon 433-750 s.f. per employee for LI & T/BP, 302-333 s.f. per employee for BP, and 400-450 s.f. per employee for CC (Economic Planning Systems and Institute of Transportation Engineers 2015).

[2] Based upon 2.61 persons per household (City of Roseville 2015).

## 3.1.1 SPECIFIC LAND USES

**Employment and Commercial.** The HPCO Master Plan integrates Light Industrial (LI), Tech/Business Park (T/BP-LI), Business Professional (BP) and Community Commercial (CC) land uses. A range of employment, business, office, retail, restaurant, service, entertainment, and related uses are permitted. In addition, the Master Plan supports an integrated mix of retail, office, and high density residential uses within the Campus Oaks Town Center.

**Residential.** The HPCO Master Plan incorporates Low Density Residential (LDR), Medium Density Residential (MDR) and High Density Residential (HDR) land uses within Campus Oaks. This mix of densities provides for a wide array of housing types ranging from both standard and small lot single family residential, cluster housing, attached and detached townhomes, row housing and apartments.

**Park, Open Space and Public.** The HPCO Master Plan includes Park & Recreation (P/R), Open Space (OS) and Public (P/QP) land uses. A variety of uses are provided including parks, recreational facilities, paseos, trails, open space, a fire station, a groundwater well and an electric substation.

## 3.1.2 ZONING

Land uses are implemented through the zoning district applied to each parcel. This includes the application of the Development Standard (DS) and Special Area (SA) overlay districts to customize allowed uses and development standards to address the Project Area's unique opportunities and objectives. Section 04, Hewlett-Packard Campus Development Plan, and Section 05, Campus Oaks Development Plan, define parcel specific land use and zoning regulations.

HPCO Master Plan land uses are illustrated on Figure 3-1 and summarized in Table 3-1. Parcel Specific land use and zoning allocations are included on Table 3-2.

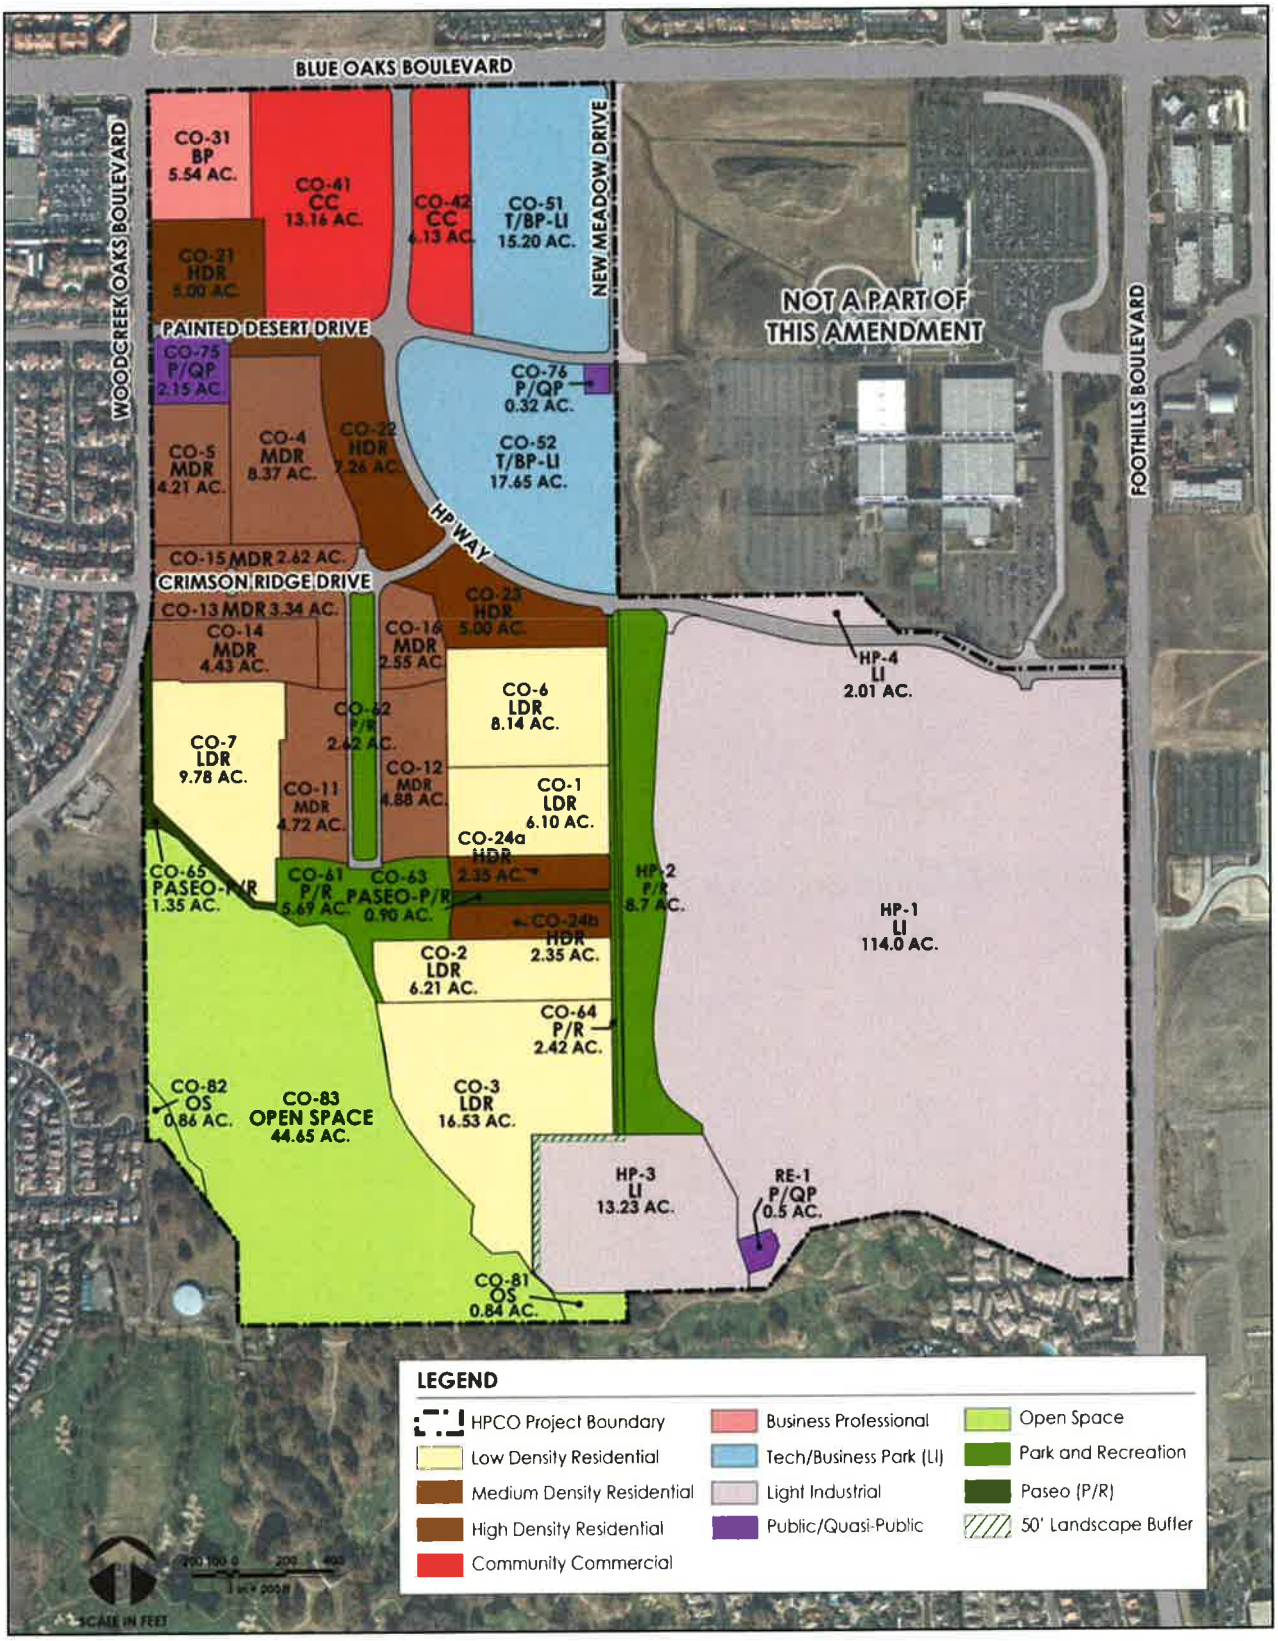


**FIGURE 3-1:** HPCO Project Area Land Use Diagram

**TABLE 3-1:** HPCO Project Area Land Use Summary

| Land Use | Gross Acres | Building Square Feet (sf) | | | | | Dwelling Units (du) | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Existing | Future | Total Capacity | FAR Range | Avg. FAR | Units | du/ac Range | Avg. du/ac |

1. Parcel HP-2 park acreage credited towards Campus Oaks. See Table 3-5.

## 3.2 Mobility

The HPCO Project Area mobility system is designed to maximize connectivity, walkability and convenience. Included is a modified grid street pattern that compliments and helps to complete the City's larger roadway network; a safe and interconnected system of paths, sidewalks and bike lanes; and multiple transit stops. Emphasis is placed upon enhancing access between jobs, homes, services and amenities, allowing residents and employees to walk and bike between uses.

The interconnected mobility system, combined with the Project Area's mixed use development pattern, internalizes trips; reducing trip lengths and the demand for travel outside of the Area for daily needs. As a result, the HPCO Master Plan land uses result in a reduction in external vehicle trips and vehicle miles traveled when compared to the prior land uses.

### 3.2.1 ROADWAYS

The HPCO Master Plan establishes a network of roadways that are safe, functional, aesthetically pleasing, and contribute positively to overall community character. Roadways integrate the concept of "Complete Streets", promoting designs that comfortably provide for pedestrians, bicyclists, transit, and vehicles.

#### *Regional Access*

Three existing arterial roadways provide access to the Project Area: Blue Oaks Boulevard to the north, Foothills Boulevard to the east, and Woodcreek Oaks Boulevard to the west. Blue Oaks Boulevard is a 6 to 8-lane arterial and the primary east-west transportation corridor in the northern portion of the City, linking to Highway 65 just east of the Project Area. Foothills and Woodcreek Oaks Boulevards are key north-south arterial routes planned to eventually extend north into the Sunset Industrial/Placer Ranch Development Area, with Foothills Boulevard connecting to future Placer Parkway.

Direct access to the Project Area consists of several signalized intersections: Two existing along Blue Oaks Boulevard; one existing on Foothills Boulevard; and two planned along Woodcreek Oaks Boulevard. Foothills Boulevard is improved as a 4-lane arterial. Frontage improvements will be installed along Blue Oaks Boulevard. Woodcreek Oaks Boulevard will be widened to 4-lanes adjacent to the Project Area.

#### *Internal Backbone Roadway System*

Internal Project Area backbone roadways consist of a network of public collector streets. Key to the internal and larger citywide roadway system is

the long sought after extension of HP Way as a public road through the Project Area. HP Way links to the future extension of Roseville Parkway at Foothills Boulevard, curving northwest through the Project Area to Blue Oaks Boulevard. Other roadway connections include the extensions of New Meadow Drive from the north, and Painted Desert and Crimson Ridge Drives from the west. Residential streets will provide in-tract subdivision access, and private drives will continue to provide internal access within the Hewlett-Packard Campus.

As the gateway to and a defining element through the Project Area, the central portion of the HP Way corridor is intended to be improved and maintained as a pedestrian and bicycle friendly 2-lane facility. To enhance the convenience, safety and comfort for pedestrians and cyclists, the HP Way corridor is planned to include sidewalks separated from the street by tree lined landscaped parkways; bike lanes buffered from vehicle travel; pedestrian bulb outs and enhanced intersection crossings; and, roundabouts and other traffic calming measures.

### *Neighborhood Electric Vehicles*

A majority of the streets in the Project Area may accommodate neighborhood electric vehicles. A neighborhood electric vehicle (NEV) is an electric-powered four wheel low speed vehicle that allows residents to make local trips. Per the California Vehicle Code, NEV's may be driven on any public roadway with a posted speed of 35 miles per hour or less, and may cross roadways with a speed limit in excess of 35 miles per hour subject to certain restrictions. NEVs may also be used on all private drives.

The backbone roadway system is reflected on Figure 3-2, with lane capacity, right-of-way, and landscape requirements summarized in Table 3-3. Typical roadway design sections are illustrated in Figures 3-3 through 3-12, with corresponding landscaping standards and related design details included in Section 04, Hewlett-Packard Campus Development Plan, and Section 05, Campus Oaks Development Plan.

**FIGURE 3-2:** Backbone Roadway System

## TABLE 3-3: Roadway Summary

| Roadway Type/Name | Roadway | | Landscape Corridor | | Landscape Median | On-Street Parking | Figure Number |
|---|---|---|---|---|---|---|---|
| | Reserved Lane Capacity | Right-of-Way | Adjacent to LDR & MDR | Adjacent to Other Uses | | | |
| **ARTERIAL ROADWAYS[1]** | | | | | | | |
| Blue Oaks Boulevard | 8 lanes | 130 ft | NA | 50 – 70 ft[2] | 22 ft | None | 3-3 |
| Woodcreek Oaks Boulevard | 4 lanes | 76 ft | 35 ft[3] | 35 ft | 14 ft | None | 3-4 |
| **COLLECTOR ROADWAYS[1]** | | | | | | | |
| HP Way – Entry | 4 lanes | 81 ft | NA | 25 ft | 13 ft | None | 3-5 |
| HP Way – Central[4] | 2 lanes | 59 ft | 25 ft | 30 ft | 13 ft | None | 3-6 |
| Painted Desert Drive, New Meadow Drive & Crimson Ridge Drive | 2 lanes | 48 ft | NA[5] | 25 ft[5] | NA | Both Sides | 3-7 |
| **LOCAL ROADWAYS** | | | | | | | |
| Park Couplet | 2 lanes | 60 ft[6] | NA[5] | NA[5] | 100 ft[7] | Res. Side | 3-8 & 3-11 |
| Primary Residential Street[8] | 2 lanes | 60 ft | NA[5] | NA[5] | NA | Both Sides | 3-9 & 3-11 |
| Minor Residential Street[9] | 2 lanes | 54 ft | NA[5] | NA[5] | NA | Both Sides | 3-10 & 3-11 |
| Alley | 2 lanes | 22 ft | NA | NA | NA | NA | 3-12 |
| **ROUNDABOUTS, PRIVATE DRIVES AND OTHER FACILITIES** | | | | | | | |
| To be designed and constructed per City standards and Campus Oaks Design Guidelines | | | | | | | |

1. Auxiliary lanes, turn lanes, bus turn-outs, and standard tapers are permitted reductions to the landscape corridors (PUE/LSE). Minimum landscape corridor width of 15' shall be maintained behind bus shelters.
2. Landscape Corridor along Blue Oaks Boulevard to be 70 feet wide where open drainage channel exists/planned.
3. Landscape corridors adjacent to LDR and MDR along Woodcreek Oaks Boulevard will be incorporated within the right-of-way.
4. The central portion of HP Way is planned to incorporate design elements to enhance pedestrian and bicyclist convenience, safety and comfort. Such elements shall include sidewalks separated from the street by tree lined landscaped parkways; bike lanes buffered from vehicle travel; enhanced intersection crossings; and, roundabouts and other traffic calming measures.
5. Residential units will front on roadways. Street frontage setbacks from back of walk to be established as part subdivision map and/or design review approval as applicable.
6. 30 feet on both sides of Couplet.
7. 100 foot wide neighborhood park.
8. Primary Residential Streets will have separated sidewalks with landscaped parkways. Primary Residential Streets are used to accommodate higher traffic volumes and are placed adjacent to schools and parks, consistent with the City's roadway improvement standards.
9. Minor Residential Streets will have separated sidewalks with landscaped parkways. Minor Residential Streets are used to carry lower traffic volumes than Primary Residential Streets, consistent with the City's roadway improvement standards.

Note: Standard signalized intersections will have dedicated turns and through lanes resulting in wider cross sections in those areas.

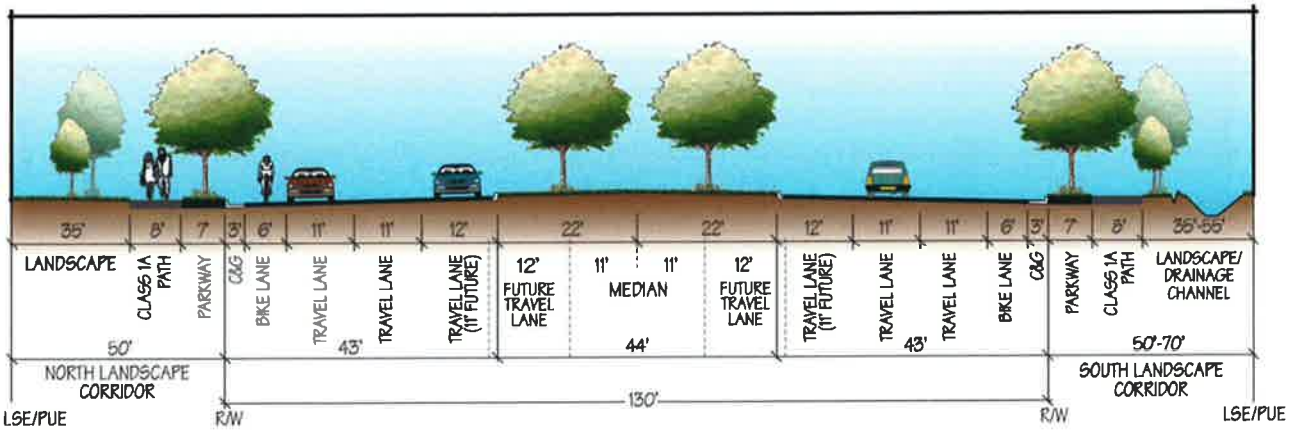

**FIGURE 3-3:** Blue Oaks Boulevard (Arterial)

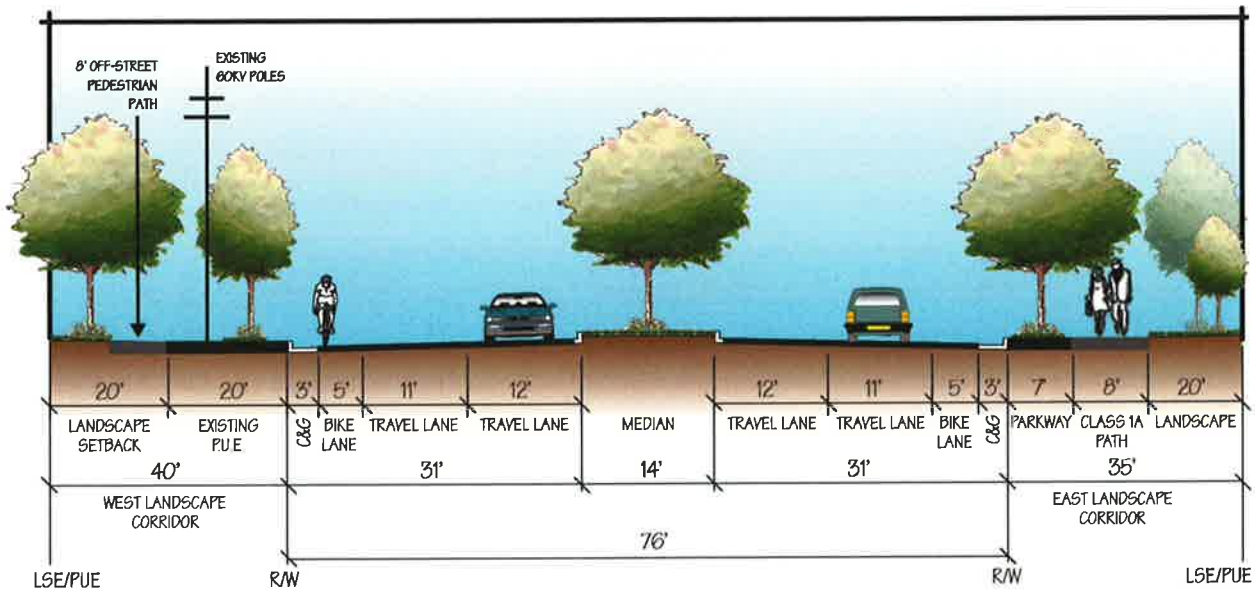

**FIGURE 3-4:** Woodcreek Oaks Boulevard (Arterial)

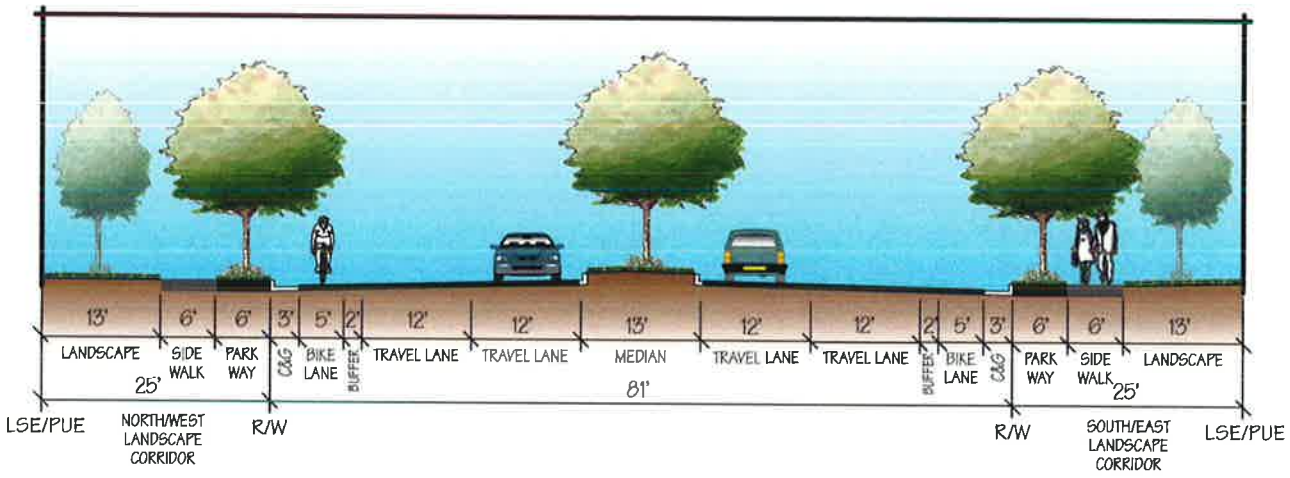

**FIGURE 3-5:** HP Way - Entry (Modified Collector)

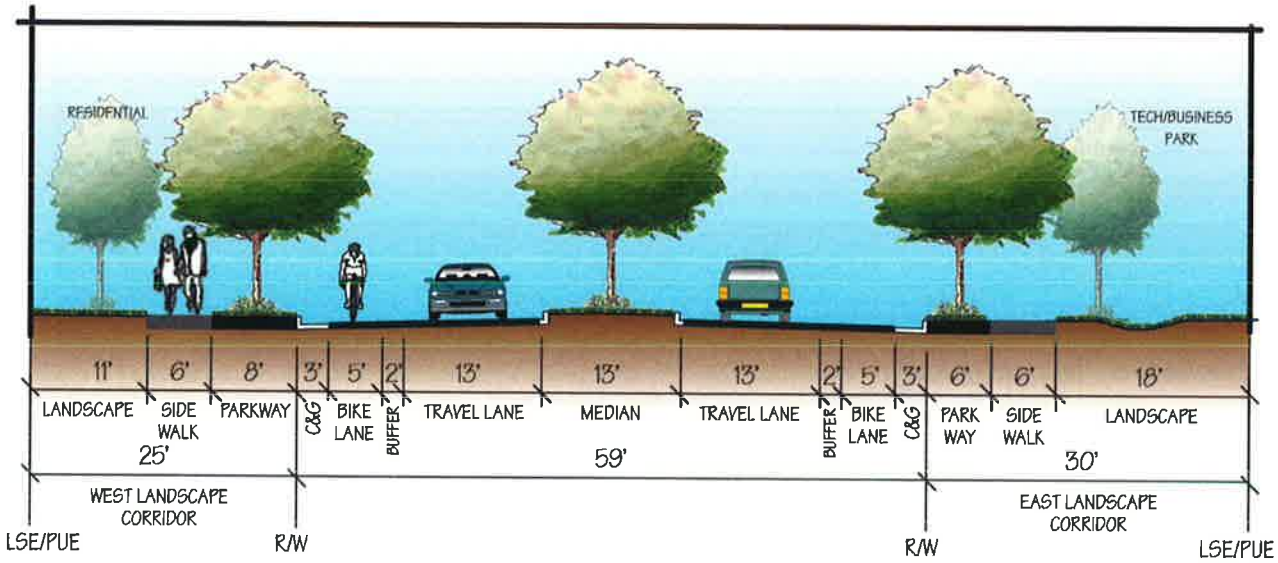

**FIGURE 3-6:** HP Way - Central (Modified Collector)

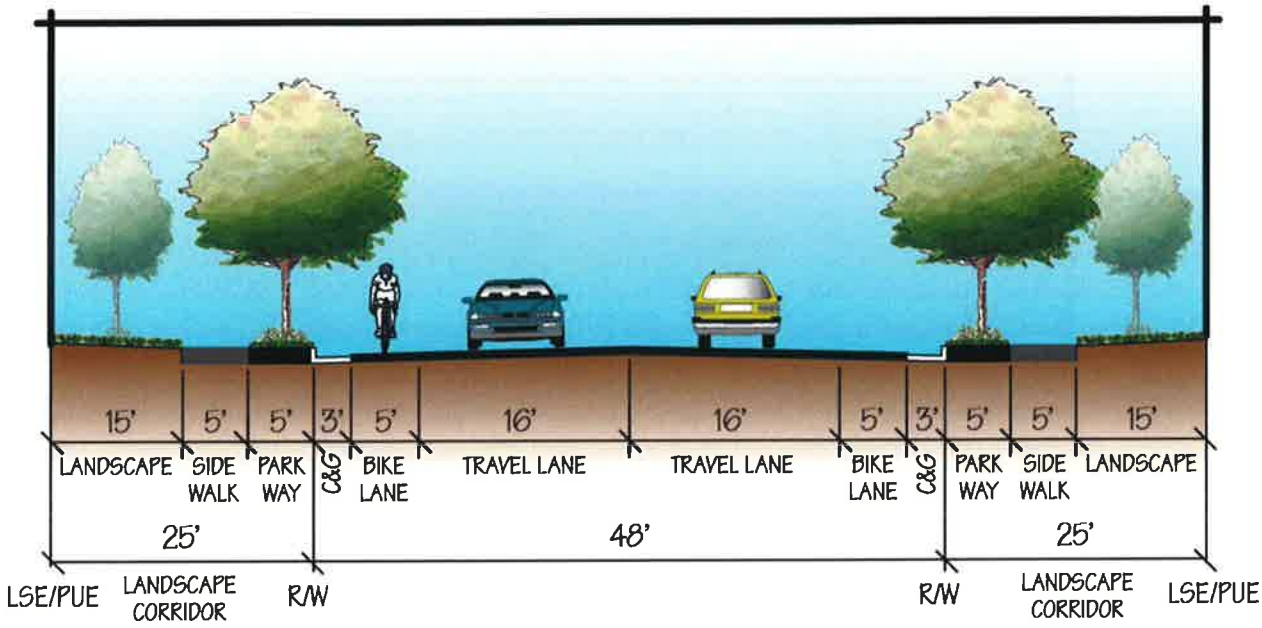
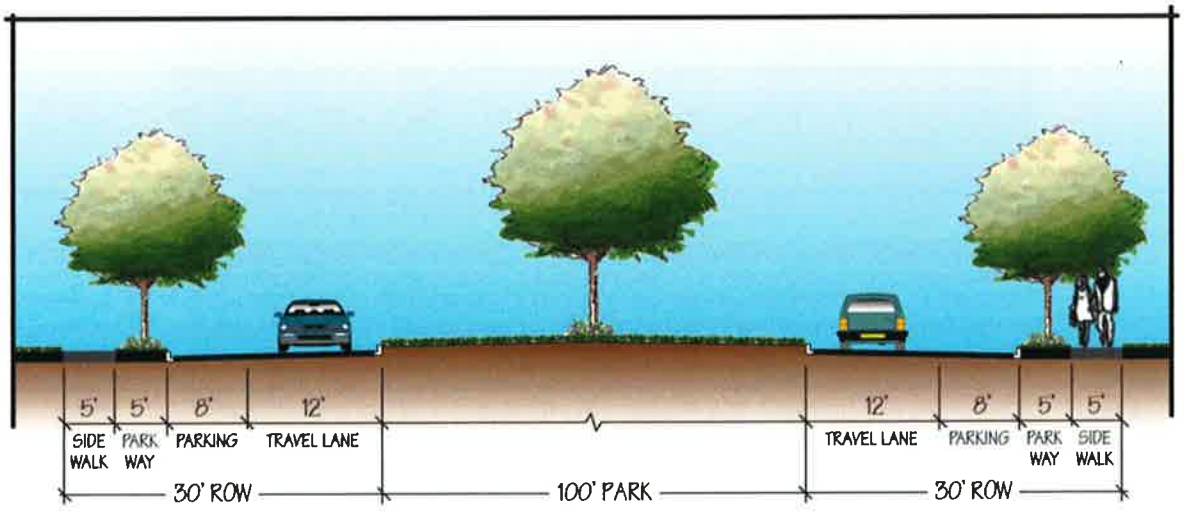


Note: Residential units will front on Collectors. Street frontage setbacks from back of walk to be established as part subdivision map and/or design review approval as applicable.

**FIGURE 3-7:** Painted Desert Drive, New Meadow Drive & Crimson Ridge Drive (Collectors)



Note: Residential units will front on Park Couplet. Street frontage setbacks from back of walk to be established as part subdivision map and/or design review approval as applicable.

## 3.2.2 PEDESTRIAN and BICYCLE NETWORK

The HPCO Master Plan provides for a safe and interconnected network of paths, sidewalks and bike lanes to allow residents and employees to easily walk and bike to meet their daily needs. The pedestrian and bicycle network is designed to enhance connectivity between jobs, homes and services. This enhanced connectivity supports alternative modes of travel; reduces vehicle trips and associated air quality and greenhouse gas emissions; promotes community activity, health and well-being; and contributes to the character and desirability of the Project Area as a place to live, work, recreate and invest.

The pedestrian and bicycle network provides for multiple looped routes, as well as connections to the larger citywide system. Key components of the network include:

- **Class I Paths** consist of shared bicycle and pedestrian paths completely separated from motor vehicle traffic. Class 1 path connections are provided within parks, paseos and open space areas. Connections are included to the existing City bike trail along the South Branch of Pleasant Grove Creek. It is intended that paths within paseos will be visible and accessible from adjacent development, with a minimum of 50 percent of the paseo edge open via a single-loaded streets, open cul-de-sac heads/street terminations, or other features. No paths may be located within Parcel CO-83, the City owned open space preserve, beyond those allowed by the Hewlett-Packard Preserve O&M Plan, deed restrictions, the City's Open Space Preserve Overarching Management Plan, and as shown on Figure 3-13. Class I facilities are 10-foot wide and paved with lane striping and 2-foot decomposed granite/gravel shoulders on each side.

- **Class IA Paths** are 8-foot wide multi-use concrete pedestrian paths within the landscape corridors along arterial roadways. Class IA path connections are provided along the edges of the Project Area adjacent to Blue Oaks, Foothills and Woodcreek Oaks Boulevards.
- **Class II Bikeways** are striped and signed one-way lanes included on all arterial and collector roadways within and adjacent to the Project Area. To enhance cyclist comfort and safety, the Class II bike lanes along HP Way include enhanced pavement delineations and 2-foot wide demarcated buffers from the adjacent travel lanes.
- **Sidewalks** are included on all improved public streets in the Project Area. Ranging from 5 to 6-feet in width, sidewalks are typically separated from the street by a landscaped parkway to create a more comfortable corridor for pedestrian mobility.

- **Walking Paths** consist of decomposed granite recreational walking and jogging trails. Walking paths may be included within some park areas.

The backbone pedestrian and bicycle network including all Class I bikeway segments shown on Figure 3-13 will be constructed concurrent with other backbone infrastructure and adjacent development. Connections to the network will be required to be made from individual development projects. Barriers (bollards, rail fence, vertical curbs, post and cable, posts, etc.) will be used along Class I paths to separate the pathways from the open space preserve (Parcel CO-83). Such barriers shall comply with the 404 permit regarding use of the preserve area, and with City design, maintenance and public safety requirements. On the Hewlett-Packard Campus, an internal pedestrian and bicycle network exists. Connections will be made from this internal system to each individual building on the Campus and to the adjacent backbone network where feasible.

To enhance internal connectivity and the convenient use of alternative transportation modes, the project proponents may explore opportunities to establish a bike share program. Bike Share programs allow users to borrow "pool" bicycles for local trips. This may include use by residents to travel to local jobs, or use by employees during the lunch hour to easily access restaurants and services. The bikes are checked out and returned to designated docking stations. Bike share programs can be funded through available grants, memberships, public-private partnerships and other mechanisms.

The bicycle and pedestrian network is illustrated on Figure 3-13.

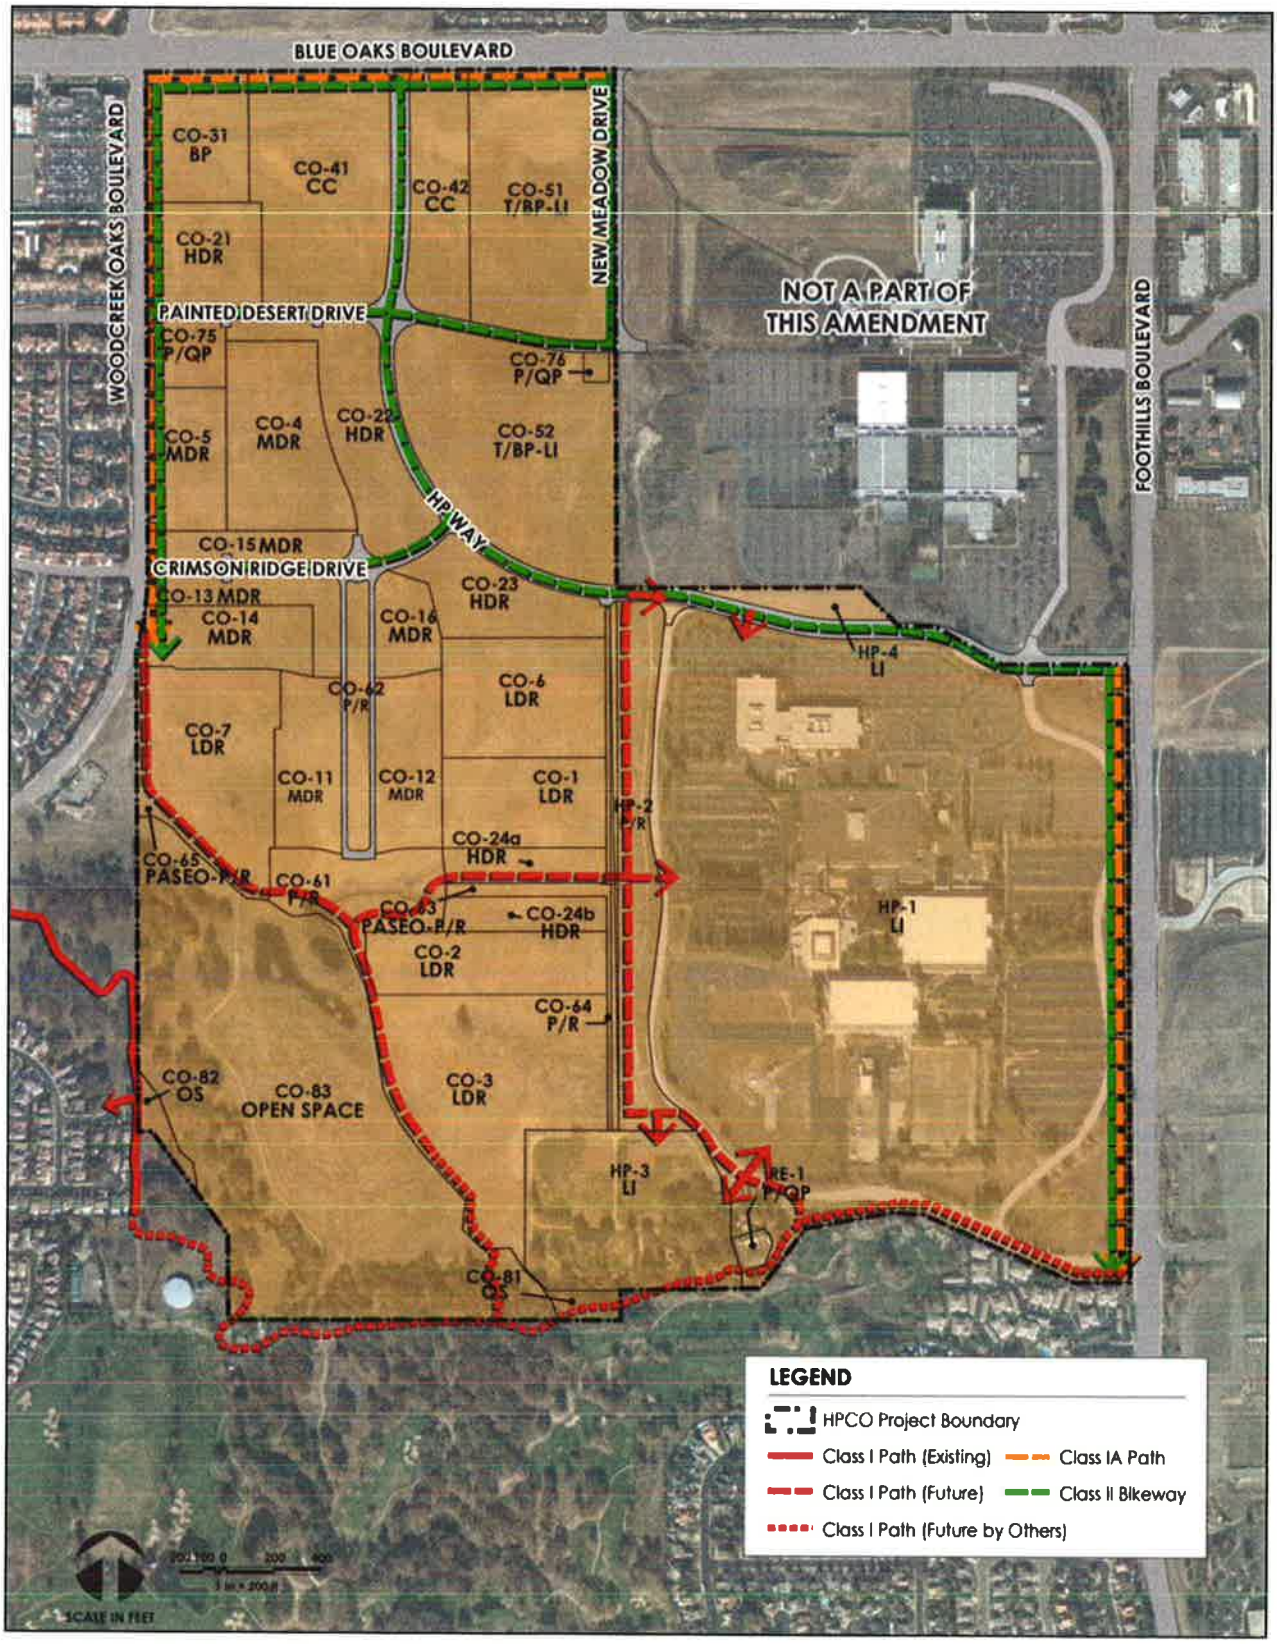

**FIGURE 3-13:** Pedestrian and Bicycle Network

### 3.2.3 TRANSIT

Bus service to the Project Area will be provided by Roseville Transit with connections to Sacramento Regional Transit and Placer County Transit as demand for service occurs and as funding allows. These services will utilize the roadway system to provide local and regional transit connections for community residents and employees.

Roseville Transit provides fixed route and Dial-A-Ride services within the City, as well as fixed route commuter services between Roseville and downtown Sacramento. The fixed route local and commuter systems operate on regularly scheduled routes, with the Dial-A-Ride system providing shared ride transit service to ADA paratransit customers and the general public within the City limits.

The Project Area supports the development of bus turnouts and transit shelters along arterial and collector roadways including Blue Oaks Boulevard, Foothills Boulevard, Woodcreek Oaks Boulevard and HP Way. Bus shelters are located near and will be conveniently connected to adjacent employment, commercial and higher density residential uses to facilitate transit use. Transit services will be extended to the Project Area as the demand for such services occur and funds are available as determined by the City.

Existing and planned bus turnouts and transit shelters are illustrated on Figure 3-14.

### 3.2.4 PARK and RIDE

Park and ride lots provide parking for commuters to leave their vehicles to meet carpools, vanpools or access transit services. In the Project Area, a park and ride lot is planned within the Campus Oaks Town Center on commercial Parcel CO-41 located along Blue Oaks Boulevard. The park and ride facility will include twenty (20) park and ride spaces of which two spaces will provide electric car charging stations.

The park and ride lot is intended to be made available to commuters during normal commute hours on a daily basis. Park and ride spaces will be provided in addition to the minimum required parking spaces for the project development and maintained by the project developer. Additional information regarding the obligations for the construction of the park and ride lot, including related facilities such as accessible parking and pedestrian paths and signs, is included in the Campus Oaks Development Agreement.

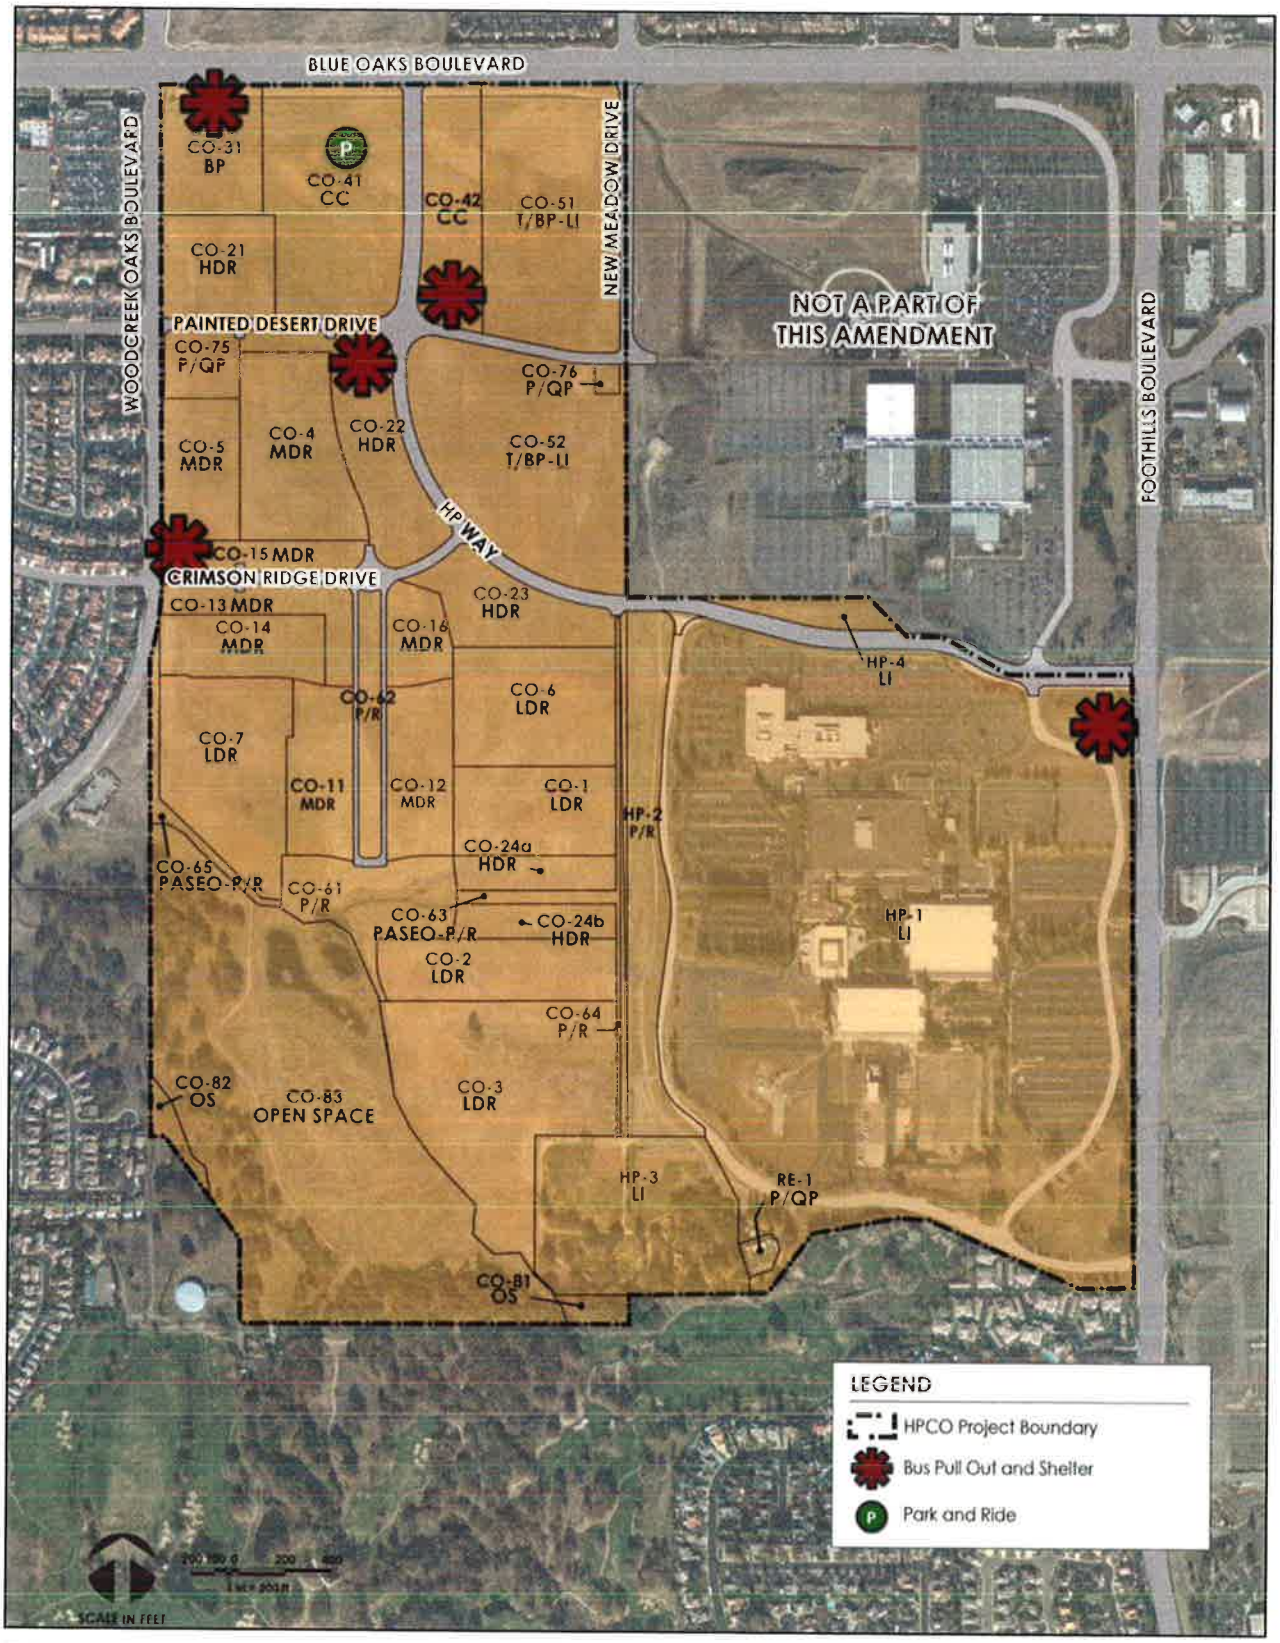

**FIGURE 3-14:** Transit Facilities and Park & Ride Lot

### 3.2.5 TRANSPORTATION SYSTEM MANAGEMENT

Transportation System Management (TSM) measures are designed to reduce the number and length of peak hour home-to-work commute trips through actions such as ridesharing, flexible work hours, and support of public transportation. Any project site, common work location, or employer with ten or more employees is required to comply with the City's TSM Ordinance. In addition, any project site, common work location, or employer with fifty or more employees is required as a condition of project approval to prepare a TSM Plan and subsequently enter into a TSM Agreement with the City. The Plan and Agreement shall comply with the City of Roseville TSM Ordinance and shall incorporate TSM measures to the degree required by the Ordinance.

## 3.3 Utilities

The HPCO Master Plan identifies the backbone utility infrastructure necessary to accommodate full build-out of the Project Area. Water, recycled water, wastewater, drainage, electric, natural gas, and telecommunications infrastructure exist within and/or adjacent to the Project Area. Since initial adoption of the Master Plan in 1996, substantial development and associated infrastructure improvements have been constructed in the vicinity of the Project Area. The HPCO Master Plan accounts for these changed conditions to define an updated and efficient backbone utility infrastructure program. Project Area utility providers are summarized in Table 3-4.

**TABLE 3-4:** Utility Providers

| Utility | Provider |
|---|---|
| Potable Water | City of Roseville |
| Recycled Water | City of Roseville |
| Wastewater | City of Roseville |
| Drainage and Flood Control | City of Roseville |
| Electric Service | City of Roseville |
| Natural Gas | Pacific Gas and Electric |
| Communications | AT&T, Comcast, Consolidated Communications, and Wave Broadband |
| Solid Waste Disposal | City of Roseville |

Adequate capacity for development of the Project Area has been/will be accounted for in the City's infrastructure planning and, where applicable, funding programs. In general, the HPCO Master Plan land uses result in an

overall reduction in utility demands when compared to the prior land uses. Infrastructure will be constructed consistent with this Master Plan, the Project Area Utility Master Plans, then current City improvement standards, and the project Development Agreements.

## 3.3.1 POTABLE WATER

### *Water Supply and Conservation*

The City of Roseville provides water service (supply, treatment, storage and conveyance) to the Project Area. The City currently uses multiple sources of water to serve customers including surface water, groundwater and recycled water. Potable water demand is typically met by surface water supplies. Surface water is obtained from Folsom Lake and the American River via contracts with the United States Bureau of Reclamation, Placer County Water Agency, and the San Juan Water District. Roseville has access to groundwater for use during an emergency, as a back-up supply during dry years, and to provide operational flexibility through implementing a conjunctive use program.

In accordance with Senate Bill 610, a Water Supply Assessment (WSA) was performed in conjunction with the HPCO Master Plan. The WSA includes an evaluation of the sufficiency of citywide water supplies over a 20-year horizon addressing the availability of adequate water supplies to meet existing and anticipated future demands, including the demand associated with the Project Area during normal, single-dry and multiple-dry years.

The Project Area's build out potable water demand is estimated at 1,004.60 acre-feet per year (AFY). This demand includes 414.63 AFY for the Hewlett-Packard Campus and 589.97 AFY for Campus Oaks. The estimated water demand for Campus Oaks is reduced to 433.05 AFY when applying savings in potable water use resulting from implementing water conservation best management practices and the use of recycled water for irrigation. Water conservation measures to be incorporated include turf reductions and water efficient landscaping; smart irrigation controllers; and, re-circulating hot water systems for residential units. These measures were selected because they can be cost-effectively implemented and have the highest potential for achieving water saving through conservation.

Water demands for the Project Area were included in the City's 2010 Urban Water Management Plan (UWMP) and the City's long-term water projections. In addition, the 2015 HPCO Master Plan (specifically the Campus Oaks land uses) results in an overall reduction in water demand of 234.95 AFY (surplus) when compared to the prior land uses. Accordingly, no additional water supplies are needed to accommodate buildout of the Project Area, nor are any improvements to the City's water treatment plant.

### *Backbone Potable Water Distribution System*

Water is delivered to the Project Area via the City's existing distribution system. This consists of existing and planned connection points to 12-inch and 24-inch mains within Blue Oaks Boulevard, Woodcreek Oaks Boulevard, and Foothills Boulevard. Water distribution within the Project Area includes a looped system of 12 to 16-inch backbone pipes that generally parallel collector and arterial roadways. In-tract improvements are required at a project level.

A groundwater well is planned within the Project Area (Parcel CO-76) adding to the City's network of wells that provide back-up water supply and aquifer storage and recovery (ASR). The backbone water distribution system and well location are illustrated on Figure 3-15.

## 3.3.2 RECYCLED WATER

### *Recycled Water Use*

The City of Roseville provides the Project Area with recycled water from the Pleasant Grove Wastewater Treatment Plan (PGWWTP) and the Dry Creek Wastewater Treatment Plant (DCWWTP). Both plants produce Title 22 quality effluent that is available for recycled water applications. The City currently provides recycled water to several locations on the west side of Roseville.

Campus Oaks will utilize recycled water for irrigating parks, non-residential and high density attached residential landscaping, as well as publicly landscaped areas (including roadway landscape corridors and medians). On the Hewlett-Packard Campus, recycled water may be extended to serve existing campus irrigation or other uses. Upon issuance of a building permit for any designated parcel on the Hewlett-Packard Campus, on site-improvements that are reasonably necessary to convert landscape irrigation facilities to make use of recycle water for that parcel may be installed.

The Project Area's annual recycled water demand is 109.33 AFY. The use of recycled water will further offset potable water demand.

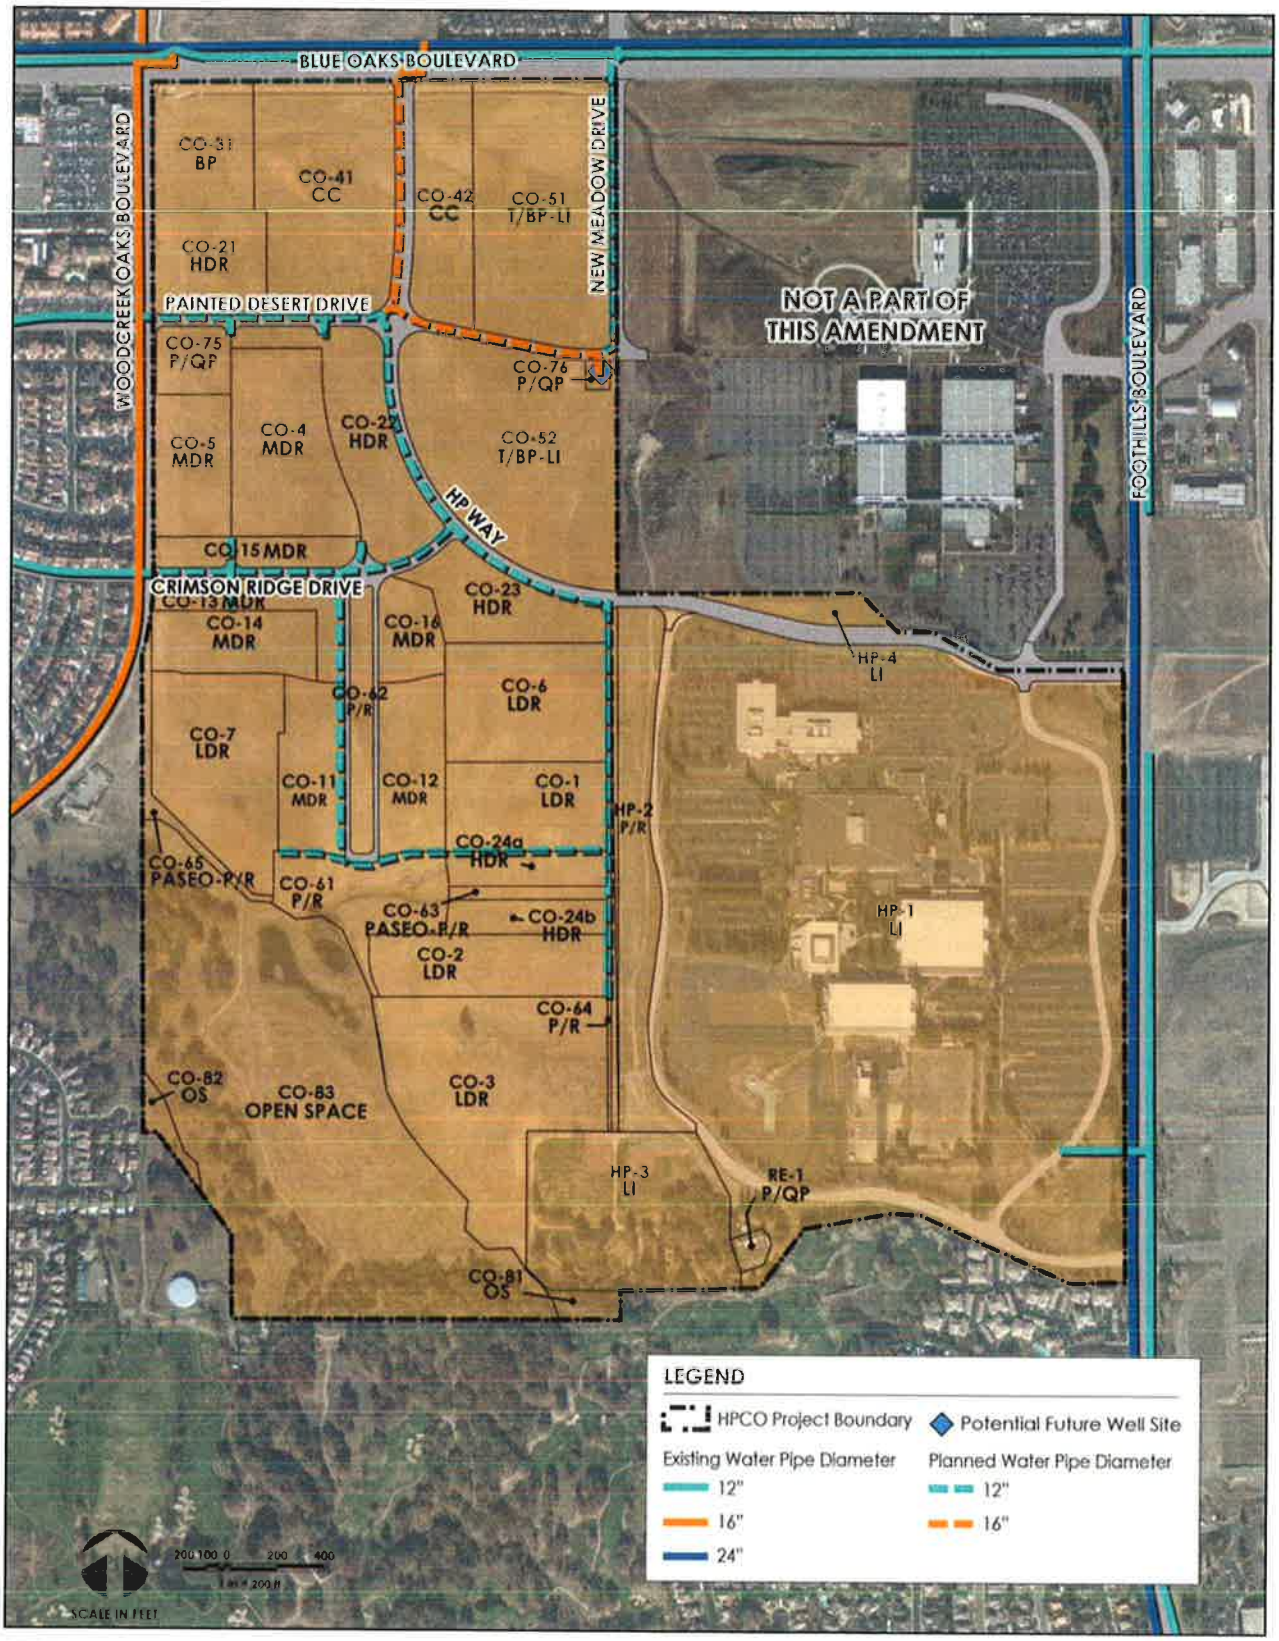

FIGURE 3-15: Backbone Potable Water Distribution System and Well Location

### *Backbone Recycled Water Distribution System*

A recycled water storage tank and pump station is located near the southwest corner of the Project Area. The Project Area connects to existing 16-inch and 30-inch recycled water mains located in Woodcreek Oaks Boulevard, Blue Oaks Boulevard, and Foothills Boulevard. A system of 6 to 8-inch on-site backbone recycled water lines will be constructed within street rights-of-way and easements to serve the Project Area. Included will be stubs to the landscape median in Blue Oaks Boulevard. In-tract recycled water improvements will be required at a project level.

The backbone recycled water distribution system is illustrated on Figure 3-16.

## 3.3.3 WASTEWATER

### *Wastewater Treatment*

Sanitary sewer service is provided to the Project Area by the City of Roseville. Wastewater flows from the Project Area will be directed to the PGWWTP. The Project Area is estimated to generate approximately 0.3 million gallons per day (mgd) average dry weather wastewater flow. The HPCO Master Plan (specifically the Campus Oaks land uses) results in an overall reduction in wastewater demand of 0.03 mgd when compared to the prior land uses and generation rates from the 1996 Master Plan. Capacity at the PGWWTP is adequate to accommodate projected flows.

### *Backbone Wastewater Collection System*

Wastewater flows are conveyed to the PGWWTP by a network of existing sewer pipes ranging in size from 30-inch to 78-inches within street rights-of-way or easements. Points of connection exist or are planned to sewer pipes within Blue Oaks Boulevard, Woodcreek Oaks Boulevard, and Foothills Boulevard.

Portions of the Hewlett-Packard Campus may continue to discharge to an existing 10-inch sewer line in Foothills Boulevard that flows to the north, as per the Hewlett-Packard development agreement, or to an alternate 10-inch sewer line that flow west through Campus Oaks to the existing 42-inch wastewater transmission line in Woodcreek Oaks Boulevard. Backbone sewer collection pipes within the Project Area will range in size from 10 to 12-inches. In-tract improvements are required at a project level.

The backbone wastewater collection system is illustrated on Figure 3-17.

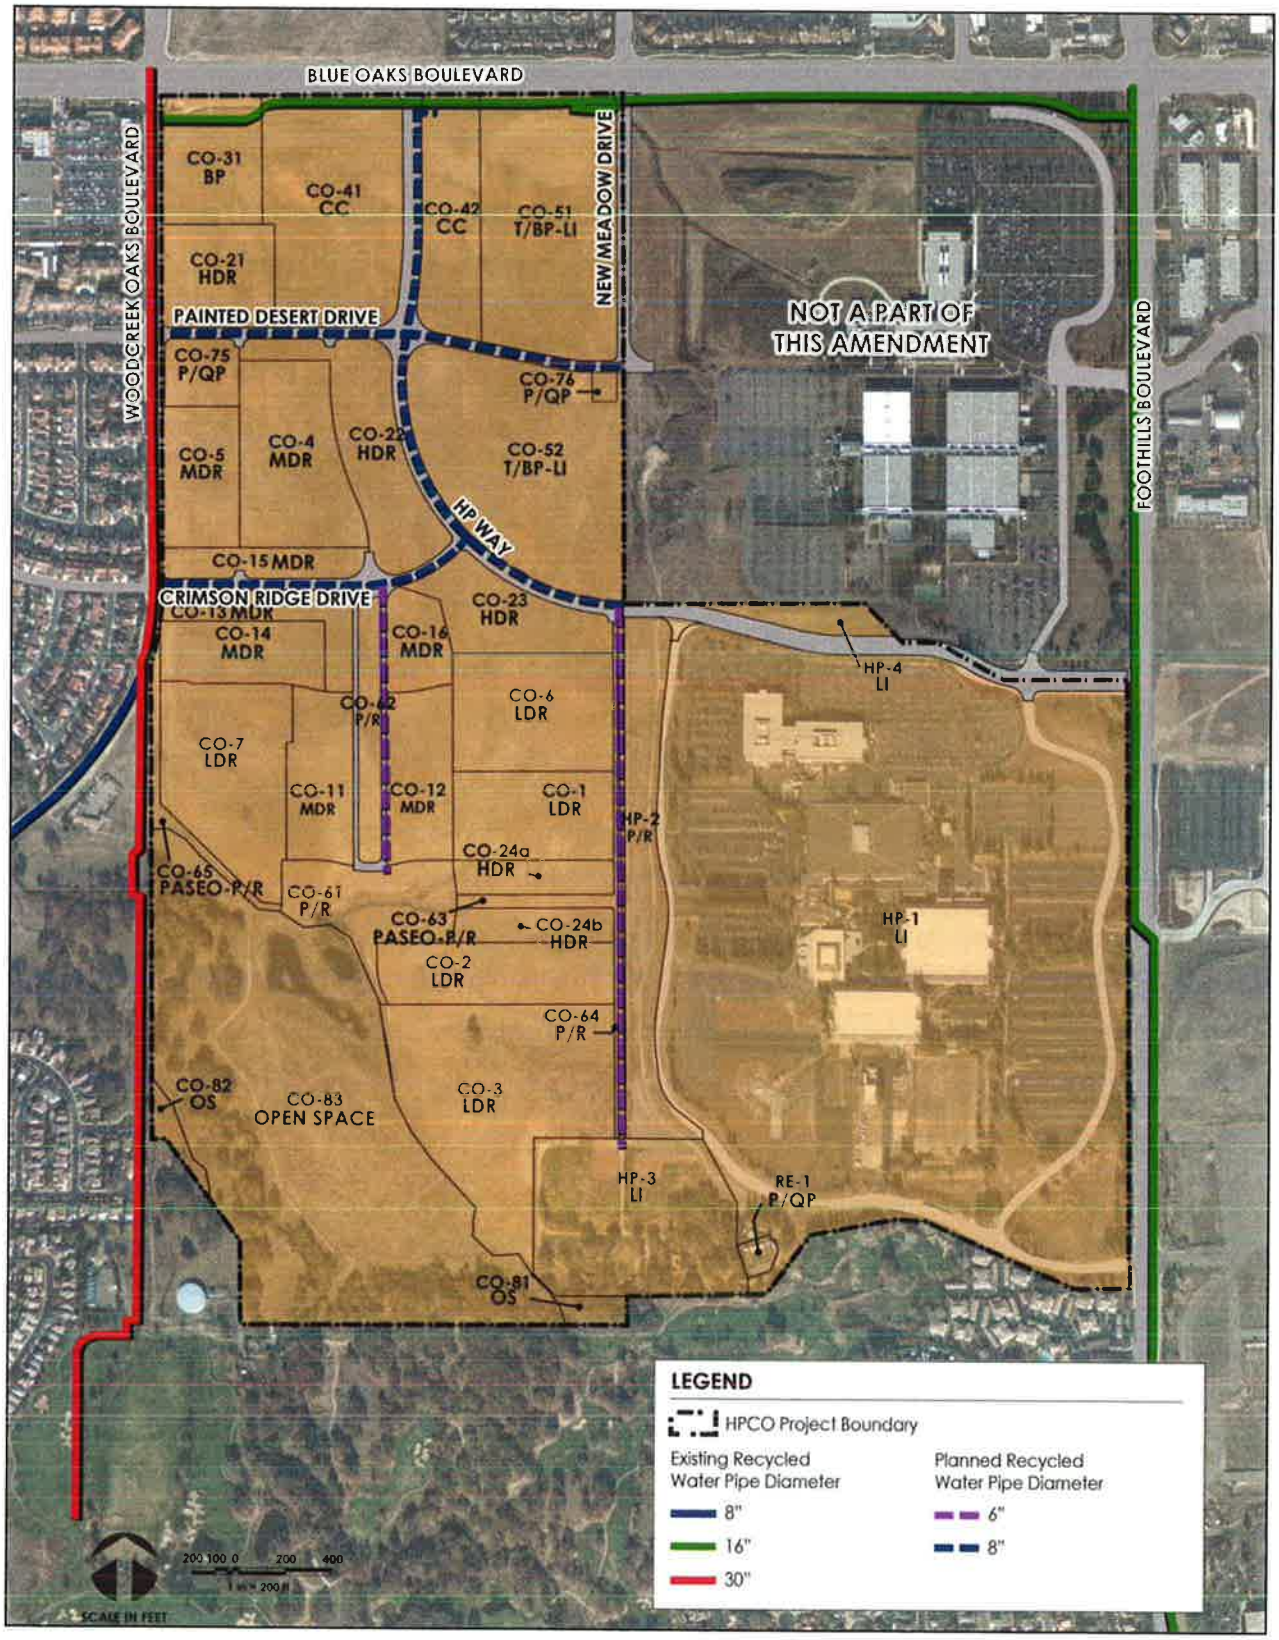

FIGURE 3-16: Backbone Recycled Water Distribution System

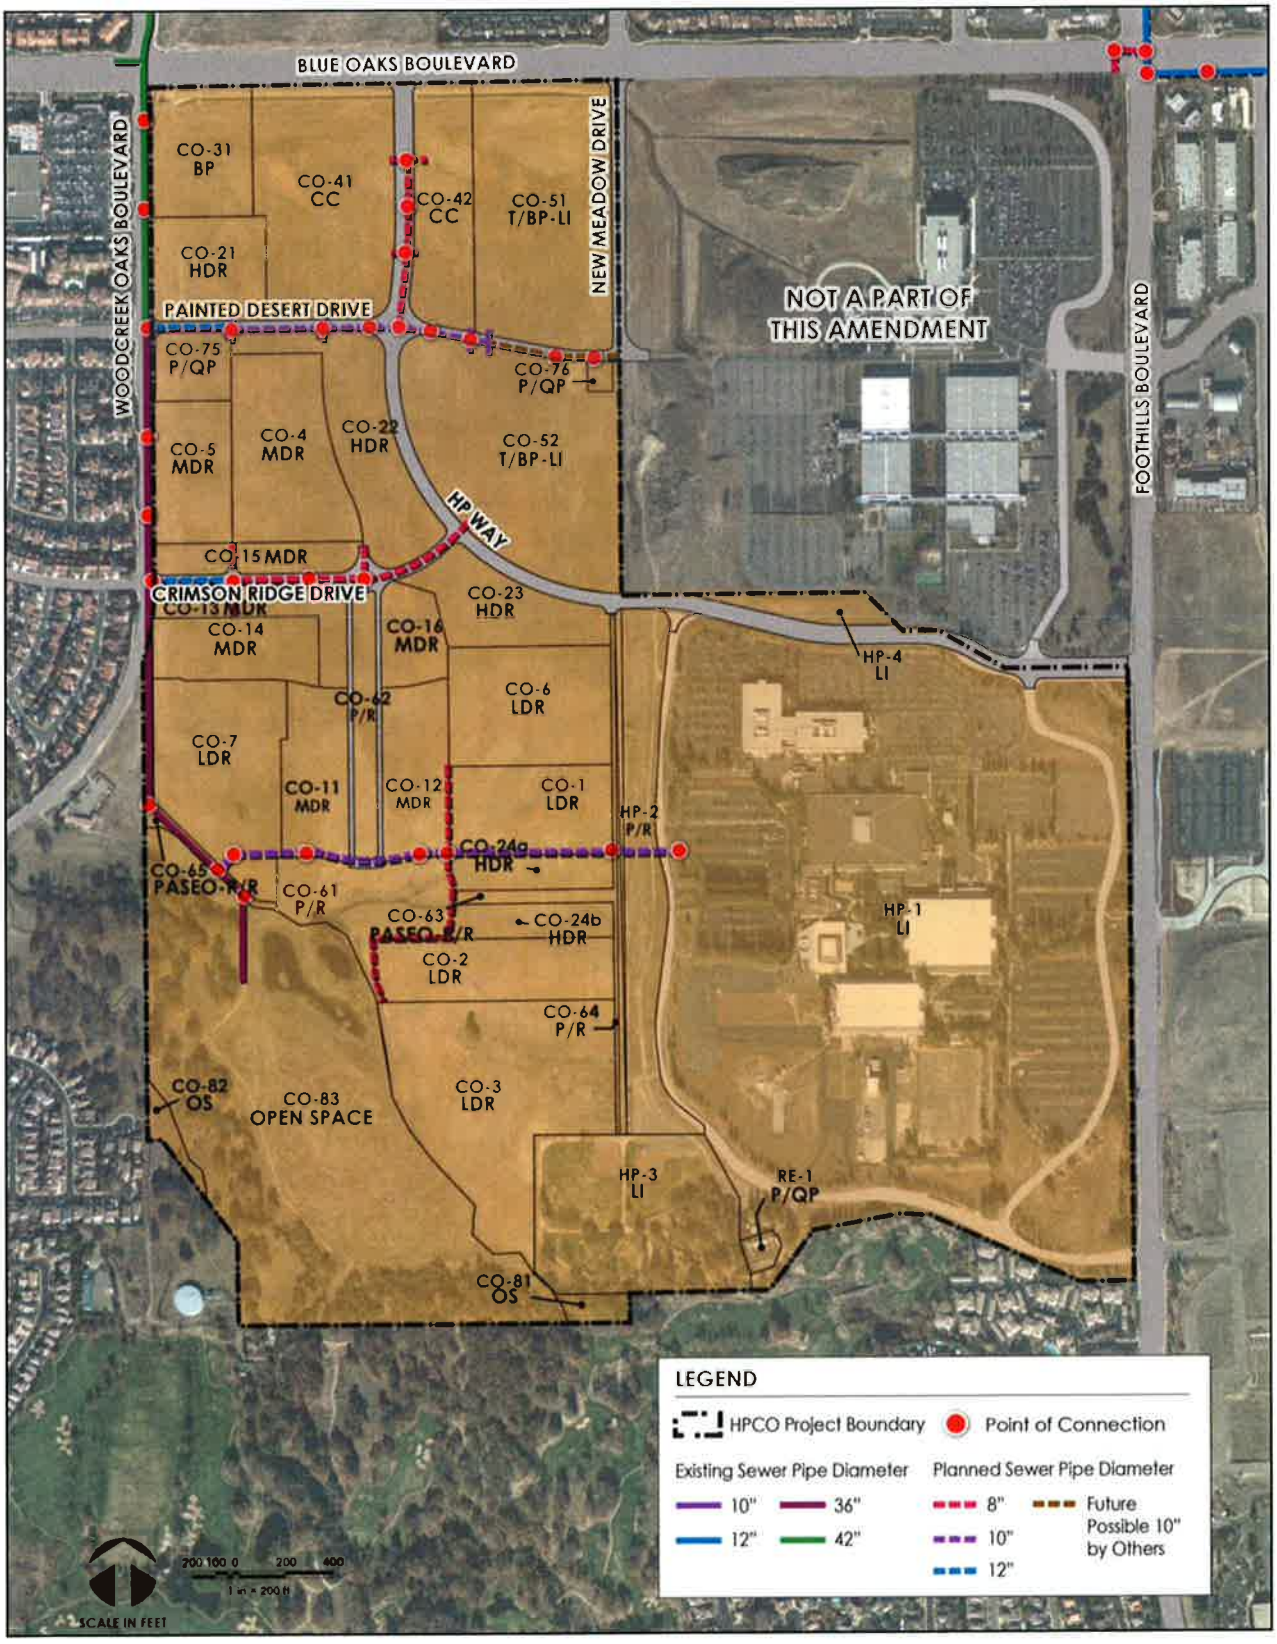

**FIGURE 3-17:** Backbone Wastewater Collection System

## 3.3.4 DRAINAGE and FLOOD CONTROL

### *Site Hydrology*

The Project Area is within the Pleasant Grove Creek watershed located within the larger Natomas Cross Canal watershed of northwestern Placer County and southeastern Sutter County. The Pleasant Grove Creek watershed drains to the Pleasant Grove Canal, then to the Natomas Cross Canal, and ultimately to the Sacramento River.

Project Area topography is gently rolling, generally sloping from east to west and is broken into a northern drainage shed and a larger southern drainage shed. The South Branch of Pleasant Grove Creek traverses the southwest portion of the Project Area within the Open Space Preserve (Parcel CO-83) and drains the southern shed. A perennial stream, Pleasant Grove Creek flows east to west conveying storm water flows during the wet season and irrigation runoff during the dry season. Within the Project Area, the limits of the 100-year floodplain for the South Branch of Pleasant Grove Creek are fully contained within the Open Space Preserve.

An unnamed tributary to the South Branch of Pleasant Grove Creek crosses the southeastern portion of the Hewlett-Packard Campus (Parcel HP-1). A small segment of this tributary is piped under the main Hewlett-Packard loop road. The tributary then continues west crossing the southern boundary of the Hewlett-Packard Campus, returns onto the Campus within the existing employee recreation area, and ultimately connects to the South Branch of Pleasant Grove Creek within the Open Space Preserve.

### *Backbone Drainage Improvements*

On-site backbone drainage improvements consist of a full complement of storm water quality BMP's and a combination of conventional subsurface and surface drainage systems including an existing drainage channel adjacent to a portion of Blue Oaks Boulevard. This drainage channel will be upgraded to include a concrete pan and access ramps for future maintenance equipment. Culverts will be utilized to cross over the existing channel at street and driveway locations and will be designed to accommodate the passage of maintenance utility vehicles (bobcat front loaders). Backbone subsurface drainage includes a series of 12 to 48-inch pipes connecting to existing and planned pipes within Woodcreek Oaks Boulevard, and Foothills Boulevard. Project Area conveyance systems discharge drainage through outfalls that eventually drain to the South Branch of Pleasant Grove Creek. Drainage facilities are to be designed and constructed in conformance with City of Roseville Improvement Standards and the Placer County Flood Control and Water Conservation District's Stormwater Management Manual.

Based upon the Project Area's location within the watershed, and given that projected runoff from the Project Area will not exceed the flow rates shown on the North Roseville Specific Plan Area (Phase 1) Drainage Shed Map, no additional peak flow on-site stormwater detention is required. The Project Area will contribute toward construction of the Reason Farms Retention Basin project through payment of the Pleasant Grove Watershed Mitigation Fee. This regional stormwater retention facility provides volumetric mitigation for waters entering the Sacramento River Basin. Additional detailed drainage analysis will be required at time of improvement plan review to ensure that all City requirements are being met.

### *Water Quality*

Best management storm water management practices consisting of site development Storm Water Pollution Prevention Plans (SWPPP) and post development source control, low impact development (LID) practices, treatment, full capture trash for priority land uses, and detention will be utilized throughout the Project Area for stormwater quality treatment and hydromodification management. The intent of both site development and post construction storm water management is to minimize the adverse impacts from storm water per applicable State and Federal NPDES Permitting mandates.

Post construction source control and LID features are woven into the fabric of a community to mimic the hydrologic function of the undeveloped site by capturing, slowing, treating, and infiltrating storm water as close to the source as possible through use of decentralized small scale features. Techniques such as tree plantings, infiltration galleries, disconnected roof drains, separated sidewalks, bio-retention facilities, rain gardens, bioswales, soil amendments, impervious surface reduction and other strategies can provide a LID "treatment train" which attempts to reproduce the predevelopment hydrologic system improving the quality and reducing the quantity of urban runoff. Additional controls such as bio-retention basins or end of the pipe treatment BMP's when required will further treat storm water before it enters the natural drainage system.

The City of Roseville has a Municipal Separate Storm Sewer System (MS4) Permit from the Regional Water Quality Control Board, which requires hydromodification mitigation to be addressed for all new discharges to waters of the State. Hydromodification control measures are intended to mitigate the artificial acceleration of erosion and sedimentation resulting from increased runoff flows and durations associated with urbanization. Hydromodification measures will be required to attenuate, infiltrate, and disperse increased runoff should LID measures not achieve infiltration and/or reuse runoff goals.

Water quality design standards shall comply with the adopted State MS4 permit requirements; the then approved City Stormwater Quality Design Manual; and, the Hewlett-Packard Preserve O&M Plan, recorded deed restrictions, and City of Roseville Open Space Preserve Overarching Management Plan. Sizing of volume based treatment control measures (water quality basins) shall follow the Roseville Volume Based Design Method.

Backbone drainage improvements are illustrated on Figure 3-18.

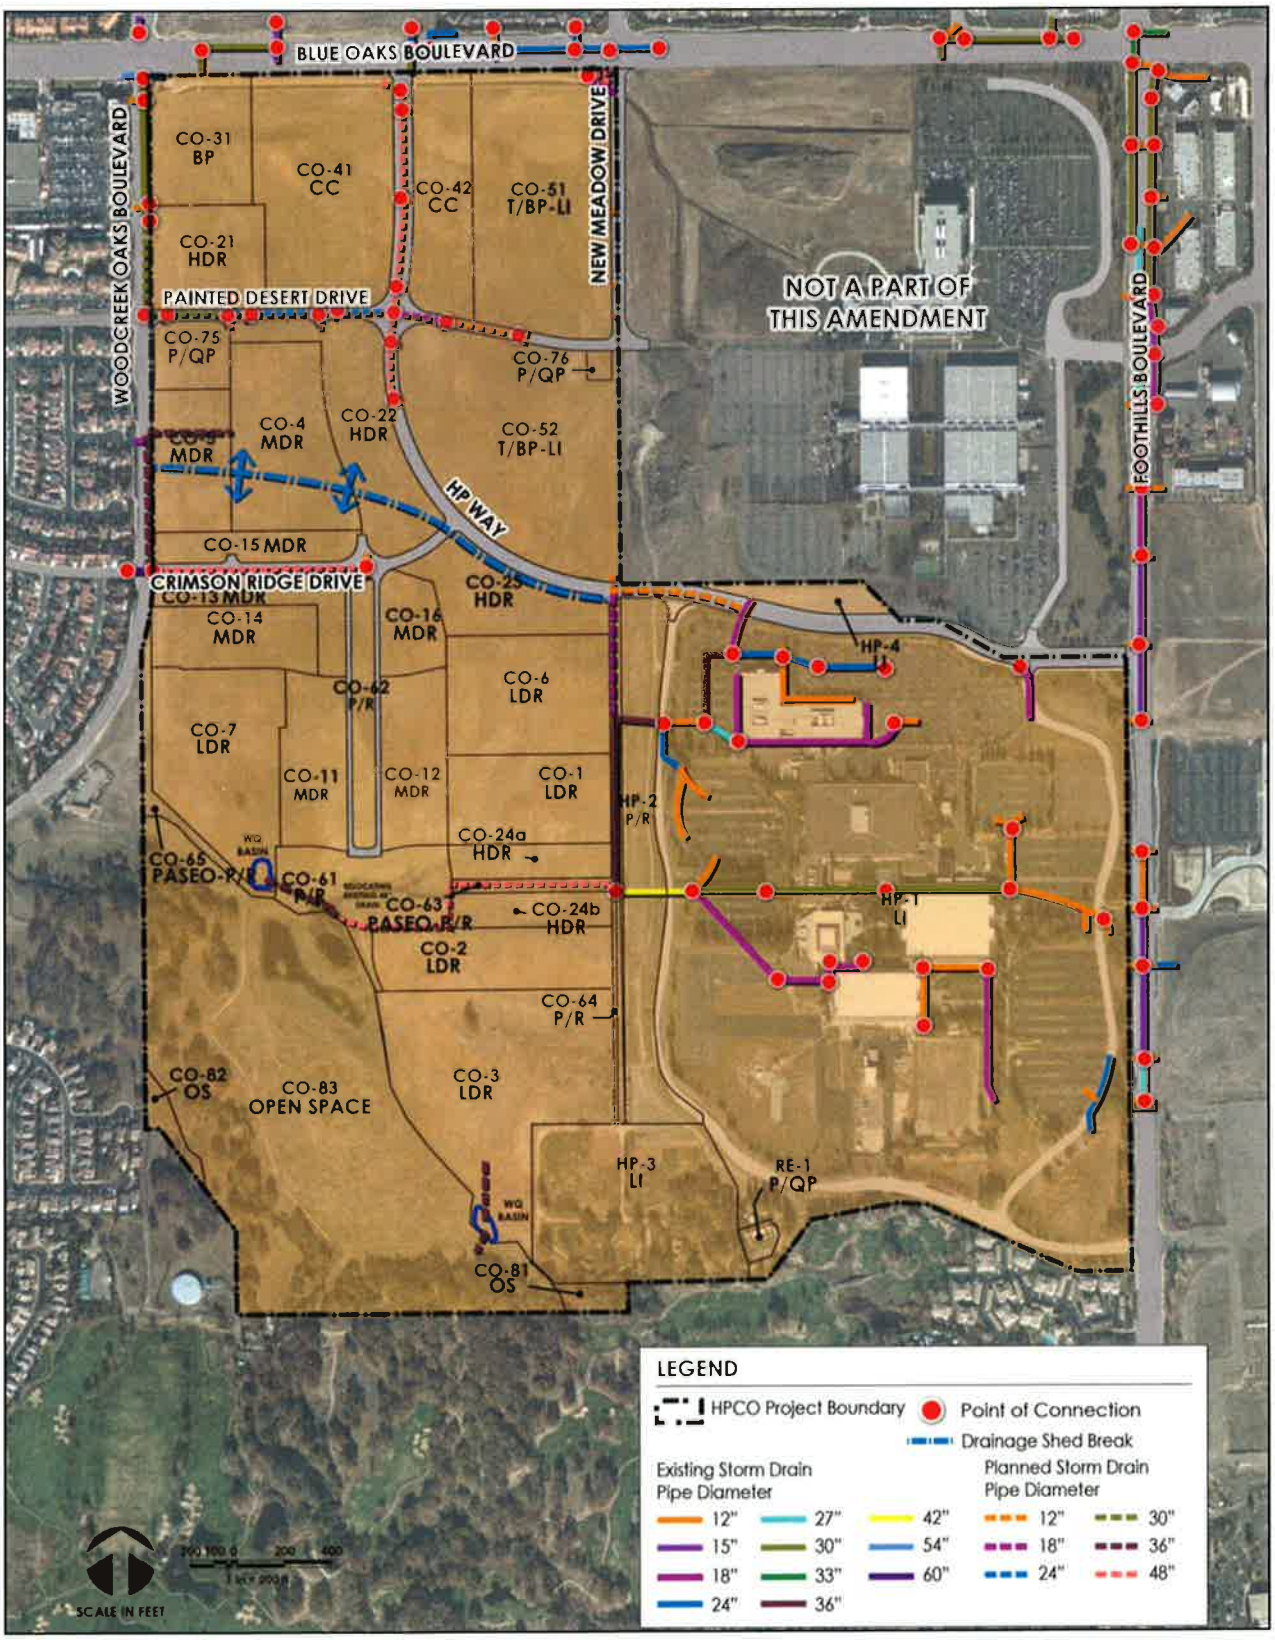

**FIGURE 3-18:** Backbone Drainage Improvements

## 3.3.5 DRY UTILITIES

### *Electric Service*

Roseville Electric supplies electricity to the Project Area, with peak electric demand estimated to be 19.1 Megawatts (MW). Additional electricity resources needed to serve the Project Area, including state and federal mandated renewable electricity resources, will be purchased from outside sources or generated by City-owned facilities at the Roseville Energy Park. As required by state regulations, Roseville Electric will use cost-efficient energy efficiency, load management and renewable resources programs to meet electricity demand before acquiring new electricity sources. It is a goal within Campus Oaks that a minimum of 50 percent of all homes be solar powered, that electric vehicle charging stations be included at all homes, and that LEED or similar green building standards be encouraged.

Electrical service is provided to the Project Area from the electric substation on the southern portion of the Hewlett-Packard Campus (Parcel RE-1) and from the Blue Oaks Substation located to the north adjacent to Woodcreek Oaks Boulevard. Underground electrical distribution will be extended to individual parcels in conjunction with roadway improvements. Included will be the undergrounding of existing overhead electrical lines along the south side of Blue Oaks Boulevard. In addition, street lighting will be provided along all public streets as part of the roadway frontage improvements. All electric and street light facilities will be constructed to the City's standards and specifications at the time of construction.

### *Natural Gas*

A Pacific Gas and Electric Company (PG&E) 16-inch high-pressure natural gas transmission pipeline bisects the middle of the Project Area from north to south. Natural gas will be provided by PG&E on request and in accordance with the rules and tariffs of the California Public Utilities Commission. Service will be provided via the extension of existing gas lines within and adjacent to the Project Area. Delivery of gas service to individual projects will be reviewed by PG&E at the time of proposal.

### *Voice/Data Communication*

The Project Area is within the service areas of AT&T, Comcast, Consolidated Communications (formerly Surewest), and Wave Broadband. Together, these providers offer both voice and data communication services. Distribution lines to individual parcels will be extended from existing infrastructure within and adjacent to the Project Area. The providers will review delivery of services to individual projects at the time of proposal. All telecommunication lines and associated facilities will be installed underground.

### 3.3.6 SOLID WASTE DISPOSAL

Solid waste collection for the Hewlett-Packard Campus is provided through a private solid waste hauling service. Should this service be terminated, the City of Roseville will make municipal solid waste hauling service available to all or a portion of the Campus. The City will provide solid waste services to Campus Oaks.

Solid waste is collected and delivered to the Western Placer Waste Management Authority facility located north of the City at the intersections of Athens Avenue and Fiddyment Roads. The Authority owns a Material Recovery Facility (MRF) that receives, separates or processes, and then markets recyclable materials removed from the waste stream. Residual waste is transferred to the Authority's Western Regional Sanitary Landfill for disposal.

At full buildout, the Project Area is anticipated to generate approximately 7,020.49 tons of solid waste annually. Campus Oaks will contribute 4,020 tons of solid waste per year, and the Hewlett-Packard Campus 3,000.49 tons per year. The Project Area's solid waste contribution will not reduce the life of the landfill or operational capacity of the MRF at buildout.

Development within the Project Area will work with the City to maximize recycling and other programs to reduce or divert the solid waste stream to the landfill in compliance with AB 939.

# 3.4 Parks, Schools and Libraries

## 3.4.1 PARKS & OPEN SPACE

The HPCO Master Plan incorporates an interconnected network of accessible public parks, paseos, and open space areas to support recreational activities, encourage community interaction, expand trail connections, preserve sensitive resources and enhance sense of place. Park and open space facilities are provided within both the Hewlett-Packard Campus and Campus Oaks to meet the active/formal/programmable and passive/informal/self-directed recreational needs of residents and employees.

### *City Parks & Recreation Requirements*

Roseville's General Plan requires new development to provide nine acres of public parkland for every 1,000 residents. This requirement is satisfied through three land dedication components: three acres each of neighborhood park, citywide park and open space. The City maintains flexibility in applying the above standards to best meet the parks and recreation needs of the community.

The 948 dwelling units within Campus Oaks will generate an estimated population of 2,474 residents based on an average of 2.61 persons per household. In accordance with the General Plan, 22.3 acres of credited parkland is required based upon 7.43 acres each of neighborhood park, citywide park and open space. The HPCO Master Plan provides for a total of 66.74 net acres of parks and open space (including the City open space preserve), of which 41.35 acres of credit are granted. As summarized in Table 3-5, neighborhood and citywide parks are granted full credit, and open space partial credit, based upon their differing recreational contributions to the community consistent with General Plan policy.

Table 3-6 summarizes how the HPCO Master Plan satisfies the City's parkland dedication requirements.

## TABLE 3-5: Park and Open Space Credit

| Parcel | Total Net Acreage[1] | Credit Ratio | Credited Acreage |
|---|---|---|---|
| **NEIGHBORHOOD PARKS** | | | |
| CO-61[2] | 5.04 ac | 1:1 | 5.04 ac |
| CO-62[2] | 2.62 ac | 1:1 | 2.62 ac |
| CO-64[2] & HP-2[4](portion of) | 2.16 ac[3] | 1:1 | 2.16 ac[2] |
| ***Sub-Total*** | ***9.82 ac*** | | ***9.82 ac*** |
| **CITYWIDE PARK** | | | |
| CO-64[2] & HP-2[4] (portion of) | 8.38 ac[5] | 1:1 | 8.38 ac[4] |
| ***Sub-Total*** | ***8.38 ac*** | | ***8.38 ac*** |
| **PASEO** | | | |
| CO-63[2] (Paseo) | 0.84 ac | 0:1 | 0 ac. |
| CO-65[2] (Paseo) | 1.35 ac | 0:1 | 0 ac |
| ***Sub-Total*** | ***2.19 ac*** | | ***0ac*** |
| **OPEN SPACE** | | | |
| CO-81[2] (Open Space) | 0.84ac | 0.5:1 | 0.42 ac |
| CO-82[2] (Open Space) | 0.86 ac | 0.5:1 | 0.43 ac |
| CO-83[2] (Open Space) | 44.65 ac | 0.5:1 | 22.33 ac |
| ***Sub-Total*** | ***46.35 ac*** | | ***23.15 ac*** |
| **TOTAL** | **66.74 ac** | | **41.35 ac** |

1. Acreage excludes adjacent roadways inside curb.
2. See Table 5-2 for parcel specific land use information.
3. Includes planned open turf play, tot lot, plaza seating/game tables, small seating area, and landscaping/walkways/plazas.
4. Parcel HP-2 park acreage credited towards Campus Oaks. See Table 4-1 for parcel specific land use information.
5. Includes planned futsal/tennis courts (lighted), pickleball/badminton courts (lighted), dog park, ninja warrior course, basketball court (lighted), skate park, amphitheater, restrooms, parking stalls, group picnic grove, Class I path and landscaping/walkways/plazas.

## TABLE 3-6: Park Credit Summary

| Park Type | Credited Acreage Required | Total Acreage Provided | Credited Acreage Provided | Credit Balance |
|---|---|---|---|---|
| Neighborhood | 7.43 ac | 9.82 ac | 9.82 ac | + 2.39 ac |
| Citywide | 7.43 ac | 8.38 ac | 8.38 ac | + 0.95 ac |
| Open Space | 7.43 ac | 46.35 ac | 23.15 ac | + 15.72 ac |

## *Parks and Open Space System*

Key components of the HPCO Master Plan parks and open space system are illustrated on Figure 3-19. Parks and open space lands include:

**Neighborhood Parks.** The Master Plan integrates two neighborhood parks, Campus Oaks Park (Parcel CO-61) and the Park Couplet (Parcel CO-62). In addition, a portion of the Hewlett-Packard Greenway (Parcels CO-64 and HP-2) is dedicated to neighborhood serving facilities. Totaling 9.82 net acres, the neighborhood parks support the local recreational needs of residents through incorporation of a variety of ball fields, sports courts, informal turf areas, play structures, picnic areas, pavilions and other gathering spaces.

**Citywide Park.** The HPCO Master Plan incorporates a citywide park, the remainder of the Hewlett-Packard Greenway. Located between the residential uses in Campus Oaks and the employment uses on the Hewlett-Packard Campus, the Greenway provides a unique opportunity to integrate resident and employee interactions and activity. Facilities provided could include a skate park, trail connections, a dog park, and facilities that support performance arts, farmers markets, arts and craft shows and other activities.

**Paseos.** The HPCO Master Plan includes 2.19 net acres of Paseos (Parcels CO-63 and CO-65). The Paseos are linear open space features that provide physical and visual linkages between uses incorporating landscaping, seating areas, trail connections and other open space elements that enhance the Area's recreation and mobility systems.

**Open Space.** The HPCO Master Plan incorporates 46.35 net acres of open space including the City owned preserve (Parcel CO-83) as well as new additions adjacent to the preserve (Parcels CO-81 and CO-82). The open space lands encompass a portion of the South Branch of Pleasant Grove Creek, natural and created wetlands, oak woodlands, and annual grasslands. The Master Plan proposes to implement existing open space preserve planned and approved trails as well as develop new trails proposed immediately adjacent to and outside the preserve boundaries (as shown in Figure 3-13). The trails outside the preserve boundaries may include seating and viewing areas that will increase public visibility and appreciation of the Project Area's preserved natural resources.

**FIGURE 3-19:** Parks and Open Space System

Concept plans for each park and open space site are illustrated in Figures 3-20 through 3-24. Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.

In addition to public parks and open space, the Project Area contains private recreation facilities accessible to employees on the Hewlett-Packard Campus. Included are baseball fields, a pavilion and related amenities. While these private recreation facilities supplement parks and recreation opportunities within the Project Area, they are currently not granted credit towards meeting the City's park and open space requirements.

Active recreational areas will be designed to reduce potable water demand by providing recycled water for irrigation, limiting turf, incorporating water conserving plants, and using water efficient irrigation systems.

The funding for public park and open space facilities is assigned to residential uses (Campus Oaks). Parks, paseos and trails will be constructed through a combination of developer turn-key and City park fee programs. The open space preserve (Parcel CO-83) is already owned by the City with associated monitoring, reporting and maintenance costs currently funded by Community Facilities District Annexation 4 (CFD4). All other public parks, paseos and open space areas will be dedicated to and maintained by the City. Maintenance will be funded through the Campus Oaks Community Facilities District – Public Services (Services CFD) to the extent permitted as specified in the project Development Agreements.

U. Mounded Grassy Play

*Campus Oaks Park is envisioned as a family oriented active neighborhood park. The park's geometrics are responsive to the sites rolling topography, with formal landscape/hardscape designs complimenting the Park Couplet to the north and Paseo to the east, and more naturalistic undulating forms as the park unfolds to the south and west towards the Open Space Preserve. A tree lined plaza with a focal point act as the southern terminus of the Park Couplet. A sticks and stones creek play area and adventure park features compliment the opportunities for creative play. The westerly edge of the park incorporates a youth soccer field and/or open turf practice area. Shade shelters and seating areas are integrated into the northern plaza. A smaller shade sail picnic area and game tables are placed at the east end overlooking the entire park. Trial connections are provided to the west and south.*

***NOTE:** Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.*

**FIGURE 3-20:** Campus Oaks Park Concept Plan (Parcel CO-61)

*The 100-foot wide Park Couplet is envisioned for primarily passive neighborhood recreational uses with the potential for limited small scale activity areas. Pedestrian circulation is enhanced by a series of gathering spaces with formal connections using a central promenade within the northerly space and a dual walkway system located toward the east and west edges within the southern space. A life-size chess board along with an open turf play area provides the community with active spaces. A plaza with a specimen tree and accent plantings is located in the southern area. Enhanced pavements, decorative fenced planters, seating areas and focal points are integrated to give this space a rich texture.*

***NOTE:*** *Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.*

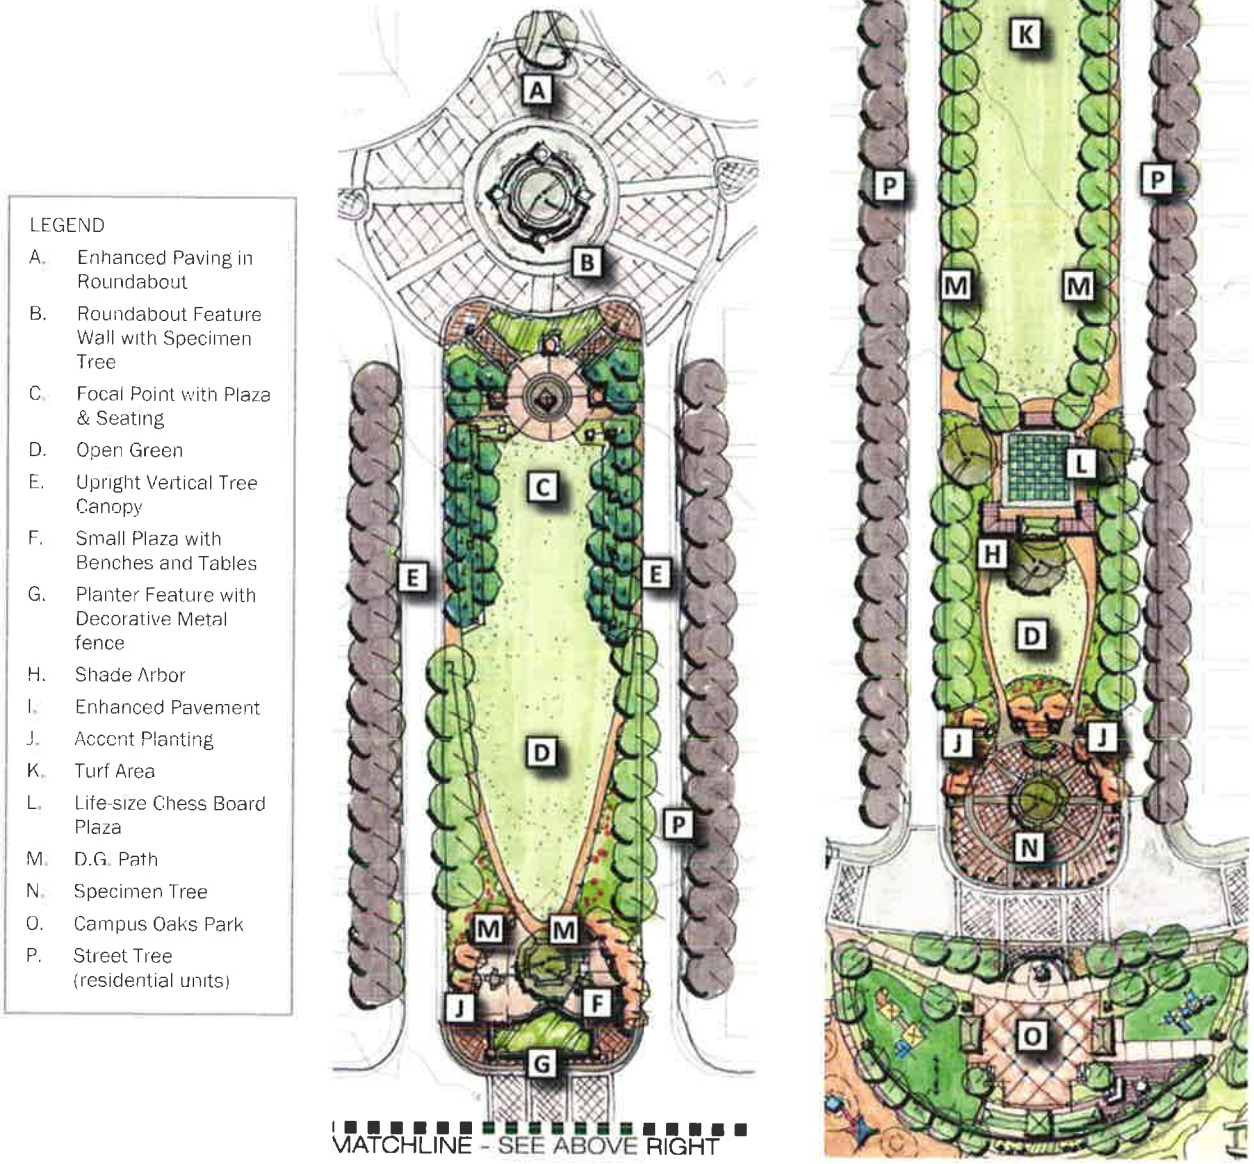

**FIGURE 3-21:** Park Couplet Concept Plan (Parcel CO-62)

*The Hewlett-Packard Greenway is envisioned as a primarily active park providing for a variety of neighborhood and citywide recreational opportunities. Included are a BMX or skate park, Ninja warrior facility, open turf areas, as well as bocce, pickleball/badminton, futsal/tennis and full basketball courts. A Class I multi-use path runs the entire length of the Greenway. The intersection of the path at the east-west paseo includes a plaza area with a fruitless olive grove, picnicking, and tot lot aligned with the main entry of Hewlett-Packard. This space can accommodate performance arts, farmers markets, arts and craft shows, and other events. The Park geometrics allow for the integration of the sites rolling terrain, with flat areas and vertical evergreen trees creating visual linkages between Hewlett-Packard and Campus Oaks. A small amphitheater and dog park are included. Focal points are created at the eastern roundabout and the termination of each adjacent east west vehicular access. Parking is provided along the western edge of the site.*

***NOTE:** Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.*

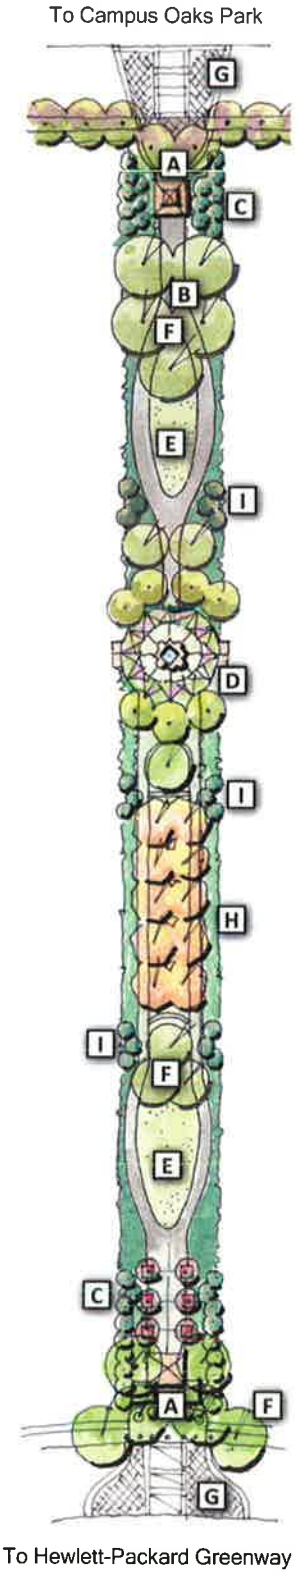
**FIGURE 3-22:** Hewlett-Packard Greenway Concept Plan (Parcels CO-64 & HP-2)



*Two Paseos are included within Campus Oaks, one providing a connection adjacent to the Open Space Preserve and up to Crimson Ridge Drive, and the other creating a link between Campus Oaks Park and the Hewlett-Packard Greenway. Both Paseos include Class I multi-use paths and select passive use elements. The Paseo adjacent to the Open Space Preserve will have an informal character, integrating natural grades and incorporating native plant materials transitioning to the open space. The Paseo linking Campus Oaks Park and the Hewlett-Packard Greenway will incorporate more formal landscaping incorporating elements such as arbors and seating areas. Tree alleys will be used to enhance visual linkages between the parks, as well as to frame the physical and visual connection between Hewlett-Packard and Campus Oaks. It is intended that the paseos will be visible and accessible from adjacent development, with a minimum of 50 percent of the edge of each paseo open via single-loaded streets, open cul-de-sac heads/street terminations, or other features.*

***NOTE:** Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.*

**FIGURE 3-23:** Paseo Concept Plan (Parcels CO-63 & CO-65)

*The Open Space Preserve is envisioned as a passive amenity complementing the active parks within the Project Area. Nestled along the South Branch of Pleasant Grove Creek, the Preserve incorporates Oak Woodlands as well as natural and created wetland habitats. Opportunities exist to enhance community appreciation of the natural terrain, plants and animals. The City's existing Pleasant Grove Creek Trail (Northern Section) currently is improved off of Cedar Springs Court and feeds northwesterly to Woodcreek Oaks Boulevard. The intent is to provide access from the southern end of this existing trail and the City's planned off-site trail to the south adjacent to Woodcreek Oaks Golf Course to Campus Oaks Park at its southern boundary, and then continue eastward into the Hewlett-Packard Greenway. A new trail connection to Woodcreek Oaks Boulevard is also planned from the western end of Campus Oaks Park northwest through the planned paseo (Parcel CO-65). All activities are required to be in compliance with the Hewlett-Packard Preserve O&M Plan, deed restrictions, and the City's Open Space Preserve Overarching Management Plan. Parcel CO-82 may accommodate reburial of Native American cultural artifacts that have been repatriated to the United Auburn Indian Community.*

***NOTE:*** *Park concept plans are subject to change based on funding or other factors. Final park designs shall be approved by the City.*

**FIGURE 3-24:** Open Space Preserve Concept Plan (Parcels CO-81, CO-82 & CO-83)

## 3.4.2 LIBRARIES

The City of Roseville operates a public library system consisting of three individual facilities, providing print and online services to all City residents. The closest library to the Project Area is the Martha Riley Community Library at Mahany Park, a joint use facility that includes a community TV studio and Utility Exploration Center. The Project Area will offset its contribution to library services through payment of the City's Public Facilities Fee.

## 3.4.3 SCHOOLS

The Project Area is within the boundaries of the Roseville City School District (grades K-8) and Roseville Joint Union High School District (grades 9-12). The number of students generated within the Project Area does not create sufficient demand for new school facilities (see Table 3-7). Students will be served at existing schools including Oakmont High School, Robert C. Cooley Middle School, and Blue Oaks Elementary School. The High School District will study potential enrollment boundary changes upon future construction of the new high school within West Roseville. Campus Oaks will enter into mutual benefit impact fee agreements to fully mitigate school impacts in accordance with its Development Agreement and Funding Agreements with the school districts.

**TABLE 3-7:** Student Generation

| | Single Family[1] | Multi-Family Detached[2] | Multi-Family Attached[3] | Students Generated | School Capacity | Schools Required |
|---|---|---|---|---|---|---|
| **ROSEVILLE CITY SCHOOL DISTRICT** | | | | | | |
| Grades K-5 | 0.3329 | 0.2200 | 0.1118 | 193 | 600 | 0.32 |
| Grades 6-8 | 0.1164 | 0.0776 | 0.0352 | 66 | 1,000 | 0.07 |
| **ROSEVILLE JOINT UNION SCHOOL DISTRICT** | | | | | | |
| Grades 9-12 | 0.161 | 0.036 | 0.036 | 64 | 1,800 | 0.04 |

1. Single Family = units at less than 8 dwelling units per net acre. 242 Single Family units.
2. Multi-Family detached = detached units at or above 8 dwelling units per net acre. 310 Multi-Family detached units.
3. Multi-Family attached = attached units at or above 8 dwelling units per net acre. 396 Multi-Family attached units.

# 3.5 Public Safety

## 3.5.1 FIRE & EMERGENCY SERVICES

The Roseville Fire Department (RFD) provides fire protection, suppression, emergency medical services, fire life and safety, along with hazardous materials management to the Project Area. At the time of HPCO Master Plan approval, the Project Area was within the service district of Station #2, located at 1398 Junction Boulevard. Fire Station 5, at 1565 Pleasant Grove Boulevard, was the closest fire station to the project site. However, the locations of these two existing fire stations would not meet the national standard of response time for emergency responders upon total build out, which is why a new fire station is proposed.

A 2.15 acre fire station site (Station No. 8) is designated within Campus Oaks at the southeast corner of Woodcreek Oaks Boulevard and Painted Desert Drive (Parcel CO-75). This site has been located In accordance with the RFD's risk assessment model to meet the City's response times, and has been configured to allow for efficient access, accommodate the City's planned facilities needs and allow flexibility for future growth. A concept plan of the fire station site is included as Figure 3-25. Once constructed, the Campus Oaks station will provide first response to the Project Area. Stations located in adjacent portions of the City will provide interim and secondary response.

Development within the Project Area will comply with applicable City fire protection standards and regulations.

## 3.5.2 POLICE PROTECTION

The Roseville Police Department provides primary law enforcement, crime prevention, traffic enforcement and animal control services to the Project Area. The Police Department provides all operations and patrols out of its central station located at 1051 Junction Boulevard. In addition, private security services are provided within the Hewlett-Packard Campus. Development will comply with applicable City safety and security standards.

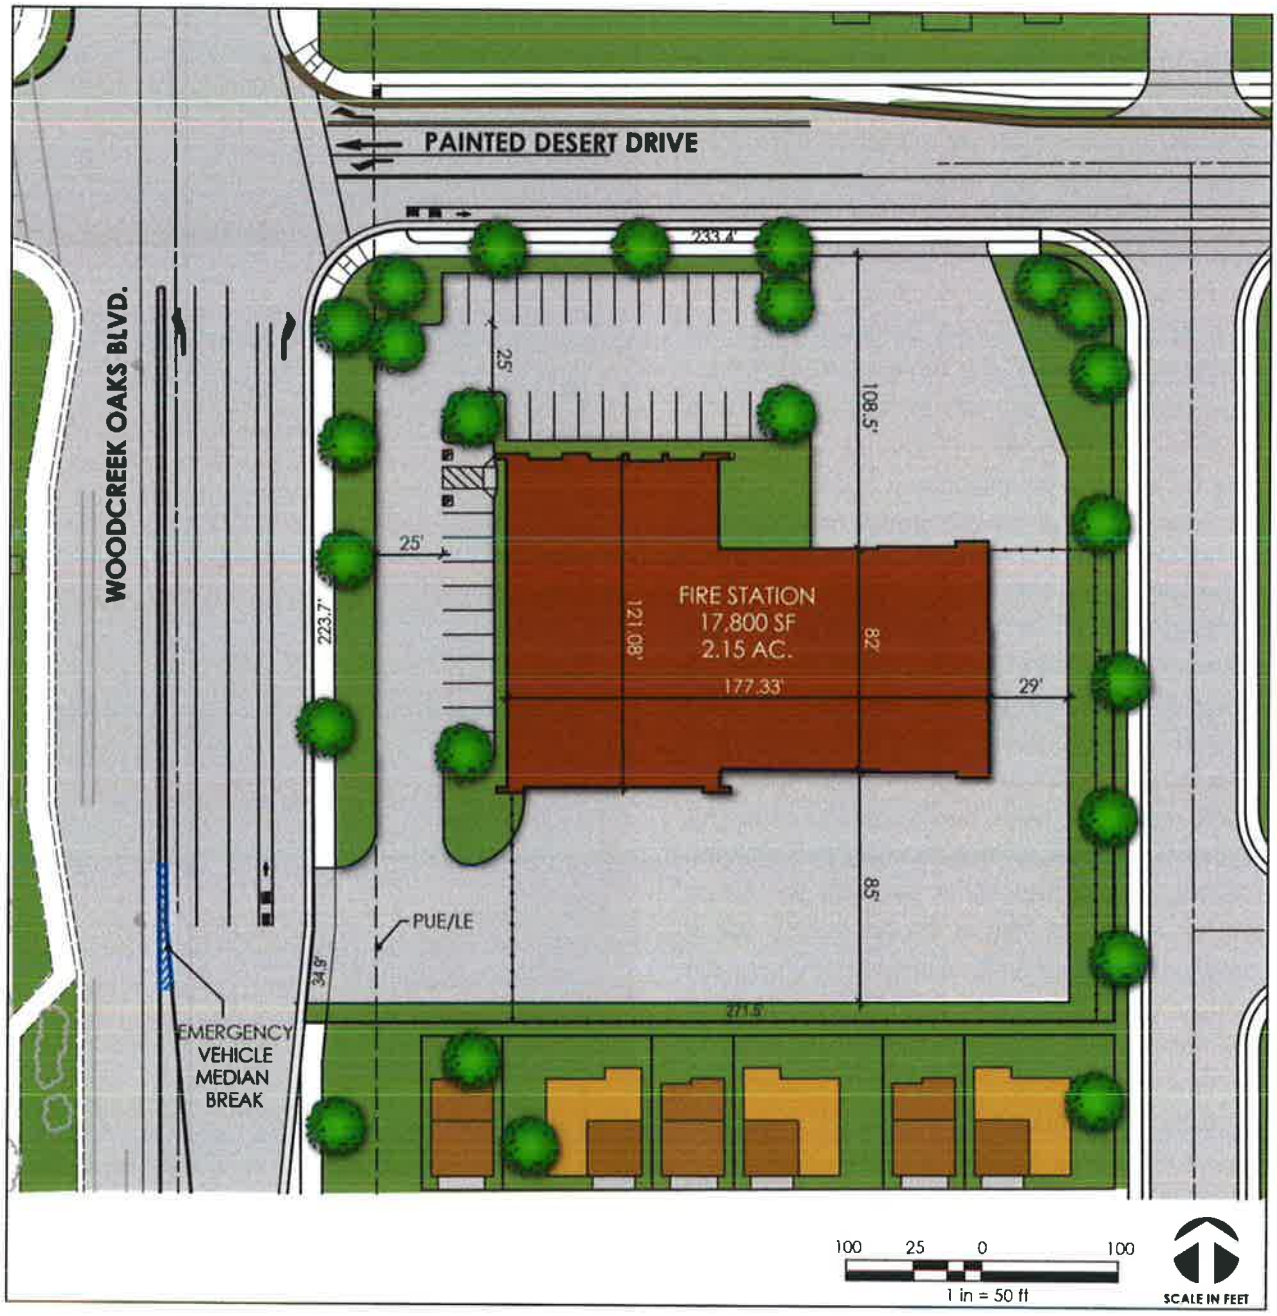

**FIGURE 3-25:** Fire Station Concept Plan (Parcel CO-75)

# Hewlett-Packard Campus Development Plan

CITY OF ROSEVILLE

A BLUEPRINT COMMUNITY

# 04 Hewlett-Packard Campus Development Plan

*The following establishes land use, zoning, infrastructure, intensity threshold, development guidelines and development review provisions for the Hewlett-Packard Campus. Covering the eastern 141.2 acres of the Project Area, the Hewlett-Packard Campus is planned for continued light industrial, private recreation and related development. A portion of the Campus is also designated for development as a City park. All development projects within the Hewlett-Packard Campus will be reviewed by the City to ensure compliance with applicable Master Plan, General Plan, Zoning Ordinance and Development Agreement requirements.*

## 4.1 Land Use and Zoning

The Hewlett-Packard Campus is partially developed with existing light industrial and office uses, along with parking lots, internal roadways, private recreation facilities, and a Roseville Electric substation. Capacity exists for additional development on vacant properties within the Campus, as well as potential intensification of existing buildings/uses. At buildout, total development on the Hewlett-Packard Campus is estimated to support approximately 1,200,000 square feet of Light Industrial use, as well as 8.7 acres of City park.

Land uses for the Hewlett-Packard Campus are summarized in Table 4-1 and reflected on Figure 4-1. The overall square footage allocation reflected on Table 4-1 is vested with the Hewlett-Packard property, as further regulated by the intensity threshold allocations described in Section 4.3 and the Hewlett-Packard Development Agreement.

**TABLE 4-1:** Hewlett-Packard Campus Land Use and Square Footage Allocations

| Parcel | Land Use | Gross Acres | Building Square Feet (sf) | | | | |
|---|---|---|---|---|---|---|---|
| | | | Existing | Future | Total Allocation | FAR Range | Avg. FAR |
| HP-1 | Light Industrial (LI) | 114.00 ac | 593,820[1] sf | 564,000 sf | 1,157,820 sf | 20-50% | 23% |
| HP-2 | Park & Recreation (P/R) | 8.70 ac[2] | | | | | |
| HP-3 | Light Industrial (LI) | 13.23 ac | | 42,180 sf | 42,180 sf | 20-50% | 7% |
| HP-4 | Light Industrial (LI) | 2.01 ac | | | | | |
| RE-1 | Public (P/QP) | 0.50 ac | | | | | |
| | Backbone Roads | 2.76 ac | | | | | |
| TOTAL | | 141.20 ac | 593,820 sf | 606,180 sf | 1,200,000 sf | | |

1. Existing development consists of Buildings R3 (126,220 sf), R4 (131,190 sf), R5 (158,760 sf) and R6 (177,650 sf).
2. Parcel HP-2 park acreage credited towards Campus Oaks. See Table 3-5.

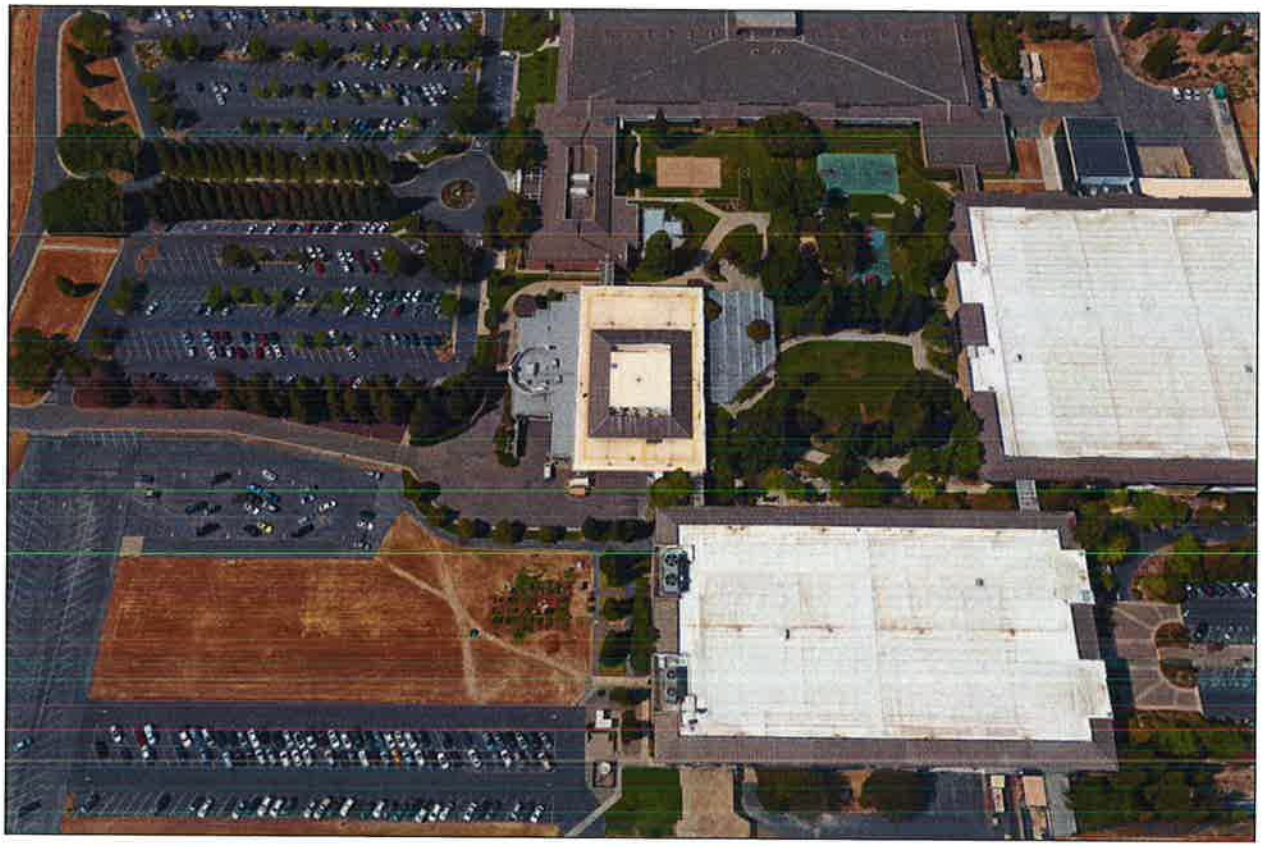
**FIGURE 4-1:** Hewlett-Packard Campus Land Use Diagram

## 4.1.1 SPECIFIC DESIGNATIONS & DISTRICTS

With the exception of the Roseville Electric Substation, all properties within the Hewlett-Packard Campus are designated with either the Light Industrial/Special Area Overlay (M-1/SA) or Parks & Recreation (PR) zoning district. Permitted uses within the PR District are consistent with the City's Zoning Ordinance general district regulations.

Permitted uses within the M1/SA District are modified from the Zoning Ordinance by the provisions of the Special Area Overlay District. This overlay allows for modification of the underlying general district regulations (including both permitted use types and development standards) to meet the unique needs of the site. This Master Plan contains all modifications to the general district regulations and is incorporated into the ordinance establishing the M1/SA District for the Hewlett-Packard Campus.

Use types listed in the Master Plan M1/SA and PR districts are defined in Section 19.08 of the Roseville Zoning Ordinance.



*Hewlett Packard Campus*

## LIGHT INDUSTRIAL

### Land Use Designation

Light Industrial (LI)

### Zoning District

*Light Industrial-Special Area Overlay (M1/SA)*

### Purpose

The M1/SA district is applied to the majority of the Hewlett-Packard Campus. This district identifies areas appropriate for industrial and related uses such as manufacturing, processing, assembly, high technology, research and development, office, and storage uses. These uses are intended to be compatible operating in relatively close proximity to adjacent commercial and residential uses.

### Permitted Uses

Table 4-2 identifies the permitted M1/SA use types and required approvals. Use types identified as principally permitted are subject only to the streamlined review and approval requirements contained in Section 4.5 of this Master Plan. Use types identified as administratively or conditionally permitted also require approval of an Administrative or Conditional Use Permit as specified in Article V of the Zoning Ordinance. Use types not listed as principally, administratively or conditionally permitted are prohibited.

The M1/SA district modifies permitted use types to limit those that have the potential to conflict with internal or adjacent uses, and/or are considered inconsistent with the desired campus character of the project. In general, all permitted industrial and transportation and communication use types have been retained. The use types permitted within the M1/SA District do not include outdoor manufacturing, but may include limited outdoor storage and the emission of a limited amount of noise, vibration, odor, dust, smoke, light, or other pollutants. Truck and other vehicle storage related to the primary industrial activity is permitted in designated storage areas. Uses prohibited include some civic, all residential and several commercial use types.

### Development Standards and Design Guidelines

As specified in Section 4.4 of this Master Plan. If a development standard is not specifically addressed in Section 4.4, it shall be governed by the applicable standards in Chapter 19.14 of the Roseville Zoning Ordinance or as established through Site Review approval pursuant to the Development Approval Process, Section 4.5.

## TABLE 4-2: Light Industrial/Special Area Overlay (M1/SA) Permitted Uses

| Use Type | M1/SA |
|---|---|
| **Agricultural and Open Space Use Types** | |
| Agricultural | P |
| Resource Protection & Restoration | P |
| Resource Related Recreation | P |
| **Civic Use Types** | |
| Community Assembly | CUP |
| Community Services | P |
| Essential Services | P |
| Public Parking Services | P |
| **Commercial Use Types** | |
| Automotive & Equipment | |
| Automotive Rentals | P |
| Commercial Parking | P |
| Broadcasting & Recording Studios | P |
| Business Support Services | P |

| CUP | Conditionally Permitted |

## PARK & RECREATION

### Land Use Designation

Park & Recreation (P/R)

### Zoning District

Park & Recreation (PR)

### Purpose

The Park and Recreation (P/R) district is applied to Parcel HP-2 which, in combination with adjacent Parcel CO-64, is planned as the Hewlett-Packard Greenway park. While within the Hewlett-Packard Campus, the development of Parcel HP-2 will be led by Campus Oaks in coordination with the City and Hewlett-Packard. Located between the employment uses on the Hewlett-Packard Campus and residential uses in Campus Oaks, the Hewlett-Packard Greenway provides a unique opportunity to integrate resident and employee interactions and activity. Facilities that may be provided include a skate park, dog park, trail connections, and facilities that support performance arts, farmers markets, arts and craft shows and other activities. Parcel HP-2 will be dedicated to and maintained by the City. Maintenance will be funded through a Community Facilities District – Public Services (Services CFD) to the extent permitted. Park credit will be applied to Campus Oaks (see Table 3-5).

### Permitted Uses

As specified in Chapter 19.16 of the Roseville Zoning Ordinance.

### Development Standards and Design Guidelines

As specified in Chapter 19.16 of the Roseville Zoning Ordinance and Section 3.4.1. of this Master Plan.

## 4.2 Infrastructure Components

Backbone mobility and utility systems are described in Sections 3.2 and 3.3 of this Master Plan. Included are provisions for roadways, the pedestrian and bicycle network, transit, potable water, recycled water, wastewater, drainage and flood control, electric, natural gas, voice/data communication and solid waste disposal. All proposed development projects within the Hewlett-Packard Campus will be reviewed to ensure compliance with the infrastructure and sequencing provisions described in this Master Plan, then current City improvement standards, and the project Development Agreement(s).

As development of the Hewlett-Packard Campus has occurred, much of the infrastructure required to support Campus development has already been constructed. Each component of the infrastructure system is designed/ constructed to accommodate development anticipated at buildout of the Project Area. For the Hewlett-Packard Campus, anticipated development is based on the square footage allocation defined in Sections 4.1 and 4.3.

Parcel specific improvements will continue to be constructed over time to coincide with the construction of the individual buildings within the Hewlett-Packard Campus. When an individual development project is submitted for City review, each infrastructure component will be evaluated for adequacy to serve the proposed project and for compatibility with the overall system, as outlined in the Hewlett-Packard Development Agreement.

Since the infrastructure components may be constructed incrementally, individual permits may be conditioned to require improvements needed to build an additional connection to directly serve an individual building.

# 4.3 Intensity Thresholds

The following identifies buildout traffic and utility demand thresholds and monitoring provisions for new development within the Hewlett-Packard Campus. These thresholds apply to Hewlett-Packard's parcels with designated Light Industrial land use, and exclude park parcel HP-2. The thresholds affect infrastructure and environmental analysis needs, as well as the ultimate limits of development. All proposed development projects within the Hewlett-Packard Campus will be reviewed to ensure compliance with the identified thresholds.

## 4.3.1 BUILDOUT INTENSITY THRESHOLDS

Buildout square footage estimates have been generated for new development within the Hewlett-Packard Campus (See Table 4-1). The projected square footage or acreage, as appropriate, has been multiplied by generation/demand factors for each of the key service/infrastructure components to identify buildout needs. For the purposes of this Master Plan, these key components include traffic, water, wastewater and electricity. The generation/demand factors utilized are a combination of standard demand rates and actual rates based on existing site development at the time of initial Master Plan approval (1996), as well as the thresholds identified in the project Development Agreement(s).

While the square footage estimates provide a general base for monitoring purposes, it is the traffic and utility demand factors that dictate the buildout development thresholds and infrastructure/service requirements for the project. Inconsistency with the thresholds could modify infrastructure and resource needs, as well as trigger the requirement for additional environmental analysis.

Table 4-3 provides the projected generation/demand factors and buildout intensity thresholds for development within the Hewlett-Packard Campus. These intensities are vested and run with the property. Any unused square footage and intensity assigned to the Hewlett-Packard Campus shall revert to the City upon termination of the project Development Agreement. The City, at its discretion, may allocate any unused intensity elsewhere within the larger Master Plan Area.

**TABLE 4-3:** Estimated Buildout Intensity Threshold Allocations

| | Light Ind. Gross Acres | Light Ind. Gross Square Feet | Traffic | | Water | | Wastewater | | Electric | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Trip Rate (Total PM Peak Hour trips per 1,000 sf) | PM Peak Hour Trips | Demand Factor (gallons/ day/acre) | Max Daily Demand | Demand Factor (gallons/ day/acre | Peak Daily Flow | Demand Factor (MW/ acre) | Peak Annual Demand |
| Hewlett-Packard | 129.24 ac | 1,200,000 sf | 1.14[1] | 1,368 trips | 2,598[2] | 0.67 mgd | 1,700[3] | 0.63 mgd | 0.079[4] | 8.08 MW |

1. Standard Light Industrial trip rates have been adjusted upwards based on actual traffic counts of existing Hewlett-Packard development (10/95).
1. Standard Light Industrial water demand factors and a max day factor of 2.0.
2. Standard Light Industrial wastewater generation factors with a factor of safety of 2.0 and Peaking Factor of 2.85.
4. Standard Light Industrial electricity demand factor has been adjusted upwards to reflect existing and anticipated demand.

## 4.3.2 THRESHOLD MONITORING

As individual development projects are submitted, project square footage or acreage will be multiplied by the average generation/demand factors and monitored to ensure that it falls within the cumulative thresholds for new development within the Hewlett-Packard Campus as identified on Table 4-3.

It is recognized that the generation/demand factors are averages. Development projects may be above or below the average factor depending on the composition and operations of the uses proposed. It is also recognized that, over time, the mix of uses may vary and shift. The average factors take into account a general mix of uses and, in most cases, should provide an adequate overall long-term measure of project generation/demand rates and impacts.

Should a development project be proposed that has an unusually high generation/demand rate, additional analysis may be required. This analysis will include consideration of cumulative demand within the Hewlett-Packard Campus. If monitoring indicates that actual cumulative factors are above or below the estimated averages included on Table 4-3, these average factors may be adjusted subject to City approval.

Development projects that place a higher than anticipated demand on service capacity could result in attaining a particular service threshold prior to reaching the total anticipated buildout square footage. This could impact improvement needs or limit the projected square footage of development. Conversely, uses that place a lower demand than anticipated on service capacity could result in excess capacity or the ability to develop square footage over and above estimated buildout levels.

While it is not possible to predict the specific operational characteristics of each circumstance, the following general parameters can be used as a guide to help identify when additional analysis may be required. Actual determinations and specific analysis requirements will be made by the City on a case by case basis as development projects are submitted.

### *Traffic*

Additional short term site specific traffic analysis may be required for all new development of the project site. Long term analysis may be required when a development project's total PM peak hour traffic generation exceeds the total allocated threshold (Table 4-3) trip generation based on the average PM trip rate for the combined site by 50 trips or more. When determining whether a short or long term traffic study is required, the City shall consider the following criteria:

- Roadway volumes on streets adjacent to the Project Area;
- Impacts to local or other signalized intersections;
- Existing and projected levels of service at site access points;
- Existing and projected queue lengths at driveways, right turn lanes and left turn pockets; and
- Impacts to safe and efficient traffic operations.

When a traffic study is required, the analysis shall include, but not be limited to, the following:

- Ingress and egress queue lengths at existing and proposed security gates (if applicable);
- Level of service determinations at select intersections;
- Levels of service at existing and proposed access points;
- Roadway volumes on streets adjacent to the site and other local roadways that may be affected;
- Estimated trip generation rates;
- A comparison to the traffic analysis in the Master Plan EIR, subsequent Master Plan Addendum, and City's Capital Improvement Program; and,
- Impacts on required improvements including the timing of planned improvements.

The traffic study shall identify mitigation measures that can be implemented by the landowner to achieve General Plan levels of service and efficient circulation on roadways in the vicinity of the Project Area.

### *Water/Wastewater*

Additional analysis and/or information regarding the water and wastewater service requirements of a proposed project may be required when any of the following occur:

- A proposed development project's maximum daily water or wastewater demand exceeds the demand factor;
- A significant industrial user/discharger applies for connection to either the water or wastewater system; or,

- An industrial user proposes to locate within the Hewlett-Packard Campus with water demands of 2,598 gallons per acre per day or more (average) and/or wastewater generation rates of 2,000 gallons per acre per day or more (average).

Additional water and wastewater analysis will include the following information:

**Water**

- Average day demand, maximum day demand, and peak hour demand;
- Hydraulic analysis of the proposed demands and their impacts to the City water distribution system; and,
- Required improvements necessary to accommodate new demands and proposed timelines for implementation.

**Wastewater**

- Average day demand, maximum day demand, and peak hour demand;
- Impacts of additional wastewater on collection and treatment facilities;
- Compliance with the Regional Wastewater Master Plan;
- Required improvements necessary to accommodate additional demands and timelines for implementation; and,
- Anticipated level of chemical or biological demand, and impacts to the biological processes at the wastewater treatment plant.

## *Electric*

Additional analysis and/or information regarding the electric service requirements of a proposed project may be required when any of the following occurs:

- A proposed development project's total annual electric demand exceeds the peak demand of the prior year by 5% or more; or,
- Unique or unusual reliability requirements are identified in the project proposal.

Additional analysis and/or information required to be submitted may include:

- Peak demand and total energy consumption;
- Timely notice and details of any special equipment or infrastructure needs;
- Reliability requirements; and,
- Cost of outage information.

# 4.4 Development Guidelines

The following development guidelines will be applied to new development within the Hewlett-Packard Campus. A discussion of existing design guidelines is followed by a discussion of additional guidelines, standards, or conditions specific to the Hewlett-Packard Campus. All proposed development projects within the Campus will be reviewed to ensure compliance with the objectives of the applicable design guidelines and development standards.

## 4.4.1 RELATIONSHIP TO EXISTING GUIDELINES

Two existing documents contain design guidance applicable to development within the Hewlett-Packard Campus. They are:

- North Roseville Area Design Guidelines – Adopted June 22, 1992
- Community Design Guidelines – Amended March 18, 2008

These documents establish design goals and provide an indication of the type of treatment that is desired. The documents address site and building design issues such as:

- Street landscape requirements
- Entry and focal points
- Buffering of adjacent residential uses
- Required setbacks
- Site grading
- Fencing and screening
- Treatment of storage, loading, and refuse collection areas
- On-site circulation, parking, and access
- On-site landscaping and irrigation
- Architectural guidelines
- Signage guidelines
- Lighting guidelines

## 4.4.2 ADDITIONAL STANDARDS & GUIDELINES

### *Roadways*

Cross sections and required landscaped setbacks along public roadways are specified in Section 3.2 of this Master Plan. All private roads shall be designed and constructed to City standards.

### *Bikeways and Pathways*

Bikeways are an integral component of the existing Campus and will be extended to each new building as they develop. Bikeways will avoid truck traffic routes and other high traffic areas where feasible. Bikeways will be planned as a primary element of site circulation to provide direct access to

the primary entry of each building and employee recreation area. Security gates may be used to control access to the light industrial areas. The design of the bikeway and pedestrian security gates is an internal design consideration to be addressed by the Campus users. Where bikeways are located away from streets, but in the public right of way, they will meet the standards of a Class I bikeway as defined in the City Bikeway Master Plan.

## *Landscaping*

The landscaping of Foothills Boulevard is addressed in the North Roseville Area Design Guidelines. Landscaping along HP Way will be coordinated with landscaping in Campus Oaks to promote consistent treatment along these roadways.

In addition to landscaping along roads, it is intended that the Hewlett-Packard Campus be distinguished by an internal landscaping theme. The theme includes broad canopy trees in parking areas and in the open spaces between buildings to provide shade and a distinctive character to the Campus. In addition the distinctive double rows of tall upright trees in the existing Campus may be extended to establish a strong linear form traversing the Campus to serve as a visual landmark and orientation feature.

## *Developed Edge Adjacent to Residential*

The majority of the existing and planned light industrial uses within the Hewlett-Packard Campus are separated from planned residential uses within Campus Oaks by the Hewlett-Packard Greenway Park (Parcels CO-64 and HP-2). A small portion of the Campus (Parcel HP-3) is immediately adjacent to planned residential uses. While this portion of the Campus is currently developed with private recreational uses, the potential exists that it could be redeveloped with light industrial uses in the future.

To ensure adequate buffering should light industrial development be approved, the land use diagram (Figure 4-1) reflects a 50 foot landscape buffer on Parcel HP-3, adjacent to residential uses within Campus Oaks. This buffer may include a solid masonry wall, dense evergreen landscaping, berming and other screening/buffering elements consistent with Sections 2.3 and 4.6.5.1 of the North Roseville Area Design Guidelines. The precise treatment of the buffer and location/orientation of development would be defined as part of the design review process for the potential future light industrial use.

### *Developed Edge Adjacent to Open Space*

The open space areas contiguous to formal landscaped or paved areas present a special condition. The transition between formal areas and open space should be visually pleasing. The formal landscaping, utilizing native materials, should provide a gentle transition by using low ground covers rather than tall, dense shrubs. A tree line is permissible, but should have an open canopy and spacing between trees that permits a view toward the open space. Dense conifers and similar massing of trees should be avoided except to frame or block a particular view. A post and cable fence will demarcate the edge of the open space area and discourage vehicle entry to the open space.

Surface run-off drainage from the landscaped areas can be detrimental to the natural conditions in the open space. Surface water will be controlled through the design of the planting, irrigation and drainage systems in the landscape areas adjacent to open space. Native, drought tolerant plants are required to limit the amount of irrigation required and to provide a transition between the natural open space areas and the more formal landscaping near buildings. Any outfalls that direct stormwater to the preserve shall comply with the Hewlett-Packard Preserve O&M Plan, deed restrictions, and the City of Roseville Open Space Preserve Overarching Management Plan as required by the Clean Water Act Section 404 permit, and the then applicable MS4 permit.

### *Conceptual Grading*

Earthwork operations within the Hewlett-Packard Campus are expected to follow existing terrain. Generally, no more than an average two or three feet of cut or fill will occur within the Campus boundaries. Gentle slopes of one to two percent will be created to allow for adequate drainage improvements and still allow for minor grading at level building pad sites.

Private road grades within the existing Campus are constructed with less than a three percent centerline gradient. All proposed drives are planned to continue this standard. Minor changes in the standard may occur to accommodate local drainage conditions.

## 4.5 Streamlined Development Review Process

Measures have been incorporated into the HPCO Master Plan to allow for a streamlined City administrative review and approval process for development projects within the Light Industrial-Special Area (M1/SA) zone district. Separate permits may be required by other agencies such as the US Army Corps of Engineers, California Dept. of Fish and Wildlife, and the Air Pollution Control District (See Section 6 of this Master Plan for additional details).

### 4.5.1 ADMINISTRATIVE DESIGN REVIEW PERMIT

The Administrative Design Review Permit process will be used to review and approve development of permitted uses within the M1/SA District. Evaluation and approval of the administrative Design Review Permit will be performed in accordance with the procedures outlined in Article V of the City Zoning Ordinance and as described here.

The decision to issue an administrative Design Review Permit will be based on a determination of a development proposal's consistency with this Master Plan. This determination shall be made by the approving authority (Development Services Director), and will be based on the following factors:

- Land Use and Zoning
- Master Plan Components
- Intensity Thresholds and Infrastructure Sequencing
- Design Guidelines and Development Standards
- EIR/Addendum Mitigation Measures
- Development Agreement Provisions

### 4.5.2 DIRECTOR REFERRAL

If the Development Services Director determines that the proposal is inconsistent with or gives rise to issues that were not addressed by this Master Plan, the proposed project may be referred to the Planning Commission as the appropriate approving authority.

# Campus Oaks Development Plan

CITY OF ROSEVILLE

A BLUEPRINT COMMUNITY

# 05 Campus Oaks Development Plan

*The following establishes land use, zoning, design guidelines, affordable housing and density transfer provisions for Campus Oaks. Covering the western 234.53 acres of the Project Area, Campus Oaks is currently undeveloped and planned for a mix of tech/business park (LI), office, commercial, residential, park and recreation, open space and public uses. All development projects within Campus Oaks will be reviewed by the City to ensure compliance with applicable Master Plan, General Plan, Zoning Ordinance and Development Agreement requirements.*

## 5.1 Land Use and Zoning

Campus Oaks is organized as an integrated mixed use community accommodating:

- A range of new business and employment opportunities
- A diversity of comfortable, well connected and walkable neighborhoods
- A vibrant Town Center where residents, employees and passers-by can shop, eat, and meet their everyday needs
- A network of parks and open spaces that enhance community interaction, recreation, and sense of place

The inclusion of Campus Oaks within the larger Master Plan Area supports the desires of Hewlett-Packard to locate, build and operate its business within a community that provides for convenient relationships between employees and nearby housing opportunities, commercial services, and open-space and recreational amenities.

Campus Oaks land uses are summarized in Table 5-1 and illustrated on Figure 5-1. A breakdown of land use and zoning by parcel is identified in Table 5-2.

## TABLE 5-1: Campus Oaks Land Use Summary

| Land Use | Gross Acres | Dwelling Units (du) | | Square Feet (sf) | |
|---|---|---|---|---|---|
| | | Allocated Units | Density (du/ac) | Allocated Square Feet | FAR |
| **EMPLOYMENT AND COMMERCIAL USES** | | | | | |
| Tech/Business Park (T/BP-LI) | 32.85 ac | | | 300,000 sf | 21% |
| Business Professional (BP) | 5.54 ac | | | 60,000 sf | 25% |
| Community Commercial (CC) | 19.29 ac | | | 170,000 sf | 20% |
| ***Sub-Total*** | ***57.68 ac*** | | | ***530,000 sf*** | ***21%*** |
| **RESIDENTIAL USES** | | | | | |
| Low Density Residential (LDR) | 46.76 ac | 242 du | 5.2 du/ac | | |
| Medium Density Residential (MDR) | 35.60 ac | 310 du | 8.7 du/ac | | |
| High Density Residential (HDR) | 21.97 ac | 396 du | 18.0 du/ac | | |
| ***Sub-Total*** | ***104.33 ac*** | ***948 du*** | ***9.1 du/ac*** | | |
| **PARK, OPEN SPACE & PUBLIC USES** | | | | | |
| Parks (P/R) | 10.74 ac | | | | |
| Paseo (P/R) | 2.25 ac | | | | |
| Open Space (OS)[1] | 46.35 ac | | | | |
| Public (P/QP) | 2.47 ac | | | | |

1. Parcel HP-2 park acreage credited towards Campus Oaks. See Tables 4-1 and 3-5.

## 5.1.1 SPECIFIC LAND USE DESIGNATIONS & ZONING DISTRICTS

Land uses are implemented through the zoning district applied to each parcel. This includes the select application of the Development Standard (DS) and Special Area (SA) overlay districts to customize development standards and allowed use types to address Campus Oaks' unique opportunities and objectives.

### *Employment and Commercial Uses*

#### TECH/BUSINESS PARK (T/BP-LI)

**Floor Area Ratio Range**

20% to 50% gross floor area to gross site area

**Land Use Description**

The Tech/Business Park (T/BP-LI) land use designation is a variant of the LI designation unique to Campus Oaks. The intent of this district is to enhance the ability of the Project Area to attract a range of employment uses, including corporate users, in a highly amenitized business park setting. The T/BP-LI designation provides for a mix of uses that are compatible with, and act as a transition between, the light industrial uses on the Hewlett-Packard Campus and the commercial and residential uses within Campus Oaks. Allowed use types include professional offices, light manufacturing, research services, and light wholesale and distribution.

**Applied Zoning District**

MP/SA - Industrial/Business Park/Special Area Overlay.

**Permitted Use Types**

As specified in Section 5.2. The Special Area (SA) overlay district has been applied to ensure a compatible mix of employment generating uses.

**Development Standards**

As specified in the City of Roseville Zoning Ordinance and the Campus Oaks Design Guidelines (Section 5.4).

**Design Guidelines**

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines.

## COMMUNITY COMMERCIAL (CC)

### Floor Area Ratio Range

20% to 40% gross floor area to gross site area

### Land Use Description

The Community Commercial (CC) land use designation provides a broad range of retail goods and services to meet resident's and employee's daily needs. Uses may include grocery stores, restaurants, entertainment venues, retail sales, lodging and personal services. All CC uses are located within the Campus Oaks Town Center. Oriented along both sides of HP Way at Blue Oaks Boulevard, the CC uses help to create an entry into the Project Area.

### Applied Zoning District

CC – Community Commercial.

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

### Development Standards

As specified in the City of Roseville Zoning Ordinance.

### Design Guidelines

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines (Section 5.4).

## BUSINES PROFESSIONAL (BP)

### Floor Area Ratio Range

20% to 40% gross floor area to gross site area

### Land Use Description

The Business Professional (BP) land use designation provides for new employment and service opportunities. BP uses are sited at the southeast corner of Woodcreek Oaks and Blue Oaks Boulevards to maximize visibility and access. Uses may include professional offices, medical services, and business support services. All BP uses are located within the Campus Oaks Town Center.

### Applied Zoning District

BP – Business Professional.

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

### Development Standards

As specified in the City of Roseville Zoning Ordinance.

### Design Guidelines

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines (Section 5.4).

## *Residential Uses*

### LOW DENSITY RESIDENTIAL (LDR)

**Density Range**

0.5 to 6.9 dwelling units per gross acre

**Land Use Description**

The Low Density Residential (LDR) land use designation supports detached single-family homes on conventional and small lots. Lot sizes typically range from 4,500 to 6,000 square feet and could be smaller or larger depending on site configuration/constraints and neighborhood design upon approval by the City. A variety of detached, single-family residential housing types are encouraged in this density range.

**Applied Zoning Districts**

R1/DS - Single Family Residential/ Development Standard Overlay; and, RS/DS - Small Lot Residential/ Development Standard Overlay.

**Permitted Use Types**

As specified in the City of Roseville Zoning Ordinance.

**Development Standards**

As specified in the City of Roseville Zoning Ordinance and in Section 5.3. The Development Standard (DS) overlay district has been applied to all LDR uses to allow for variation in development standards and inspire a wide range of innovative residential product types.

**Design Guidelines**

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines (Section 5.4).

## MEDIUM DENSITY RESIDENTIAL (MDR)

### Density Range

7.0 to 12.9 dwelling units per gross acre

### Land Use Description

The Medium Density Residential (MDR) land use designation accommodates both single-family detached and attached residential units. Lot sizes typically range from 1,500 to 4,500 square feet and could be smaller or larger depending on site configuration/constraints and neighborhood design upon approval by the City. Within this density range, a wide range of front and alley loaded product types are encouraged including varied small lot, court oriented, cluster, duet/half-plex and townhome designs.

### Applied Zoning District

RS/DS - Small Lot Residential/ Development Standard Overlay.

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

### Development Standards

As specified in the City of Roseville Zoning Ordinance and Section 5.3. The Development Standard (DS) overlay district has been applied to all MDR uses to allow for variation in development standards and inspire a wide range of innovative residential product types.

### Design Guidelines

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines (Section 5.4).

## HIGH DENSITY RESIDENTIAL (HDR)

### Density Range

13.0+units per acre gross Acre

### Land Use Description

The High Density Residential (HDR) land use designation accommodates both detached and attached residential units. Within this density range, a wide range of front and alley loaded product types are encouraged including varied small lot, townhome, row house, courtyard, apartment and condominium designs.

### Applied Zoning District

R3/DS – Attached Housing /Development Standard Overlay.

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

### Development Standards

As specified in the City of Roseville Zoning Ordinance and Section 5.3. The Development Standard (DS) overlay district has been applied to all HDR uses to allow for variation in development standards and inspire a wide range of innovative residential product types.

### Design Guidelines

As specified in the Community Design Guidelines and the Campus Oaks Design Guidelines (Section 5.4).

## *Park, Open Space and Public Uses*

### PARK (P/R)

#### Land Use Description

The Parks and Recreation (P/R) land use designation is applied where developed parks/paseos are planned. An integrated network of accessible active/formal/programmable and passive/informal/self-directed facilities is provided to support recreational activities and social gathering. Included are two neighborhood parks (Campus Oaks Park and Park Couplet), a citywide/ neighborhood park (HP Greenway) and two improved paseos. Parks and recreation facilities are further described in Parks, Open Space and Schools (Section 3.4). Land use for the eastern portion of the HP Greenway (Parcel HP-2) is discussed in Section 4.1.1 of this Master Plan. Maintenance will be funded through a Community Facilities District – Public Services (Services CFD) to the extent permitted.

#### Applied Zoning District

PR – Parks and Recreation.

#### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

#### Development Standards

As specified in the City of Roseville Zoning Ordinance.

#### Design Guidelines

As approved by the City for individual parks. Conceptual park plans are shown in Sections 3.4 of this Master Plan.

## OPEN SPACE (OS)

### Land Use Description

The Open Space (OS) land use designation is applied to lands which are environmentally sensitive or otherwise significant due to habitat, floodplain or other natural features. Campus Oaks incorporates the City owned Open Space Preserve (Parcel CO-83) as well as new additions adjacent to the Preserve (Parcels CO-81 and CO-82). The open space encompasses a portion of the South Branch of Pleasant Grove Creek, its associated floodplain, natural and created wetlands, oak woodlands, and annual grasslands. The expansion of trails is proposed through the open space to allow for off-site trail connections and promote passive recreation, environmental stewardship and education as allowed by the 404 permit. Open space is further described in Parks, Open Space and Schools (Section 3.4).

### Applied Zoning District

OS – Open Space

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance and as allowed by the existing 404 permit.

### Development Standards

As specified in the City of Roseville Zoning Ordinance.

### Design Guidelines

As approved by the City in compliance with applicable deed restrictions, the Hewlett-Packard Preserve O&M Plan, and the City of Roseville Open Space Preserve Overarching Management Plan. A conceptual plan for the Open Space Preserve is shown in Section 3.4 of this Master Plan.

## PUBLIC (P/QP)

### Land Use Description

The Public/Quasi-Public (P/QP) land use designation accommodates public serving uses and facilities. Campus Oaks includes two P/QP sites: Parcel CO-75 housing a planned fire station; and Parcel CO-76 for a planned groundwater pump back/blending station. The pump station is discussed in more detail in Utilities (Section 3.3) and the fire station (including a concept plan) in Public Safety (Section 3.5).

### Applied Zoning District

P/QP – Public/Quasi-Public

### Permitted Use Types

As specified in the City of Roseville Zoning Ordinance.

### Development Standards

As specified in the City of Roseville Zoning Ordinance.

### Design Guidelines

As approved by the City and as specified in the Campus Oaks Design Guidelines (Section 5.4).

## 5.2 Permitted Use Types

Permitted use types within Campus Oaks are generally consistent with those allowed for by the corresponding general zone districts as defined by the City of Roseville Zoning Ordinance. The exception is for the Industrial/Business Park (MP) district where the SA overlay district has been applied. The SA overlay district allows the permitted use types and development standards to be modified from those specified by the underlying general zone district.

The Industrial/Business Park/Special Area Overlay (MP/SA) district is intended to provide for a unique transitional employment center between the light industrial uses on the Hewlett-Packard Campus, and the commercial and residential uses planned within Campus Oaks. Allowed use types are refined to support new employment and business opportunities, while ensuring compatibility with adjacent uses. The MP/SA district has eliminated those use types that have the potential to conflict with adjacent uses, and/or are inconsistent with the desired business park setting. Consistent with the City's Zoning Code, allowed MP/SA use types will not "result in the emission of any appreciable amount of visible gasses, particulates, steam, heat odor, vibration, glare, dust, or excessive noise and can be conditioned to be compatible when operating in close proximity to commercial and residential uses".

Table 5-3 identifies allowed use types within the Campus Oaks MP/SA district.

## TABLE 5-3: MP/SA Permitted Uses

| Use Type | MP/SA |
|---|---|
| **Civic Use Types** | |
| Community Assembly | CUP |
| Community Services | P |
| Essential Services | P |
| College and University | CUP |
| **Residential Use Types** | |
| Caretaker/Employee Housing | CUP |
| **Commercial Use Types** | |
| Broadcasting/Recording Studios | P |
| Business Support Services | P |
| Eating & Drinking Establishments | |
| Convenience | P[1] |
| Offices, Professional | P |
| Specialized Education & Training | |
| Vocational Schools | P |
| Specialty Schools | P |
| **Industrial Use Types** | |
| Day Care Center, Secondary (employee only) | CUP |
| Light Manufacturing | P |
| Printing & Publishing | P |
| Research Services | P |
| Wholesaling & Distribution, Light | P |
| **Transportation and Communication Use Types** | |
| Intermodal Facilities | CUP |
| Telecommunication Facilities | P/A/ CUP |

| | |
|---|---|
| MP/SA | Industrial/Business Park/Special Area Overlay District |
| P | Principally Permitted |
| A | Administratively Permitted |
| CUP | Conditionally Permitted |

1. Permitted as an ancillary use to the primary T/BP-LI uses.

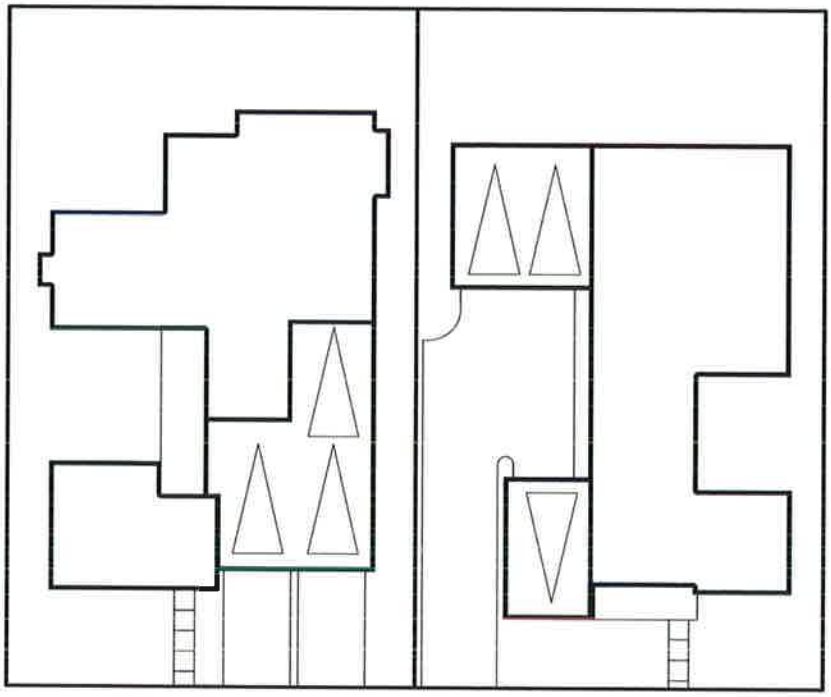
## 5.3 Development Standards

The DS overlay has been applied in combination with the general zone districts to all LDR, MDR and HDR land uses within Campus Oaks. The DS overlay allows the development standards (e.g., lot area, setbacks and building heights) to be modified from those specified by the underlying general zone districts. For Campus Oaks, the intent is to allow flexibility to accommodate and encourage a wide range of residential building types and innovative designs appealing to different economic and life-style segments.

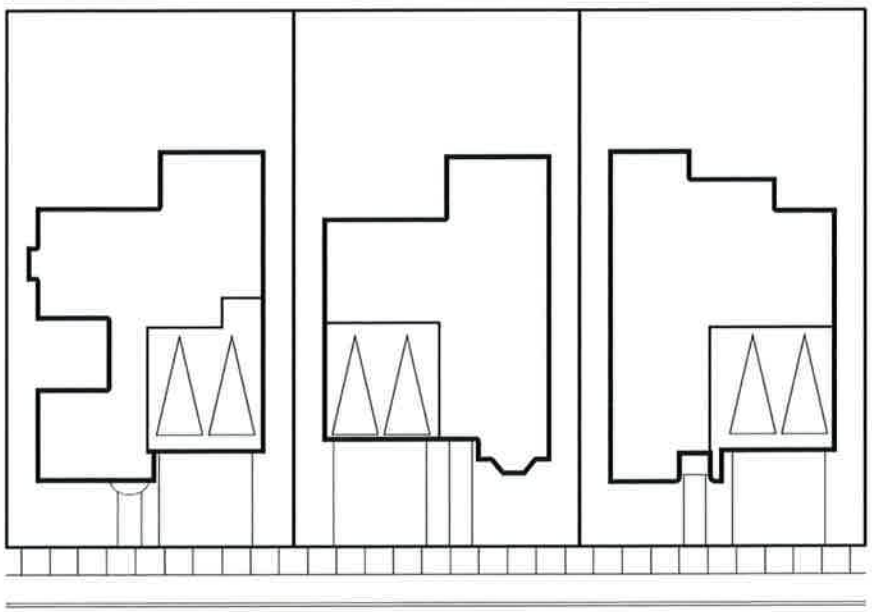
Precise development standards for the Single Family Residential/Development Standard Overlay (R1/DS), Small Lot Residential/Development Standard Overlay (RS/DS) and Attached Housing/ Development Standard Overlay (R3/DS) districts will be established as part of the subsequent Campus Oaks Design Guidelines discussed in Section 5.4. A Design Review for Residential Subdivision (DRRS) is required for all Compact Residential Development projects at 7 dwelling units per acre and above as well as specified by the City Zoning Ordinance.

Included in this section are conceptual elevations, lot sizes and plot plans to illustrate the character and layout of potential building types that could be constructed within Campus Oaks subject to approval by the City during the DRRS and small lot tentative map stage. Figure 5-2 provides an illustrative of how the varied building types may be applied. The building types and illustratives are examples and are conceptual. It is anticipated that Campus Oaks will also accommodate additional building types.

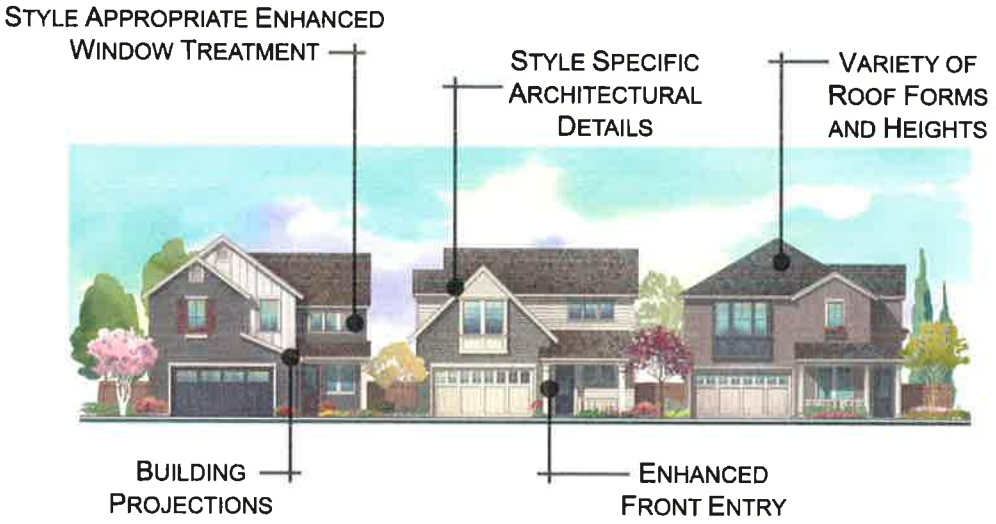
**FIGURE 5-2:** Campus Oaks Illustrative Plan (Conceptual Only)

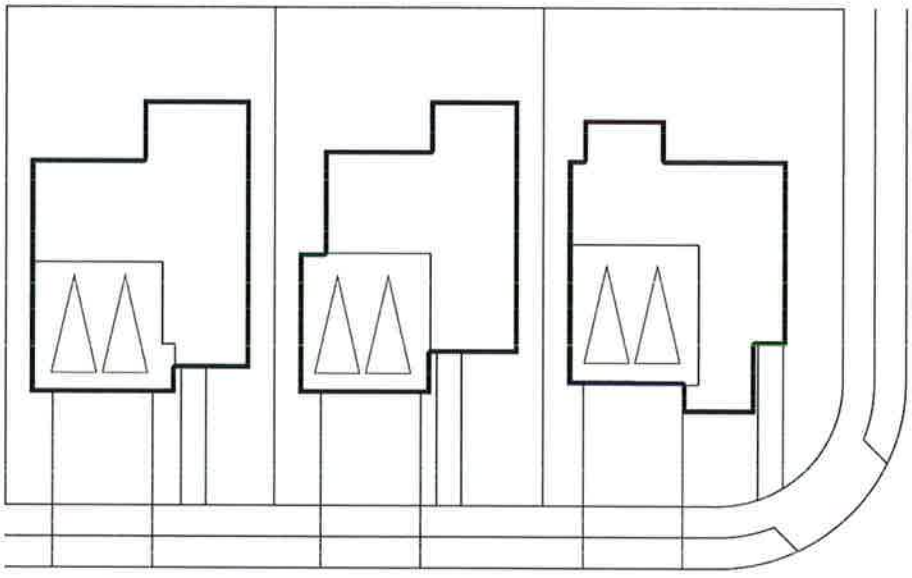


**CONCEPTUAL BUILDING TYPE A & LOT SIZE:** Single-Family Detached Front Loaded (60'x100') (subject to future City approvals)



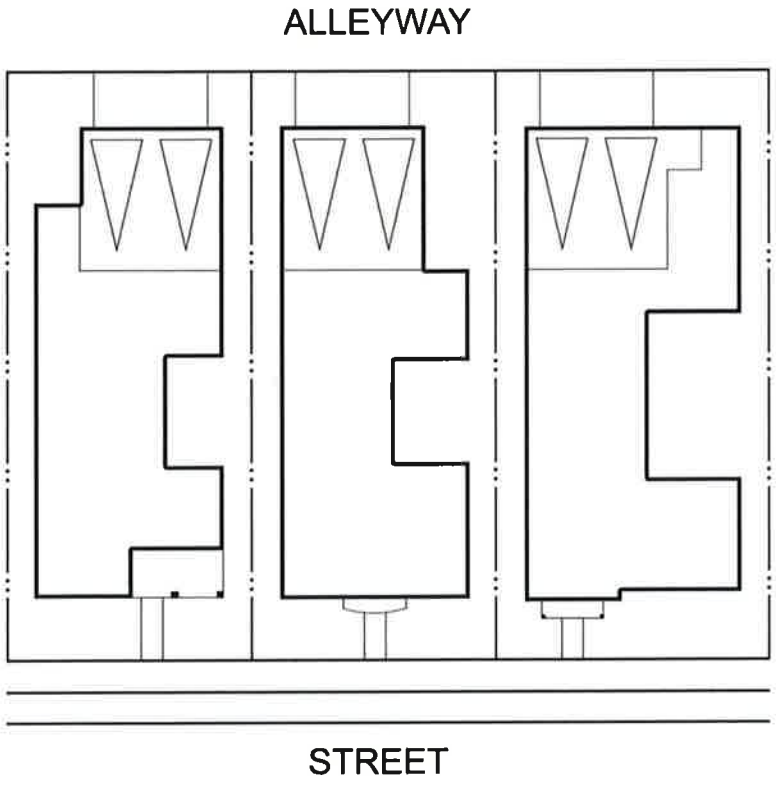
**CONCEPTUAL BUILDING TYPE B & LOT SIZE:** Single-Family Detached Front Loaded (50'x100') (subject to future City approvals)



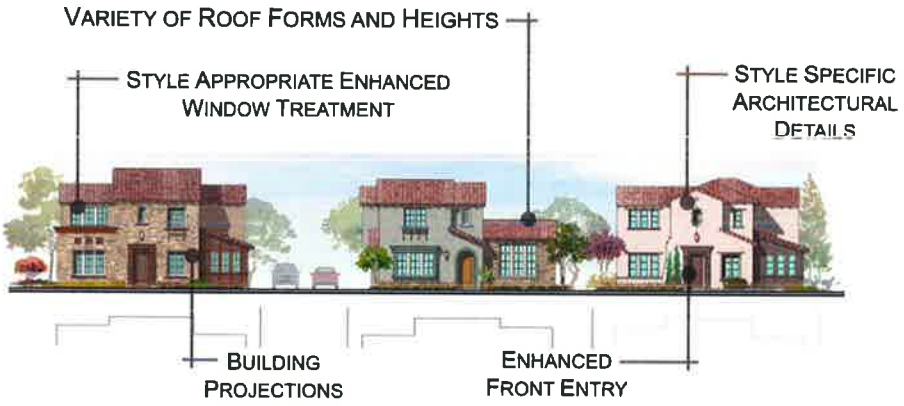


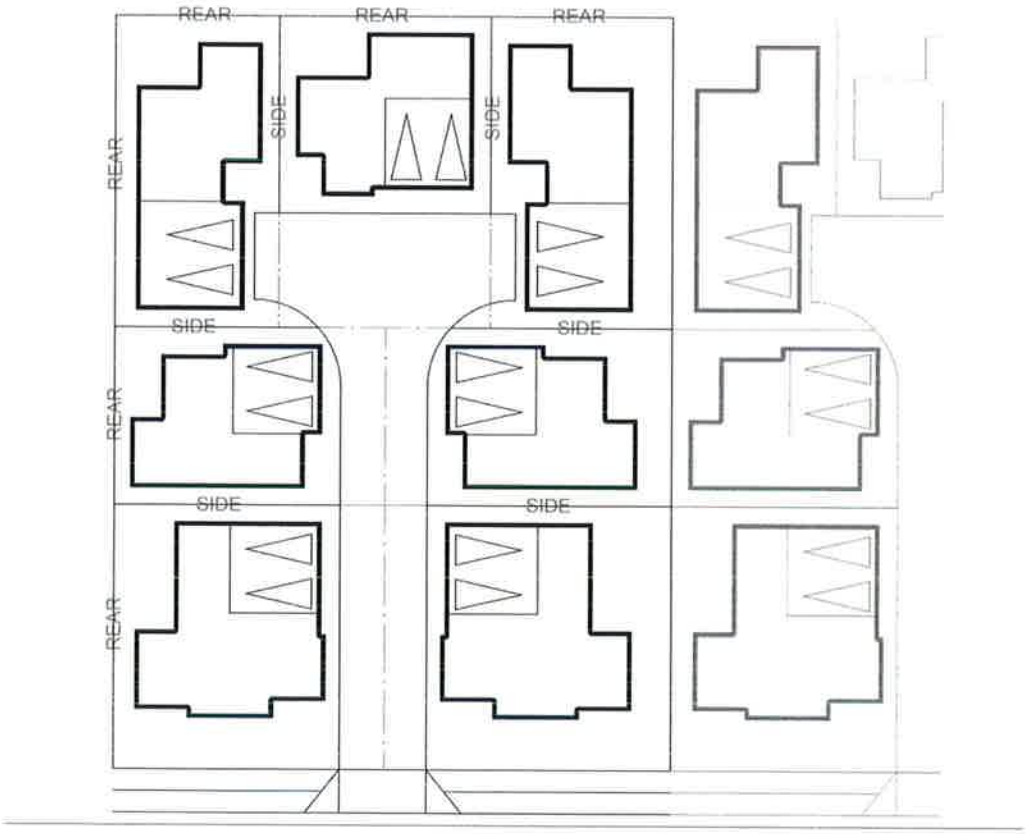
STREET

**CONCEPTUAL BUILDING TYPE C & LOT SIZE:** Single-Family Detached Front Loaded (40'x80') (subject to future City approvals)

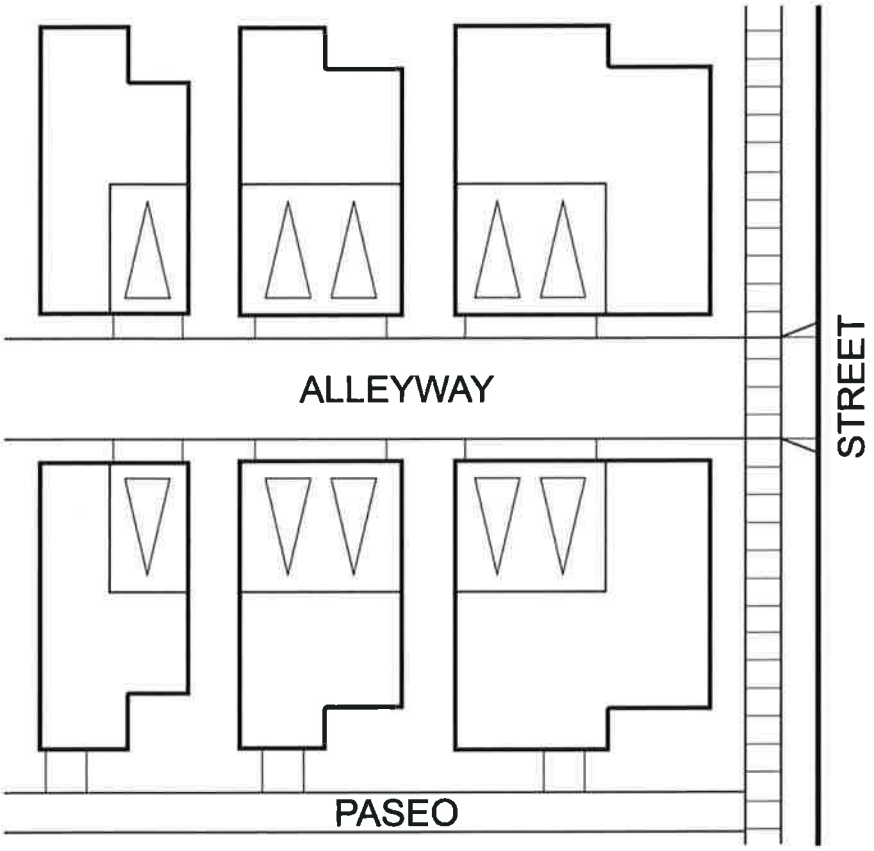


**CONCEPTUAL BUILDING TYPE D & LOT SIZE:** Single-Family Detached Alley Loaded (38'x80') (subject to future City approvals)

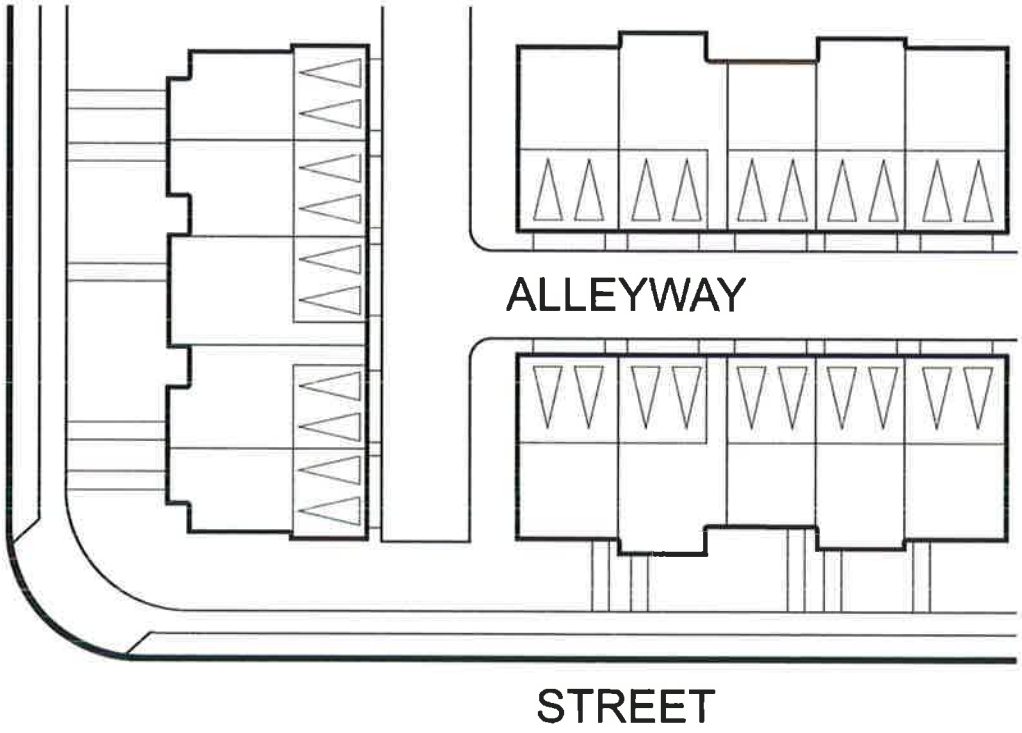




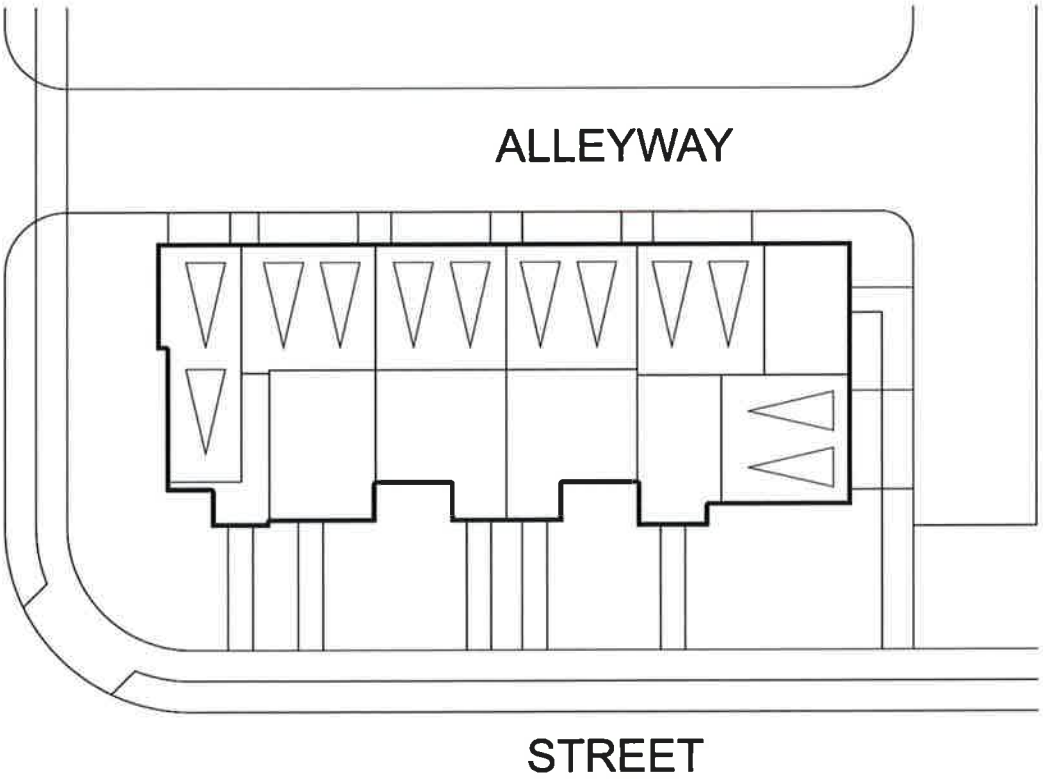
**CONCEPTUAL BUILDING TYPE E:** Cluster Motor Court



**CONCEPTUAL BUILDING TYPE F:** Cluster Alley Loaded



**CONCEPTUAL BUILDING TYPE G:** Townhome



**CONCEPTUAL BUILDING TYPE H:** Townhome

## 5.4 Design Guidelines

The Campus Oaks Design Guidelines supplement the City's Community Design Guidelines to provide a clear and common understanding of the distinct expectations for the built physical form and character of Campus Oaks. The focus is to ensure that the HPCO Planning Principles (Section 2) are meaningfully carried out and enhanced through the design, review and approval of individual development projects.

The Campus Oaks Design Guidelines will be prepared separately as a companion document to this Master Plan. The Guidelines are required to be approved by the City prior to or concurrent with the processing of the first project level planning entitlements for Campus Oaks (e.g. small lot map, Design Review for Residential Subdivision, Design Review Permit). As a companion implementation tool, the Guidelines may be adopted, and subsequently updated as appropriate, without the need to amend this Master Plan.

Topics to be addressed by the Campus Oaks Design Guidelines include, but are not limited to:

- Residential Development Standards;
- Landscaping and Streetscapes;
- Gateways and Entry Features;
- Walls and Fences;
- Edge Treatments;
- Lighting;
- Neighborhood/Subdivision Design;
- Town Center Design;
- Employment Center Design;
- Site Planning and Circulation;
- Architecture, Orientation and Massing;
- Screening;
- Public Spaces;
- Pedestrian and Bicycle Amenities, including cross-sections of trail adjacent to Parcel CO-7 and Parcel CO-83;
- Sustainable/Green Design Features; and
- Grading and LID, storm water treatment, and Hydro modification features.

# 5.5 Affordable Housing

The City of Roseville General Plan Housing Element establishes a citywide goal to provide decent, safe, adequate and affordable housing in sufficient quantities for all economic segments of the community. In an attempt to maximize efforts to meet affordable housing needs and to provide a mechanism whereby the City, property owners, and business community can actively work together in developing new affordable housing, the City's Housing Element specifies an Affordable Housing Goal of ten percent (10%) of all new housing units in the City be affordable to middle-, low- and very-low income households.

Housing affordability is based on household income categories defined by the U.S. Department of Housing and Urban Development (HUD). These five income categories are used for comparative purposes and are based on a percentage of the county median income, adjusted for household size. Based on sales and rental prices, and the definition of affordability, the City's Housing Element identifies housing assistance needs for each income group.

| DEFINITION OF HOUSEHOLD INCOME CATEGORIES |
|---|
| **Very Low** |
| Less than 50% of Median |
| **Low** |
| 50% to 80% of Median |
| **Middle Income** |
| 80% to 100% of Median |
| **Moderate Income** |
| 100% to 120% of Median |
| **Above Moderate Income** |
| 120%+ of Median |

The City recognizes that the various factors which determine affordability continually change, and project specific affordability standards need to be established and adjusted as development occurs. To that end, the 10% affordable housing goal for Campus Oaks will be based on the actual number of residential units mapped/approved.

## 5.5.1 AFFORDABLE HOUSING PROGRAM

Consistent with the General Plan affordable housing goal, 10% of the units in Campus Oaks have been designated for middle-, low- and very low-income households. This includes a mix of purchase housing affordable to middle-income households, and rental housing affordable to low- and very low-income households pursuant to the provisions of the Campus Oaks Development Agreement. In accordance with General Plan policy, twenty percent (20%) of the affordable housing goal will be available to middle-income households, forty percent (40%) to low-income households and forty percent (40%) to very low-income households. Campus Oaks' affordable housing goal is summarized in Table 5-4.

The affordable housing units within Campus Oaks have been allocated to specific MDR and HDR residential parcels as identified in Table 5-5, with designated parcels reflected on Figure 5-3. Affordable units have been positioned in close proximity to the Campus Oaks Town Center.

**TABLE 5-4:** Campus Oaks Affordable Housing Goal

| Total Campus Oaks Units | 948 du |
|---|---|
| 10% Affordable Housing Goal | 95 du |
| 40% of Goal Very Low-Income | 38 du |
| 40% of Goal Low-Income | 38 du |
| 20% of Goal Middle-Income | 19 du |

**TABLE 5-5:** Campus Oaks Affordable Housing Allocation by Parcel

| Parcel | Land Use | Total Units | Very Low-Income Rental | Low-Income Rental | Middle-Income Purchase |
|---|---|---|---|---|---|
| CO-5 | MDR | 46 du | | | 19 du |
| CO-21 | HDR | 125 du | 38 du | | |
| CO-22 | HDR | 119 du | | 24 du | |
| CO-23 | HDR | 72 du | | 14 du | |
| ***TOTAL*** | | | ***38 du*** | ***38 du*** | ***19 du*** |

**FIGURE 5-3:** Affordable Housing Sites

## 5.5.2 ADMINISTRATION & IMPLEMENTATION

Residential builders are encouraged to explore creative approaches in providing a range of housing opportunities to meet the needs of middle-, low-, and very-low income households. Over time, housing markets, income categories, funding programs, and other factors change, and it is important to retain some level of flexibility to ensure affordable housing goals are achieved.

The options outlined below may be considered to assist in achieving the Campus Oaks affordable housing goal.

### *Transfers and Credits*

Subject to approval by the Director of the City's Housing Division or designee, the affordable housing allocations identified on Table 5-5 may be transferred among parcels within Campus Oaks. In addition, to the extent the number of affordable units produced on a parcel exceeds the number of affordable units allocated to the parcel, the excess units may be credited toward meeting the affordable housing goal assigned to other parcels.

Transfer and/or credits may be approved by the Director of the City's Housing Division or designee without the need for amendments to this Master Plan or related Affordable Housing Agreement (or substitute form as specified by the City) if it is determined that:

1. The transfers/credits are applied to parcels within Campus Oaks covered by the same Development Agreement; and
2. The transfers/credits improve the ability to produce affordable units and achieve the Campus Oaks' affordable housing goal.
3. The transfer does not cause a change to the land use designation of a large lot parcel.

Requests for transfers and/or credits shall include information as deemed necessary by the City to ensure consistency with Campus Oak's affordable housing program. In addition, a revised affordable housing allocation (Table 5-5) shall be provided reflecting the adjusted affordable unit allocations.

The City's Housing Division shall maintain all revisions to Table 5-5 as the official Campus Oaks affordable housing allocation record. The affordable housing unit transfer shall be memorialized with a recorded Memorandum of Understanding (or substitute form as specified by the City).

### *Density Bonus*

The City may, in accordance with its Density Bonus Ordinance (Zoning Ordinance, Chapter 19.28) assign additional residential units to projects for

the purpose of achieving the affordable housing goal. The increase in units provided by a density bonus is intended to reduce average per unit development costs.

A density bonus is implemented by City approval of an Affordable Housing Agreement (or substitute form as specified by the City) to individual projects on a case-by-case basis, and may constitute a portion of the subsidy (if required) for the provision of affordable units.

### *In-Lieu Fee*

To the extent an in-lieu affordable housing fee is adopted by the City, a portion of the affordable housing allocations identified on Table 5-5 may be satisfied with an in-lieu fee subject to approval by the Director of the City's Housing Division or designee.

### *Affordable Housing Agreement*

An Affordable Housing Agreement (or substitute form as specified by the City) is required for each parcel with an affordable housing allocation to detail and secure specific requirements and obligations. Separate Affordable Rental and Affordable Purchase Agreements are required for each affordable obligation. Among other provisions, the Affordable Housing Agreement will:

- Specify the number of affordable units to be reserved at each income level.
- Specify the term of the affordability obligation.
- Establish criteria and a basis for initial rent or purchase price for designated affordable units.
- Establish criteria and a basis for annual rent or purchase price increases.
- Provide the City with a mechanism to monitor actual rents and purchase prices paid.
- Identify any City or other subsidies required to assist in meeting the affordability requirement and, if applicable, the basis and terms for refunding such subsidies.

Affordable Housing Agreements require City approval prior to the issuance of building permits, or recordation of a final small lot map where a subdivision map is required, for any large-lot parcel with an affordable housing allocation. The total number of affordable units required is to be calculated based on the number of final units mapped.

## 5.6 Minor Residential Density Transfers

Campus Oaks residential land use parcels are assigned a dwelling unit allocation and associated gross land use density (see Table 5-2). These assignments were made at the time of the 2015 Master Plan Amendment based on an assessment of the constraints and opportunities of each parcel and anticipated long-term demand for various housing types. As individual residential small-lot subdivision maps and residential Design Review Permits are processed over time, a more detailed assessment of site, market, design and other conditions will occur. It is anticipated this process may result in the need or desire to adjust (reduce or increase) the number of units assigned to some large-lot residential parcels.

This Master Plan includes provisions which allow the City to approve minor residential density adjustments and permit the transfer of residential units between large lot parcels in Campus Oaks. The Development Services Director may administratively approve a residential unit transfer/density adjustment between any Campus Oaks large lot parcels provided the following conditions are satisfied:

1. The transfer and receiving parcels are located within Campus Oaks and are subject to a Development Agreement;
2. The transfer of units does not result in a change to the land use designation, specifically, the transfer does not: a) reduce the number of units from the transfer parcel below the minimum number of units allowed by the applicable land use designation; or (b) increase the number of units to the receiving parcel above the maximum number of units allowed by the applicable land use designation;
3. The transfer of units does not result in increased impacts beyond those identified in the Master Plan EIR/Master Plan Addendum and does not preclude the ability of the parcels to conform to the applicable standards or regulations contained in this Master Plan and related Development Standards and Design Guidelines;
4. The transfer of units does not adversely impact planned infrastructure, roadways, schools, or other public facilities, fee programs and assessment districts;
5. The cumulative increase or decrease in units resulting from the transfer does not change the unit allocation by more than 20% of the units to either the transfer or receiving parcel, as established at the time of the Master Plan;

6. HDR units designated as affordable units may be transferred administratively until such time as they are encumbered by an Affordable Housing Rental Agreement (or other form as approved by the City); and,
7. For Parcel CO-21, unit transfers may be approved administratively provided the resulting density of the parcel does not fall below 25 dwelling units per acre.

The transfer of residential units, if consistent with the above criteria, is administrative in nature, is contemplated by and within the intent of this Master Plan and the Master Plan EIR/Master Plan Addendum, and will not require an amendment to the Master Plan, zoning, the Development Agreement(s), or the City General Plan.

To request a residential unit transfer, the owner or owners of both the transfer and receiving parcels shall submit a complete Administrative Permit application to the Development Services Director which (a) identifies the affected parcels; (b) designates the number of units being transferred; (c) provides other documentation as required by the Director to determine compliance with the above unit transfer criteria; and (d) includes a revised HPCO Land Use & Zoning by Parcel (Table 3-2) and Campus Oaks Land Use and Zoning by Parcel (Table 5-2), all reflecting the adjusted unit counts and densities. Revised Tables 3-2 and 5-2 will be the official record tracking unit allocations to each large lot residential parcel.

If the Development Services Director determines the residential unit transfer is not consistent with the above criteria, the residential unit transfer may be denied or may be referred or appealed to the Planning Commission and/or City Council for action. Any determination of consistency may, at the discretion of the Development Services Director, be forwarded to the Planning Commission for review. The applicant may request density adjustments which do not comply with the above criteria. Such requests shall require an amendment to the Master Plan (see Section 6).

All unused units must be transferred prior to the City's approval of the last small lot final map or Design Review Permit for any residential large lot parcel within Campus Oaks. Any units assigned to a large lot parcel which are not used by a tentative map/Design Review Permit or are not approved for transfer, shall revert to the City unit pool and landowners shall have no subsequent claim to such units.

## 5.7 Campus Oaks Phasing

Campus Oaks is structured to allow for the potential phasing of backbone infrastructure and facilities to serve development. Four potential phases, A through D, are illustrated on Figure 5-4. In general, the phasing plan is structured to ensure that the backbone improvements in each phase can support its respective development in compliance with City policies and standards, and the development in each phase can support the costs of the required improvements.

Outside of the initial backbone improvements to be installed with Phase A, the remaining phases may proceed in any sequence or combination, provided that the City determines that all the backbone infrastructure and facilities necessary to adequately serve development are/will be installed in compliance with City policies and standards. Specific infrastructure, facility and phasing requirements are described in the Campus Oaks Development Agreement and will be further evaluated with the processing of subsequent entitlement applications. This includes roadways, sewer, water, recycled water, storm drainage, dry utilities, parks, and other facilities and improvements. All in-tract sewer, storm drain, water, dry utilities, and recycled water (if applicable) will be installed as conditioned with local project entitlements.

# Administration

CITY OF ROSEVILLE

A BLUEPRINT COMMUNITY

# 06 Administration

*Implementation of the HPCO Master Plan is to be administered by the City of Roseville in accordance with the terms of this Master Plan and the applicable development agreements. The HPCO Master Plan is to be implemented consistent with all applicable City rules, regulations and policies.*

## 6.1 Related Documents

### 6.1.1 CITY DOCUMENTS

#### *General Plan*

The City of Roseville General Plan serves as the long-term policy guide for the physical and economic development of the City. The City's core values are the foundation of the General Plan and the underlying basis for its vision and direction. The HPCO Master Plan implements the goals and policies of the General Plan and supplements these goals and policies by providing specific direction to reflect conditions unique to the Project Area.

#### *Municipal Code*

The Roseville Municipal Code is one of the primary tools for implementing the General Plan. The Municipal Code includes the City's Zoning Ordinance, Subdivision Ordinance, Storm Water Ordinance, Grading Ordinance and Tree Ordinance, which are used in tandem with this Master Plan to implement the HPCO development program. Where the provisions of this Master Plan conflict with the Municipal Code, this Master Plan shall prevail. Where the Master Plan is silent, the Municipal Code shall prevail.

#### *Community Design Guidelines*

The Community Design Guidelines establish a clear and common understanding of the City's expectations for the planning, design, and review of development. The Community Design Guidelines work in combination with the Hewlett-Packard Campus Development Guidelines and the Campus Oaks Design Guidelines to direct Project Area

development. Where the provisions of this Master Plan conflict with the Community Design Guidelines, this Master Plan shall prevail. Where the Master Plan is silent, the Community Design Guidelines shall prevail.

### *Other Relevant City Documents*

Other documents and programs to be referenced in implementing the HPCO Master Plan include, but are not limited to, the City's Blueprint Implementation Strategies, Communitywide Sustainability Action Plan, Pedestrian Master Plan and Bicycle Master Plan.

## 6.1.2 MASTER PLAN DOCUMENTS

### *Environmental Impact Report & Addendum*

Pursuant to the California Environmental Quality Act (CEQA), the Hewlett-Packard Master Plan Environmental Impact Report (EIR) was certified with findings concurrent with initial adoption of the Master Plan (1996). The EIR evaluated the existing environmental resources within the project area, analyzed potential impacts on those resources due to the project, and identified mitigation measures as appropriate to reduce significant impacts. The EIR examined all phases of the project including planning, construction and operation.

Concurrent with adoption of the HPCO Master Plan, an Addendum to the Hewlett-Packard Master Plan Environmental Impact Report (HPCO Addendum) was adopted (2015). The HPCO Addendum analyzed the potential environmental impacts either created by the HPCO Master Plan or resulting from changed circumstances, and determined that, with the inclusion of applicable requirements conditioned and made part of the project, the HPCO Master Plan would not give rise to any new significant effects or any substantial increase in the severity of any previously identified significant effects. Accordingly, the HPCO Addendum concluded that none of the conditions identified in State CEQA Guidelines Section 15162 were present that require preparation of a subsequent or supplemental EIR.

In accordance with CEQA, it is intended that the Master Plan EIR and HPCO Addendum form the environmental basis for approval of subsequent development within and in compliance with the HPCO Master Plan. Both the Master Plan EIR and HPCO Addendum incorporate Mitigation Monitoring and Reporting Programs.

### *Development Agreements*

Individual landowners within the Project Area and the City of Roseville have executed project Development Agreements in accordance with Sections 65864 through 65869.5 of the Government Code of California, as implemented through Article V of the City of Roseville Zoning Ordinance. The Project Area Development Agreements form a binding contract between the parties establishing certain development rights and obligations. The Development Agreements secure permitted uses, needed infrastructure improvements, the timing and method of financing improvements, and other specific rights, duties and obligations of the property owners and the City as it relates to development within the Project Area.

### *Utility Master Plans*

Utility Master Plans have been prepared for the Project Area. These Master Plans provide general direction for the construction of improvements to serve buildout of the project and may be augmented with additional studies as may be required by the City during review of subsequent entitlement requests or the review of final construction drawings. Included are the HPCO Water Master Plan, Sewer Master Plan, Recycled Water Master Plan, and Drainage Master Plan. The intent is to ensure functional and reliable utility systems (see Chapter 3 for additional detail).

## 6.2 Subsequent Approvals

### 6.2.1 CITY PROCESSING

Individual development projects within the Project Area are subject to review and approval of subsequent permits and entitlements by the City of Roseville (e.g. subdivision review, design review, conditional use permits, variances, and/or other permits). Application and processing requirements shall be in accordance with the City's Zoning Ordinance and other regulations, unless otherwise modified by this Master Plan.

All subsequent development projects, public improvements and other activities shall be consistent with this Master Plan, accompanying Development Standards and Design Guidelines, the Development Agreements, applicable City of Roseville policies, requirements and standards, and all State and Federal permit conditions and environmental review documents (CEQA and NEPA).

In acting to approve a subsequent project or permit, the City may impose conditions as are reasonably necessary to ensure the project is in compliance with the Master Plan and all applicable plans and regulations.

### 6.2.2 STREAMLINED DEVELOPMENT REVIEW

Measures have been incorporated into the HPCO Master Plan to allow for a streamlined Administrative Design Review Permit process for development projects within the Light Industrial-Special Area (M1/SA) zone district within the Hewlett Packard Campus. See Section 4.5 for additional details.

### 6.2.3 ENVIRONMENTAL REVIEW

Each subsequent development project shall be reviewed to ensure compliance with the California Environmental Quality Act (CEQA). The Master Plan Environmental Impact Report (EIR) and the HPCO Addendum serve as the base environmental documents for subsequent entitlements. Development applications will be reviewed on a project-by-project basis to determine consistency with the EIR and HPCO Addendum.

In general, if a subsequent project is determined to be consistent with the Master Plan and within the scope of the Master Plan EIR and HPCO Addendum, further environmental review may not be necessary. If it is determined that a development application is inconsistent with the Master Plan and/or outside the scope of the Master Plan EIR and HPCO Addendum, a determination will be made as to the appropriate subsequent environmental document in accordance with CEQA.

### 6.2.4 APPROVALS FROM OTHER AGENCIES

Other permits and approvals may be required prior to the development of individual projects by federal, state, and/or regional agencies. These agencies may include the U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, California Department of Fish and Wildlife, California Department of Transportation, Regional Water Quality Control Board, Placer County Air Pollution Control District, and others as applicable.

## 6.3 Consistency and Amendment Process

One of the primary objectives of the Master Plan is maintaining the flexibility to react quickly to changing conditions, markets and opportunities. To achieve this, the following process is established which allows the Development Services Director to interpret Master Plan consistency and the type of Plan amendment, if any, that is required by proposed changes:

1. **Substantial Conformity.** The Development Services Director may make the determination that a proposed change is consistent with the intent and basic provisions of the Master Plan, and therefore in

substantial conformity with the Plan. In such cases, no subsequent amendment to the HPCO Master Plan is required.

2. **Minor Modification**. If it is determined that a proposed change would result in a minor deviation to the HPCO Master Plan, then such modification may be approved administratively through the Administrative Permit process. Such permit shall be reviewed consistent with Article V of the Zoning Ordinance.

3. **Major Modification/Amendment.** When a proposed change is considered to be inconsistent with the adopted Master Plan, a subsequent amendment is required. Amendments are processed in the same manner as initial Master Plan adoption, requiring review by the Planning Commission and action by the City Council.

In reviewing Substantial Conformity and Minor Modifications to the Master Plan, the Development Services Director shall consider consistency with the intent of the Master Plan, the applicable Master Plan Development Agreement(s), the Master Plan EIR/HPCO Addendum, and the City General Plan. Any proposed change to the Master Plan may, at the discretion of the Development Services Director, be forwarded to the Planning Commission for review.

# THIRD AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND HEWLETT-PACKARD COMPANY RELATIVE TO THE HEWLETT-PACKARD PROPERTY OF THE ROSEVILLE MASTER PLAN

This Third Amendment of Development Agreement (the "Third Amendment") is entered into this _____ day of_____, 2015, by and between the **CITY OF ROSEVILLE**, a municipal corporation, hereinafter "City", and **HEWLETT-PACKARD COMPANY**, a Delaware corporation, hereinafter "Landowner," pursuant to the authority of Sections 65864 through 65869.5 of the Government Code of California.

## Recitals

1. Original Development Agreement. On August 1, 1996, the City and Landowner entered into that certain agreement entitled "Development Agreement By and Between The City of Roseville and Hewlett-Packard Company Relative to the Roseville Master Plan" (the "Original Development Agreement"). The Original Development Agreement was recorded in the Official Records of Placer County on August 16, 1996, as Instrument No. 96-0047544 and re-recorded on March 25, 1998 as Instrument No. 98-0019739.

2. Amendments to Development Agreement. On May 23, 2001, the City and Landowner entered into that certain amendment entitled "First Amendment of Development Agreement By and Between The City of Roseville and Hewlett-Packard Relative to the Roseville Master Plan" ("First Amendment"); the First Amendment was recorded in the Official Records of Placer County on June 7, 2001, as Instrument No. 2001-0056191. On _____, 2015, the City and BBC Roseville Oaks, LLC, and Landowner entered into that certain amendment entitled "Second Amendment of Development Agreement By and Between The City of Roseville and Hewlett-Packard Company and BBC Roseville Oaks, LLC Relative to the Roseville Master Plan" ("Second Amendment"). The Second Amendment was recorded in the Official Records of Placer County on _____, 2015, as Instrument No. 2015-_____. The Original Development Agreement, as amended by the First and Second Amendments, shall be referred to herein as the "Development Agreement." Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement. All

references to "Section" herein, unless otherwise noted, shall mean and refer to the corresponding Section of the Development Agreement.

3. Hewlett Packard Property. The subject of this Third Amendment is the development of that certain parcel of land, consisting of approximately 140.7 acres, located in the City of Roseville, County of Placer, commonly referred to as Parcel 1 and more particularly described in **Exhibit A-1** and diagrammed in **Exhibit A-2** (hereinafter, the "HP Property"), attached hereto and incorporated herein by this reference. Landowner represents that it owns the HP Property in fee and that all other persons holding legal or equitable interests in the HP Property shall be bound by this Third Amendment. For purposes hereof, all references to the "Property" or "Master Plan Area" shall mean and refer to the Property described in the Development Agreement and all references to the "HP Property" shall mean and refer to the real property described in **Exhibit A-1** hereto, which is the subject of this Third Amendment.

4. Coordination of Amendment with Amendment for Campus Oaks Property. Concurrently herewith, the City and BBC Roseville Oaks, LLC ("BBC Roseville Oaks") are entering into that certain amendment entitled "Fourth Amendment of Development Agreement By and Between The City of Roseville and BBC Roseville Oaks Relative to the Campus Oaks Property of the Roseville Master Plan" ("Fourth Amendment"), which is being recorded immediately following the recordation of this Third Amendment. The portion of the Master Plan Area owned by BBC Roseville Oaks that is the subject of the Fourth Amendment is referred to herein as the "Campus Oaks Property." Landowner supports the concurrent processing of this Third Amendment with the Fourth Amendment because the coordinated development of the two Properties as a mixed use master planned community will provide convenient and sustainable housing opportunities, commercial services and parks and recreational amenities that serve the needs of Landowner's current and future employees, thereby promoting the overall HP Campus as a desirable major employment hub. To this end, as part of Landowner's support to realize the benefits of this mixed use master plan, Landowner is agreeing hereunder to (i) reduce the development capacities previously allocated to the HP Property to correspondingly provide to the Campus Oaks Property the additional capacities needed to develop these complementary uses therein and (ii) dedicate approximately 8.7 acres of the HP Property for future park and recreational facilities to be developed and supported by the Campus Oaks Property to be credited towards and help satisfy Campus Oaks' park land dedication requirements.

5. Amended Master Plan for Hewlett Packard and Campus Oaks Properties. In connection with Landowner's planned development of the HP Property, Landowner and BBC Roseville Oaks have prepared and processed with the City, and the City Council has approved as provided below, the Hewlett-Packard Campus Oaks Master Plan Amendment (the "Amended Master Plan"). The Amended Master Plan amends the Roseville Master Plan as applied to the development of the HP and Campus Oaks Properties. The purpose of this Third Amendment is to amend the Development Agreement and the Entitlements vested thereby, including incorporating the Amended Master Plan as part of the Revised Entitlements described herein, as applied to development of the HP Property to facilitate the development thereof consistent with the Amended Master Plan and in coordination with the development of the Campus Oaks Property consistent therewith.

6. Authorization. To strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864, et seq., of the Government Code (the "Development Agreement Statute"), which authorizes the City of Roseville and an applicant for a development project to enter into a development agreement establishing certain

development rights in and obligations with respect to the property which is the subject of the development project application. In addition to this statutory authorization, Section 1.4 of the Development Agreement allows amendments to the Development Agreement that affect less than the entire Master Plan Area to be approved by the owner(s) in fee of the portions of the Master Plan Area that is subject to or affected by such amendment. In accordance with Section 1.4 of the Development Agreement, Landowner proposes hereby to amend the terms and conditions for development only as to the HP Property, which amendments are limited to the HP Property, do not impose any new burdens or obligations on any other property in the Master Plan Area, and do not affect or impair the development rights of any other properties within the Master Plan Area (except as otherwise agreed to by BBC Roseville Oaks in the Fourth Amendment being approved concurrently herewith).

7. Hearing. On _____, 2015, the City Planning Commission, designated by Roseville Ordinance No. 3014 as the planning agency for purposes of development agreement review pursuant to Government Code Section 65867, following a duly noticed and conducted public hearing, considered this Third Amendment and recommended that the City Council approve this Third Amendment for the HP Property.

8. Environmental Review. On _____, 2015, the City Council considered the Addendum to the Plan FEIR (the "Addendum") for development of the HP Property consistent with the Revised Entitlements (the "Project"). An Initial Study prepared in support of the Addendum identified mitigation measures to reduce environmental impacts which have been incorporated into the Project and the Amended Master Plan for the HP Property and in the terms and conditions of this Third Amendment, as reflected by the findings adopted by the City Council concurrently with this Third Amendment.

9. No New Impacts Associated with Approval of Amendment. The City Council has determined that the adoption of this Third Amendment involves no new impacts not considered in the Addendum; therefore, no further environmental documents relating to the adoption of this Third Amendment are required.

10. Development Agreement Ordinance. City and Landowner have taken all actions mandated by and fulfilled all requirements set forth in the Development Agreement Ordinance of the City of Roseville, Chapter 19.84 of the Roseville Municipal Code. This Third Amendment, to the extent it amends and affects the terms of the Development Agreement for the HP Property, is consistent with and authorized by the amendment provisions of Section 1.4 of the Development Agreement.

11. Consistency with General Plan and Amended Master Plan. Having duly examined and considered this Third Amendment and having held properly noticed public hearings hereon, City finds and declares that this Third Amendment is consistent with the General Plan of the City of Roseville and with the Amended Master Plan.

NOW THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

**1. Amendment of Development Agreement.** The following recital and sections of the Development Agreement for the HP Property are hereby amended as follows:

**a. Revised Recital 5 (Entitlements).** Recital 5 is revised as follows:

"5. Entitlements. The City has approved the following land use entitlements for the HP Property, which entitlements are the subject of this Agreement:

A. The Roseville General Plan, as amended by Resolution No. _____;

B. The Hewlett-Packard Roseville Master Plan, as amended by the HP Campus Oaks Master Plan Amendment thereto adopted by Resolution No. _____ (the "Amended Master Plan");

C. The Rezoning of the HP Property pursuant to Ordinance No. _____;

D. This Third Amendment of Development Agreement for the HP Property, as adopted by Ordinance No. _____ (the "Adopting Ordinance"); and

E. The Large Lot Tentative Subdivision Map for the HP Property, as approved by the Planning Commission (the "Large Lot Map").

"The approvals described in paragraphs A through C, inclusive, are referred to herein as the "Entitlements." All references to the "Master Plan" in the Development Agreement, as amended hereby and as applied to the HP Property, shall mean and refer to the Amended Master Plan described in paragraph B above."

**b. Revised Section 2.2 (Vested Entitlements).** Section 2.2 of the Development Agreement is hereby revised in its entirety to read as follows. As noted in Recital 4 above, in support of the coordinated development of the Campus Oaks Property with the HP Property, Landowner acknowledges and agrees that the changes below include a reduction in developable square footage and corresponding traffic and utility capacities previously allocated and reserved for development within the HP Property from 1,670,000 sq. ft. to 1,200,000 sq. ft., which reduction in development capacities is being re-allocated to and included within the development of the Campus Oaks Property:

"2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the HP Property in accordance with the terms and conditions of this Agreement and the Entitlements. City acknowledges that the Entitlements include the following land uses (with approximate acreages) for the HP Property:

| | |
|---|---|
| Light Industrial | 129.2 acres; |
| Parks | 8.7 acres; |
| Roads | 2.8 acres. |

all as set forth in **Exhibit B**. Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the effective date of the Development Agreement, or as they may provide from time-to-time by amendment of the Master Plan. Landowner's vested right to proceed with the development of the HP Property shall be subject to subsequent approvals and the Intensity Thresholds as defined and as provided for in the Master Plan, provided that any conditions, terms, restrictions, and requirements for such subsequent approvals shall not prevent development of the HP Property for the uses and to the density or intensity of development or rate of timing of development set forth in

this Agreement so long as the limitations set forth in the Intensity Thresholds have not been reached and further provided Landowner is not in default under this Agreement.

"For purposes of this Third Amendment and development of the HP Property pursuant to the Master Plan, the Intensity Thresholds for Light Industrial uses described for the HP Property in the Master Plan are as follows:

| **Property** | **Gross Sq. Ft.** | **Water** *(Max Daily Demand)* | **Sewer** *(Max Daily Flow)* | **Electric** *(Peak Annual Demand)* | **Traffic** *(PM Peak Hour Trips)* |
|---|---|---|---|---|---|
| H-P Property | 1,200,000 | 0.72 mgd | 0.32 mgd | 8.08 MW | 1,368 |

"Landowner and City acknowledge that, as more particularly described in the Master Plan and as analyzed in the Addendum, nothing in this Agreement or the Entitlements vested hereby for the HP Property affects or reduces the vested development rights of the other properties within the Master Plan Area. Landowner acknowledges and agrees that the uses described in the Master Plan for the other properties within the Master Plan Area are compatible with the vested uses planned for development of the HP Property.

"2.2.1 Consistency with General and Master Plans; Parcel HP-3 Landscape Buffer. Landowner acknowledges that, as required and shown by the Master Plan, to maintain adequate buffering of light industrial uses from adjacent residential development consistent with the General Plan, although Parcel HP-3 is currently improved with private recreational use, should light industrial development be approved for Parcel HP-3, such development will maintain a 50-foot landscape buffer within Parcel HP-3 adjacent to residential uses within the Campus Oaks Property. The landscaping and other such buffering elements to be installed within such 50' landscape setback buffer will be established in accordance with the design guidelines to be approved for the Master Plan and as part of the design review process for any future light industrial use to be developed within Parcel HP-3."

**c. Revised Section 3.2 (Parks).** Section 3.2 of the Development Agreement is hereby revised in its entirety to read as follows:

"3.2 Parks. In consideration of this Agreement and the benefits to Landowner to be derived from the coordinated development of the HP Property with the Campus Oaks Property, upon recordation of the Large Lot Map for the HP Property or within sixty (60) days of written request from the City, Landowner shall dedicate Parcel HP-2 to the City for development of the Hewlett-Packard Greenway (Parcel HP-2) as described in and consistent with the Master Plan. Furthermore, within sixty (60) days of the Effective Date, Landowner shall record or deliver to the City to record a temporary construction license over Parcel HP-2 giving BBC Roseville Oaks a license to construct park and landscaping improvements within Parcel HP-2; such construction license shall be provided in the form for construction licenses included with the Second Amendment.

Landowner acknowledges that the City shall not be obligated to accept the dedication of Parcel HP-2 until the park improvements to be constructed thereon are completed by Campus Oaks and accepted by the City. Maintenance of Parcel HP-2 remains a Landowner obligation until accepted by the City.

Landowner shall not be obligated, due to this dedication or grant of license, to fund any costs to improve or maintain the Hewlett-Packard Greenway park and landscaping

improvements to be installed within Parcel HP-2. No park fees, taxes or assessments shall be required to be paid or levied or assessed against the HP Property for purposes of funding construction or maintenance of the park improvements within the Hewlett-Packard Greenway in connection with or as a condition of any development of the HP Property consistent with Entitlements. The costs of any such park installation and/or maintenance with Parcel HP-2 shall be funded solely from development within the Campus Oaks Property and/or the City's funding sources for the construction and maintenance of city-wide park improvements."

**d. Revised Section 3.3 (Electrical).** Section 3.3 of the Development Agreement is hereby revised in its entirety to read as follows:

"3.3 Electric. Landowner shall provide electric utility improvements as provided in this section.

"3.3.1 On-Site Public Electrical Circuits. Concurrently with the construction or reconstruction of any portion of HP Way within the HP Property shown on **Exhibit C**, Landowner agrees to construct on-site electrical circuits and facilities to then current City standards to serve the street lights and landscaping improvements to be installed within the rights-of-way therefor, such that the electrical service needs for such improvements can be provided by a public circuit if and when such roadways are accepted by the City. The design of such circuits shall be included as part of the improvement plans for such roadways.

"3.3.2 Streetlights. Concurrently with the construction or reconstruction of any portion of HP Way, Landowner agrees to construct streetlights therein in accordance with the Master Plan and the then current requirements of the Electric Department for public streetlights."

**e. New Section 3.4.6 (Flood Water Conservation Easement).** Section 3.4.6 of the Development Agreement is hereby added to read as follows:

"3.4.6 Flood Water Conservation Easement. Prior to additional building plan approval for new facility construction in excess of 20,000 square feet upon HP property, Landowner shall dedicate to the City a Flood Water Conservation Easement for that extent of the 100-year floodplain for the unnamed tributary to the South Branch of Pleasant Grove Creek that runs along the southern end of the site (referred to as the "HP Tributary") affecting Lot 26 (HP-1) and Lot 27 (HP-3). The Landowner shall continue to be responsible for the maintenance of the floodplain with rights to the City to access and perform maintenance if needed at any time in the future. Prior to issuance of the building permit for such new facility, Landowner shall enter into a drainage maintenance agreement with the City to confirm Landowner's continued obligation to maintain such floodplain and to assign to the City a right of access necessary for the City to perform any and all required maintenance thereof, at Landowner's cost, in the event Landowner fails to adequately maintain such floodplain improvements.

**f. Deleted Section 3.5.2 (On-Site Water Lines).** Section 3.5.2 of the Development Agreement, including all subsections thereof, is hereby deleted.

**g. Deleted Section 3.6.2 and Revised Sections 3.6 and 3.6.4 (Sewer Improvements).** Section 3.6.2 of the Development Agreement is hereby deleted and Sections 3.6 and 3.6.4 are hereby revised as follows:

1) Section 3.6: The first sentence of Section 3.6. is hereby deleted; and

2) Section 3.6.4: The first sentence of Section 3.6.4 is hereby deleted.

**h. Deleted Sections 3.8.1 through 3.8.4, Revised Sections 3.8.5 and New Sections 3.8.11 and 3.8.12 (Road Improvements).** Sections 3.8.1 through 3.8.4 are hereby deleted, Section 3.8.5 is revised and Sections 3.8.11 and 3.8.12 are added to read as follows:

"3.8.5 No Security Gates Within HP Way Right of Way. In consideration of this Agreement and the intent that the City accept HP Way and utility improvements to be installed therein as a public road and utilities, Landowner shall not have the right to install or maintain any security gates along the portion of HP Way dedicated or to be dedicated to the City.

"Notwithstanding the foregoing, Landowner shall have the right to install security gates at any entrance to the HP Property adjoining HP Way or along Local Road E (as long as such road is privately owned and maintained by Landowner), subject to compliance with City standards for access and stacking. Landowner shall also have the right, at its discretion, to install signage along HP Way (including within the HP Way right of way along the HP Property outside of the improved roadway portion thereof), provided that the signage complies with the City's then existing signage requirements and sign ordinance.

---

"3.8.11 HP Way. Pursuant to the Second Amendment, Landowner has or will grant to the City an irrevocable offer to dedicate (IOD), in fee, the right-of-way for HP Way within the HP Property as shown on **Exhibit C** with the recordation of the Large Lot Final Map or by separate document in form acceptable to the City. Notwithstanding Landowner's dedication of HP right-of-way to the City, the provisions of Section 3.8.8 regarding internal roadway standards remain in effect and Landowner shall not be obligated to comply with City standards with respect to any on-site construction thereof by Landowner in connection with the development of the HP Property. Landowner acknowledges that BBC Roseville Oaks will be obligated under the Fourth Amendment to construct all of HP Way to then current City standards and Landowner will cooperate therewith, at no cost or expense to Landowner. Upon completion of construction of HP Way by BBC Roseville Oaks, and City acceptance of the improvements, the City shall accept the roadway right-of-way dedication for HP Way.

"3.8.11.A. Maintenance of HP Way Private Drainage. Landowner acknowledges that it is not practicable to modify the existing storm water drainage facilities presently draining HP Way and that the future drainage of the publicly dedicated HP Way right of way will continue to be accommodated through an existing private storm drain traversing across Landowner property, currently maintained by Landowner and the owner of Parcel 2. As provided by the Second Amendment, Landowner shall remain obligated to maintain the private storm drain improvements, including any reconstruction or replacement thereof, as and to the extent required to continue to accommodate the storm drainage requirements for such portion of HP Way. Prior to acceptance of HP Way as a public roadway, and as part of the Large Lot Map conditions, City will require that Landowner enter into a drainage maintenance agreement with the City to confirm Landowner's continued obligation to maintain such private drainage system and to assign to the City a right of access necessary for the City to perform any and all required maintenance thereof, at Landowner's cost, in the event Landowner fails to adequately maintain such private drainage improvements. Nothing

herein shall affect the rights and obligations between Landowner and the owner of Parcel 2 to cooperate with and share in the maintenance of such roadway storm drainage improvements.

"3.8.12 Local Road E. Landowner may elect to maintain its existing perimeter roadway identified as Local Road E on **Exhibit C** from Foothills Boulevard located along the western and southern boundaries of the HP Property as a private roadway or may elect, at any time, to offer to dedicate to the City the right of way therefor for acceptance and operation as a public street. If Landowner elects or has elected to dedicate Local Road E or any portion thereof to the City, Landowner shall reconstruct the portion of such roadway to conform to the City's then current standards for public roadways prior to City's acceptance."

**i. Deleted Section 3.15 (Light Rail Funding).** Section 3.15 is hereby deleted.

**j. Revised Sections 3.17.1.B and 3.17.1.C and New Sections 3.17.3, 3.17.4 and 3.17.5 (Reclaimed Water).** Sections 3.17.1.B and 3.17.1.C are revised and Sections 3.17.1, 3.17.4 and 3.17.5 are added as follows:

1) Section 3.17.1.B: The second and third sentences of Section 3.17.1.B are hereby deleted;

2) Section 3.17.1.C: Section 3.17.1.C is revised to read as follows:

"3.17.1.C Provided the foregoing requirements are satisfied, City shall make recycled water available to Landowner at current charges specified in the Roseville Municipal Code."

3) New Sections 3.17.3, 3.17.4 and 3.17.5 of the Development Agreement are hereby added as follows:

"3.17.3 HP Greenway Recycled Water Use and Oversizing Reimbursement. Landowner acknowledges that recycled water will be used for irrigation of the park and landscape improvements to be located and maintained within the HP Greenway (HP-2). Landowner further acknowledges that, in connection with the development of the HP Greenway improvements, BBC Roseville Oaks will be obligated to install a recycled water stub to the HP Property, as generally shown on the map attached hereto as **Exhibit D** (the "Recycled Water Stub"). If Landowner elects to connect to the Recycled Water Stub to extend the use of recycled water to the HP Property, Landowner shall reimburse BBC Roseville Oaks for the Recycled Water Stub and any oversizing of recycled water lines related thereto consistent with the improvement cost reimbursement provisions of the Development Agreement; this reimbursement obligation will terminate from and after ten (10) years after the Effective Date of this Amendment."

"3.17.4 Non-Exclusive Public Utility Easement. Where recycled water facilities are not located within road rights-of-way, as and when such facilities are installed, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such facilities, together with access thereto for maintenance purposes only. Easement widths shall be granted in accordance with the City's then current Improvement Standards.

"3.17.5 Terms and Conditions for Recycled Water Operations, Use, and Service. Any and all private commercial recycled water customers within the HP Property shall sign a

Terms and Conditions for Recycled Water Operations, Use and Service prior to service meter installation and recycled water being introduced to the site per requirements of the City's Municipal Code at the time of connection."

**k. New Sections 9.7 and 9.8 (Estoppel and Mortgagee Protection)**. New Sections 9.7 and 9.8 are hereby added as follows:

"9.7 Estoppel Certificate. Either party may, at any time, and from time to time, deliver written notice to the other party requesting such party to certify in writing that, to the knowledge of the certifying party, (i) this Agreement is in full force and effect and a binding obligation of the parties, (ii) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments, and (iii) the requesting party is not in default in the performance of its obligations under this Agreement, or if in default, to describe therein the nature of such default. The party receiving a request hereunder shall execute and return such certificate within thirty (30) calendar days following the receipt thereof. City acknowledges that a certificate hereunder may be relied upon by transferees and mortgagees of Landowner.

"9.8 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Landowner, in any manner, at Landowner's sole discretion, from encumbering the HP Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the HP Property, except as limited by the provisions of this section. City acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with Landowner and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the HP Property shall be entitled to the following rights and privileges:

"9.8.1 Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the HP Property made in good faith and for value, unless otherwise required by law.

"9.8.2 The mortgagee of any mortgage or deed of trust encumbering the HP Property, or any part thereof ("Mortgagee"), which Mortgagee has submitted a request in writing to City in the manner specified herein for giving notices, shall be entitled to receive written notification from City of any default by Landowner in the performance of Landowner's obligations under this Agreement.

"9.8.3 If City receives a timely request from a Mortgagee requesting a copy of any notice of default given to Landowner under the terms of this Agreement, City shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to Landowner. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed to Landowner under this Agreement.

"9.8.4 Any Mortgagee who comes into possession of the HP Property, or any part thereof, by any means, whether pursuant to foreclosure of the mortgage deed of trust, or deed in lieu of such foreclosure or otherwise, shall take the HP Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this

Agreement to perform any of Landowner's obligations or other affirmative covenants of Landowner hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by Landowner is a condition precedent to the performance of a covenant by City, the performance thereof shall continue to be a condition precedent to City's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Article II of this Agreement."

**I. Revised/Updated Terminology**. Wherever the Development Agreement, as amended hereby, continues to use or refer to the following capitalized terms, such capitalized terms shall have the corresponding meanings assigned thereto:

1) "Planning Director" shall mean and refer to "Development Services Director, as such term may be revised by the City from time to time."

2) "Public Works Director/City Engineer" shall mean and refer to "City Engineer, as such term may be revised by the City from time to time,"

3) "Master Plan" shall mean and refer to the Amended Master Plan, as applied to the HP Property.

**2. Exhibits.** The following Revised Exhibits are attached hereto and incorporated herein by reference and hereby replace and supersede the respective Exhibits previously attached to the Development Agreement with respect to the HP Property. Accordingly, all references to Exhibits A-1, A-2 and B in the Development Agreement with respect to the HP Property shall mean and refer to the corresponding Revised Exhibits attached hereto. All other Exhibits referred to in this Third Amendment shall mean and refer to the corresponding Exhibits in the Development Agreement:

| | | |
|---|---|---|
| Exhibit A-1 | -- | Property Description |
| Exhibit A-2 | -- | Diagram of HP Property |
| Exhibit B | -- | Land Use Map of HP Property |
| Exhibit C | -- | Circulation Map |
| Exhibit C-1 | -- | Roadway Cross-Sections |
| Exhibit D | -- | Map of Recycled Water Line Stub |

**3. Consistency with General Plan.** The City hereby finds and determines that execution of this Third Amendment is in the best interest of the public health, safety and general welfare and is consistent with the General Plan.

**4. Amendment Limited to HP Property**. This Third Amendment is limited to and applies only to development of the HP Property and does not affect or apply in any manner with respect to the development of any other property within the Master Plan Area.

**5. Amendment; Balance of Development Agreement In Full Force.** This Third Amendment amends, but does not replace or supersede, the Development Agreement. In the event of any conflict, the language of this Third Amendment shall be controlling in all events or circumstances. Except as modified hereby, all other terms and provisions of the Development Agreement shall remain in full force and effect.

**6. Form of Amendment; Execution in Counterparts.** This Third Amendment is executed in duplicated originals, each of which is deemed to be an original, and may be executed in counterparts.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement by its City Manager and attested to by its City Clerk under the authority of Ordinance No. _____ adopted by the Council of the City of Roseville on the ____ day of _____, 2015.

# FOURTH AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND BBC ROSEVILLE OAKS, LLC RELATIVE TO THE CAMPUS OAKS PROPERTY OF THE ROSEVILLE MASTER PLAN

This Fourth Amendment of Development Agreement (the "Fourth Amendment") is entered into this _____ day of_____, 2015, by and between the **CITY OF ROSEVILLE**, a municipal corporation, hereinafter "City", and **BBC ROSEVILLE OAKS, LLC**, an Illinois limited company, hereinafter "Landowner", pursuant to the authority of Sections 65864 through 65869.5 of the Government Code of California.

## Recitals

1. Original Development Agreement. On August 1, 1996, the City and Hewlett-Packard Company ("Hewlett-Packard") entered into that certain agreement entitled "Development Agreement By and Between The City of Roseville and Hewlett-Packard Company Relative to the Roseville Master Plan" (the "Original Development Agreement"). The Original Development Agreement was recorded in the Official Records of Placer County on August 16, 1996, as Instrument No. 96-0047544 and re-recorded on March 25, 1998 as Instrument No. 98-0019739.

2. Amendments to Development Agreement. On May 23, 2001, the City and Hewlett-Packard entered into that certain amendment entitled "First Amendment of Development Agreement By and Between The City of Roseville and Hewlett-Packard Relative to the Roseville Master Plan" ("First Amendment"); the First Amendment was recorded in the Official Records of Placer County on June 7, 2001, as Instrument No. 2001-0056191. On _____, 2015, the City and Hewlett-Packard and Landowner entered into that certain amendment entitled "Second Amendment for Parcels 1 and 4 of Development Agreement By and Between The City of Roseville and Hewlett-Packard Company and BBC Roseville Oaks, LLC Relative to the Roseville Master Plan" (the "Second Amendment"); the Second Amendment was recorded in the Official Records of Placer County on _____, 2015, as Instrument No.

2015-_____. The Original Development Agreement, as amended by the First Amendment and Second Amendment, shall be referred to herein as the "Development Agreement." Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement. All references to "Section" herein, unless otherwise noted, shall mean and refer to the corresponding Section of the Development Agreement.

3. Campus Oaks Property. The subject of this Fourth Amendment is the development of that certain parcel of land, consisting of approximately 189.88 acres, located in the City of Roseville, County of Placer, commonly referred to as Parcel 4 and more particularly described in **Exhibit A-1** and diagrammed in **Exhibit A-2** (hereinafter, the "Campus Oaks Property"), attached hereto and incorporated herein by this reference. Landowner represents that it owns the Campus Oaks Property in fee and that all other persons holding legal or equitable interests in the Campus Oaks Property shall be bound by this Fourth Amendment. For purposes hereof, all references to the "Property" or "Master Plan Area" shall mean and refer to the Property described in the Development Agreement and all references to the "Campus Oaks Property" shall mean and refer to the real property described in **Exhibit A-1** hereto, which is the subject of this Fourth Amendment.

4. Coordination of Amendment with Amendment for Hewlett-Packard Property. Concurrently herewith, the City and Hewlett-Packard are entering into that certain amendment entitled "Third Amendment of Development Agreement By and Between The City of Roseville and Hewlett-Packard Company Relative to the Hewlett-Packard Property of the Roseville Master Plan" ("Third Amendment"), which is being recorded immediately prior to the recordation of this Fourth Amendment. The portion of the Master Plan Area owned by Hewlett Packard that is the subject of the Third Amendment is referred to herein as the "HP Property." Landowner supports the concurrent processing of this Fourth Amendment with the Third Amendment because the coordinated development of the two Properties as a mixed use master planned community will provide convenient and sustainable housing opportunities, commercial services and parks and recreational amenities that will serve the needs of both Landowner's future residents and Hewlett-Packard's current and future employees, thereby promoting the overall HP Campus as a desirable major employment hub. To this end, as part of Landowner's support to realize the benefits of this mixed use master plan, Landowner is agreeing hereunder to (i) improve the existing HP Way and extend it through the Campus Oaks Property as a major public entrance to the Campus and (ii) commit the Campus Oaks Property to improve and maintain the park and recreational facilities to be installed within the HP2/CO64 Park, including the approximately 8.7 acre portion thereof being dedicated to the City by Hewlett-Packard to help satisfy Campus Oaks' park land dedication requirement, to expand the Campus amenities that will be available to the Campus residents and employees.

5. Amended Master Plan for Campus Oaks and Hewlett-Packard Properties. In connection with Landowner's planned development of the Campus Oaks Property, Landowner and Hewlett-Packard have prepared and processed with the City, and the City has approved as provided below, the Hewlett-Packard Campus Oaks Master Plan Amendment (the "Amended Master Plan"). The Amended Master Plan amends the Roseville Master Plan as applied to the development of the Campus Oaks Property and the HP Property that is the subject of the Third Amendment being approved concurrently herewith. The purpose of this Fourth Amendment is to amend the Development Agreement and the Entitlements vested thereby, including incorporating the Amended Master Plan as part of the Revised Entitlements described herein, as applied to development of the Campus Oaks Property to facilitate the development thereof independent of the other properties within the Master Plan Area.

6. Authorization. To strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864, et seq., of the Government Code (the "Development Agreement Statute"), which authorizes the City of Roseville and an applicant for a development project to enter into a development agreement establishing certain development rights in and obligations with respect to the property which is the subject of the development project application. In addition to this statutory authorization, Section 1.4 of the Development Agreement allows amendments to the Development Agreement that affect less than the entire Master Plan Area to be approved by the owner(s) in fee of the portions of the Master Plan Area that is subject to or affected by such amendment. In accordance with Section 1.4 of the Development Agreement, Landowner proposes hereby to amend the terms and conditions for development only as to the Campus Oaks Property, which amendments are limited to the Campus Oaks Property, do not impose any new burdens or obligations on any other property in the Master Plan Area, and do not affect or impair the development rights of any other properties within the Master Plan Area (except as otherwise agreed to by Hewlett-Packard in the Third Amendment being approved concurrently herewith).

7. Hearing. On _____, 2015, the City Planning Commission, designated by Roseville Ordinance No. 3014 as the planning agency for purposes of development agreement review pursuant to Government Code Section 65867, following a duly noticed and conducted public hearing, considered this Fourth Amendment and recommended that the City Council approve this Fourth Amendment for the Campus Oaks Property.

8. Environmental Review. On _____, 2015, the City Council considered the Addendum to the Plan FEIR (the "Addendum") for development of the residential, business professional, commercial, light industrial (tech/business park), park, open space and public/quasi-public uses within the Campus Oaks Property consistent with the Revised Entitlements (the "Project"). An Initial Study prepared in support of the Addendum identified mitigation measures to reduce environmental impacts which have been incorporated into the Project and the Amended Master Plan for the Campus Oaks Property and in the terms and conditions of this Fourth Amendment, as reflected by the findings adopted by the City Council concurrently with this Fourth Amendment.

9. No New Impacts Associated with Approval of Amendment. The City Council has determined that the adoption of this Fourth Amendment involves no new impacts not considered in the Addendum; therefore, no further environmental documents relating to the adoption of this Fourth Amendment are required.

10. Development Agreement Ordinance. City and Landowner have taken all actions mandated by and fulfilled all requirements set forth in the Development Agreement Ordinance of the City of Roseville, Chapter 19.84 of the Roseville Municipal Code. This Fourth Amendment, to the extent it amends and affects the terms of the Development Agreement for the Campus Oaks Property, is consistent with and authorized by the amendment provisions of Section 1.4 of the Development Agreement.

11. Consistency with General Plan and Amended Master Plan. Having duly examined and considered this Fourth Amendment and the Revised Entitlements to be vested hereby, including without limitation, appropriate separation between industrial and residential uses provided by planned roadways, greenways and setbacks, and having held properly noticed

public hearings hereon, City finds and declares that this Fourth Amendment is consistent with the General Plan of the City of Roseville and with the Amended Master Plan.

NOW THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

**1. Amendment of Development Agreement.** The following recital and sections of the Development Agreement for the Campus Oaks Property are hereby amended as follows:

**a. Revised Recital 5 (Entitlements).** Recital 5 is revised as follows:

"5. Entitlements. The City has approved the following land use entitlements for the Campus Oaks Property, which entitlements are the subject of this Agreement:

A. The Roseville General Plan, as amended by Resolution No. _____;

B. The Hewlett-Packard Roseville Master Plan, as amended by the HP Campus Oaks Master Plan Amendment thereto adopted by Resolution No. _____ (the "Amended Master Plan");

C. The Rezoning of the Campus Oaks Property pursuant to Ordinance No. _____;

D. The Large Lot Tentative Subdivision Map for the Campus Oaks Property, as approved by the Planning Commission; and

E. This Fourth Amendment of Development Agreement for the Campus Oaks Property, as adopted by Ordinance No. _____ (the "Adopting Ordinance").

"The approvals described in paragraphs A through D, inclusive, are referred to herein as the "Entitlements." All references to the "Master Plan" in the Development Agreement, as amended hereby and as applied to the Campus Oaks Property, shall mean and refer to the Amended Master Plan described in paragraph B above."

**b. Revised Section 2.2 (Vested Entitlements).** Section 2.2 of the Development Agreement is hereby revised in its entirety to read as follows. As noted in Recital 4 above and the Third Amendment, in support of the coordinated development of the Campus Oaks Property with the HP Property, Landowner acknowledges the changes below are supported, in part, by Hewlett-Packard's agreement in the Third Amendment to reduce the developable square footage and corresponding traffic and utility capacities previously allocated and reserved for development within the HP Property from 1,670,000 sq. ft. to 1,200,000 sq. ft., which reduction in development capacities is being re-allocated to and included within the development of the Campus Oaks Property:

"2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the Campus Oaks Property in accordance with the terms and conditions of this Agreement and the Entitlements. City acknowledges that the Entitlements include the following land uses (with approximate acreages) for the Campus Oaks Property:

| | |
|---|---|
| Low/Med Density Residential | 82.4 acres |
| High Density Residential | 22.0 acres |

| | |
|---|---|
| Commercial/Retail | 19.3 acres |
| Light Industrial (Tech Park/Business Park) | 32.8 acres |
| Business Professional | 5.5 acres |
| Parks | 10.7 acres |
| Paseos | 2.3 acres |
| Open Space | 1.6 acres |
| Fire Station and Well Site (P/QP) | 2.5 acres |
| Roads | 10.7 acres |
| TOTAL | 189.8 acres |

all as set forth in **Exhibit B**. Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the effective date of the Development Agreement, or as they may provide from time-to-time by amendment of the Master Plan. Landowner's vested right to proceed with the development of the Campus Oaks Property shall be subject to subsequent approvals as defined and as provided for in the Master Plan, provided that any conditions, terms, restrictions, and requirements for such subsequent approvals shall not prevent development of the Campus Oaks Property for the uses and to the density or intensity of development or rate of timing of development set forth in this Agreement so long as any limitations set forth in the Master Plan applicable to the Campus Oaks Property have not been reached and further provided Landowner is not in default under this Agreement.

"For purposes of development of Parcels CO-51 and CO-52 of the Campus Oaks Property pursuant to the Master Plan, the Intensity Thresholds for the planned Light Industrial (Tech Park/Business Park) uses described for Parcels CO-51 and CO-52 of the Campus Oaks Property in the Master Plan are as follows:

| **Property** | **Gross Sq. Ft.** | **Water** *(Max Daily Demand)* | **Sewer** *(Max Daily Flow)* | **Electric** *(Peak Annual Demand)* | **Traffic** *(PM Peak Hour Trips)* |
|---|---|---|---|---|---|
| CO Parcels 51 and 52 | 300,000 | 0.17 mgd | 0.06 mgd | 2.02 MW | 291 |

"Landowner and City acknowledge that, as more particularly described in the Master Plan and as analyzed in the Addendum, nothing in this Agreement or the Entitlements vested hereby for the Campus Oaks Property affects or reduces the vested development rights of the other properties within the Master Plan Area. Landowner acknowledges and agrees that the uses described in the Master Plan for the other properties within the Master Plan Area are compatible with the vested uses planned for development of the Campus Oaks Property.

"Landowner acknowledges that it shall have no right to seek to amend the zoning of the portion of the Campus Oaks Property identified on **Exhibit B** as Parcels CO-51 and CO-52 from Light Industrial (Tech/Business Park) use for a period of twenty (20) years from the Effective Date of this Fourth Amendment."

**c. Revised Section 2.4 (City Fees, Taxes and Assessments)** Section 2.4 of the Development Agreement is hereby revised in its entirety to read as follows:

"2.4 City Fees, Taxes and Assessments.

"2.4.1 Processing Fees and Charges. Landowner shall pay those processing, inspection and plan checking fees and charges required by City under then current regulations for processing applications and requests for permits, approvals and other actions, and monitoring compliance with any permits issued or approvals granted or the performance of any conditions with respect thereto or any performance required of Landowner hereunder.

"2.4.2 Public Financing Limited to Specific Funding Mechanisms. This Agreement includes specific construction, funding and reimbursement obligations of Landowner and specific rights or obligations, as the case may be, to participate in a community facilities district(s) or a similar financing district to fund the acquisition and construction of specific facilities and the maintenance of certain improvements. Landowner's obligation with respect to the participation of the Property in any funding mechanisms to support the construction of any other public facilities and improvements or the provision of public services in relation to development of the Property shall be to pay City fees related to the construction and provision of such public facilities authorized by ordinance to be collected by City as of the date that City executes this Agreement as such fees may be adjusted from time to time in accordance with applicable law, or such other fees as may be duly adopted in the future by City from time to time in accordance with applicable law; provided, however, except as otherwise specifically provided in this Agreement, Landowner's obligation to pay future City fees is limited to those fees adopted on a city-wide basis or which apply uniformly to all properties within the City of Roseville which are zoned consistent with the Property's zoning as set forth in the Entitlements, or which apply uniformly to all properties which are similarly situated, whether by geographic location, drainage sheds or other distinguishing circumstances."

**c. New Section 2.5 (Affordable Housing).** New Section 2.5 is hereby added as follows:

"2.5 Affordable Housing. Consistent with the goals and policies contained in City's General Plan and the Master Plan, and subject to the terms of this Agreement, Landowner shall develop or cause ten percent (10%) of the total residential units which are actually constructed within the Campus Oaks Property to be developed as affordable housing. In accordance with the terms of this Section and subject to adjustment based on actual development, Landowner shall provide 95 units affordable to very low, low and middle-income households. The breakdown of percentage of the total number of affordable units to the different income levels shall be 40% for very low, 40% for low and 20% for middle income households. Any adjustment based on actual development shall be subject to the written approval of the City Manager or his/her designee.

"The term "very low income" means households earning 50% or less of median income, "low income" means households earning 50% to 80% of median income, and "middle income" means households earning 80% to 100% of median income, as published annually by the U.S. Department of Housing & Urban Development ("HUD"). Income eligibility and asset verification and calculation guidelines shall be determined in accordance with the HUD Handbook 4350.3 Chapter 5 (or comparable guidelines, if discontinued). For each of the household income ranges specified herein, household income at the upper limit of the specified ranges shall be used in determining qualifying sales prices for affordable purchase residential units. Qualifying rents for affordable rental residential units shall be calculated at the upper range of the specified income levels if no other restrictions are placed on the properties due to the type of financing secured by the ultimate developer of the Parcel.

"The parcels of the Campus Oaks Property within which the affordable housing will be provided are shown in the Master Plan and **Exhibit B-1** attached hereto (the "Affordable Parcels"). The Affordable Parcels will also be identified on the final recorded Large Lot Subdivision Map for the Campus Oaks Property. Such locations may be modified pursuant to Section 2.5.3 of this Agreement.

"2.5.1 Affordable Purchase Residential Units. Subject to the actual number of units constructed within the Campus Oaks Property, Landowner agrees that nineteen (19) units will be reserved on the Campus Oaks Property as detached and/or attached single-family residential units affordable to middle-income purchasers as follows:

| Affordable Parcel | Total Units in Parcel | Middle Income Purchase Units |
|---|---|---|
| CO-5 | 46 | 19 |

"Such units shall be distributed throughout each Affordable Parcel.

"i. Required Agreements. Prior to the approval of the final small lot residential subdivision map containing lots for affordable purchase units within Parcel CO-5, the parties shall enter into City's then current form Affordable Purchase Housing Agreement (or other applicable City-approved form) for such residential purchase units affordable to middle income households, which shall identify the obligation to produce and deliver nineteen (19) residential units affordable to middle-income purchasers. Specific requirements of the agreement will be determined by the Economic Development Director or his/her designee.

"ii. Content. The Affordable Purchase Housing Agreement shall, for each such residential lot subdivision, set forth, among other things, the distribution of the affordable housing units within the subdivision, and include specific requirements for marketing of affordable purchase units, inclusion or modifications of amenities, exterior materials and finishes, alternate means of satisfying the affordable housing obligation, and good faith efforts requirements.

"iii. No City Subsidies. Landowner agrees to provide all of the middle-income affordable purchase units without any subsidy from the City.

"2.5.2 Multi Family Affordable Rental Units. Subject to the actual number of units constructed within the Campus Oaks Property, Landowner agrees that seventy-six (76) affordable rental units will be reserved within the Campus Oaks Property, half of which will be reserved for rental to very low income households and half of which will be reserved for rental to low income households as follows:

| Affordable Parcel | Total Units In Parcel | Total Affordable Unit Allocation | Very Low Income Rental Units | Low Income Rental Units |
|---|---|---|---|---|
| CO-21 | 125 | 38 | 38 | |
| CO-22 | 119 | 24 | | 24 |
| CO-23 | 72 | 14 | | 14 |

"i. Rental Agreement Required. Prior to issuance of a building permit for the applicable Affordable Parcel, the parties shall enter into City's then current form

Affordable Rental Housing Agreement (or other applicable City-approved form) for such residential rental units affordable to low income and very low income households, which shall identify the obligation to produce and deliver the applicable number of rental units affordable to very low or low income households to be provided by such Affordable Parcel. The term of the Agreement shall require the affordable units to be rented only to qualified affordable households for a period of thirty (30) years, commencing on the date of issuance of a certificate of occupancy for each affordable unit. Specific requirements of the agreement will be determined by the Economic Development Director or his/her designee.

"ii. Content. The Affordable Housing Rental Agreements shall, for each such Affordable Parcel, set forth, among other things, the distribution of the affordable rental units within the Parcel, and include specific requirements for marketing of affordable units, inclusion or modifications of amenities, exterior materials and finishes, alternate means of satisfying the affordable housing obligation, and good faith efforts requirements.

"iii. Potential Compensation by City. If and to the extent funding to subsidize the provision of affordable housing with the City of Roseville as described herein is or becomes available to the City and is not otherwise committed by the City to other affordable housing projects, City at its sole discretion may compensate Landowner or its successors for one-half (1/2) of the net present value (discounted at the City's then current investment rate) of the loss of rental revenue that would be expected to accrue over the period that such units are reserved from such available funds. Landowner acknowledges that, as of the Effective Date hereof, City does not have and does not anticipate obtaining any such subsidies that would be available to compensate Landowner hereunder and if City cannot provide or identify any subsidies, Landowner will nevertheless be obligated hereunder to provide the affordable housing as required by this Agreement. In connection herewith, Landowner hereby waives any claims, suits, or actions against City on account of or arising from the Costa-Hawkins Rental Housing Act, California Civil Code Sections 1954.50 et seq.

"If and to the extent available, to compensate Landowner for providing rental housing affordable to low income households and very low income households, such compensation (hereafter "subsidy" or "subsidies") may be issued through a combination of cash investment, density bonus, fee deferrals or financing, federal, and state, local programs or any other form agreeable to the Landowner and City. Landowner shall join City in any application prepared for Federal, State, local or private funding for any potential subsidies and Landowner shall use its best efforts to cooperate with City to obtain approval thereof, provided any additional costs or liabilities associated with Landowner's participation therein shall be subject to Landowner's reasonable approval.

"To the extent that public funds or subsidies are provided to the development of affordable dwelling units, Landowner shall provide written notice to the builder(s) of such affordable units that such construction may be subject to a requirement to pay prevailing wage.

"2.5.3 Inclusion of Affordable Obligation on Large Lot Map. Landowner shall provide notice on the large lot subdivision map identifying the affordable parcels by large lot and Master Plan lot number and shall state the affordable obligation by type (i.e., middle, low or very low) and number of lots or units. The notice shall be designed to provide that,

upon recordation of an Affordable Purchase Housing Agreement or Affordable Rental Housing Agreement, as applicable, upon such parcel or the affordable lots thereof, the notice on the large lot map shall be deemed replaced by such recorded Agreement and no longer separately effective or binding as an encumbrance on the parcel, or lots thereof not encumbered by such recorded Agreement, and shall no longer be listed as an exception to title. The City shall cooperate with any such removal of the effect of such notice from unaffected lots upon recordation of such Affordable Agreements.

"2.5.4 Transfer of Obligation Within Campus Oaks Property. Any proposed transfer of an affordable purchase or rental housing obligation (or any portion thereof) to another parcel within the Campus Oaks Property shall require an amendment to this Development Agreement and the Master Plan. Any such transfer shall also require the owner of the parcel receiving such affordable obligation to comply with the requirements of Section 2.5.3 above to include a notice on its map or parcel that is designed, to the extent practicable, to disclose such affordable obligation as an exception to title on Schedule B of any preliminary title reports thereafter prepared for the receiving parcel.

"2.5.5 Community Facilities Districts. The City Manager or his/her designee shall maintain a list of middle, low and very low-income affordable purchase and rental units for each Parcel which is subject to an Affordable Housing Agreement (or applicable City-approved form) and, on or about May 1 of each calendar year, shall send a copy of such Affordable Housing Agreement(s) to the City Finance Director. To assist with the affordability of these units, Landowner and City agree that, with respect to the Infrastructure CFD to be formed pursuant to Section 3.22 below, the initial monthly maximum special tax, subject to annual adjustment, shall be established at $75 for middle income affordable units, $60 for low income affordable units and $37.50 for very low income affordable units.

"2.5.6 In Lieu Fee - Affordable Housing. In the event City adopts a fee to be paid in lieu of constructing either rental or purchase housing affordable to middle, low or very low income households, Landowner may be eligible to pay such in lieu fee rather than construct affordable housing units on the Campus Oaks Property, subject to the approval of the City Manager or designee.

"2.5.7 Not a Limitation. Nothing in the foregoing Sections 2.5.1 and 2.5.2 shall be construed to limit Landowner from offering units for rental or purchase to households of very low, low or middle incomes in excess of the number of units specified."

**d. Revised Section 3.2 (Parks).** Section 3.2 of the Development Agreement is hereby revised in its entirety to read as follows:

"3.2 Parks, Open Space, and Bike Trails. A total of 18.2 acres of active park land (9.5 acres of which will be dedicated by Landowner and 8.7 of which will be dedicated by Hewlett-Packard pursuant to the Third Amendment), 2.19 net acres of paseo and 1.7 additional acres of open space (to be combined and consolidated with the 44.65 acre existing open space Preserve previously granted to the City by Landowner's predecessor-in-interest, Hewlett-Packard, pursuant to the terms of the Development Agreement) will be dedicated to the City in connection with the development of this Project. Landowner will also pay fees for construction of park and trail improvements, and construct park frontage, paseo and park improvements as set forth in this Section. To facilitate the coordinated development of the Campus Oaks Property with the HP Property, Landowner acknowledges that, pursuant to the Third Amendment, Hewlett-Packard will be offering to dedicate Parcel HP-2 to the City to be credited against the Campus Oaks' park land dedication requirement

and to facilitate Landowner's installation of the neighborhood and city-wide park improvements planned for Parcels HP-2 and CO-64 (the "HP2/CO64 Park") as described in and consistent with the Master Plan. As provided in the Third Amendment, the City will not accept Parcel HP-2 until the HP2/CO64 Park improvements are completed by Campus Oaks as provided herein and accepted by the City, and Hewlett-Packard will continue to own Parcel HP-2 and be responsible for all maintenance obligations related thereto until the Park improvements are completed. In consideration of the benefits to be derived by the Campus Oaks Property from this coordinated development with the HP Property, including without limitation, the park dedication and improvement credits that will be allocable to the Campus Oaks Property associated with the dedication and development of the HP2/CO64 Park, Landowner agrees that the Campus Oaks Property shall be solely responsible for all the costs to design and construct the park improvements to be installed within the HP2/CO64 Park in accordance with the terms hereof.

"The park plans contained in the Master Plan are conceptual only. Further refinements and a final design for the HP2/CO64 Park shall be reviewed and approved by the Parks & Recreation Commission and City Council separate from the City's approval of the HP Campus Oaks Master Plan Amendment.

"Landowner shall not construct any private single access gates or private access from single homeowner's property onto public spaces, such as parks, preserves, open space and paseos. Additionally, Landowner shall place the foregoing restriction as applicable to homeowners in the CC&R's for any single family residential subdivision.

"3.2.1 Park and Open Space Dedications. Landowner shall dedicate to the City the following three (3) park parcels, two (2) paseo parcels and two (2) additional open space parcels as described below and shown in **Exhibit B** and **Exhibit K**:

"A. A 5.04 net acre, more or less, portion of the Campus Oaks Property for the purposes of a public park, shown as Parcel CO-61;

"B. A 2.62 acre, more or less, portion of the Campus Oaks Property for the purpose of a public park, shown as Parcel CO-62;

"C. A 1.84 net acre, more or less, portion of the Campus Oaks Property for the purpose of a public park, shown as Parcel CO-64;

"D. A 0.84 net acre, more or less, portion of the Campus Oaks Property for the purposes of paseo, shown as Parcel CO-63;

"E. A 1.35 acre, more or less, portion of the Campus Oaks Property for the purposes of paseo, shown as Parcel CO-65;

"F. A 0.84 acre, more or less, portion of the Campus Oaks Property for the purpose of public open space, shown as Parcel CO-81; and

"G. A 0.86 acre, more or less, portion of the Campus Oaks Property for the purpose of public open space, shown as Parcel CO-82.

"City acknowledges that, in addition to the foregoing dedications, the prior dedication by Hewlett-Packard of the 44.65 acres of open space shall be credited against the open space dedication requirements for the Campus Oaks Property. Furthermore, Hewlett-Packard's agreement to dedicate approximately 8.7 acres of the HP Property for the HP2/CO64 Park adjacent to the Campus Oaks Property (as more particularly described in the Third Amendment and Master Plan and designated as Parcel HP-2 of the HP Property), in combination with Landowner's dedication of Parcel CO-64, shall be credited as collectively providing 2.16 acres of neighborhood park and 8.38 acres of City-wide park against the park land dedication requirements for the Campus Oaks Property, based on the mix of amenities to be provided thereby.

"Landowner shall dedicate the foregoing park lands, paseos and open space parcels within the Campus Oaks Property on the face of the Large Lot Final Map as an Irrevocable Offer to Dedicate (IOD) of such park lands, paseos and open space parcels within the Property provided that the Large Lot Final Map creating a separate parcel for the subject sites has been recorded. Landowners acknowledges that the City shall not be obligated to accept the IOD for Parcels HP-2 and CO-64 prior to Landowner's completion of the turn-key park improvements required hereunder. City shall accept the dedication of each of the other park lands and paseo parcels at the time when all infrastructure improvements (e.g., curb and gutter, roadway, utilities, utility stubs, etc.) required to serve the dedicated lands are completed by Landowner and either (i) City is prepared to improve and maintain the site or (ii) the improvement thereof has been completed by Landowner pursuant to a park development agreement between the City and Landowner. City shall accept the dedication of the open space parcels after formation of the Public Services CFD described herein that includes funding for the maintenance by the City of such open space parcels.

"Maintenance of these properties remains a Landowner obligation until accepted by City. In the event the Landowner uses any of the above mentioned Parcels for temporary construction activity or staging (e.g., construction equipment parking, dirt/debris stockpiling, etc.), Landowner shall, prior to acceptance by City, restore the site to a like condition to what existed prior to such temporary construction or staging activity.

"3.2.2 Construction of Park Improvements. Landowner shall construct all park improvements for the HP2/CO64 Park to be located on Parcel CO-64 and Parcel HP-2 in accordance with the terms of this Agreement and in accordance with public project regulations and requirements. Paseo improvements to be located on Parcels CO-63 and CO-65 shall be constructed as and when required by the conditions of the subsequently approved tentative small lot residential map that includes such Parcels. Prior to Landowner's construction of the park improvements for the HP2/CO64 Park, the parties shall enter into a separate park development agreement for the construction thereof and appropriate credits against and reimbursement from the applicable neighborhood and City-wide park fees to be generated or provided by such construction. The construction of paseos will not be eligible to receive park fee credits or reimbursement.

3.2.2.A The HP2/CO64 Park shall be improved in conjunction with Landowner's development of the portion of the Campus Oaks Property outlined as Phase B and Phase C on **Exhibit B** ("Phases B and C"). In particular, the HP2/CO64 Park shall be improved in conjunction with development of Parcels CO-1, CO-2, CO-3, CO-6, CO-7, CO-11, CO-12, CO-13, CO-14 CO-16, CO-23, CO-24a, CO-24b (the "Phase B and C Parcels").

3.2.2.B The park facilities for the HP2/CO64 Park shall be constructed and improved pursuant to a separate park development agreement and according to a park master plan for the HP2/CO64 Park to be prepared by Landowner and approved by the City. These park facilities shall be designed in accordance with the design standards for such facilities and improvements described in the City's Park construction standards. Landowner and the City shall use good faith efforts to provide copies of the draft master plan to Hewlett-Packard for review and input by Hewlett-Packard's Site Council, provided final approval thereof shall be made by the City. The improvement plan for this park site shall include detailed construction plans, specifications and drawings for the site to be approved by the City. Landowner shall be responsible for all costs associated with the approval of the plan, including the costs of preparing the required final master plan, construction plans and drawings.

3.2.2.C The estimated cost for the design and installation of the park improvements for the HP2/CO64 Park are set forth in the Park Financing Plan and have been used to establish the neighborhood and city-wide park fees for the Property. The improvements to be required by the City for this park site shall consider and accommodate such cost estimates. The cost estimate shall be adjusted by the City, from the Effective Date of this Agreement to the date of commencement of the construction of the improvements, based on the percentage change in the Engineering News Record, Construction Cost Index for the United States, 20-city average (or comparable replacement index; hereafter, the "ENR Construction Cost Index").

Landowner shall bid the work using a City list of pre-qualified park contractors for the park. If the bid amount for the work, together with all design and other park improvement costs then incurred by Landowner, exceeds the then adjusted cost estimate by more than eight percent (8%), then the City shall either (i) agree to defer the installation of certain improvements within the park site to reduce the cost of the work to be installed by Landowner to 108% of such adjusted cost estimate or (ii) agree to pay its share of the cost of the improvements in excess of 108% of such adjusted cost estimate, as such costs are incurred by Landowner.

3.2.2.D Since the Master Plan graphic is merely conceptual, Landowner shall submit a final and approved master plan to the City for improvement of the HP2/CO64 Park prior to the issuance of the building permit for the 75th residential unit within the Phase B and C Parcels and shall commence construction of the park improvements for the HP2/CO64 Park in accordance with the approved park improvement plans prior to the issuance of the building permit for the 150th residential unit within the Phase B and C Parcels. Thereafter, Landowner shall diligently proceed with such construction and use its best efforts, subject to the provisions of Section 5.3 below, to complete the construction of its improvements to the HP2/CO64 Park within one hundred fifty (150) business days of the date of commencement of such improvement, not including the establishment period as defined in the City's park construction standards.

Landowner acknowledges that development of each Phase B and C Parcels will be dependent on compliance with the foregoing schedule. Accordingly, if the design and construction schedule for the HP2/CO64 Park is not satisfied, the City MAY DENY BUILDING PERMITS WITHIN ANY PHASE B OR PHASE C PARCEL, whether or not the ownership thereof is under a single owner or multiple owners. City acknowledges and agrees that any failure to comply with such schedule shall not affect the rights of Landowner to proceed with the construction of units for which building permits have been issued by City

within Phases B and C and shall not limit the rights of Landowner to develop within any other Phase of the Campus Oaks Property.

BBC Roseville Oaks, LLC, as Landowner, further acknowledges and agrees that, notwithstanding anything else to the contrary in this Agreement or in any assignment of this Agreement, with respect to the obligations under this Section 3.2.2, BBC Roseville Oaks, LLC shall be responsible for the design and construction of the park improvements for the HP2/CO64 Park as and when required hereunder and shall remain responsible therefor notwithstanding any subsequent sale or transfer of any Phase B or Phase C Parcel and notwithstanding any assumption of such obligations by any successor in interest to BBC Roseville Oaks, LLC, unless the City expressly agrees, in writing, to release BBC Roseville Oaks, LLC, from any of such design or construction obligations under this Section 3.2.2.

To assist City in monitoring compliance with the applicable park design and construction schedule, as and when Landowner applies for building permits within a Phase B or Phase C Parcel, Landowner shall give written notice to the Parks Department, indicating the number of units involved in the permit request and the total number of building permits which have then been issued for the Phase B and C Parcels, as well as the status of the design and/or construction of the HP2/CO64 Park.

3.2.2.E Park improvements constructed by Landowner for the HP2/CO64 Park shall include all utilities and all landscaping and irrigation necessary to serve the park improvements to be located therein.

3.2.2.F Upon satisfactory completion of such park improvements for the HP2/CO64 Park by Landowner, City shall accept the dedication of the HP2/CO64 Park and assume the ownership and maintenance thereof.

"3.2.3 Financing and Improvement Agreements for Parks. The construction of improvements to parks within the Campus Oaks Property, and also the construction of the HP2/CO64 Park improvements adjacent to the Campus Oaks Property within Parcel HP-2 of the HP Property, shall be financed through neighborhood and City-Wide park fees established for the Campus Oaks Property by this Agreement. The plan to finance the construction and operation of such park improvements is generally set forth in **Exhibit L** attached hereto (the "Parks Financing Plan").

"i. Financing for Neighborhood Parks. The construction budget for each parcel shall be as allocated in the Park Finance Plan, and which amount is adjusted by the percentage change, annually on July 1, utilizing the Engineering News Record, Construction Cost Index for the United States 20-city average (the "CCI").

ii. Financing of Paseos. No funding is included in the Park Financing Plan for the development of the paseos. Financing for the maintenance of the paseos shall be provided through the Public Services CFD described in Section 3.23 below.

"iii. Maintenance District Financing. Pursuant to Section 3.23 below, Landowner shall support the formation of the Public Services CFD defined therein. Among other things, the Public Services CFD shall be authorized to levy special taxes on the Campus Oaks Property to provide maintenance of the neighborhood parks, streetscapes, paseos and open space parcels within the Campus Oaks Property and the neighborhood park components within the HP2/CO64 Park. Maintenance of the city-wide park components

to be installed within the HP2/CO64 Park shall be the responsibility of the City from and after City acceptance of the fully developed park.

"3.2.4 Neighborhood Park Fee. In accordance with the Park Financing Plan for the Campus Oaks Property, subject to any applicable fee credits, Landowner shall pay a neighborhood park fee (the "Neighborhood Park Fee"), upon the issuance of each residential building permit within the Project, to fund construction of the neighborhood park improvements described above. As more particular shown on Table A-3 of the Park Financing Plan, such neighborhood park fee shall be $3,177 per Low Density, Medium Density and High Density Townhome Residential Unit, and $2,097 per High Density Apartment Residential unit (but excluding carriage units, which shall not pay neighborhood park fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI. All such Neighborhood Park Fees shall be deposited into the neighborhood park fee fund to finance the development of the parks within the Campus Oaks Property and the HP2/CO64 Park.

"The Neighborhood Park Fee, as calculated herein, is figured on 100% of the total dwelling units entitled for the Campus Oaks Property being developed and paying the Neighborhood Parks Fee. City may conduct an annual re-assessment of the Neighborhood Park Fee for the Campus Oaks Property subject to this Agreement and adjust the fee upward if underutilization of entitled dwelling units for the Campus Oaks Property subject to this Agreement exceeds ten percent (10%). In the event of a rezoning of any parcel(s) in the Campus Oaks Property that creates a park funding shortfall, City shall require supplemental neighborhood in-lieu fees to fund such shortfall from the rezoned parcel(s).

"At the completion of all residential and neighborhood park development, if there are any remainder fees, City shall, within thirty (30) days of filing a notice of completion of the last neighborhood park for the Campus Oaks Property, refund to Landowner such remainder fees.

"i. Neighborhood Park Frontage Improvements. When installing road improvements adjacent to neighborhood park sites, Landowner shall construct the frontage improvements, which shall include curb, gutter, and stub utilities for the park site, subject to direction from City on the location of such utility stubs, but shall not be required to include sidewalk or landscaping. The cost of this work is not included in the Neighborhood Park Fee and accordingly Landowner shall not be entitled to any reimbursement from the Neighborhood Park Fee for such frontage improvements. City acknowledges that the cost of sidewalks within the park sites is included in the Neighborhood Park Fee.

"At the time Landowner installs infrastructure frontage improvements for the neighborhood parks, Landowner may construct the sidewalks, as specified in the Master Plan and upon mutual consent of the City and Landowner. Landowner shall be entitled to a reimbursement for the sidewalk costs installed by Landowner, provided City has sufficient funds to reimburse Landowner for such sidewalk improvements at the time that Landowner would construct such improvements. If City does not have or expect to have sufficient funds to reimburse Landowner within sixty (60) days prior to commencement of completion of the applicable frontage improvements, the sidewalk improvements shall deferred to be included as part of the adjacent park improvements and Landowner shall be released from any obligation to construct such sidewalk improvements in connection with the adjacent frontage improvements. Reimbursement shall be based on actual

costs of constructing the sidewalk and as approved by the City prior to construction. All frontage improvements, including any sidewalks, shall be constructed consistent with City standards.

"3.2.5 City-Wide Park Fee. In consideration of Landowner's commitment to build the park improvements for the HP2/CO64 Park, including city-wide park components, a city-wide park fee credit shall be applied in lieu of payment of city-wide park fees per dwelling unit, typically due at building permit. The value of the city-wide park fee credits shall be consistent with the budget outlined in the Parks Financing Plan (**Exhibit L**).

"3.2.6 Bike Trail Construction. Landowner shall design, secure necessary permits and construct certain Class 1 bike trail improvements within the Campus Oaks Property as shown on **Exhibit I** (the "Bikeway Master Plan") and described in the Master Plan. Bike trails shall be constructed to City standards as and when Landowner develops the Parcels within the Campus Oaks Property adjacent to such bike trails. The sections of bike trail to be installed upon development of such parcels are generally shown on **Exhibit I**. The entire length of bike trail along Parcel CO-3 shall be graded at the time that the parcel develops, with the installation of the bike trail improvements per **Exhibit I**.

"If a bike trail is completed prior to City's acceptance of open space within which the bike trail is located, City shall be responsible for bike trail maintenance. City shall enter into an agreement with the Landowner memorializing such obligations and indemnifying Landowner for the public's use of the bike trail prior to the City's acceptance of the open space, which will include the recordation of a temporary maintenance and pedestrian access easement on and across the bike trail. Upon completion of the bike trail and City's acceptance of the open space within which the bike trail is located, City shall continue to be responsible for bike trail maintenance.

"The project shall fund an amount of **$318,000** for the design and construction of the off-site bike trial construction as shown on **Exhibit I** and generally shown as "Future by Others." This money will be included as part of the "Community Facilities District – Public Facilities (Project Infrastructure)" bond sale proceeds and will be paid directly to and retained by the City for such bike trail improvements.

"3.2.7 Entire Park Land Obligation. The City agrees that the provisions of the Master Plan and the commitments contained herein, together with Hewlett-Packard's previous dedication of the 44.6 acres of park/preserve property and commitment to dedicate Parcel HP-2 for the HP2/CO64 Park, satisfy Landowner's General Plan park obligations for the dedication and improvement of neighborhood and City-Wide parks and open space related to development of the Campus Oaks Property.

"3.2.8 Open Space Improvements. When installing road improvements adjacent to the open space, Landowner shall construct the frontage improvements. Frontage improvements shall include sidewalks, split rail fencing and landscaping. The cost of this work shall be payable solely by Landowner, without any fee credits or fee reimbursements. The parties also acknowledge that, subject to the City's review and consent, Landowner may allow certain Indian artifacts to be repatriated into Parcel CO-82 prior to the City's acceptance thereof, which City agrees will not interfere with the City's acceptance thereof."

**e. Revised Sections 3.3.1 and 3.3.2, Replaced Section 3.3.7 and New Section 3.3.8 (Electrical).** Sections 3.3.1 and 3.3.2 of the Development Agreement are hereby revised in their entirety, Section 3.7 (formerly referring to a requirement to enter into a Power Purchase

Agreement) is hereby replaced with a replacement Section 3.3.7, and new Section 3.3.8 is added to read as follows:

"3.3.1 Installation of Underground Electrical Service. As electrical service becomes necessary to be extended along Blue Oaks Boulevard to service the Campus Oaks Property, Landowner shall, at its sole cost, install any such electrical service underground within the public utility easement to be granted to City along Blue Oaks Boulevard pursuant to Section 3.3.2. Landowner shall only be obligated to install the portion of underground electrical service along the frontage of the Campus Oaks Property adjacent to Blue Oaks Boulevard from its intersection with New Meadow Drive to its intersection with Woodcreek Oaks Boulevard, as shown in cross-section in **Exhibit C-1**.

"3.3.2 Public Utility Easement/Sidewalk/Pedestrian Access Easement. Landowner shall grant and convey to City a public utility easement for public utility purposes along Woodcreek Oaks Boulevard from Blue Oaks Boulevard to the southernmost point where Woodcreek Oaks Boulevard exits the Campus Oaks Property. Landowner shall grant and convey to City simultaneously with each of the foregoing easements a co-extensive easement for sidewalk/pedestrian access purposes. Each such easement shall be twenty-five feet (25') wide and shall be measured from the southern boundary of the existing right of way of Blue Oaks Boulevard or the easternmost boundary of the right of way of Woodcreek Oaks Boulevard established pursuant to Section 3.8.2.A, as the case may be and shall be included within the landscape setback established by Section 3.8.10."

"3.3.7 Electric Efficiency and Demand Reduction. In order to mitigate demand for energy supplies and comply with state mandated energy efficiency goals, the following energy efficiency and load management requirements are hereby established:

"i. All residential dwelling units will install residential air conditioning units with, as a minimum standard, a Seasonal Energy Efficiency Rating ("SEER") of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California Regulations, up to a total maximum of 16 points including the 2 point premium, an Energy Efficiency Ratio ("EER") of 12 or greater, and a thermal expansion valve ("TXV"). The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 16 points, and an EER rating of 12.5 or greater along with a TXV will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Utility Director or designee.

"ii. All commercial air conditioning units 5 tons or less (<65,000 btu/h) shall meet the current Consortium for Energy Efficiency ("CEE") Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by the Electric Utility Director or designee."

3.3.8 Electric Vehicle Ready. Every garage of each single family home shall be designed and improved as "Electric Vehicle Ready". To facilitate this use, all garages for single-family units shall either include a ¾" conduit raceway to a spare electric box that is sized for a future 40-amp, 220v outlet, with labeling of the availability thereof, or include a 40-amp, 220v outlet, wired with an acceptable gauge to provide such service. A 40-amp, 220v breaker space must be available in the electrical panel.

**f. Revised Section 3.4.1 (Drainage Impact Study).** Section 3.4.1 is hereby revised in its entirety to read as follows:

"3.4.1 Drainage Impact Study. Landowner has prepared an updated drainage impact study for the Campus Oaks Property that evaluates the size and location of all necessary on-site drainage facilities required to treat and convey all storm water from the Campus Oaks Property to current City Standards. The updated drainage impact study includes a full description of Low Impact Development (LID) and Hydro-modification per the requirements of the City's State-issued NPDES permit. Full capture of trash will be required as and to the extent required by applicable City and state standards and the City's State-issued NPDES permit, including for all storm water leaving priority land uses as defined within the permit. Subsequent drainage analysis will accompany the approval of future entitlement requests and shall be used as the basis of construction drawings."

**g. Revised Section 3.5.2 and New Sections 3.5.3 through 3.5.8 (Water System Improvements and Supply).** Section 3.5.2 of the Development Agreement is hereby revised in its entirety and New Sections 3.5.3 through 3.5.7 are hereby added as follows:

"3.5.2 On-Site Water Lines. Landowner shall construct all on-site water lines, including those major on-site transmission mains shown on **Exhibit E**, as and when required for development within the Campus Oaks Property, as determined by the City based on the timing and scope of development of the Campus Oaks Property from time to time proposed by Landowner. All such improvements shall be constructed pursuant to City's Improvement Standards and shall be subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check and inspection costs as incurred by City for review and inspection of any such improvements. Sizing of pipes shall be as set forth on said **Exhibit E**, subject to any revisions thereto as deemed necessary by the City to serve development of the Campus Oaks Property based on any water master plan updates required by the City in connection with Landowner's development. Notwithstanding any other provision of this Agreement, unless fire flows are maintained and a non-loop system is approved by the Environmental Utilities Director, all areas of the Campus Oaks Property shall at all times be supplied by a loop system. Landowner shall install backflow devices to City's then current specifications at each point where a private on-site water line joins the City-owned water supply system.

"3.5.2.A Phasing of On-Site Lines. The water phasing plan shall consist of the development and extension of an on-site looped water system as shown on **Exhibit E**, as and when required by the City to be installed by Landowner based on the portion(s) of the Campus Oaks Property then proposed for development by Landowner. All development will be served by the City of Roseville's existing 24" water line. At a minimum, as and when Landowner proposes to install any roadways within the Campus Oaks Property within which the water lines shown on **Exhibit E** will be located, Landowner shall be obligated to install the water lines located within such road rights of way. In particular, and without limitation

thereof, in consideration of Landowner's commitment to construct all of HP Way within the Campus Oaks Property prior to recordation of the first small-lot subdivision map or issuance of the first building permit within the Campus Oaks Property, Landowner shall be obligated to install the water lines proposed to be located within HP Way concurrently with its construction thereof. Except as provided above based on any water master plan updates required by the City, City shall have no right to require any changes, modifications or increases in the on-site water line system set forth in **Exhibit E**, provided Landowner may request changes thereto, subject to the reasonable review and approval of the Environmental Utilities Director.

"3.5.2.B Public Utility Easements. Landowner shall offer to dedicate to City a public utility easement for the ownership and maintenance of all water lines to be installed within the Campus Oaks Property, and City shall accept such lines, subject to improvement of the water lines to the then current City standard. In the event Landowner subdivides any portion of the Campus Oaks Property, all lots or parcels created by such subdivision shall be required to be served with water service from a City-owned water line located within an accepted public utility easement and shall install backflow devices and meters as required by City. Until City accepts any such public utility easement(s), Landowner shall be responsible for maintenance of all on-site water lines and facilities and backflow devices.

"3.5.2.C Reservation of Well Site. Landowner hereby offers to dedicate to City a groundwater well site in the area within the Campus Oaks Property referred to as Parcel CO-76 and generally shown on **Exhibit F** attached hereto (the "Well Site"). As shown thereon, the Well Site is adjacent to and shall have access to the 16" water line to be installed within Painted Desert Drive. The Landowner shall be responsible for the construction of a monitoring well for determining water production and quality. The Landowner shall contact the City prior to construction of the monitoring well to receive approval from the City Environmental Utilities Director on the associated construction and sampling plans. The test well shall be commenced prior to the issuance of the first building permit. The production well casing will be designed for Aquifer Storage and Recover (ASR) purposes. Financing for the costs of the production well is included in the City Water Department's CIP program and as such the City shall be responsible for constructing the production well and the above ground improvements such as pumping, treatment and well building facilities.

"It is the intent of this Section 3.5.2.C (and the Parties) that the groundwater well location identified within the Campus Oak Master Plan be capable of achieving a yield of approximately 1,800 gallons per minute and the groundwater is of such quality that only disinfection will be required to meet California Drinking Water Quality Standards. Should the City determine the available capacity or water quality does not achieve these objectives, Landowner shall, at its own cost, work with the City to relocate the site within the Campus Oaks Master Plan until these objectives are satisfied. If no satisfactory site can be identified within the Campus Oaks Master Plan, and upon approval from the City Environmental Utilities Director, an off-site location may be identified and the monitoring well drilled at the alternative site at Landowners expense. All conditions set forth in this Section 3.5.2.C shall remain in force.

"Landowner shall offer to dedicate to City, without compensation and upon recordation of the Large Lot Map, the Well Site identified as Parcel CO-76. Landowner shall be responsible for installing all frontage improvements to Parcel CO-76, including storm drainage, water, wastewater, electric and fiber. The storm drain shall be sized with sufficient

capacity to enable flows up to 1,800 gallons per minute to facilitate flushing the water well. The use of such Well Site shall be limited for the purpose of constructing and maintaining an ASR groundwater well for potable water storage recovery and appurtenant uses. The term of this dedication shall commence upon the Effective Date of this Agreement and shall terminate on the expiration of this Agreement or upon written notice from City that it will not need the Well Site for potable water purposes, whichever occurs first.

"3.5.3 Water Conservation Measures. Landowner and its successors shall implement a Water Conservation Plan included as **Exhibit M** to this Agreement. The Water Conservation Plan shall include compliance with the City's then current Water Efficient Landscape Ordinance and outline all water conservation measures being implemented within the Campus Oaks Property and measures to ensure water conservation objectives are achieved in perpetuity subject to approval of the Environmental Utilities Director prior to issuance of the first building permit. Such water conservation measures shall include, but are not limited to, Weather Based Smart Irrigation Controllers, re-circulating hot water systems, and turf limitations, and shall be disclosed to each purchaser of real property within the Campus Oaks Property. Modifications to the Water Conservation Plan as approved by the Environmental Utilities Director shall not require an amendment to this Agreement.

"3.5.4 Confirmation of Water Supply. The City has determined, even without Landowner's planned utilization of Recycled Water and implementation of the Water Conservation Plan, that the water demand for the Project is less than the demand originally associated with the previously approved land uses for the Campus Oaks Property and, therefore, the available water supply, as originally set-aside to serve development of the Campus Oaks Property, is sufficient to serve all of the Project. This determination was the conclusion of a review of the demand and source issues originally planned for the Property, and as modified by the projected build-out of the Project, based upon the various technical studies completed in connection with the environmental review of the Project. The demand for water at build-out of the Project was determined by reference to the City's current information on water usage by the various land uses included and permitted within the City and the proposed land uses within the Project and by reference to the Campus Oaks Master Water Conservation Plan (June 18, 2015) as shown in **Exhibit M**.

"The sources for water evaluated for the Project are the same types of sources currently used throughout the City; namely, surface water contracts with federal and local agencies, and, in drought or emergency situations, the use of groundwater. City and Landowner are satisfied, based upon detailed technical analysis, that the demand and source assumptions relied upon to assure water for the Project are valid and are adequately served by the water demands and sources originally planned for development of the Property.

"3.5.5 Water System Sequencing. Water system facilities shall be constructed as required by the City and concurrently with the construction of the road improvements described in Section 3.8 of this Agreement. Extensions into the neighborhoods will be completed with their respective development. Water line extensions shall be sequenced to assure looped systems in all developing areas, except as otherwise approved by the Environmental Utilities Director.

"3.5.6 Public Utility Easements. Where the water improvements to be constructed by Landowner are not located within road rights-of-way, as and when Landowner installs such water facilities, Landowner shall grant and City shall accept a non-exclusive public utility easement the width of which shall be in accordance with City's then current

Improvement Standards, for the ownership and maintenance of such lines, together with access thereto for maintenance purposes.

"3.5.7 Disclosure to Buyers. Landowner shall disclose to all residential and nonresidential buyers that the Campus Oaks Property will be served by both surface water and groundwater supplies and that variations in the appearance, taste and color of water may be noticed from time to time and include such disclosure in the CC&Rs for the Campus Oaks Property. The disclosure shall describe the location of the groundwater well.

"As further disclosure Landowner shall install signage at the Well Site on Parcel CO-76 describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The Environmental Utilities Director must review and approve sign layouts prior to installation.

"3.5.8 Water Softeners. As part of its development of the Campus Oaks Property, Landowner and its successors shall not provide water stubouts for the installation of water softeners."

**h. New Section 3.6.2.A (Sewer Improvements).** New Section 3.6.2.A is hereby added as follows:

"3.6.2.A On-Site Sewer Lines Within Campus Oaks Property. Landowner shall construct all on-site sewer lines within the Campus Oaks Property, including those major on-site transmission mains shown on **Exhibit G**, as and when required for development within the Campus Oaks Property, as determined by the City based on the timing and scope of development of the Campus Oaks Property from time to time proposed by Landowner. Sizing of pipes shall be as set forth on said **Exhibit G**, subject to any revisions thereto prior to construction thereof as deemed necessary by the City to serve development of the Campus Oaks Property and as may also be needed to serve planned development of other Property within the Master Plan Area based on any sewer master plan updates required by the City in connection with Landowner's development. If City requires such upsizing, City will be responsible for the costs of such upsizing in recognition that Landowner will be sizing the Infrastructure CFD financing to install the system described in **Exhibit G**.

The sewer phasing plan for the Campus Oaks Property shall consist of the development and extension of the sewer transmission mains as shown on **Exhibit G**, as and when required by the City to be installed by Landowner based on the portion(s) of the Campus Oaks Property then proposed for development by Landowner. At a minimum, as and when Landowner proposes to install any roadways within the Campus Oaks Property within which the sewer lines shown on **Exhibit G** will be located, Landowner shall be obligated to install the sewer lines located within such road rights of way. In particular, and without limitation thereof, in consideration of Landowner's commitment to commence construction of all of HP Way within the Campus Oaks Property prior to issuance of the first building permit within the Campus Oaks Property, Landowner shall be obligated to install the sewer lines proposed to be located within HP Way concurrently with its construction thereof. Except as provided above based on any sewer master plan updates required by the City, City shall have no right to require any changes, modifications or increases in the on-site sewer line system set forth in **Exhibit G**, provided Landowner may request changes thereto, subject to the reasonable review and approval of the Environmental Utilities Director.

Landowner acknowledges that, if any sewer line, or portion thereof, is installed within the Campus Oaks Property by other owners within the Master Plan Area prior to Landowner's development of the Campus Oaks Property that requires such sewer line, Landowner will be obligated to reimburse such other constructing owner for its share of the cost thereof, or portion thereof then serving development of the Campus Oaks Property, in accordance with the reimbursement provisions related thereto in the Second Amendment. Similarly, if Landowner installs any sewer line improvements within Campus Oaks that are sized or used to serve development of other Parcels within the Master Plan Area, City shall use good faith efforts to cause the owner(s) of such benefitted Parcel(s) to reimburse Landowner for its share of the cost thereof consistent with the reimbursement provisions of the Second Amendment."

i. **Revised Section 3.7 (Solid Waste)**. Section 3.7 is hereby revised to read as follows:

"3.7 Solid Waste. Landowner shall be required to utilize City of Roseville Solid Waste hauling services per the City of Roseville Municipal Code, Sections 9.12 and 9.17, and specifically Section 9.17.100 – Periodic refuse collection prohibited."

j. **Deleted Sections 3.8.4 and 3.8.5, Revised Sections 3.8.1 and 3.8.8 and New Sections 3.8.11 and 3.8.12 (Road Improvements).** Sections 3.8.4 and 3.8.5 are hereby deleted, Sections 3.8.1, 3.8.2.E and 3.8.8 (excluding subsections 3.8.8.A, and 3.8.8.B thereof, which are not modified hereby) are hereby revised in their entirety, and New Sections 3.8.2.F, 3.8.11 and 3.8.12 are hereby added as follows:

"3.8.1 Blue Oaks Boulevard.

"3.8.1.A Landowner shall construct the frontage improvements along Blue Oaks Boulevard consisting of curb, gutter and remaining asphalt to connect to the existing Blue Oaks Boulevard roadway improvements, streetlights, and electric trench to underground the existing 12kv electric line from its intersection with Foothills Boulevard to its intersection with Woodcreek Oaks Boulevard, as shown in cross-section in **Exhibit C-1**. Unless otherwise constructed in part by the owner of Parcel 3 in connection with its development of Parcel 3 prior to development of the Campus Oaks Property, Landowner shall commence construction of the foregoing improvements along Blue Oaks Boulevard between Foothills Boulevard and Woodcreek Oaks Boulevard within twelve (12) months of the first sale of bonds by the Infrastructure CFD (which will include the amount then estimated by the City to construct such improvements), subject to the City's good faith processing of the improvement plans for Blue Oaks Boulevard pursuant to this Agreement. Provided, however, Landowner shall not be obligated to install any portion of the frontage improvements along Parcel 3 if and to the extent the installation thereof requires the cooperation of the owner thereof to provide construction access to facilitate such construction and such necessary access is not provided by such owner.

"Sidewalk improvements shall not be required to be installed along Blue Oaks Boulevard within the Campus Oaks Property except in connection with the issuance of a building permit for a building within Campus Oaks Property within 300' or less of the Blue Oaks Boulevard right of way, in which case such sidewalk improvements shall be installed by the applicant for such building permit. All improvements to be installed by Landowner shall comply with City's then current standards for public streets. Auxiliary lanes, deceleration lanes and bus turnouts can encroach into the public utility easement (PUE)/landscape setback easement (LSE).

"3.8.1.B In addition to and in conjunction with the improvements to Blue Oaks Boulevard required in subsection 3.8.1.A herein, Landowner shall construct the southerly one-half (1/2) of the landscape median in Blue Oaks Boulevard between Foothills Boulevard and Woodcreek Oaks Boulevard, as shown in **Exhibit C-1**. In the event that the City has sufficient funds to pay for the costs of the northern one-half (½) of the landscaping, and at the City's request at the time of construction, Landowner shall construct the entire landscaped median with funding from the City for the northern one-half (½) of the landscaping, which funding shall be paid by the City concurrently with Landowner's payment of its share of the costs to the contractor for such work."

---

"3.8.2.E In addition to and in conjunction with the improvements to Woodcreek Oaks Boulevard, Landowner shall construct the easterly one-half (1/2) of the landscape median in Woodcreek Oaks Boulevard between Blue Oaks Boulevard and the southerly edge of the property as shown in **Exhibit C-2**. In the event that the City has sufficient funds to pay for the costs of the western one-half (½) of the landscaping, and at the City's request at the time of construction, Landowner shall construct the entire landscaped median with funding from the City for the western one-half (½) of the landscaping, which funding shall be paid by the City concurrently with Landowner's payment of its share of the costs to the contractor for such work."

"3.8.2.F Prior to the issuance of the first building permit within the Campus Oaks Property, Landowner shall pay to the City the amount of $128,488.49 per the reimbursement agreement by and between the City and the then developer of the Longmeadow Subdivision made on July 1, 2009, and approved by the City Council as Resolution 09-276. The reimbursement provides payment for public improvements along the frontage of Woodcreek Oaks Boulevard that were in excess of the capacity necessary to serve the Longmeadow Subdivision and which would have otherwise been the obligation of the Campus Oaks project."

---

"3.8.8 Timing of and Standards for Internal Roadways. Subject to compliance with all other provisions of this Agreement, Landowner shall construct its on-site, internal roadway improvements to then applicable City Standards as and when required by the City to serve the portion(s) of the Campus Oaks Property then proposed for development by Landowner. The timing and extent of such internal road improvements required to serve development of the Campus Oaks Property, including providing any necessary secondary emergency access therefor, may be further conditioned and described by the City in connection with the City's processing and approval of subsequent approvals for the Project, including tentative subdivision maps related thereto."

---

"3.8.11 Immediate Construction of HP Way. Within ninety (90) days of approval of this Fourth Amendment, Landowner shall dedicate to the City public rights of way for road and utility improvements within the Campus Oaks Property for HP Way for acceptance and operation as public streets, as shown on **Exhibit C**. Prior to issuance of the first (1st) permit for any grading, development or construction of any improvements or buildings within the Campus Oaks Property, other than a grading permit for roadway construction within the HP Way right of way, Landowner shall have obtained or caused to be dedicated to the City all required rights of way for and shall have commenced construction of the full road improvements for HP Way from Foothills Boulevard to Blue Oaks Boulevard. All

improvements to be installed within HP Way shall comply with City's then current standards for public streets.

"Prior to the issuance of the 700th residential building permit, Landowner shall be responsible to design and commence construction of the necessary improvements to the HP Way/Foothills Boulevard intersection to include a third south bound through lane on Foothills Boulevard. The modifications shall include all utility relocations, landscape modifications, the installation of a westbound turn lane on Foothills Boulevard, RoW acquisitions, and all signal modifications as may be required. These intersection improvements shall be the full responsibility of the Landowner.

"3.8.12 Other Roadways. As and when Landowner seeks to obtain grading or building permits for development of the Campus Oaks Property, Landowner shall construct the applicable portions of Painted Desert Drive, New Meadow Drive and/or Crimson Ridge Way located therein required to serve such development of the Campus Oaks Property, as reflected by the phasing map attached hereto as **Exhibit B**. All improvements to be installed within said roadways shall comply with City's then current standards for public streets."

**k. Deleted Section 3.15 (Light Rail Funding).** Section 3.15 is hereby deleted.

**l. Revised Section 3.17 (Reclaimed Water).** Section 3.17 of the Development Agreement is hereby revised in its entirety as follows:

"3.17 Recycled Water System Improvements. Landowner shall use recycled water for the purpose of landscape irrigation for all parks and landscape setbacks, medians, paseos and other landscape areas including all multi-family and non-residential landscaping uses within the Campus Oaks Property. City and Landowner agree that Landowner shall use recycled water for irrigation, and Landowner agrees to pay for the costs of connecting to and extending City recycled water lines as required to irrigate landscaping for new projects.

"3.17.1 To facilitate Landowner's use of recycled water:

"3.17.1.A Landowner shall prepare a Title 22 Recycled Water Engineering Report for submittal to and review by the State Regional Water Quality Control Board and State Department of Public Health documenting the use of recycled water in the Campus Oaks Property. Prior to submittal to the State Water Quality Control Board, Landowner shall obtain approval of the City's Environmental Utilities Director. Recycled water shall not be provided for use within the project until the Title 22 Recycled Water Engineering Report has received all required State approvals.

"3.17.1.B In connection with the use of recycled water, Landowner shall be responsible for obtaining any and all ancillary necessary permits prior to actual use of recycled water and for the payment of any and all City fees and charges related thereto.

"3.17.1.C Landowner shall, at its sole cost and expense, install the recycled water lines within the planned road rights of way as generally shown in **Exhibit H** attached hereto. Such installation shall include recycled water stubs to serve the median landscaping to be installed by Landowner within Blue Oaks and Woodcreek Oaks Boulevards. Any and all recycled water lines shall be constructed pursuant to City's then current Improvement Standards to permit acceptance thereof by the City upon completion thereof and shall be subject to City plan review, construction inspection and final approval.

"3.17.1.D Landowner shall be required to add additional pumping capacity and ancillary equipment necessary to meet the increase peak demands of the project as identified in the Landowners Recycled Water System Master Plan. Landowner shall reimburse the City for the required upgrades to the pumping capacity at the North Zone and Dry Creek Wastewater Treatment Plant for actual costs of upgrades up to, but not exceeding $300,000.

"3.17.1.E Provided the foregoing requirements are satisfied, City shall make recycled water available to Landowner at user charges specified in the Roseville Municipal Code (RMC).

"3.17.2 Improvement Standards. All recycled water improvements shall be designed and constructed pursuant to the City's then current Improvement Standards and shall be subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check and inspection costs as incurred by City for review and inspection of such improvements.

"3.17.3 Non-Exclusive Public Utility Easement. Where the recycled water facilities are not located within road rights-of-way, as and when such facilities are installed, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such facilities, together with access thereto for maintenance purposes only. Easement widths shall be granted in accordance with the City's then current Improvement Standards.

"3.17.4 Recycled Water Use Disclosure to Buyers. Landowner shall disclose to all buyers that recycled water shall be used for irrigation of parks and landscape corridors, medians, paseos adjacent to collector streets and other landscape areas, including all multi-family and non-residential landscaping uses. Such disclosure shall be included in the CC&Rs for all residential buyers and other recorded notice instrument for all non-residential buyers.

"3.17.5 Terms and Conditions for Recycled Water Operations, Use, and Service. All private commercial recycled water customers within the Campus Oaks Property shall sign a Terms and Conditions for Recycled Water Operations, Use and Service prior to service meter installation and recycled water being introduced to the site per requirements of the City's Municipal Code at the time of connection."

**m. New Sections 3.19 through 3.30 (Miscellaneous Landowner Obligations).** New Sections 3.19 through 3.30 are hereby added as follows:

"3.19 Phases of Development. The Phases of Development of the Campus Oaks Property identified on the Map of the Project attached as **Exhibit B** are intended to illustrate the road and related utility improvements anticipated by Landowner to be installed in connection with the development of the portions of the Campus Oaks Property within such Phases. Except as otherwise provided herein with respect to Landowner's commitment to commence construction of HP Way roadway and ancillary utilities prior to the issuance of any building permits within the Campus Oaks Property, this Phasing map shall not be deemed to imply that Landowner is obligated to develop the Campus Oaks Property in any particular order or sequence or is required to complete development within any Phase prior to commencement of development within any other Phase of the Campus Oaks Property.

Landowner acknowledges that modifications to the Phasing Plan as shown in **Exhibit B** shall require additional City Review. Landowner shall be responsible for all costs associated with the preparation of any required special studies and for the associated cost of time and materials of City Staff for the review and processing of the requested information as deemed necessary by City.

"3.20 Miscellaneous Public Facilities, Services and Disclosures

"3.20.1 Fire Tax Equivalent Fee. The Fire Service Construction Tax set forth in Chapter 4.46 of the Roseville Municipal Code is no longer in effect. Landowner or its respective successors shall pay a fee equal in amount to the discontinued Fire Service Construction Tax at issuance of building permit. Landowner hereby consents to and waives any objection to the imposition of such substitute fee.

"3.20.2 Public Benefit Fee. As partial consideration for this Agreement, and to ensure that the Project will benefit the current and future residents of Roseville, Landowner shall pay a Public Benefit Fee at the time of obtaining each residential building permit for the Project. The Public Benefit Fee for each low density and medium density residential unit shall be $1,280. The Public Benefit Fee for each high density residential unit shall be $845.

"3.20.3 Community Infrastructure and Parks Benefit Fee. In consideration of converting an industrial land use into a residential land use, Landowner acknowledges and agrees to pay a Community Infrastructure and Parks Benefit Fee. The Community Infrastructure and Parks Benefit Fee shall be paid at the time of building permit issuance for the 552 LDR and MDR units and 396 HDR units included in the Project. In consideration of the community benefits to be derived by development of the Campus Oaks Property, the Community Infrastructure and Parks Benefit Fee shall be $_____ per the 552 LDR and MDR units and $_____ per the 396 HDR units, provided however, in order to assist the affordable housing goals for the Project, the Community Infrastructure and Parks Benefit Fee shall not be assessed against affordable residential units subject to an Affordable Purchase Housing Agreement or Affordable Rental Housing Agreement.

"3.20.4 Signage for Future Public Facilities. Landowner shall provide, install and maintain signage at the following public facility sites to alert residents of future facilities: park sites (parcels CO-61, CO-62, and CO-64), fire station (parcel CO-75), and bike trails where they will abut residential property, per City specifications and applicable sign permits.

"3.20.5 Signage for Future Tech/Business Park Development. Prior to development of Parcel CO-52, Landowner shall provide, install and maintain signage at Parcel CO-52 to alert residents of future development of tech/business park uses planned for Parcel CO-52 facing the residential parcels across HP Way pursuant to the applicable sign permit therefor.

"3.20.6 Construction Waste. Landowner shall comply with construction waste requirements set forth in the CA Green Building Code and The City's Construction & Demolition Recycling Ordinance, Chapter 9.17.000. All construction debris shall be delivered to the Placer County Western Regional Materials Recovery Facility. Landowner shall require that contractors and subcontractors submit to the City Environmental Utilities Department records of waste diversion and disposal in order to verify compliance with this requirement.

"3.20.7 Weed Abatement on P/QP Parcels. Prior to acceptance by the City of any P/QP parcel, Landowner shall maintain such P/QP parcel to meet City's weed abatement standards.

"3.21. School Fee Agreements. Landowner has entered or will enter into separate written agreements with the Roseville City School District and the Roseville Joint Union High School District (collectively, the "Districts"), prior to any subdivision map approval or issuance of any building permit, to mitigate the impacts of development of the Campus Oaks Property on said Districts. Such agreements outline the timing and amount of development impact fees payable by development of the Campus Oaks Property to mitigate such impacts. With the execution thereof, City agrees that so long as Landowner is not in default of said agreements, City shall process and approve any subdivision maps or other such entitlements for the Campus Oaks Property and issue any building permits for development thereof consistent with the Entitlements. Landowner agrees that a default under any of these school agreements shall also constitute a default under this Agreement.

"3.22. Community Facilities District - Public Facilities (Project Infrastructure).

"3.22.1 Formation. Landowner and City may form a Community Facilities District for the purpose of financing the construction and/or acquisition of public infrastructure and facilities within the Campus Oaks Property (an "Infrastructure CFD"). If requested by Landowner, City and Landowner, shall use their best efforts to cause to be formed the Infrastructure CFD for the purpose of financing the acquisition or construction of some or all of the improvements and facilities and payment of capital facility fees eligible for CFD financing (the "CFD Eligible Improvements") within and associated with the Project, including those improvements and impact fees which will mitigate impacts of the Project upon areas inside and outside of the Project, and will be owned, operated and maintained by the City or another public agency. A list of CFD Eligible Improvements is attached hereto as **Exhibit N**.

"More specifically, the CFD Eligible Improvements are those improvements including, but not limited to roadway and frontage improvements for HP Way, Blue Oaks Boulevard, Woodcreek Oaks Boulevard, New Meadow Drive, Painted Desert Drive and Crimson Ridge Way; traffic signals; right of way acquisitions; water, sewer, recycled water, and drainage improvements and appurtenances; landscape and landscape irrigation and drainage facilities; environmental mitigation and remediation; bicycle and pedestrian facilities; parks and paseos within the Campus Oaks Property and the HP2/CO64 Park; electrical and dry utility improvements; transit improvements; masonry walls; development impact fees; design, engineering, surveying, construction management, and security for CFD Eligible Improvements; and other improvements and/or impact fees as which are defined as authorized improvements under the Infrastructure CFD selected by the City or any ordinance under the City.

"Formation of the Infrastructure CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, et seq. Landowner shall be allocated and assessed special taxes as specified in a tax formula agreed to by City and Landowner, in accordance with the financing plan for the Project. The rights and obligations under this Section 3.22 shall survive the termination or expiration of this Agreement.

"i. Voluntary Formation. Nothing in this section shall be construed to require Landowner to form an Infrastructure CFD nor, if formed, to preclude the payment by an owner of any of the Parcels to be included within the Infrastructure CFD a cash amount equivalent to its proportionate share of costs for the CFD Eligible Improvements, or any portion thereof, prior to the issuance of bonds.

"ii. Terms of CFD. If Landowner desires to pursue an Infrastructure CFD, City and Landowner agree that, with the consent of Landowner and to the extent permitted by law, City and Landowner shall use their best efforts to cause bonds to be issued and in amounts sufficient to affect the purposes of this section. City and Landowner further agree that, with the consent of Landowner or their successor(s) in interest, and to the extent permitted by law, the City agrees to the following:

"(a) Maximum Annual Taxes for residential units, when aggregated with all other existing or expected taxes and assessments (excluding homeowners association assessments), shall not exceed 2.00% of the assessed valuation, net of the homeowner's exemption (2% Test).

"(b) The Special Tax shall be levied for as long as needed to service the principal and interest on bond debt to fund the acquisition or authorized facilities, and to pay for any additional authorized facilities not reimbursed with bond proceeds as defined in the Funding, Construction, and Acquisition Agreement during the first ten (10) years of the Special Tax levy.

"(c) City shall not unreasonably deny the Maximum Annual Tax escalating at 2% per year.

"(d) Authorized facilities shall include, among other items, development impact fees for public improvements.

"(e) Annual Costs shall provide that special taxes not used for debt service and City administration be paid to Landowner during the first ten (10) years of the Infrastructure CFD for the costs and/or acquisition of any authorized facilities not reimbursed with bond proceeds (pay-as-you-go). City shall reasonably consider a reasonable interest component for any authorized facilities reimbursed with pay-as-you-go provided for in the Funding, Construction and Acquisition Agreement defined below.

"(f) Landowner may utilize the Statewide Community Infrastructure Program ("SCIP") for any eligible impact fees.

"(g) Landowner may utilize a phased bond sale or sales.

"(h) Landowner may utilize private placement of bonds.

"iii. Acquisition Agreement. Concurrent with any formation of the Infrastructure CFD, Landowner and City shall enter into a shortfall agreement as defined in the Funding, Construction, and Acquisition Agreement, in form and substance acceptable to City, whereby Landowner shall covenant to finance the costs of the CFD Eligible Improvements, to the extent that the bonds issued by the Infrastructure CFD do not provide sufficient funding for the completion of such Improvements, subject to reimbursement/acquisition by pay-as-you-go proceeds to the extent available.

"iv. Alternative Financing. Nothing herein shall be construed to limit Landowner's option to install the public improvements through the use of traditional assessment districts or private financing.

"3.23 Community Facilities District - Public Services (Services CFD).

"3.23.1 Formation of Campus Oaks Public Services CFD. No residential building permit, excluding permits for model homes, or certificate of occupancy for non-residential uses, shall be issued until a Community Services District - Public Services has been formed to include the Campus Oaks Property ("Public Services CFD"). Landowner consents to and shall cooperate in such formation or other such financing mechanism for maintenance purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.23.1(i) below. Formation of the Public Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, et seq. The Public Services CFD will fund maintenance of landscaping, paseos and open space (parcels CO81 and CO82), neighborhood parks within the Campus Oaks Property, and the neighborhood park components of the HP2/CO64 Park. The rate and method for the Public Services CFD shall reflect differential tax rates between low density residential, medium density residential, high density residential, and non-residential land uses.

"i. Public Services. The Public Services CFD shall provide the funds required for the performance of maintenance obligations consisting of the following:

"(a) Autumn leaf cleanup for collector and local streets;

"(b) Maintain neighborhood parks within the Campus Oaks Property and the neighborhood park improvement components to be installed within the HP2/CO64 Park and accepted by the City;

"(c) Maintain paseos, and medians, and landscape corridors, including masonry walls installed therein along arterial roadways where they are adjacent to low and medium density residential land uses within the Campus Oaks Property, and medians within HP Way, and median landscaping within Woodcreek Oaks Boulevard and Blue Oaks Boulevard adjacent to and fronting the Campus Oaks Property;

"(d) Maintain bikeways and trails and their appurtenances (drainage [limited to culverts or outfall pipes from adjacent subdivisions or roads], signs, benches, striping and ancillary landscaping) within and adjacent to the Campus Oaks Property;

"(e) Maintain City and neighborhood entry features within the Campus Oaks Property, public rights-of-way and ancillary landscaping;

"(f) Conduct any necessary environmental mitigation monitoring, and the annual review thereof, as and to the extent required by the Mitigation Monitoring Plan related to the EIR and Addendum, and annual Development Agreement review and implementation;

"(g) Inspect, monitor, and maintain all water quality structural controls, storm management facilities (and programs) within rights-of-way and open space;

"(h) Maintain open space parcels CO81 and CO82, including general maintenance, signage and City-owned fence maintenance, and trash and debris collection;

"(i) Conduct all monitoring, reporting and adaptive management for and maintenance of the open space preserve area previously dedicated to and accepted

by the City consistent with the 404 Permit and O&M Plan (the "Preserve Maintenance Costs"), as more particularly described in that certain Agreement to Fund Maintenance Costs between the City and Hewlett-Packard Company, dated June 18, 2008, and recorded against the Campus Oaks Property as Document No. 2008-0053391 (the "Maintenance Funding Agreement"). Such Preserve Maintenance Costs shall be financed by this Public Services CFD if and only if Community Facilities District 4 (Annexation 4) previously formed by the City to finance such costs is terminated, discontinued or otherwise unable to fund such Preserve Maintenance Costs. By authorizing these Preserve Maintenance Costs for financing under this Public Services CFD and thereby providing additional assurance to the City that these Preserve Maintenance Costs will be funded in perpetuity, the City acknowledges that, upon formation of this Public Services CFD, the requirement to provide such additional assurances under the Maintenance Funding Agreement shall be deemed fully satisfied and City shall cooperate in any additional documentation required to remove the Maintenance Funding Agreement from the Campus Oaks Property as a document of public record;

"(i) Maintain fire breaks within open space areas; and

"(j) Maintain a Replacement Reserve Fund for repair and replacement of entry features, signage, lighting, landscaping and irrigation retrofits in paseos, medians and landscape corridors, and other special features including structures, park features/amenities, etc. included in the areas to be maintained through the Public Services CFD, as indicated in the Design Guidelines.

"3.23.2 Public Parcel Exclusion. Landowner expressly agrees that Parcels conveyed or to be conveyed to the City shall be excluded from any assessment imposed by the Public Services CFD.

"3.24 Community Facilities District – Municipal Services (Annexation to CFD 3).

"3.24.1 Formation/Annexation; Consent, Waiver and Special Benefit. No residential building permit, excluding permits for model homes, shall be issued until a Community Facilities District – Municipal Services ("Municipal Services CFD") has been formed or the Campus Oaks Property has been annexed to the City's existing Municipal Services CFD. Landowner consents to and shall cooperate in such formation or other such financing mechanism for services purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.24.2. Formation of or annexation to the Municipal Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, et seq. The initial amount of the maximum special tax shall be in accordance with the Municipal Services District Rate, Method, and Apportionment ("RMA"), and adjusted annually for inflation. The initial amount of the maximum special tax (for the 2015/16 City fiscal year, and as subsequently adjusted annually) shall be $156 for LDR units, $91 for MDR units, $46 for HDR units, $366 per acre for business professional/tech/business park land uses, and $425 per acre for commercial land uses. City shall initiate the necessary steps to revise the RMA in the City's existing Municipal Services CFD to conform to the above-referenced initial amounts of maximum special taxes.

"3.24.2 Municipal Services. The Municipal Services CFD shall provide the funds required to offset the Project's impact on City general fund resources available to pay for

municipal services citywide, including the Project. The funds shall be utilized for general fund purposes.

"3.25 Fire Station Site. Landowner shall reserve for transfer to the City an approximately 2.15 acre site (Parcel CO-75), for use as a fire station at the location shown in the Campus Oaks Master Plan and as shown in **Exhibit J** attached hereto. The net buildable area (i.e., an area of land, which may be fully and completely utilized for structures and other improvements) shall be no less than 2.15 acres. Site frontage improvements and site preparation as described below are to be completed by Landowner prior to City acceptance of Landowner's conveyance of the site and funded from the Infrastructure CFD bond proceeds.

At Landowner's expense, site grading, frontage improvements including roadways, curb and gutter, sidewalks and utility services (including water, sewer, gas, electric, voice/data communication, fire systems and other such utility services) shall be completed prior to transfer of the site to the City consistent with the City's Grading Ordinance. If retaining walls are required, the retaining wall shall be a split faced.

Prior to recordation of the first small lot residential subdivision map or issuance of first building permit, Landowner shall also fund from the Infrastructure CFD the City's cost, not to exceed $10,000, a propagation study to determine if a public safety radio tower will be needed on the site when the station is in operation.

"3.26 Disclosures to Subsequent Purchasers. This Agreement shall constitute notice to all successors to Landowner hereunder, and to all subsequent purchasers of any lots and/or residential units within the Campus Oaks Property, of the following matters:

"1. Designation of Blue Oaks Boulevard as a truck route.

"2. The existence of this Development Agreement on the Campus Oaks Property. However, this notice shall not extend to the purchaser of a completed individual single family residential unit.

"3. The Project will be served by surface water supplies and by groundwater supplies.

"4. Recycled water will be used to irrigate parks and landscape setbacks, medians, paseos and other landscape areas including all multi-family and non-residential landscaping uses.

"5. Requirement to implement water conservation measures per the project Water Conservation Plan attached hereto as **Exhibit M**, which may include such measures as Smart Timers.

"6. Proximity of PG&E utility easement for high-pressure natural gas line along the eastern boundary of the Campus Oaks Property.

"7. Requirement for fifty percent (50%) reduction in construction waste stream.

"8. Location of schools and parks within one mile.

"9. Parcels adjacent to Open Space may have a public bike trail and appurtenances adjacent to said parcels.

"10. Location of well site.

"11. Owners of residential units adjacent to separated sidewalks shall be responsible to maintain area between curb and sidewalks.

"12. Masonry walls, within the City right-of-way will be owned by the City, which is responsible for their maintenance, repair and replacement.

"13. Solar envelope impact: Landowner shall disclose to all residential and nonresidential buyers that certain properties, specifically those adjacent to major arterials and collector streets where City-maintained landscaping is installed, may impact the buyer's opportunity to install solar panels or structures or the efficiency or effectiveness of such solar panels or structures. And that this is primarily due to the trees within the street landscapes as being generally medium to large shade trees, which may cast shade, leaf litter, or other natural affects onto the adjacent property.

"14. Designation of Blue Oaks Boulevard, Woodcreek Oaks Boulevard, HP Way, Painted Desert Drive and Crimson Ridge Way as potential fixed-route transit routes, including a map of the planned transit stops and park and ride within the Campus Oaks Property.

"If Landowner records any Property CC&Rs, such CC&Rs shall include the foregoing disclosures and the foregoing disclosures shall not be omitted or deleted from the CC&Rs without the City Attorney's prior written approval."

"3.27 Transportation Systems Management. Landowner and its successors shall comply with the City's Transportation Systems Management Ordinance.

"3.28 Park-and-Ride Lot. A twenty (20) space park and ride lot shall, as shown on **Exhibit C**, be constructed by Landowner at its expense on Parcel CO-41 when said parcel is developed. Maintenance of the improvements shall be the responsibility of the Landowner. Park and ride lots shall allow for parking daily between the hours of 5:00 am and 10:00 pm.

"3.29 Alternative Transportation Modes Marketing. The Landowner shall provide to each new resident educational and marketing materials for alternative modes of transportation. To implement this requirement, the Landowner will periodically contact the Alternative Transportation Division to obtain current City prepared and produced information.

"3.30 Master Plan Funding. Landowner shall pay their fair share on a City-wide basis of the Long Range Master Transit Plan (LRMTP), the Short Range Transit Plan, and Bicycle Master Plan. The fair share payment for each shall be paid to the City prior to recordation of the large lot final map. Total City-wide fair share costs for all plans shall not exceed $3,500."

**n. Revised Section 4.2.1 (Reimbursements for Road Improvements)**. Section 4.2.1 is revised to read as follows:

"4.2.1 Reimbursements for Road Improvements. Roadway improvements along Woodcreek Oaks Boulevard, Blue Oaks Boulevard, Foothills Boulevard and HP Way in excess of Landowner's required Frontage Improvements (including the portion of the four-lane segment of HP Way located between Parcels 1 and 2 in excess of the Frontage Improvements related thereto, and new and additional traffic signal improvements required in connection with connections to such roadways, and the third southbound through lane required hereunder for Foothills Boulevard) constructed by Landowner pursuant to this Agreement shall be subject to a funding, construction and acquisition agreement (the "Funding, Construction and Acquisition Agreement") between Landowner and City. City shall establish a traffic mitigation fee set-aside fund dedicated to CIP improvements within the Master Plan Area that are in excess of required Frontage Improvements by withholding 60% (the "TMF Set-Aside Fund") of City Traffic Mitigation Fee ("TMF" or "City TMF Fund") revenues paid by Landowner and by development within the HP Property. Payments to Landowner for CIP improvements shall be on a first completed, first paid basis and shall be distributed from the TMF Set-Aside Fund as improvements are constructed and invoiced pursuant to the Funding, Construction and Acquisition Agreement; any such payments shall be payable to Landowner notwithstanding any initial funding therefor that may be provided by the Infrastructure CFD secured against the Campus Oaks Property. Within thirty (30) days of City acceptance of improvement plans, City and Landowner shall enter into a Funding, Construction and Acquisition Agreement to provide for periodic progress payments to Landowner, based upon invoices for actual work constructed, for stages of the eligible roadway improvements described in this Section 4.2.1 that have been signed off by City inspectors.

"City agrees that, in consideration of Landowner financing of such improvements that may be part of a City project for which the City is collecting development impact fees, either privately or through the Infrastructure CFD, Landowner, upon entering into an improvement agreement with City and posting security for such improvements (or providing funds therefor through the Infrastructure CFD), shall be entitled to credits against the City TMF and/or reimbursements pursuant to the Funding, Construction and Acquisition Agreement. Such credits may be applied against the 60% portion of the TMF that otherwise would have been deposited into the TMF Set-Aside Fund. Such credits and/or reimbursements are owned personally by Landowner and do not run with the Property to successors and assigns, unless Landowner provides written notice to City that said credits and reimbursements have been assigned by Landowner to a third party. Landowner may assign such fee credits for use anywhere within the Campus Oaks or HP Properties. Such personal ownership of credits and reimbursements by Landowner applies to all credits and reimbursements set forth in this Section 4.2.1 and all other credits and reimbursements provided under this Agreement. City shall use its reasonable best efforts to establish a program to track credits owned by Landowner as provided herein, provided Landowner hereby agrees to hold the City harmless for any credits that are misapplied by City."

**o. New Sections 9.7 and 9.8 (Estoppel and Mortgagee Protection).** New Sections 9.7 and 9.8 are hereby added as follows:

"9.7 Estoppel Certificate. Either party may, at any time, and from time to time, deliver written notice to the other party requesting such party to certify in writing that, to the knowledge of the certifying party, (i) this Agreement is in full force and effect and a binding obligation of the parties, (ii) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments, and (iii) the requesting party is not in default in the performance of its obligations under this Agreement, or if in default, to

describe therein the nature of such default. The party receiving a request hereunder shall execute and return such certificate within thirty (30) days following the receipt thereof. City acknowledges that a certificate hereunder may be relied upon by transferees and mortgagees of Landowner.

"9.8 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Landowner, in any manner, at Landowner's sole discretion, from encumbering the Campus Oaks Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Campus Oaks Property, except as limited by the provisions of this section. City acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with Landowner and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Campus Oaks Property shall be entitled to the following rights and privileges:

"9.8.1 Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Campus Oaks Property made in good faith and for value, unless otherwise required by law.

"9.8.2 The mortgagee of any mortgage or deed of trust encumbering the Campus Oaks Property, or any part thereof ("Mortgagee"), which Mortgagee has submitted a request in writing to City in the manner specified herein for giving notices, shall be entitled to receive written notification from City of any default by Landowner in the performance of Landowner's obligations under this Agreement.

"9.8.3 If City receives a timely request from a Mortgagee requesting a copy of any notice of default given to Landowner under the terms of this Agreement, City shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to Landowner. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed to Landowner under this Agreement.

"9.8.4 Any Mortgagee who comes into possession of the Campus Oaks Property, or any part thereof, by any means, whether pursuant to foreclosure of the mortgage deed of trust, or deed in lieu of such foreclosure or otherwise, shall take the Campus Oaks Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of Landowner's obligations or other affirmative covenants of Landowner hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by Landowner is a condition precedent to the performance of a covenant by City, the performance thereof shall continue to be a condition precedent to City's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Article II of this Agreement."

**p. Revised/Updated Terminology**. Wherever the Development Agreement, as amended hereby, continues to use or refer to the following capitalized terms, such capitalized terms shall have the corresponding meanings assigned thereto:

1) "Planning Director" shall mean and refer to "Development Services Director, as such term may be revised by the City from time to time."

2) "Public Works Director/City Engineer" shall mean and refer to "City Engineer, as such term may be revised by the City from time to time,"

3) "Master Plan" shall mean and refer to the Amended Master Plan, as applied to the Campus Oaks Property.

**2. Exhibits.** The following Revised and Additional Exhibits are attached hereto and incorporated herein by reference and hereby replace and supersede the respective Exhibits previously attached to the Development Agreement with respect to the Campus Oaks Property. Accordingly, all references to the applicable Exhibits in the Development Agreement with respect to the Campus Oaks Property, as amended hereby, shall mean and refer to the corresponding Revised Exhibits and Additional Exhibits below:

**3. Consistency with General Plan.** The City hereby finds and determines that execution of this Fourth Amendment is in the best interest of the public health, safety and general welfare and is consistent with the General Plan.

**4. Amendment Limited to Campus Oaks Property.** This Fourth Amendment is limited to and applies only to development of the Campus Oaks Property and does not affect or apply in any manner with respect to the development of any other property within the Master Plan Area.

**5. Amendment; Balance of Development Agreement In Full Force.** This Fourth Amendment amends, but does not replace or supersede, the Development Agreement. In the event of any conflict, the language of this Fourth Amendment shall be controlling in all events or circumstances. Except as modified hereby, all other terms and provisions of the Development Agreement shall remain in full force and effect.

**6. Form of Amendment; Execution in Counterparts.** This Fourth Amendment is executed in duplicated originals, each of which is deemed to be an original, and may be executed in counterparts.

PARKS FINANCING PLAN

[Attached]

# *MEMORANDUM*

To: Tara Gee, City of Roseville
Stephen L. Des Jardins, Campus Oaks
Greg Bardini, Morton & Pitalo

From: Jamie Gomes and Mark Polhemus

Subject: Campus Oaks Park, Parkway, Streetscape, and Open Space Financing Plan; EPS #132145

Date: July 7, 2015

This memorandum includes information regarding the amount, type, and estimated cost of planned parks in the Campus Oaks Project (Project). This parks financing plan will assist the City of Roseville (City) in establishing the Project's neighborhood and citywide park obligations. In addition, this document sets forth the quantities and estimated annual maintenance costs for parks, parkways, streetscapes, and open space in the Project.

The parks financing plan is based on information from the following sources:

- Fuhrman Leamy Land Group
- Morton & Pitalo, Inc.
- City

## Park Capital Improvements

Calculations for the park capital improvements are included in **Appendix A**. The detailed park cost estimates from Fuhrman Leamy Land Group are included in these tables.

**Table A-1** summarizes the estimated total park development costs and the portions of total costs that would be identified as Citywide Parks and Neighborhood Parks.

**Tables A-2** and **A-3** allocate Citywide and Neighborhood Park costs to Project residential land uses using estimated persons per household as the means for cost allocation. Typically, high-density residential (HDR) land uses pay approximately 2/3 of the cost of a low-density residential

Economic & Planning Systems, Inc.

Los Angeles

www.epsys.com

(LDR) unit. To achieve this same end, this analysis varied the estimated persons-per-household estimates for LDR and medium-density residential (MDR) land uses as compared to HDR land uses, while still maintaining the preferred citywide average of 2.64 people per household. As calculated, using the varying estimates for Citywide Parks, the HDR fee equals 66 percent of the LDR/MDR rate, which is similar to other plan areas in the City. For the Neighborhood Park allocation, HDR Townhomes are treated like LDR and MDR units.

For Citywide Park costs, the analysis compares the estimated revenue the Project might otherwise derive for Citywide Parks if the Project were subject to the City's "infill" Citywide Park fee of $2,111 per unit. **Table A-4** compares the estimated costs of Citywide Parks provided in the parks financing plan as compared to the revenue estimate described above, which is calculated in **Table A-5**. The difference shown on **Table A-4** will be funded through Project contributions to community infrastructure and the park benefit fee.

**Tables A-6** through **A-8** include the detailed park development cost estimates.

## Park, Parkway, Streetscape, and Open Space Maintenance

The City requires new development projects to form a new land-secured financing district (called Community Facilities District [CFD] No. 2—Services) designed to levy a special tax to fund annual park, parkway, streetscape, and open space maintenance. The calculations in **Appendix B** show the estimated annual maintenance special taxes for the Project.

**Table B-1** shows the estimated total annual maintenance special taxes for the Project. In **Table B-2**, EPS quantified the total annual maintenance costs and which portion of the annual costs would be identified as parkway, landscape, streetscape, and open space maintenance and which portion of the annual costs would be identified as park and stormwater maintenance. Please note the calculations in **Table B-2** include the estimated annual open space maintenance costs for two new open space parcels in the Project. **Table B-2** also includes the Project's obligation to fund a share of stormwater maintenance related to the Project.

**Tables B-3** and **B-4** allocate the annual maintenance costs to the respective benefiting land uses. In **Table B-3**, annual park maintenance is allocated to both residential development and nonresidential land uses, where nonresidential employees are weighted at one employee equaling 0.5 of a resident. This allocation does not include the Tech/Business Park land because there is potential for a longer holding period of such land. Selected nonresidential land uses were included to mitigate the higher than typical annual park maintenance cost per residential unit, so the residential maintenance costs are comparable to other projects in the area. In **Table B-4**, annual landscape maintenance costs are allocated to all residential and nonresidential land uses in the Project. For these maintenance costs, nonresidential employees are weighted as equivalent to residents.

EPS came to these annual maintenance cost estimates for the final park capital and maintenance financing strategy based on the suggestions and revisions from the City and Project proponent.

# INTRODUCTION

## STUDY PURPOSE AND OBJECTIVES

The purpose of this Water Conservation Plan (Plan) is to define how much surface and recycled water can be conserved as the various parcels implementthe conservation best management practices requirements. The Plan will calculate water demands within the Hewlett-Packard/Campus Oaks (HPCO) Master Plan Amendment Area and apply conservation requirements that reduce the draw on the City of Roseville's (City) water sources.

The primary objective of this Plan is to estimate the anticipated level of conservation for the overall project focusing on the three City requested Best Management Practices (BMP's). These BMP's reduce the amount of potable water and recycled water needed to support the Project.

The Plan will follow these steps:

- Develop a baseline water use inventory for the project;
- Identify and describe methods for reducing water consumption;
- Estimate the reduction in water demand using the recommended measures.

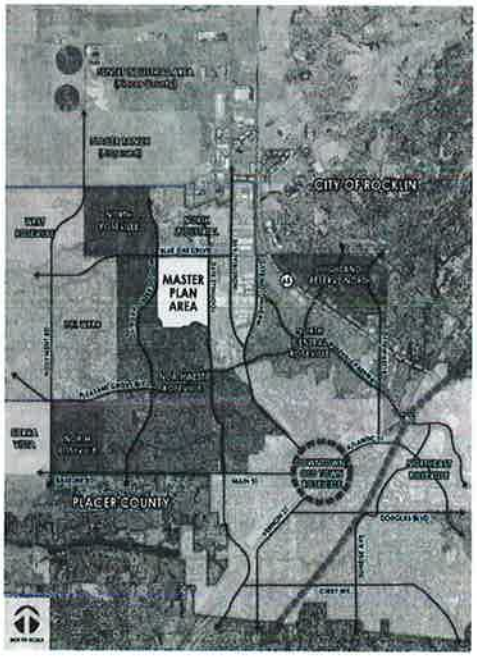

**Figure 1- Project Location**

## PROJECT DESCRIPTION

Hewlett-Packard and BBC Roseville Oaks, LLC have proposed an amendment to the Hewlett-PackardRoseville Campus Master Plan that would reconfigure the land uses and infrastructure on a portion of the Master Plan Area. The Hewlett-Packard Roseville Campus Master Plan establishes development regulations for 492.2 acres at the southwest corner of Blue Oaks and Foothills Boulevards within the City of Roseville's North Industrial Planning Area (see **Figure 1**). Originally adopted in June 1996, the Master Plan envisioned a manufacturing and office campus to accommodate Hewlett-Packard's existing and planned operations. Hewlett-Packard has subsequently adjusted its facilities needs for the Roseville campus, divesting its ownership in all but a portion of the Master Plan Area.

**Figure 2- HPCO Amendment Area**

The proposed amendment to the Master Plan, the Hewlett-Packard|Campus Oaks (HPCO) Master Plan Amendment provides for a mixed-use community on a 375.7-acre portion of the original Master Plan Area (See **Figure 2**). The HPCO Amendment Area is organized into two physically and functionally integrated sub-areas: the Hewlett-Packard Campus accommodating existing and planned light industrial, recreation and related uses (blue area); and Campus Oaks (tan area) planned for a new mix of tech/business park, office, commercial, residential, park and recreation, open space and public uses. The HPCO Master Plan Amendment supersedes all prior Master Plan requirements for the HPCO Amendment Area.

## PROJECT SETTING

The HPCO Amendment Area has been designated for development for over 35 years. Surrounded by established employment, commercial and residential uses, the eastern portion of the Amendment Area is partially developed by Hewlett-Packard. The western portion of the Amendment Area, Campus Oaks, is undeveloped consisting primarily of annual grasslands with gently rolling topography that has been highly disturbed over time through bi-annual disk-plowing. The southern portion of Campus Oaks contains a City owned open space/wetland preserve along the South Branch of Pleasant Grove Creek.

## PROPOSED PROJECT

The HPCO Master Plan Amendment establishes updated land use and zoning regulations, mobility and infrastructure plans, public services provisions, design guidelines, and development approval processes for the 375.7-acre Amendment Area. The remainder of the larger Master Plan Area will continue to be regulated by the existing Hewlett-Packard Roseville Campus Master Plan.

The HPCO Master Plan Amendment proposes to retain the existing Light Industrial land use designation on a majority of the Hewlett Packard Campus, refining the square footage allocated to the Campus based upon Hewlett-Packard's projected development program. In addition, a City park is proposed on the western edge of the Campus.

The existing Light Industrial land use designation on Campus Oaks is proposed to be changed to a mix of

tech/business park (LI), office, commercial, residential, park and recreation, open space and public uses. The existing City owned wetland preserve will be retained, and will be augmented by additional open space parcels.

The HPCO Master Plan Amendment includes proposed revisions to the mobility and utility systems to accommodate the revised land uses. The mobility system will include a modified grid street pattern that is connected to, and helps to complete, the City's larger roadway network; an interconnected system of paths, sidewalks and bike lanes; and multiple transit stops. HP Way will be constructed as a public roadway through the project site. Other roadway connections will include the extensions of New Meadow Drive from the north, and Painted Desert and Crimson Ridge Drives from the west.

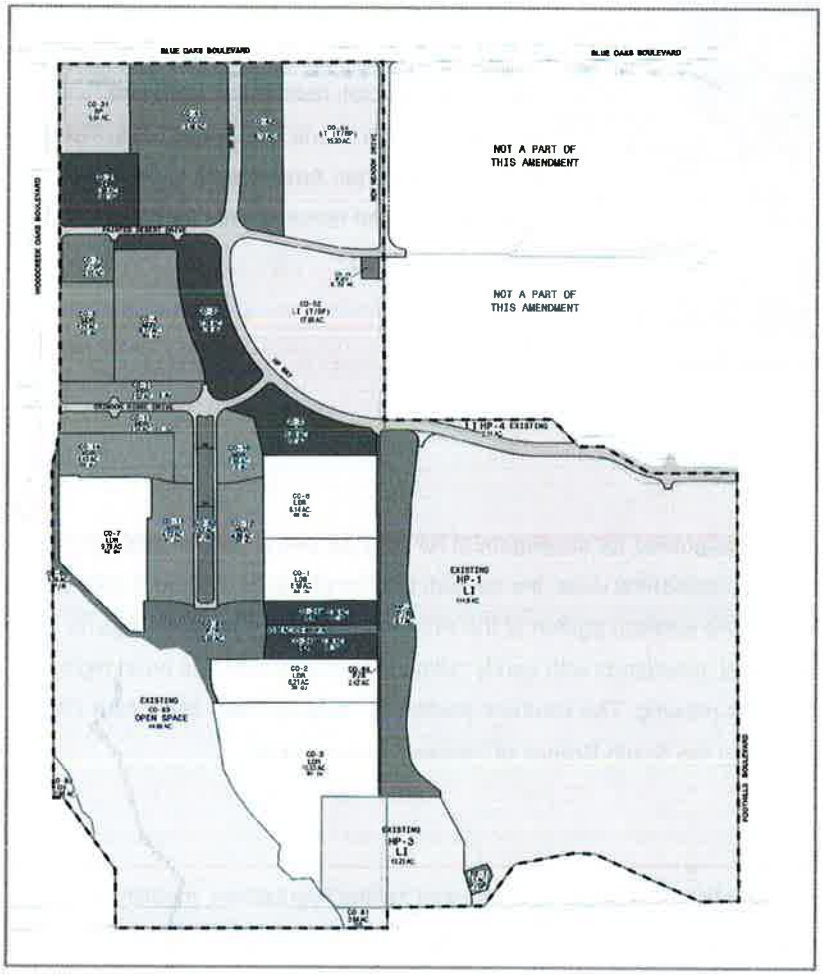

Figure 3 – HPCO Land Use Plan

The construction of backbone utility infrastructure will be necessary to accommodate full build-out of the Amendment Area. Water, recycled water, wastewater, drainage, electric, natural gas, and telecommunications infrastructure exist within and/or adjacent to the Amendment Area. Since adoption of the 1996 Master Plan, substantial development and associated infrastructure improvements have been constructed in the vicinity of the Amendment Area. The HPCO Amendment accounts for these changed conditions to define an updated and efficient backbone utility infrastructure program.

Proposed land uses within the HPCO Master Plan Area are summarized on **Table 1**, and illustrated on **Figure 3**.

**TABLE 1: HPCO Master Plan Amendment Area Land Use Summary**

| Land Use | Gross Acres | Building Square Feet (sf) | | | | | Dwelling Units (du) | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Existing | Future | Total Capacity | FAR Range | Avg. FAR | Units | du/ac Range | Avg. du/ac |
| **EMPLOYMENT AND COMMERCIAL USES** | | | | | | | | | |
| Light Industrial (LI) | 129.24 ac | 593,820sf | 606,180 sf | 1,2000,000 | 20-50% | 21% | | | |
| Tech/Business Park (T/BP-LI) | 32.85 ac | | 300,000 sf | 300,000 sf | 20-40% | 21% | | | |

**NOTE:** Existing development consists of Buildings R3 (126,220 sf), R4 (131,190 sf), R5 (158,760 sf) and R6 (177,650 sf).

## Baseline Water Use

Municipal Consulting Group developed a baseline water use estimate for the proposed Campus Oaks area. A summary of the water use factors and resultant estimated water demands are presented in **Table 2**. It is noted that these estimated water demands include both potable and recycled water usage in Campus Oaks. Additionally, system losses are not accounted for in any calculations.

**Table 2**
**Campus Oaks Rezone Area**
**Proposed Land Uses**
**Baseline Water Demand Estimate**

| Residential | | Gross Acres | Units | Annual Demand (AFY) |
|---|---|---|---|---|
| | LDR | 46.76 | 242 | 146.90 |
| | MDR | 35.60 | 310 | 127.75 |
| | HDR | 21.97 | 396 | 87.47 |
| | Subtotal: | 104.33 | 948 | 362.12 |
| Non-Residential | | | | |
| | Commercial /Business Professional | 57.68 | | 167.87 |
| | Parks | 12.99 | | 43.48 |
| | Open Space | 46.35 | | 0.00 |
| | Public Quasi Public | 2.47 | | 4.93 |
| | Subtotal: | 119.49 | | 216.28 |
| **Right of Way** | | 0.00 | | 0.00 |
| | | 223.82 | 948 | 578.40 |
| **Total (AFY)** | | | | 578.40 |
| **System Losses (2%) AFY** | | | | 11.57 |
| **Total System Demand (AFY)** | | | | 589.97 |

**Notes: Demand factors and annual demands are based on the Campus Oaks Rezone Area – Land Use Plan, dated January 22,2015 and City of Roseville unit water demand factors.**

For single-family residential areas, the annual water demands shown in **Table 2** are divided into internal and external uses based on how water is used throughout the City. **Table 3** presents the percentage of external usage as well as various indoor usage percentages. These factors are used to quantify the impact various conservation measures have on the Plan's water demand.

For high-density residential (HDR) land uses, it was estimated that 20% of the overall water usage calculated in **Table 2** is used for exterior landscape irrigation. Landscape usage for HDR-Attached units will use recycled water to meet all exterior demands for the parcels.

| Table 3<br>Typical Single-Family<br>Residential Water Usage<br>For LDR and MDR Land Use Types | |
|---|---|
| Use | Percent ofTotalUse |
| Landscaping | 51% |
| Toilets | 13% |
| Faucets, cooking, cleaning | 10% |
| Shower | 9% |
| Clotheswasher | 8% |
| Bath | 6% |
| Toiletleaks | 2% |
| Dishwasher | 1% |
| **Note: Values in Table 2 were incorporated from the Creekview Specific Plan, Water Conservation Technical Study, which utilized values from the City's FAQ – 794.** | |

As shown in **Table 3**, 51% of water used by LDR and MDR uses is for exterior landscape irrigation. This usage is then split between the front and back yards of the residence, 60% for backyard landscaping and 40% for the front yard. This division of landscaping between the front and back yards was estimated with greater demand in the back yard than the front yard because hardscape limits the irrigation in a typical front yard. High Density Residential (HDR) parcels do not have a front- or back-yard areas, but utilize more common areas, as such, the irrigation demand associated with HDR parcels is represented as the total irrigated area using recycled water to meet the Annual Irrigation Demand.

This baseline water use is summarized in **Table 4.**

Water demands were identified for the front and backyards for LDR and MDR parcels to account for different conservation measures in each. Steps like limiting turf in the front yards may not necessarily be feasible in the back yards.

| Table 4<br>Potable Water Demand<br>Residential Use | | | | |
|---|---|---|---|---|
| Campus Oaks Land UseDesignation | Annual Demand (AFY) | Annual Irrigation Demand (AFY)[1] | Annual Front Yard Demand (AFY)[2] | Annual Back Yard Demand (AFY)[3] |
| | | 51% | 40% | 60% |
| Low Density Residential | 146.90 | 74.92 | 29.97 | 44.95 |
| Medium Density Residential | 127.75 | 65.15 | 26.06 | 39.09 |
| High Density Res-Attached | Irrigated with Recycled Water | | | |
| Sub-Total CampusOaksResidential | 274.65 | 140.07 | 56.03 | 84.04 |

**Notes.**
1. **Calculated as 51% of annual demand for LDR and MDR uses.**
2. **Calculated as 40% of irrigation demand for LDR and MDR uses.**
3. **Calculated as 60% of irrigation demand for LDR and MDR uses.**

## Methods for Reducing Water Consumption

Methods identified in this conservation plan can be used individually or in combination to reduce the Campus Oaks water consumption. The various methods recommended for use within the plan area includes:

- Turf Reduction
- Smart Irrigation Controllers
- Recirculating Hot Water Systems

### Turf Reduction

One of the simplest and most effective ways to conserve water is to limit the area of turf being irrigated, or exchanging higher water use plant materials (like turf) for lower water using plant materials ("soft plantings"). There are a number of plantings that can be used that dramatically reduce water demand when they replace turf. The actual water demand for soft plantings depends on the individual species. Data provided by the City of Roseville water conservation staff assumes replacing turf with soft plantings could yield a water savings of 56% compared to irrigation of turf. Turf reductions are recommended for implementation in residential and non-residential parcels within the Campus Oaks Master Plan area.

### Residential Turf Reduction

It is assumed that replacing turf with low water use plantings could be accomplished on all types of residential property, including low, medium, and high-density residential parcels as well as non-residential parcels. In order to assess the potential impact of this change on residential parcels, the

following assumptions were made:

- When accounting for drive ways, walk ways and hardscape areas, the landscaped area in the front yard is estimated to be 75% of the front yard area for LDR and MDR units. Of this landscaped area, it is assumed that 70% of the front yard area is turf and 5% is soft plantings. The turf area in the front yard would be reduced from 70% to 42% of the landscaped area and the soft landscaping would increase from 5% to 33%. See the figure in Appendix A for an example of how turf placement could be reduced on a typical single-family lot.

- Area converted from turf to soft plantings represents a conversion of 28% of the landscaping in the front yard. This results in the following front yard areas: 25% hardscape (driveway, paths), 42% turf, and 33% low water use plantings (See the figure in Appendix A).

- For the Roseville area, soft plantings on average use 70% less water than turf. This estimate is based on data collected by the City of Roseville. This means that turf has an average daily demand of 3,064 gallons per day per acre (gpd/acre) and soft plantings have an average daily demand of 919 gpd/acre.

- Soft plantings also utilize low volume irrigation systems like a drip or micro- spray system designed to achieve uniform application of water unlike an overhead spray irrigation system used for turf. To accomplish the 70% reduction in water usage obtained from using soft plantings, this evaluation also assumes that landscaping is irrigated properly (no over-or under-watering).

**Table 5** presents the base landscape percentage and new residential landscaped areas.

**Table 5**
**Reduced Landscape Turf Areas**
**For LDR and MDRL and Use Types**

| Land Use Designation | Front Yard Irrigated Area[1] | Base Condition | | Base Condition With Water Conservation | |
|---|---|---|---|---|---|
| | | Turf Area | Low Water Use Area | Turf Area | Low Water Use Area[2] |
| Low Density Residential | 75% | 70% | 5% | 42% | 33% |
| Medium Density Residential | 75% | 70% | 5% | 42% | 33% |

1. **As a percentage of the front yard, See Appendix A.**
2. **Includes 5% existing low water use plantings + 28%new water use plantings.**

Recycled water will be used to irrigate the high-density attached residential land uses, and thus would conserve potable water.

As an example of how these values were calculated, the calculation for the annual front yard turf demand and the reduced annual front yard demand is presented below.

For the annual front yard turf demand, as calculated for low-density residential land-uses, 75% of the front yard area is landscaped; 70% turf and 5% soft plantings. Since soft plantings use 70% less water than what is required for turf, this 5% area is equal to 1.50% (5% x 30%) turf area.

This resulted in the following annual front yard demands for LDR, MDR is calculated the same way.

Turf: 29.97 AFY * (70%/71.50 %) = 29.34 AFY

Soft Planting: 29.97 AFY * (1.5%/71.5%) = 0.63 AFY

Totaling: 29.97 AFY

For the reduced annual front yard demand, as calculated for LDR land uses, reducing the base turf area in the front yards from 70% to 42% and replacing that area (28%) with soft plantings resulted in the following annual demands.

Adjusted landscape demand for LDR (example of calculation):

29.97 AFY * (42%/70%) = 17.98 AFY – Modified Turf Demand
29.97 AFY * (28%* 30%)/70%)+ 0.63 AFY = 4.23 AFY – Modified Soft Planting

Totaling 22.21 AFY

29.97 AFY – 22.21 AFY = A savings of 7.76 AFY

**Table 6** presents the results of the residential water savings for replacing landscape turf in the low density and medium density residential areas of the proposed Campus Oaks Master Plan area.

**Table 6**
**Reduced Turf/Increased Soft Plantings**
**Water Savings - Residential**

| Land Use Designation | Annual Front Yard Demand (AFY)[1] | Modified Turf Demand (AFY) | Reduction Due to Landscape Conversion (AFY) |
|---|---|---|---|
| Low Density Residential | 29.97 | 22.21 | 7.76 |
| Medium Density Residential | 26.06 | 19.31 | 6.75 |
| **Total:** | 56.03 | 41.52 | 14.51 |

## Non-Residential Turf Reduction

Turf reduction on non-residential parcels within the Campus Oaks area, turf reduction is assumed to be employed on all landscaped areas.

The assumptions utilized to estimate water conservation in the non-residential areas of the Campus Oaks sub-area are as follows:

- Within Roseville, soft plantings are assumed to use 70% less water than turf.
- High Density Residential parcels landscape approximately 40% of the overall parcel.

- Commercial / Business Professional parcels landscape approximately 30% of the overall parcel.

- Park parcels landscape approximately 90% of the overall parcel.

- Parks are estimated to landscape approximately 80% of the landscaped portion of the parcel area with turf and 20% with soft plantings. The landscape percentage would be reduced to30% turf and 70% soft plantings.

- Low water use areas are assumed to utilize low volume irrigation systems such as a drip or micro spray system design to achieve irrigation uniformity rather than an overhead spray irrigation system typically used for turf.

- Right-of-Way streetscape landscaping is calculated based on the respective street segments. The amount of landscaping for each reach is based on the type of arterial landscaping being proposed in the master plan.

- Right-of-Way streetscapes are estimated to landscape approximately 80%of the landscaped portion of the parcel area with turf and 20% with soft plantings. The landscape percentage would be reduced to 30% turf and 70% soft plantings.

**Table 7** summarizes the results of reducing turf and replacing it with soft plantings in various types of non-residential installations.

| Table 7<br>Reduced Turf/Increased Soft Plantings<br>Water Savings–Non-Residential<br>Recycled Water | | | | |
|---|---|---|---|---|
| Land Use Designation | Annual Irrigation Demand (AFY) | Modified Annual Irrigation Demand (AFY) | Water System Savings (AFY) | Type |
| Campus Oaks Area | | | | |
| High Density Residential | 17.49 | 10.77 | 6.73 | Recycled |
| Parks | 39.13 | 28.18 | 10.95 | Recycled |
| Public Quasi Public | 2.46 | 1.26 | 1.20 | Recycled |
| Right of Way | 0 | 0 | 0 | Recycled |
| Total Campus Oaks | 59.08 | 40.21 | 18.88 | Recycled |

## Smart Irrigation Controller

Demand for water varies greatly with weather patterns and time of year. Standard irrigation schedules do not account for actual weather conditions during the day, week, or month that could vary significantly from normal weather patterns. This deviation can result in significant water waste. A smart irrigation controller can account for these variations by using weather information and soil moisture conditions to determine the amount of water to apply. A smart irrigation controller restricts the time of irrigation and water application rates that are really needed for efficient and effective watering.

Fourteen studies estimating the percentage of water conservation associated with the use of smart irrigation controllers were summarized in a paper published by the US Bureau of Reclamation (USBR, April 2008). These studies estimated the range of water savings associated with their use to be between 7 to 41%.

However, not all houses have controllers for both the front and back yards. Some existing houses use impact heads connected to a hose to irrigate their front or back yards. This irrigation method is less efficient and results in higher water waste. Considering these issues, the percent of water savings for this measure was estimated at 20%.

The additional savings expected with the use of a smart irrigation controller are presented in **Table 8**. All land use types will be required to employ smart irrigation controllers. These calculations assume that the area of turf is reduced as described above.

As an example, for the low-density residential front yards, the annual demand is 22.21 AFY. Assuming that this demand is reduced by 20% when using smart irrigation controllers, the reduced demand is estimated to be:

22.21 AFY * (80%) = 17.76 AFY

**Table 8**
**Smart Irrigation Controller**
**Water Savings**

| Land UseDesignation | Turf Modified Demand (AFY)[1] | Reduced Demand (AFY) | Water Savings (AFY) | Water System Saving |
|---|---|---|---|---|
| Campus Oaks Area of HP-CO Master Plan | | | | |
| Low Density Residential | | | | |
| Front Yard | 22.21 | 17.76 | 4.44 | Potable |
| Back Yard | 44.95 | 35.96 | 8.99 | Potable |
| Medium Density Residential | | | | |
| Front Yard | 19.31 | 15.45 | 3.86 | Potable |
| Back Yard | 39.09 | 31.27 | 7.82 | Potable |
| **Total Potable Campus Oaks** | **125.56** | **100.45** | **25.11** | **Total Potable** |
| High Density Residential | 10.77 | 8.61 | 2.15 | Recycled |
| Parks | 28.18 | 22.54 | 5.64 | Recycled |
| Public Quasi Public | 1.26 | 1.00 | 0.26 | Recycled |
| Right of Way | | | | Recycled |
| **Total Campus Oaks** | **165.77** | **132.60** | **33.15** | |

**Notes: 1.Original demand includes the turf reduction water conservation measures that were previously described.**

## Recirculating Hot Water Systems

Recirculating hot water systems use a pump to keep the water in the hot water lines circulating back to the water heater to keep the water in the hot waterlines hot. This provides hot water at the tap immediately and prevents the need to let cold water flow down the drain until the water heats up. These systems can be operated in a number of different ways but all conserve water in the same manner. For this study, it was estimated that each draw of hot water would waste approximately 1.25 gallons per occurrence. This is equivalent to drawing water through 50 feet of ¾-inch pipe with each draw. For purposes of this analysis, it is assumed that this occurs six times per day per dwelling unit (7.5 gallons per day per dwelling unit). The expected savings are presented in **Table 9**.

A low-density residential land use having a total number of dwelling units of 242 is used as a calculation example. The reduced water demand would be estimated to be:

242 units * 6 occurrences per day * 1.25 gpd/EDU *365 days = 662,475 gallons per year = 2.03 AFY

**Table 9**
**Re-Circulating Hot Water System**
**Water Saving**

| Land Use Designation | Dwelling Units (DU) | Recirculating Hot Water (AFY) | Water System Savings |
|---|---|---|---|
| Campus Oaks | | | |
| Low Density Residential | 242 | 2.03 | Potable |
| Medium Density Residential | 310 | 2.60 | Potable |
| High Density Residential | 396 | 3.33 | Potable |
| Total Campus Oaks | 948 | 7.96 | |

## Summary

The water conservation measures selected for implementation for the Campus Oaks area of the Master Plan follow previous Specific Plan. These measures were selected because of their ability to be cost-effectively implemented and achieve the anticipated water savings. **Table 10** summarizes both potable and recycled water demands as well as estimated conservation results.

**Table 10**
**Potable Water and Recycled Water Summary[1]**

| | Water Conser (AFY) | Water Usage (AFY) | Rec Water Conser (AFY) | Rec Water Usage (AFY) | Running Total (AFY) |
|---|---|---|---|---|---|
| Initial Water Demand Estimate | | 469.07 | | 109.33 | 578.40 |
| Conserved Potable Water | 47.59 | | | | (47.59) |
| Conserved Recycled Water | | | 26.93 | | (26.93) |
| Net Demand | | 421.48 | | 82.40 | 503.88 |

1 – Totals do not include system losses of 2%.

The total estimated amount of water conserved through this plan is projected to be 74.52 AFY (47.59 AFY of potable water and 26.93 AFY of recycled water) plus an additional reduction for recycled water use of 82.40 AFY totaling 156.92 AFY less potable water. This equates to a 26.60% reduction in usage by implementing the proposed conservation measures. The net potable demand is 433.05 AFY – a reduction of 156.92 AFY.

**Tables 10.A and 10.B** provide the detailed results for Potable Water Usage (10.A) and Recycled Water Usage (10.b). Water savings are based on the three specific conservation measures applied to various land use categories throughout the Campus Oaks area as identified in **Table1**.

**Table 10.A**
**Estimate Potable Water Saved**
**by Implementing Conservation Measures**
**(AFY)**

| Residential | | Annual Demand (AFY) | Outdoor Demand (AFY) | Modified Turf Savings (AFY) | Smart Timer Savings (AFY) | Insta Hot Savings (AFY) | Total Savings (AFY) |
|---|---|---|---|---|---|---|---|
| | LDR | 146.90 | 74.92 | 7.76 | 13.43 | 2.03 | 23.02 |
| | MDR | 127.75 | 65.15 | 6.75 | 11.68 | 2.60 | 21.03 |
| | HDR | 87.47 | 17.49 | Recycled Water | | 3.33 | 3.33 |
| | Subtotal: | 362.12 | 157.56 | 14.51 | 25.11 | 7.96 | 47.58 |

**Table 10.B**
**Estimate Recycled Water Saved**
**by Implementing Conservation Measures**
**(AFY)**

| | | Original Annual Demand (AFY) | Outdoor Demand (AFY) | Conservation Measures | | | |
|---|---|---|---|---|---|---|---|
| | | | | Modified Turf (AFY) | Smart Timer (AFY) | Insta Hot Savings (AFY) | Conserved RW (AFY) |
| **Residential** | HDR | 87.47 | | 6.73 | 2.15 | | 8.88 |
| **Non-Residential** | | | | | | | |
| | Commercial | 56.14 | 16.84 | - | - | | - |
| | Business / Professional | 111.73 | 33.52 | - | - | | - |
| | Parks / Open Space | 43.48 | 39.13 | 10.96 | 5.64 | | 16.60 |
| | Public Quasi Public | 4.93 | 2.46 | 1.21 | 0.25 | | 1.46 |
| | Subtotal: | 216.28 | 91.53 | 18.90 | 8.04 | | 26.94 |
| Total: | | 578.40 | 249.09 | 33.41 | 33.15 | 7.96 | |

Though the actual water conservation realized will depend in part on the participation of the homeowners or tenants of the affected parcels, it is expected that these measures could be implemented and maintained by employing the following measures:

- Constructing parcels with these water conservation measures in place.
- By simply having an available smart irrigation controller with the capacity to run the front and back yard systems pre-wired and in place, using this controller is a financially sound decision for the land owner versus replacing the controller with a different one.
- The City or the applicable school district, commercial owner, or a homeowners association will maintain landscape areas for parks, paseos, or Right of Ways. It is expected that landscape maintenance professionals will be able to maintain these water savings through proper management of these landscapes, especially by minimizing run-off through effective adjustment of the smart irrigation controller and other pertinent infrastructure.
- For single-family residences (LDR and MDR Land Use types), it is expected that a two-fold measure will be required to realize long-term water savings.
    1. Restrictions in the codes, covenants and restrictions for each parcel that limiting the types and/or locations of landscape in the front yards of each residence.
    2. Ongoing outreach by the City to remind and reinforce the need for water conservation. This can include attachments to the water bill, water audits that can be made available to HPCO land owners by City staff, the promotion of the City's water conservation website, and the availability of City water conservation staff to respond to specific questions.
    3. Educating homeowners on how to use and setup their smart irrigation controllers, especially if the back yard has not been added to the system.
- Conservation measures should be applied to commercial and business professional land use types to ensure consistency across all land use types.

## List of Improvements

### Roadway / Utility Improvements:

Blue Oaks Blvd, Woodcreek Oaks Blvd., HP Way, Painted Dessert, Crimson Ridge, New Meadow Drive, Residential and Collector Roadways:

1. Site Clearing, Grubbing & Demolition
2. Grading & soil import / export
3. Roadway / utility trench excavations
4. Curbs
5. Gutters
6. Sidewalks
7. Access Ramps
8. Pavement
9. Pavement Slurry Seal
10. Enhanced/Decorative pavement, concrete and/or pavers
11. Sanitary Sewer mains, manholes and appurtenances
12. Potable Water mains, valves, services and appurtenances
13. Non-Potable Water mains, valves, services and appurtenances
14. Storm Drain mains, laterals, manholes, drain inlets and appurtenances
15. Storm Drain outfalls and water quality measures
16. Dry utilities (i.e. gas, electric, telephone, cable, fiber, etc.), vaults, pull boxes, services and appurtenances
17. Under grounding of existing overhead utilities
18. Median landscaping and irrigation
19. Landscape corridors and irrigation
20. Streetlights and appurtenances
21. Traffic Signals, interconnects and appurtenances
22. Signage
23. Striping
24. Erosion control measures
25. Masonry walls
26. Bus Shelters
27. Monument signs
28. Traffic Control
29. Right-of-way acquisitions
30. Agency fees

## Other Improvements/Facilities

1. Well site, including but not limited to, site clearing, grading, paving, curbs, gutters, site lighting, site drainage, sewer service, water service, well drilling, well casing and appurtenances, site landscaping and irrigation, access gates, fencing, recycle containers and bins, striping and signage.
2. Park and/or Paseo Improvements
3. HP2/CO64 Park Improvements
4. Trails and Open Space Improvements
5. Environmental Mitigation(s)
6. Off-site hawk, agricultural and/or wetland mitigation property acquisition.
7. Off-site non-potable water pump.
8. Engineering Studies
9. Preparation of an Overarching O&M Plan for the City of Roseville Open Space Preserves.
10. Preparation of an engineers report for the use of recycled water.
