

ITEM 6.1: Design Review For Residential Subdivision – 4701 Solaire Dr. – SVSP PCL WB-22 & 23 – Radiance at Solaire DRRS – PL20-0175

REQUEST

The applicant requests approval of a Design Review for Residential Subdivision to establish unit designs for 103 single-family homes in the Radiance at Solaire subdivision (SVSP Parcels WB-22 and 23).

Applicant- Karina Guerrieri, Tri Pointe Homes, Inc.
 Owner – WP Development Company, LLC.

SUMMARY RECOMMENDATION

The Planning Division recommends that the Planning Commission take the following actions:

- A. Adopt the two (2) findings of fact and approve the Design Review for Residential Subdivision subject to 26 (twenty-six) conditions of approval.

SUMMARY OF OUTSTANDING ISSUES

There are no outstanding issues associated with this request. The applicant has reviewed and is in agreement with the recommended conditions of approval.

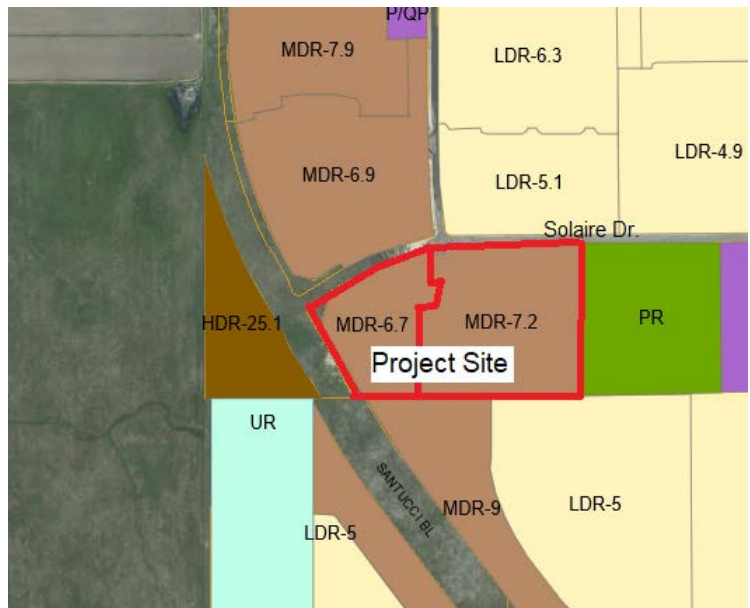

BACKGROUND

The project site is located on parcels WB-22 and WB-23 within the Westbrook area of the Sierra Vista Specific Plan (SVSP), to the east of Santucci Boulevard and to the south of Solaire Dr. (Figure 1). The parcels have a land use designation of Medium Density Residential and a zoning designation of Small Lot Residential with modified SVSP Development Standards (RS/DS).

In June 2012, the Westbrook project (File #2011-PL-043) amended much of the 400-acre Urban Reserve portion of the SVSP to a mixed land use plan with residential, commercial, and open space/park areas. The land uses within the Westbrook area were further amended by the Westbrook Phase 2 and 3 project (File #PL13-0318), which reconfigured and re-designated land uses within the Westbrook portion of the SVSP.

On January 24, 2019, the Planning Commission approved a Tentative Subdivision Map (File #PL18-0266) to create small-lot tentative subdivision maps for Parcels WB-20, 21, 22 and 23 within the Westbrook portion of the SVSP. The subject parcels (WB-22 and 23) were approved with a total of 103 lots zoned Small Lot Residential with modified development standards (RS/DS) to allow for smaller lot sizes and reduced rear yard space. A copy of the approved Tentative Subdivision Map for parcels WB-22 and WB-23 is included as

Figure 1: Project Location

Attachment 1. A condition of approval was added to the Tentative Subdivision Map stating that the approval of a Design Review Permit for a Residential Subdivision (DRRS) would be required prior to any home construction on the lots to evaluate the proposed architecture. A DRRS entitlement was approved by the Planning Commission for parcels WB-20 and WB-21 (the other portion of File #PL18-0266, north of Solaire Dr.) on November 14, 2019.

The applicant requests approval of a DRRS to allow the construction of 103 single-family homes on parcels WB-22 and WB-23. No modifications to the approved development standards are proposed.

SITE INFORMATION

Location: 4701 Solaire Dr.

Total Size: 14.7 acres

Topography and Setting: The project site has been rough graded into a relatively flat condition in preparation for development of the subdivision. Surrounding land uses include future medium and low density residential to the north and south, a future park to the east, and future high density residential to the west of Santucci Bl.

EVALUATION

Section 19.10.045 of the Zoning Ordinance specifies that a Design Review Permit is required for all compact residential development (attached or detached single-family units on land with a General Plan land use designation of Medium Density Residential or higher). Compact residential development products are more dense and urban in nature than is typical of the suburban setting, and Design Review gives staff the opportunity to evaluate the compatibility of the proposed design with the surrounding community, as well as consistency with the intent of the Community Design Guidelines and other applicable design standards. Pursuant to Zoning Ordinance Section 19.78.060 (i), the required findings for a Design Review Permit for a Residential Subdivision are as follows:

- 1. The residential design, including the height, bulk, size, and arrangement of buildings is harmonious with other buildings in the vicinity.***
- 2. The residential design is consistent with applicable design guidelines.***

This project is subject to the development standards of the City's Zoning Ordinance, the City's Community Design Guidelines (CDG), and the Sierra Vista Specific Plan (SVSP). Development standards for the proposed subdivision were approved concurrent with the Tentative Subdivision Map application (File #PL18-0266). The applicable development standards for this project are included as Attachment 2. No modifications to the development standards are proposed as a part of the project. The applicant submitted conceptual elevations showing architectural treatment and floor plans (Exhibits A and B).

Plan Types: The project includes three plan types, all of which are two-story, ranging in size from 2,206 square feet to 2,578 square feet. Table 1 identifies the square footage and number of bedrooms for each plan type. The floor plans offer four bedrooms, with Plan 2 offering a loft and Plan 3 offering a loft/5th bedroom option. Each plan includes a small, covered entry and have an option for a covered patio in the rear yard. All plans include a two-car garage and at least an 18-foot-long driveway to provide adequate space for vehicles to park within the driveway. All homes meet the minimum Zoning Ordinance parking requirement of two spaces per single-family dwelling.

Table 1: Plan Type Features and Dimensions

Plan Type	Square Footage	Bedrooms
Plan 1	2,206 square feet	4 bedrooms
Plan 2	2,410 square feet	4 bedrooms/loft
Plan 3	2,578 square feet	4 bedrooms, loft/5 th bedroom

Streetscape: Each of the floor plans will be offered in one of three architectural styles, including Spanish, Italian, and Cottage. Four color palates are available for each architectural style. Building projections and varying roof forms are used to provide visual interest in the streetscape. An example of the unit mix is shown in Figure 2. Consistent with the CDG, architectural treatment will be applied to all elevations of the buildings, including exterior shutters, decorative trim details on the windows, and enhanced siding. Further enhancements to the elevations are provided on street-facing side and rear elevations, consistent with the Enhanced Elevations shown in Exhibit B and DRRS Condition #5.

Figure 2: Example Unit Mix

Colors and Materials: Each of the architectural styles have four color schemes primarily consisting of generally natural or neutral tones. Stucco wainscoting and a stacked stone veneer are applied creatively to the elevations to add texture and interest to the façade. The unit designs include a range of decorative embellishments (i.e. shutters, decorative foam trims, and gables) and exterior finishes (i.e. stucco, simulated wood finish, and stone), creating a diverse streetscape that provides visual interest. The proposed colors and materials are included as Exhibit C.

Landscape: The proposed landscape will include a mix of groundcovers, shrubs of varying heights, and shade and accent trees for the front yard. The selected landscape will provide a mix of colors and textures which will complement the streetscape and is consistent with the SVSP Landscape Guidelines and the City’s Water Efficient Landscape Ordinance (WELo).

PUBLIC OUTREACH

The proposed project was distributed to the various agencies and departments which have requested notice of City applications, and all comments were considered and incorporated into the Conditions of Approval, as appropriate. Notice of the application was also distributed to the Roseville Coalition of Neighborhood Associations. No comments were received. A public notice of the Planning Commission hearing was published on October 9, 2020, and was distributed to all property owners within 300 feet of the project site. To date, no comments have been received.

CONCLUSION

Staff has reviewed the development plans for Parcels WB-22 and WB-23 and found them to be consistent with the applicable standards and guidelines. In addition, the proposed designs are similar to other housing products located in the vicinity of the project. As discussed above and with the following conditions, staff supports approval of the proposed project.

ENVIRONMENTAL DETERMINATION

The project is exempt from the California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Section 15182, which states:

Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

The exemption applies unless one of the conditions requiring a Subsequent, Supplemental, or Addendum environmental document exist (pursuant to CEQA Guidelines Section 15160-15170). The project is consistent with the adopted specific plan. A Final EIR was certified for the SVSP on May 10, 2010 (SCH #2008032115). City staff determined that the adopted infrastructures and financing plans are sufficient to support the project, making any additional studies unnecessary, and that no material alterations have occurred on the site or in the vicinity which would require additional discussions or analysis. Furthermore, the current proposed action is Design Review of the proposed home plans. Mitigation adopted as part of the prior environmental documents has been reviewed to determine if any measures apply to this Design Review; there is no applicable mitigation.

RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

- A. Adopt the findings of fact as stated in the staff report and approve the **DESIGN REVIEW FOR RESIDENTIAL SUBDIVISION –4701 SOLAIRE DR.– SVSP PCL WB-22 & 23 – RADIANCE AT SOLAIRE DRRS – PL20-0175** subject to 26 (twenty-six) conditions of approval.

CONDITIONS OF APPROVAL FOR DESIGN REVIEW FOR RESIDENTIAL SUBDIVISION FILE # PL20-0175

1. The development standards, unit designs, and landscape plans for SVSP WB-22 & 23 – Radiance at Solaire are approved as described in Exhibits A-C, except as modified by these conditions of approval. (Planning)
2. This permit shall expire on **October 22, 2022**. Prior to the expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration date beyond **October 22, 2023**. Effectuation of this DRRS shall occur with the first residential Building Permit. (Planning)
3. The landscape plan shall comply with the Landscape Guidelines for the SVSP and the City of Roseville Water Efficient Landscape Ordinance. (Planning)
4. The project shall comply with all required environmental mitigation identified in the Sierra Vista Specific Plan Environmental Impact Report and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)

5. Lots with street-facing rear and side elevations shall be constructed with enhanced architectural details, consistent with Exhibit B. (Planning)

PRIOR TO ISSUANCE OF BUILDING PERMITS:

6. The project Landscape Plans shall comply with the following:
 - a) The Landscape Plan shall indicate the location of, and be designed to avoid conflicts with, all pole-mounted light fixtures and utility equipment including (but not limited to) electric transformers, switchgear, and overhead lines, backflow preventers, fire department connections, and public water, sewer, and storm drain facilities. (Planning, Fire, EUD, Electric, Public Works)
 - b) At a minimum, landscaped areas not covered with live material shall be covered with a rock, (3") bark (no shredded bark) or (3") mulch covering. (Planning)
7. All on-site external lighting shall be installed and directed to have no off-site glare. (Planning)
8. Building permit plans shall comply with all applicable code requirements (California Residential Code based on the International Residential Code, California Building Code – CBC – based on the International Building Code, California Green Building Standards Code – CGBSC; California Mechanical Code – CMC – based on the Uniform Mechanical Code, California Plumbing Code – CPC – based on the Uniform Plumbing Code, California Fire Code – CFC – based on the International Fire Code – with City of Roseville Amendments – RFC, California Electrical Code – CEC – based on the National Electrical Code, and California Energy Standards – CEC T-24 Part 6), California Title 24 and the Americans with Disabilities Act – ADA requirements, and all State and Federally mandated requirements in effect at the time of submittal of building permits (contact the Building Division for applicable Code editions). (Building)
9. Prior to the issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Engineering)
10. The design and installation of all fire protection equipment shall conform to the California Fire Code and the amendments adopted by the City of Roseville, along with all standards and policies implemented by the Roseville Fire Department. (Fire)
11. The applicable codes and standards adopted by the City shall be enforced at the time construction plans have been submitted to the City for permitting. (Fire)
12. Testing of all fire systems shall be performed prior to opening the sales office for business. (Fire)
13. Framing construction cannot commence until access roads and public fire hydrants are approved by the Fire Department. (Fire)
14. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

DURING CONSTRUCTION AND PRIOR TO ISSUANCE OF OCCUPANCY PERMITS:

15. All electric metering shall be directly outside accessible. (Electric)
16. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstruction during construction and when the project is complete. (Electric)

OTHER CONDITIONS OF APPROVAL:

17. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, project construction is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday. Provided, however, that all construction equipment shall be fitted with factory installed muffling devices and that all construction equipment shall be maintained in good working order. (Building)
18. The required width of fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. Minimum required widths and vertical clearances established by the Fire Code shall be maintained at all times during construction. Closure of accesses for fire apparatus by gates, barricades, and other devices shall be prohibited unless approved by the Fire Chief. (Fire)
19. Temporary aboveground storage tanks may be used at construction sites for diesel fuel only and shall not exceed 1,000 gallon capacity. Tanks shall comply with all provisions found within the Fire Code. A Fire Department Permit shall be obtained prior to tank installation. The permit shall expire after 90 days from the date of issuance, unless extended by the Fire Chief. (Fire)
20. All alley-loaded driveways shall have the address and street name of the designated unit as identified on the approved city lot maps. (Fire)
21. Signs are not approved as part of the Design Review Permit. A Sign Permit is required for all project signs. (Planning)
22. Following the installation of the landscaping, all landscape material shall be maintained in a healthy and weed-free condition; dead plant material shall be replaced immediately. All trees shall be maintained and pruned in accordance with the accepted practices of the International Society of Arboriculture (ISA). (Planning)
23. Fences and walls shall be consistent with the locations and treatments specified in the Sierra Vista Specific Plan Design Guidelines. (Planning)
24. The location and design of the gas service shall be determined by PG&E. The design of the gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)
25. Any relocation or modification to the existing utility facilities or other existing improvements required for the development of this subdivision shall be at the developer's expense. (Electric, Environmental Utilities, Engineering, Fire)
26. All residential units must install a Seasonal Energy Efficiency Rating ("SEER") of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California regulations, up to a total maximum of 16 points including the 2 point premium, an Energy Efficiency Ratio ("EER") of 12 or greater, and a thermal expansion valve "TXV"). The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 16 points, and an EER rating of 12 or greater along with a TXV will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any

residential unit. Any variances must be approved by the Electric Department's Retail Energy Services Department.
