

**ITEM 6.2:** Major Project Permit Stage 1 Modification and Major Project Permit Stage 2 – 7890 Painted Desert Drive – NIPA PCL CO-41 – Ace Hardware – File #PL21-0252

**REQUEST**

The applicant requests approval of a Major Project Permit (MPP) Stage 1 Modification and MPP Stage 2 to allow construction of an approximate 14,000-square-foot retail building for Ace Hardware, which will be located on a 1.79-acre portion of the Campus Oaks Town Center.

Applicant – Tom Towne, Sisler and Sisler Construction  
Property Owner – BBC Roseville Oaks, LLC

**SUMMARY RECOMMENDATION**

The Planning Division recommends the Planning Commission take the following actions:

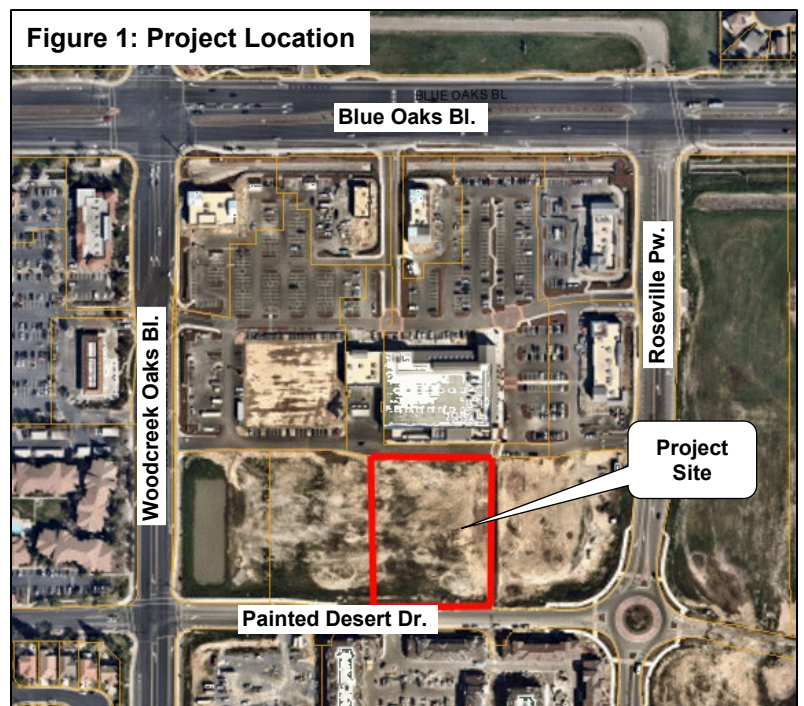

- A. Adopt the two (2) findings of fact and approve the Major Project Permit Stage 1 Modification subject to eight (8) conditions of approval; and
- B. Adopt the two (2) findings of fact and approve the Major Project Permit Stage 2 subject to seventy-two (72) conditions of approval.

**SUMMARY OF OUTSTANDING ISSUES**

There are no outstanding issues associated with this request. The applicant has reviewed and is in agreement with all recommended conditions of approval.

**BACKGROUND**

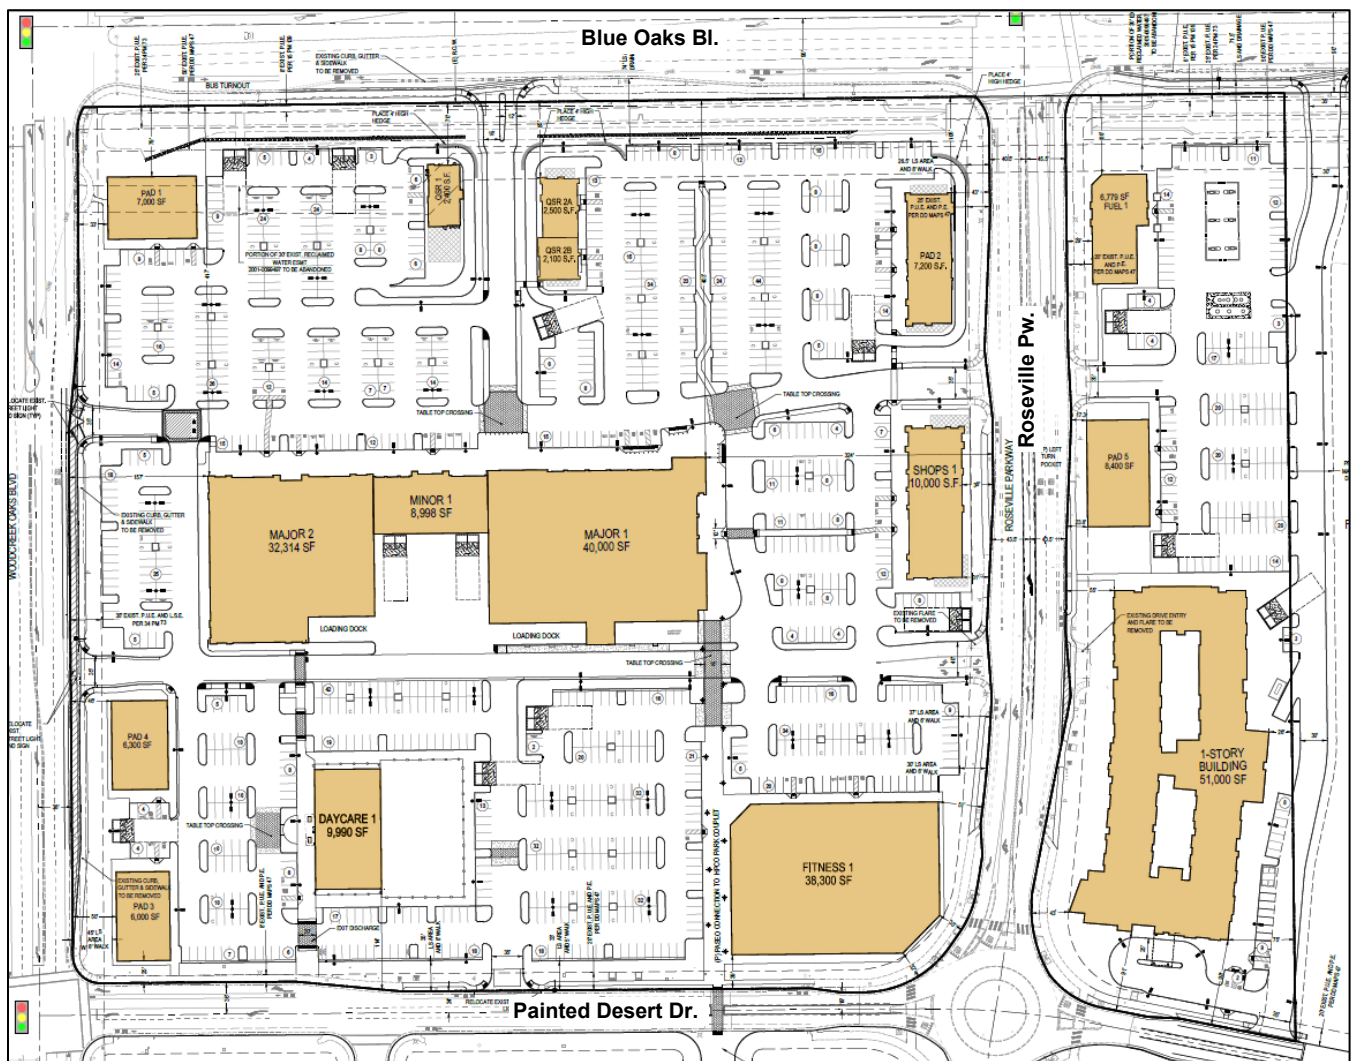

The project site is located at 7890 Painted Desert Drive, on the southern portion of the Campus Oaks Town Center (COTC) development, which is located at the southeastern corner of Blue Oaks Boulevard and Woodcreek Oaks Boulevard (see Figure 1). The site has a zoning and land use designation of Community Commercial, and is part of the Hewlett Packard Campus Oaks (HPCO) Master Plan area, located in the North Industrial Planning Area (NIPA). The HPCO Master Plan redesignated 198 acres of industrial land formerly owned by Hewlett Packard to a mix of land uses, including, Low, Medium, and High Density Residential; Business Professional, Community Commercial, Tech/Business Park – Light Industrial, Parks and Recreation, Open Space, and Public/Quasi-Public. The HPCO Master Plan also established development standards, design

guidelines, permitted uses, and a development plan for the area, and a tentative subdivision map to create large lots based on the land use plan. The project received final approval in August of 2015.

The Campus Oaks Town Center (COTC) development is the commercial shopping center portion of the HPCO Master Plan and consists of approximately 29 acres. The COTC is planned to be developed in phases. The entire HPCO Master Plan project was approved through the Major Project Permit (MPP) process. Therefore, any modifications to the site plan require an MPP Stage 1 modification and any new building elevations require an MPP Stage 2 approval. The building footprints for the COTC were approved by the Planning Commission on October 25, 2018, which include a total of 239,281 square feet of retail/commercial space (file #PL18-0080) (see Figure 2 below). Building elevations were also approved for 9 of the 16 buildings in the center. Some of the buildings in the center are fully constructed and currently in operation, including the Nugget Market (the Major 1 tenant). The southern half of the site and the eastern portion (across Roseville Parkway) is currently vacant.

**Figure 2: Approved COTC Site Plan (File #PL18-0080)**

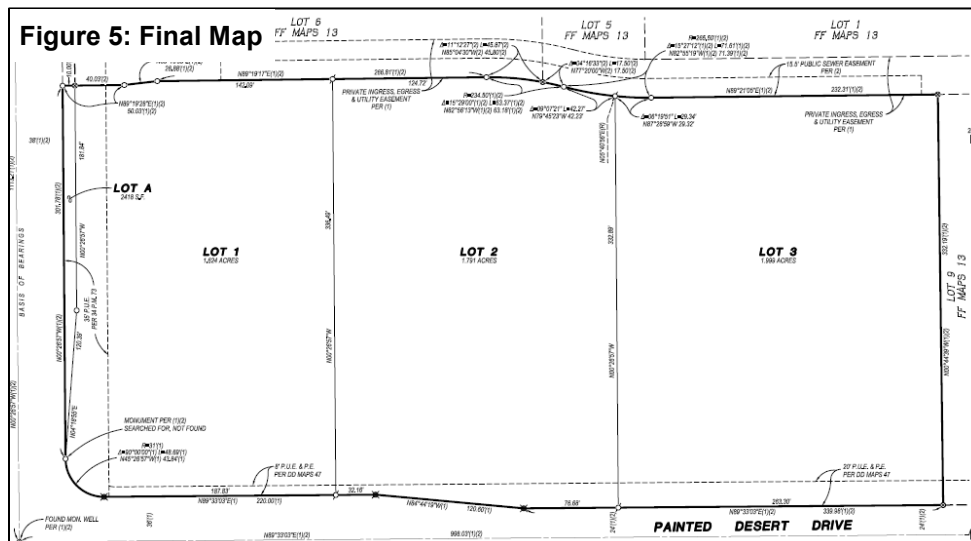

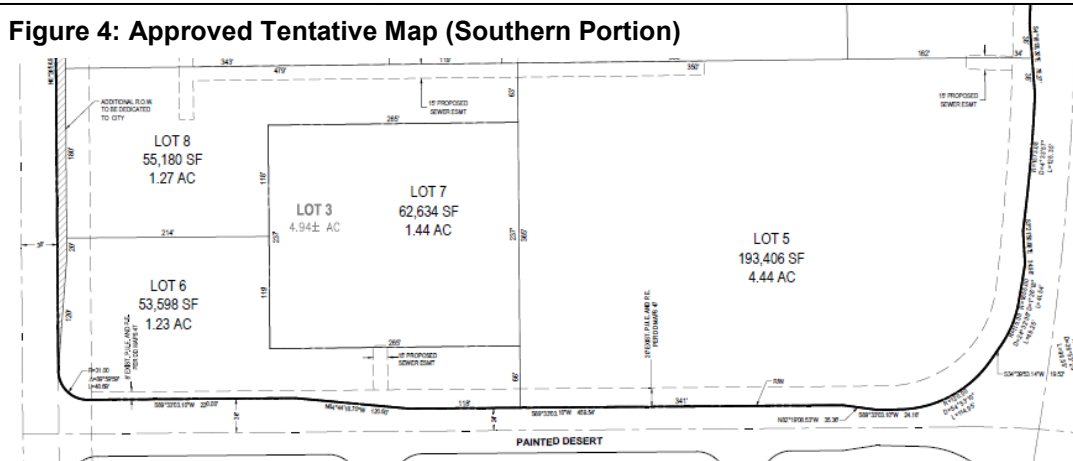

In September 2020, the Planning Manager approved a minor modification to the MPP site plan (file #PL20-0026). The use of Major 2 was changed from the originally planned retail use to a fitness use, which resulted in changes in the footprint of the Major 2 and Minor 1 buildings. Figure 3 below shows the approved changes.

**Figure 3: Original (Red) vs. Modified Building Footprints**

Concurrent with the MPP approval, a tentative subdivision map was approved for the center to subdivide the property into 15 lots based on the locations of the buildings and associated parking areas. The parcel lines of the approved tentative subdivision map for the southern half of the COTC were subsequently modified with the final map through a substantial conformance determination. Figures 4 and 5 show a comparison between the southern half of the tentative subdivision map and the approved final map. The map was modified from four (4) lots to three (3) lots on the southern half of the site. The approved buildings on these lots have not yet been constructed.

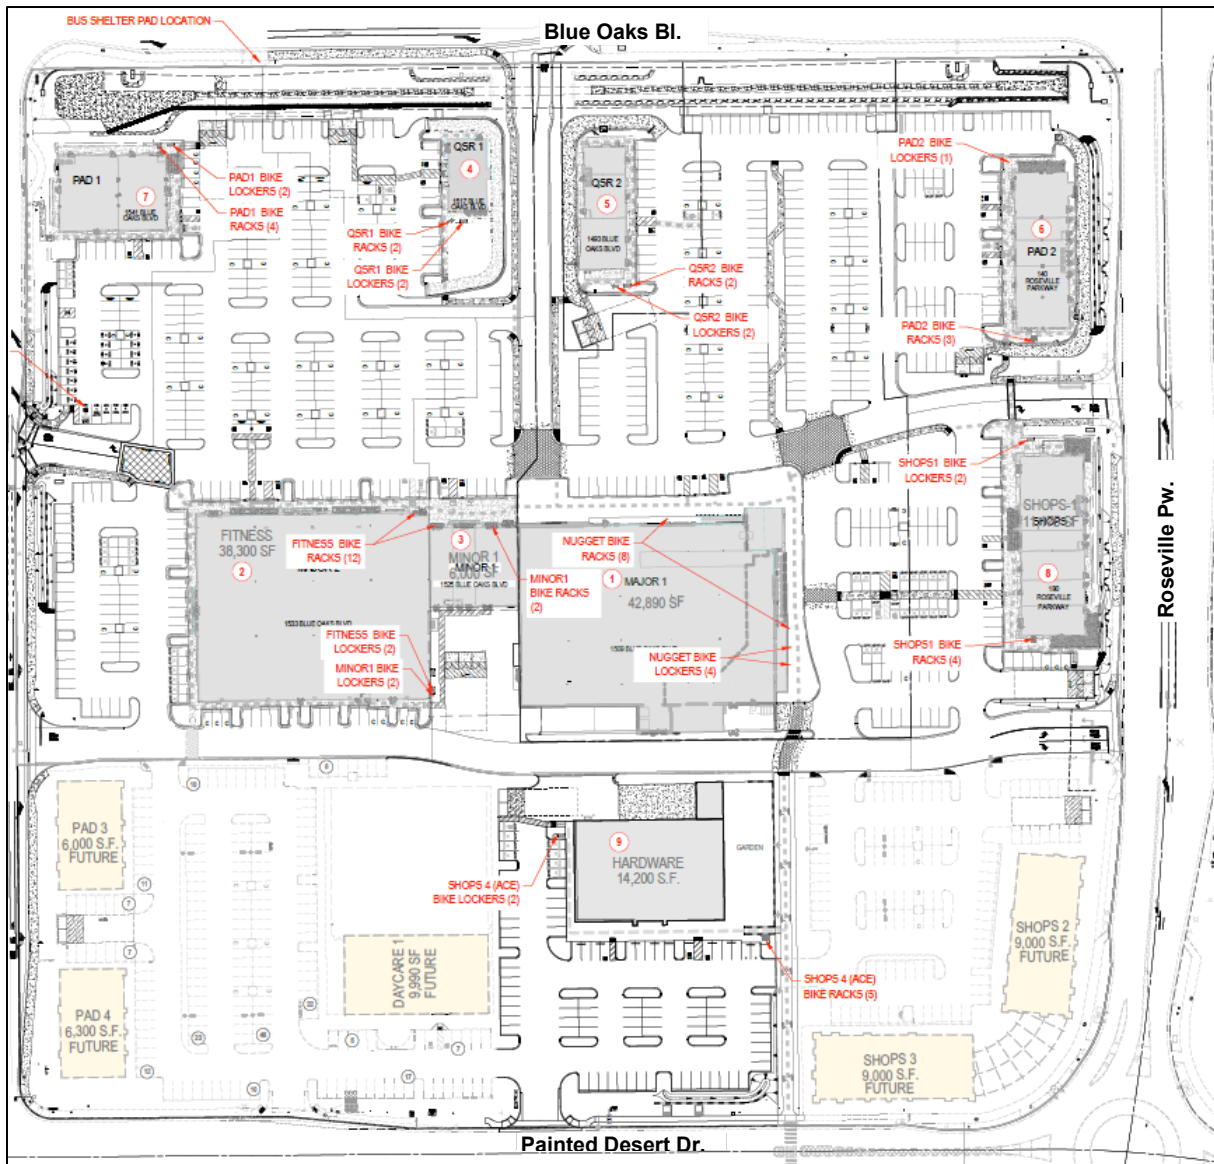

## Proposed Project

The proposed project is located on Lot 2 of the above map, which is approximately 1.79 acres in size. The project includes a request for an MPP Stage 1 Modification to change the approved site plan by adding a new retail building, reorienting the approved daycare building, and modifying the parking lot and internal circulation between Lots 1-3. Figure 6 includes a conceptual site plan of the overall center. The eastern portion of the COTC (across Roseville Parkway) will remain unchanged with this application.

The project also includes an MPP Stage 2 to evaluate the new 14,169-square-foot building and associated site improvements. The building will be occupied by Ace Hardware, a retail sales and service use type, which is a permitted use in the CC zone district. The building will also include a 6,432-square-foot outdoor garden center. The remaining buildings on Lots 1-3 (highlighted in yellow on Figure 6) are not proposed to be constructed with this application and are shown for conceptual purposes only.

**Figure 6: Overall Conceptual Site Plan**

## **EVALUATION**

The proposed project is being evaluated through the Major Project Permit (MPP) entitlement process. The intent of the MPP process is to streamline the review of large and diverse projects that could be constructed over a period of several years. The MPP process allows for the resolution of site issues prior to the review of more detailed architectural and landscape issues that may not be finalized at the time the site plan is ready. In accordance with the City's MPP Ordinance, the MPP review process is segregated into three separate stages. The evaluation section of this report includes an analysis of the requested MPP Stage 1 Modification and MPP Stage 2. Each entitlement is analyzed for its consistency with the goals and policies of the applicable regulations, including the General Plan, the Zoning Ordinance, the Community Design Guidelines (CDG), the North Industrial Planning Area (NIPA), and the HPCO Master Plan Design Guidelines (HPCO Design Guidelines).

Section 19.82.040 of the City of Roseville Zoning Ordinance describes the procedures for an amendment to a Major Project Permit. According to Section 19.82.040(C), all amendments that are not considered minor shall be reviewed in the same manner as the initial approval. The proposed request includes modifying the site plan and constructing a new retail building. This modification does not meet the minor modification criteria and; therefore, requires final action by the Planning Commission subject to the findings for a Major Project Permit Stage 1. The required findings are listed below in *italicized, bold* text and are followed by an evaluation.

The findings for a MPP Stage 1 (or modification of same) are as follows:

- 1. The Preliminary Development Plan is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines; and***
- 2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.***

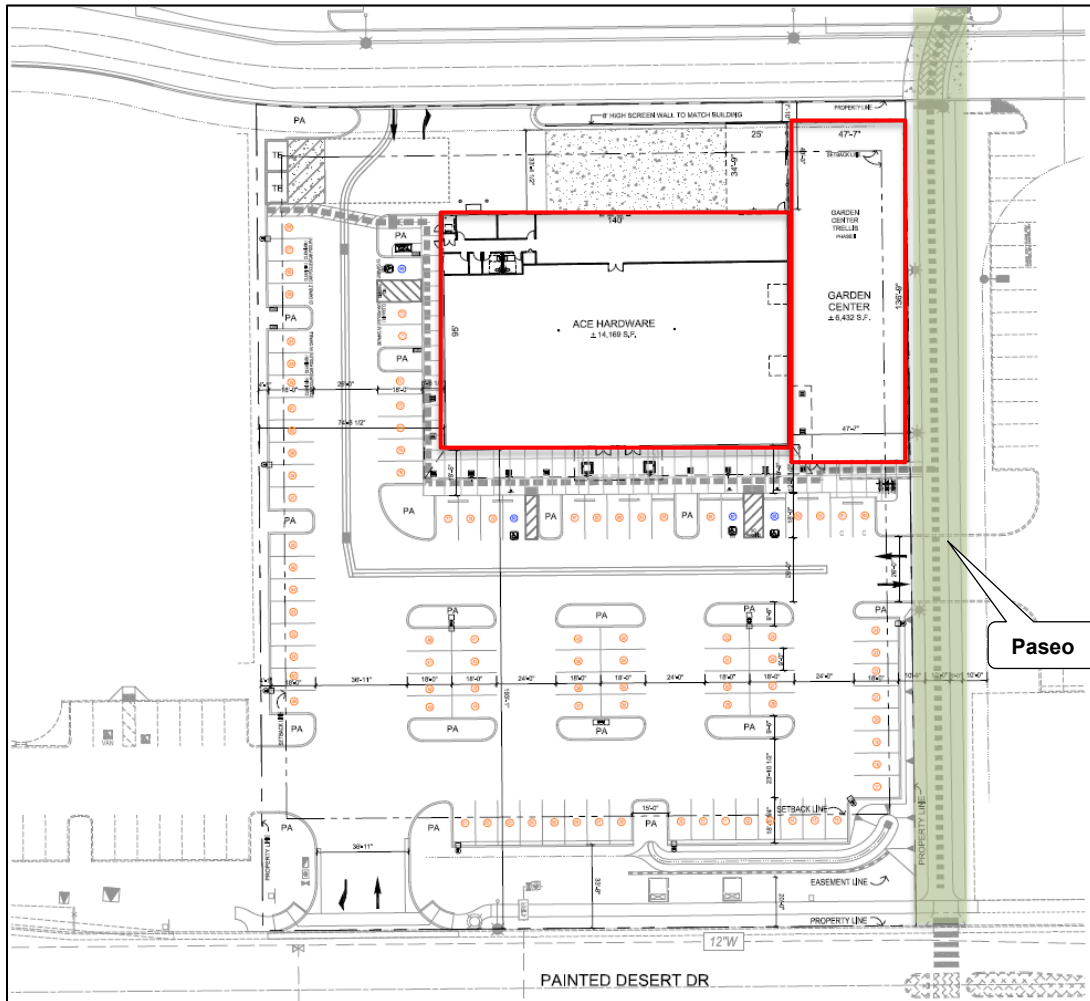

The findings for the MPP Stage 2 are as follows:

- 1. The architecture and landscaping is consistent with the General Plan, applicable Specific Plan, and adopted City Design Guidelines; and Phase 1 approval; and***
- 2. The design and installation of the Preliminary Development Plan shall not be detrimental to the public health and safety, or be materially detrimental to the public welfare.***

These findings are essentially the same, with the MPP Stage 1 Modification findings referring to the preliminary development plan, and the MPP Stage 2 findings referring to the architecture and landscaping, as well as consistency with the Stage 1 project. Therefore, for the purposes of this evaluation, both stages are examined together.

**Site Plan and Building Siting:** The project will modify the approved site plan by adding a new retail building (Ace Hardware) and reorienting the approved daycare building. The portion of the site plan that is proposed for construction is shown in Figure 7 below. The Ace Hardware building will be approximately 14,169 square feet in size with an approximate 6,432-square-foot outdoor garden area to the east of the building. The building will be located behind the Major 1 building (Nugget Market), separated by an internal drive aisle. The building will be setback approximately 193 feet away from Painted Desert Drive to the south and approximately 43 feet away from the drive aisle to the north. The front of the building will be oriented towards Painted Desert Drive. A loading dock is proposed on the back of the building, which will have a covered receiving area screened with an approximate 18-foot tall stucco wall. The remainder of the loading dock area will be screened with an 8-foot tall masonry wall with a stucco finish, also painted to match the building. The outdoor garden center will be enclosed with an 8'-4" tall black metal fence with a pedestrian entrance provided on the south. A covered outdoor display area will be included along the building frontage that is approximately in 1,280 square feet in size.

**Figure 7: Ace Hardware Site Plan**

**Vehicle Access and Circulation:** The changes to the site plan will result in modifications to the access and circulation pattern for the southern portion of the COTC. The project will provide driveways along Painted Desert Drive to the south and along the drive aisle to the north, consistent with the original MPP approval. However, the locations of these driveways will slightly be modified as a result of the reconfigured site plan. Connectivity between the parcels will be maintained, and there will be internal drive aisles that connect the shared parking areas. City Engineering and Fire Department staff have reviewed the project and found it to conform to City design standards and emergency vehicle response standards. The project has adequate vehicle site access, meets design standards, and will not be detrimental to public health and safety.

**Pedestrian Access and Circulation:** Consistent with the HPCO Design Guidelines, the original MPP site plan includes a paseo extending from the south across Painted Desert Drive and north through the site, ending at the front of the Major 1 building (Nugget Market). Other connecting pedestrian pathways branch off from this central paseo, providing access to other buildings, parking areas, and the sidewalks along the public streets. The paseo also provides a connection to the HPCO park couplet to the south of the site, in the residential portion of the HPCO Master Plan. As it relates to the proposed project, the paseo is located on the adjacent Lot 3 parcel to the east of the proposed building (see Figure 7). Given the proposed modifications will maintain the paseo connection, the project conforms to the HPCO Master Plan Design Guidelines related to pedestrian access and circulation.

**Parking:** The approved MPP for the site provides a total of 1,275 spaces, which is 48 spaces more than the minimum that was required. Of these spaces, 754 are currently constructed. Pursuant to the

conditions of approval, a reciprocal access and parking agreement is recorded over the site. Since approval of the original MPP, the corresponding Zoning Ordinance parking requirements based on use type have been applied as tenant spaces have been leased out.

Ace Hardware will require a total of 55 spaces. This is based on the Zoning Ordinance parking requirement for retail sales and service uses—one (1) space per 300 square feet of building area and one (1) space per 1,000 square feet of the outdoor display and garden area. The proposed project exceeds this requirement by providing a total of 92 spaces.

**Architecture:** The proposed elevations are consistent with the modern agrarian design concept developed for the COTC as a whole. The modern agrarian style incorporates traditional building forms and materials associated with rural or agricultural settings—such as barn-style building forms and wood or metal cladding or roofs—coupled with modern design styles such as flat parapets, stucco, and modern glass and metal storefronts. Given many of the elevations of buildings in the COTC are already approved, the proposed project will be evaluated based on its consistency with the approved designs, colors, and materials.

The building is rectangular in shape with a variation in wall planes and height to break up the structure and provide visual interest. The building incorporates many of the materials used throughout the COTC, including stucco, wood veneer siding, and metal roofs, as well as a similar paint palette, which includes neutral and earth tones and a red accent color (see Figure 8). The main entry area is defined by the use of stacked stone and wood veneer while the remainder of the building primarily consists of stucco. These contrasting materials have been applied to the building in a cohesive way. The main entry area is further defined by variation in the roofline, forward presentation, and a glass storefront. The outdoor display area will be covered with a metal roof canopy supported by wooden posts with a stacked stone wainscot, and the outdoor garden center will feature a wooden trellis. These elements add further articulation to the façade and a mix of materials. As proposed, the building design is cohesive with the overall design of the COTC, and is consistent with the HPCO Design Guidelines and the CDG.

The north (or back) elevation will consist of a metal roll-up door for the loading dock area. The proposed screen wall and adjacent landscaping will minimize views of the loading dock area and roll-up door, as encouraged by the CDG. The screen wall will have a stucco finish painted to match the building.

**Figure 8: Front and Back Elevations**

**Landscaping:** Landscaping for the overall COTC was approved with the original MPP, which included a variety of plants designed to be consistent with the theme established in the HPCO Design Guidelines. The project will maintain the required landscape width for Painted Desert Drive to the south, which is 25 feet wide, and will consist of golden rain trees as required by the HPCO Design Guidelines. A 7.5-foot-wide landscape planter will also be provided adjacent to the loading dock area on the north of the site,

which will consist of London plane trees to help screen views of the loading dock. Landscaping within the parking area will consist of a mix of narrow-leaved ash, tupelo, and red sunset maple trees. The CDG require that 50-percent of the paved parking areas be shaded by trees at 15-year maturity. The landscaping plan indicates that the project site will provide 80-percent parking lot shading, meeting the requirement. Overall, the landscape design is consistent with the landscaping palate used throughout the COTC and is consistent with the CDG.

**Lighting:** The parking lot lighting will consist of LED pole-mounted lights consistent with the approved parking lighting for the overall COTC, with an overall height of twenty (20) feet. This height complies with CDG Policy CC-90, which requires pole mounted lighting to be no taller than 25 feet. Consistent with CDG Policy CC-86, the lighting sources will have cut off lenses and be located to avoid light spillage and glare on adjacent properties. The lighting is conditioned to comply with the City’s minimum lighting level requirements (0.5 foot-candles in pedestrian areas and 1.0 foot-candles in vehicle areas). As such, staff finds the photometric plan is consistent with the CDG.

## **CONCLUSION**

The proposed project is consistent with the City’s General Plan, NIPA, Zoning Ordinance, CDG, and the prior Campus Oaks Town Center project approvals. Therefore, staff recommends that the Planning Commission approve the MPP Stage 1 Modification and MPP Stage 2.

## **PUBLIC OUTREACH**

The proposed project was distributed to all internal and external agencies and departments who have requested such notice, and all comments or recommended conditions of approval have been incorporated into the project, as appropriate. Early notification of the project was posted on the Roseville Coalition of Neighborhood Associations (RCONA)’s website. A notice of the public hearing was published in the Roseville Press Tribune on January 14, 2022 and a notice of the hearing was also distributed to all property owners within 300 feet of the site and posted on the RCONA website. No comments have been received as of publication of the staff report.

## **ENVIRONMENTAL DETERMINATION**

An Addendum to the Hewlett Packard Master Plan EIR (SCH #95112022) was prepared for the Campus Oaks Commercial project (file #PL18-0080) consistent with CEQA Section 15164. This Addendum evaluated the impact of development of the Campus Oaks Town Center, which includes the project site. The proposed project is substantially consistent with the previously evaluated project, and no new effects are expected to occur.

## **RECOMMENDATION**

The Planning Division recommends the Planning Commission take the following actions:

- A. Adopt the two (2) findings of fact and approve the **MAJOR PROJECT PERMIT STAGE 1 MODIFICATION – 7890 PAINTED DESERT DRIVE – NIPA PCL CO-41 – ACE HARDWARE – FILE #PL21-0252** subject to eight (8) conditions of approval; and
- B. Adopt the two (2) findings of fact and approve the **MAJOR PROJECT PERMIT STAGE 2 – 7890 PAINTED DESERT DRIVE – NIPA PCL CO-41 – ACE HARDWARE – FILE #PL21-0252** subject to seventy-two (72) conditions of approval.

### **CONDITIONS OF APPROVAL FOR THE MPP STAGE 1 MODIFICATION – FILE #PL21-0252**

1. This Major Project Permit modification approval shall be effectuated within a period of two (2) years from **January 27, 2022** and if not effectuated shall expire on **January 27, 2024**. Prior to said expiration

date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **January 27, 2025**. (Planning)

2. The project is approved as shown in Exhibit A and as conditioned or modified below. (Planning)
3. The project is subject to the previously approved conditions of approval for the Major Project Permit for Campus Oaks Commercial (File #PL18-0080), except as conditioned or modified below. (Planning)
4. Bike parking and clean air vehicle spaces shall be provided per the California Green Building Standards. Bike rack/locker design and location shall be approved by Alternative Transportation. (Alternative Transportation, Building).
5. The applicant/developer shall submit an updated Transportation Systems Management (TSM) Plan to Alternative Transportation for Campus Oaks Town Center to include Ace Hardware. (Alternative Transportation)
6. The applicant shall maintain the drive aisle access to the west near Painted Dessert Drive. The applicant will not be responsible for any later modifications if/when the property to the west develops. (Engineering)
7. All commercial air conditioning units 5 tons or less (<65,000 btu/ h) shall meet the current Consortium for Energy Efficiency ("CEE") Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by the Electric Department's Retail Energy Services Department. (Electric)
8. The address for this project and the proposed building, shall be 7890 Painted Desert Drive. (Business Services)

#### **CONDITIONS OF APPROVAL FOR THE MPP STAGE 2 – FILE #PL21-0252**

1. This Major Project Permit approval shall be effectuated within a period of two (2) years from **January 27, 2022** and if not effectuated shall expire on **January 27, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **January 27, 2025**. (Planning)
2. The project is approved as shown in Exhibit A and as conditioned or modified below. (Planning)
3. The project shall comply with all required environmental mitigation identified in the Hewlett-Packard Master Plan Environmental Impact Report and subsequent Hewlett-Packard Campus Oaks Addendums, and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)
4. The project shall be addressed as 7890 Painted Desert Drive. All projects with multi-tenants or buildings must submit a site plan with building footprint(s) to the Development Services Department (Business Services – Addressing) for building/suite addressing. (Business Services)
5. The applicant shall pay City's actual costs for providing plan check, mapping, GIS, and inspection services. This may be a combination of staff costs and direct billing for contract professional services. (Public Works, Environmental Utilities, Electric, Finance)

6. The design and construction of all improvements shall conform to the Design and Construction Standards of the City of Roseville, or as modified by these conditions of approval, or as directed by the City Engineer. (Public Works)
7. The applicant shall not commence with any on-site improvements or improvements within the right-of-way until such time as grading and/or improvement plans are approved and grading and/or encroachment permits are issued by the Department of Public Works. (Public Works)
8. The approval of this project does not constitute approval of proposed improvements as to size, design, materials, or location, unless specifically addressed in these conditions of approval. (Public Works)

**PRIOR TO ISSUANCE OF BUILDING PERMITS:**

9. Parking lot design shall conform to the City's design standards, including the following minimum standards for parking stalls:
  - a. All parking stalls shall be double-striped. Parking stalls adjacent to sidewalks, landscaped areas or light fixtures, and all Accessible stalls shall abut a 6-inch raised curb or concrete bumper. (Planning)
  - b. Standard – 9 feet x 18 feet; Compact – 9 feet x 16 feet; Accessible – 14 feet x 18 feet (a 9-foot-wide parking area plus a 5-foot-wide loading area) and a minimum of one (1) parking space shall be Accessible van accessible – 17 feet x 18 feet (9-foot-wide parking area plus an 8-foot-wide loading area). (Planning)
  - c. An 'exterior routes of travel' site accessibility plan incorporating slope, cross-slope, width, pedestrian ramps, curb ramps, handrails, signage, detectable warnings or speed limit signs or equivalent means shall comprise part of the site improvement plans submitted to City for review, prior to building plan check approvals. This site accessibility plan shall also include:
    - i. Accessible parking stalls shall be dispersed and located closest to accessible entrances. The total number of accessible parking spaces shall be established by Table 11B-208.2 of the CBC.
    - ii. Accessible Parking spaces and crosswalks shall be signed, marked and maintained as required by Chapter 11 of the CBC.
    - iii. Accessible parking and exterior route of travel shall comply with CBC, Sections 11B-206 and 11B-208. (Building)
10. Signs and/or striping shall be provided on-site as required by the Planning Department to control on-site traffic movements. Parking lot striping and signage shall be maintained in a visible and legible manner. (Planning)
11. The plans submitted to the Building Division for permits shall indicate all approved revisions/alterations as approved by the Commission including all conditions of approval. (Planning)
12. The project Landscape Plans shall comply with the following:
  - a. The Landscape Plan shall indicate the location of, and be designed to avoid conflicts with, all pole-mounted light fixtures and utility equipment including (but not limited to) electric transformers, switchgear, and overhead lines; backflow preventers; fire department connections; and public water, sewer, and storm drain facilities. (Planning, Fire, Environmental Utilities, Electric, Public Works)

- b. The tree plantings in the parking lot shall be designed to provide a minimum of 50% shade coverage after 15 years. (Planning)
  - c. At a minimum, landscaped areas not covered with live material shall be covered with a rock, (3") bark (no shredded bark) or (3") mulch covering. (Planning)
  - d. The landscape plan shall comply with the Landscape Guidelines for the HP Campus Oaks Master Plan and the City of Roseville Water Efficient Landscape Ordinance. (Planning, Environmental Utilities)
  - e. All landscaping in areas containing electrical service equipment shall conform to the Electric Department's Landscape Requirements and Work Clearances as outlined in Section 10.00 of the Departments "Specification for Commercial Construction." (Electric)
  - f. Slopes within landscape planters shall be no more than 3:1. A two-foot flat bench located at back-of-walk shall be included in the landscape area to slow or allow absorption of nuisance run-off from the planters. (Parks, Recreation, and Libraries)
  - g. All landscaping shall conform to the standards of crime prevention through environmental design with the intent to create natural surveillance, controlling access, and territorial reinforcement to property boundaries. (Police)
13. Any roof-mounted equipment and satellite dishes proposed shall be shown on the building plans. The equipment shall be fully screened from public streets and the surrounding properties. (Planning)
  14. At the time of building permit application and plan submittal, the project applicant shall submit a proposed plan which shows the proposed suite addressing for individual tenant spaces within the building. The Building Official, or the designee, shall approve said plan prior to building permit approval. Refer to the *City of Roseville Addressing Guidelines*. (Building)
  15. A separate Architectural Site Accessibility Plan which details the project's site accessibility information as required by California Title 24, Part 2 shall be submitted as part of the project Building Permit Plans. (Building)
  16. For Multiple Building Complexes: As part of the required Architectural Site Accessibility Plan, the developer shall delineate the extent of the site accessibility improvements being installed as part of the initial improvements for the project, and those that are planned to be developed as part of subsequent phases (i.e. around future pad buildings). (Building)
  17. Building permit plans shall comply with all applicable code requirements (California Building Code – CBC – based on the International Building Code, California Green Building Standards Code–CGBSC, California Mechanical Code – CMC – based on the Uniform Mechanical Code, California Plumbing Code – CPC – based on the Uniform Plumbing Code, California Fire Code – CFC – based on the International Fire Code – with City of Roseville Amendments – RFC, California Electrical Code – CEC – based on the National Electrical Code, and California Energy Standards – CEC T-24 Part 6), California Title 24 and the American with Disabilities Act - ADA requirements, and all State and Federally mandated requirements in effect at the time of submittal for building permits (contact the Building Division for applicable Code editions). (Building)
  18. Maintenance of copy of building plans: Health and Safety Code section 19850 requires the building department of every city or county to maintain an official copy of the building plans for the life of the building. As such, each individual building shall be submitted as a separate submittal package. Building plan review, permit issuance and archiving is based on each individual building address. (Building)

19. For all work to be performed off-site, permission to enter and construct shall be obtained from the property owner, in the form of a notarized right-of-entry. Said notarized right-of-entry shall be provided to Public Works prior to approval of any plans. (Public Works)
20. The Improvement Plans shall include a complete set of Landscape Plans. The Landscape Plans shall be approved with the Improvement Plans. (Planning, Public Works, Fire, Environmental Utilities, Electric)
21. A note shall be added to the grading plans that states:  
  
*“Prior to the commencement of grading operations, the contractor shall identify the site where the **excess/borrow** earthen material shall be imported/deposited. If the **borrow/deposit** site is within the City of Roseville, the contractor shall produce a report issued by a geotechnical engineer to verify that the exported materials are suitable for the intended fill, and shall show proof of all approved grading plans. Haul routes to be used shall be specified.”* (Public Works)
22. The applicant shall dedicate all necessary rights-of-way or Public Utility Easement for the widening of any streets or transfer of public utilities across and over any portion of the property as required with this entitlement. A separate document shall be drafted for approval and acceptance by the City of Roseville, and recorded at the County Recorder’s Office. (Public Works)
23. Bike parking and clean air vehicle spaces shall be provided per the California Green Building Standards. Bike rack/locker design and location shall be approved by Alternative Transportation. (Alternative Transportation, Building)
24. All storm drainage, including roof drains, shall be collected on site and treated with Best Management Practices (BMP’s) per the City’s Stormwater Quality Design Manual. All storm water shall be routed to the nearest existing storm drain system or natural drainage facility. Drain outfalls shall extend down to the receiving water and shall be constructed with adequate velocity attenuation devices. The grading/improvement plans for the site shall be accompanied with a shed map that defines that area tributary to this site and all drainage facilities shall be designed to accommodate the tributary flow. The storm drain system and proposed BMP’s shall be privately owned and maintained by the property owner. Prior to the issuance of any permits, the owner shall provide a plan for the maintenance of the proposed BMP’s. (Public Works)
25. Prior to the approval of the Improvement Plans, the project proponent shall provide proof of preparation and submittal of a Storm Water Pollution Prevention Plan (SWPPP) to the Regional Water Quality Control Board (RWQCB). Proof shall be in the form of the Waste Discharge Identification Number (WDID#), provided to the applicant from RWQCB, placed on the coversheet of the improvement plans. Upon approval of the improvement plans, a copy of the SWPPP shall be required onsite and available for viewing by City inspection staff upon request. (Engineering)
26. The developer shall be responsible for any necessary relocation of signal interconnect cables that may require re-location as a result of the construction of turn lanes and/or driveways. (Public Works)
27. To ensure that the design for any necessary widening, construction, or modifications of Public Streets does not conflict with existing dry utilities generally located behind the curb and gutter, and prior to the submittal of design drawings for those frontage improvements, the project proponent shall have the existing dry utilities pot holed for verification of location and depth. (Public Works)
28. Sight distances for all driveways shall be clearly shown on the improvement plans to verify that minimum standards are achieved. It will be the responsibility of the project proponent to provide appropriate landscaping and improvement plans, and to relocate and/or modify existing facilities as needed to meet these design objectives. (Public Works)

29. The applicant shall remove and reconstruct any existing damaged curb, gutter, and sidewalk along the property frontage. During plan check of the improvement plans and/or during inspection, Public Works will designate the exact areas to be reconstructed. Any existing public facilities damaged during the course of construction shall be repaired by the property owner and at the property owner's expense, to
30. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Public Works)
31. Prior to the issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Public Works)
32. The applicant/developer shall submit an updated Transportation Systems Management (TSM) Plan to Alternative Transportation for Campus Oaks Town Center to include Ace Hardware. (Alternative Transportation)
33. Prior to the issuance of a grading permit or approval of Improvement Plans, the grading plans shall clearly identify all existing water, sewer and recycled water utilities within the boundaries of the project (including adjoining public right of way). Existing utilities shall be identified in plan-view and in profile-view where grading activities will modify existing site elevations over top of or within 15 feet of the utility. Any utilities that could potentially be impacted by the project shall be clearly identified along with the proposed protection measures. The developer shall be responsible for taking measures and incurring costs associated with protecting the existing water, sewer and recycled water utilities to the satisfaction of the Environmental Utilities Director. (Environmental Utilities)
34. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)
35. Water and sewer infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards and shall include:
  - a. Utilities or permanent structures shall not be located within the area which would be disturbed by an open trench needed to expose sewer trunk mains deeper than 12 feet unless approved by Environmental Utilities in these conditions. The area needed to construct the trench is a sloped cone above the sewer main. The cone shall have 1:1 side slopes.
  - b. Water, sewer and recycled mains shall not exceed a depth of 12 feet below finished grade, unless authorized in these conditions of approval.
  - c. All sewer manholes shall have all-weather, 10-ton vehicle access unless otherwise authorized by these conditions of approval. (Environmental Utilities)
36. Recycled water infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. The applicant shall pay all applicable recycled water fees. Easements shall be provided as necessary for recycled water infrastructure. (Environmental Utilities)
37. Trash enclosures, recycling areas, and enclosure approaches shall be designed to current Refuse Division specifications, the materials and colors shall match the building, and the location of such facilities shall be reviewed and approved by the Refuse Division, Planning and the Fire Department. The enclosure must have inside dimensions of 12 feet wide and 9 feet deep and be built to the specifications of the Solid Waste Department's Enclosure Description. (Refuse, Planning, Fire)

38. Access to trash enclosures shall have an inside turning radius of 25 feet and an outside turning radius of 45 feet must be maintained to allow the refuse truck access to and from the enclosure. Enclosures must have a clear approach of 65 feet in front of the enclosure to allow servicing bins. (Refuse)
39. A trash enclosure and recycling enclosure is required for each building and each tenant, otherwise, the building owner is responsible for the trash service. (Refuse)
40. The design and installation of all fire protection equipment shall conform to the California Fire Code and the amendments adopted by the City of Roseville, along with all standards and policies implemented by the Roseville Fire Department. (Fire)
41. The applicable codes and standards adopted by the City shall be enforced at the time construction plans have been submitted to the City for permitting. (Fire)
42. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:
  - a. one (1) set of improvement plans
  - b. load calculations
  - c. electrical panel one-line drawings
43. All on-site external lighting shall be installed and directed to have no off-site glare. Lighting within the parking areas and pedestrian walkways shall provide a maintained minimum of one (1) foot-candle, and 0.5 foot-candle of light, respectively. The overall height of parking lot light fixtures shall be no more than 20 feet measured from the bottom of the base. All exterior light fixtures shall be vandal resistant. (Planning, Police)
44. The parking lot shall have properly posted signs that state the use of the parking area is for the exclusive use of employees and customers of this project. (See California Vehicle Code Sections 22507.8, 22511.5, 22511.8, 22658(a), and the City of Roseville Municipal Code Section 11.20.110). The location of the signs shall be shown on the approved site plan. (Planning, Police)
45. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

**DURING CONSTRUCTION & PRIOR TO ISSUANCE OF OCCUPANCY PERMITS:**

46. Any backflow preventers visible from the street shall be painted green to blend in with the surrounding landscaping. The backflow preventers shall be screened with landscaping and shall comply with the following criteria:
  - a. There shall be a minimum clearance of four feet (4'), on all sides, from the backflow preventer to the landscaping.
  - b. For maintenance purposes, the landscaping shall only be installed on three sides and the plant material shall not have thorns.
  - c. The control valves and the water meter shall be physically unobstructed.
  - d. The backflow preventer shall be covered with a green cover that will provide insulation. (Planning, Environmental Utilities)
47. The following easements shall be provided by separate instrument and shown on the site plan, unless otherwise provided for in these conditions:

- a. Water, sewer, and reclaimed water easements.
  - b. Additional internal easements will be required to cover primary electrical facilities to the project when the final electrical design is completed. (Electric)
48. Easement widths shall comply with the City's Improvement Standards and Construction Standards. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville". All legal descriptions shall be prepared by a licensed land Surveyor. All existing public utility, electric, water, sewer and reclaimed water easements shall be maintained unless otherwise authorized by these conditions of approval. (Public Works, Environmental Utilities, Electric)
49. Inspection of the potable water supply system on new commercial/industrial/office projects shall be as follows:
- a. The Environmental Utilities Inspector will inspect all potable water supply up to the downstream side of the backflow preventer.
  - b. The property owner/applicant shall be responsible for that portion of the water supply system from the backflow preventer to the building. The builder/contractor shall engage a qualified inspector to approve the installation of this portion of the water supply. The Building Division will require from the builder/contractor, a written document certifying that this portion of the potable water supply has been installed per improvement plans and in accordance with the Uniform Plumbing Code. This certificate of compliance shall be submitted to the Building Division before a temporary occupancy or a building final is approved.
  - c. The building inspectors will exclusively inspect all potable water supply systems for the building from the shutoff valve at the building and downstream within the building. (Building, Environmental Utilities)
50. All improvements being constructed in accordance with the approved grading and improvement plans shall be accepted as complete by the City. (Public Works)
51. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUE's) located along public roadways. (Public Works)
52. Water, sewer and reclaimed water shall be constructed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. (Environmental Utilities)
53. All water backflow devices shall be tested and approved by the Environmental Utilities Department. (Environmental Utilities)
54. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)
55. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial Construction." These charges will be determined upon completion of the final electrical design. (Electric)
56. Any relocation, rearrangement, or change of existing electric facilities due to this development shall be at the developer's expense. (Electric)
57. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes,

but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

58. All electric metering shall be directly outside accessible. This can be accomplished in any of the following ways:
- a. Locate the metered service panel on the outside of the building.
  - b. Locate the metered service panel in a service room with a door that opens directly to the outside. The developer will be required to provide a key to the door for placement in a lock box to be installed on the outside of the door. Any doors leading from the service room to other areas of the building shall be secured to prohibit unauthorized entry. (Electric)
59. One ¾-inch conduit with a 2-pair phone line shall be installed from the building's telephone service panel to the meter section of the customer's electrical switchgear or panel. (Electric)
60. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstruction during construction and when the project is complete. (Electric)

**OTHER CONDITIONS OF APPROVAL:**

61. Signs shown on the elevations are not approved as part of the Design Review Permit. A Sign Permit is required for all project signs. (Planning)
62. Following the installation of the landscaping, all landscape material shall be maintained in a healthy and weed-free condition; dead plant material shall be replaced immediately. All trees shall be maintained and pruned in accordance with the accepted practices of the International Society of Arboriculture (ISA). (Planning)
63. The City reserves the right to restrict vehicle turning movements within the public right-of-way in the future if deemed necessary by the City Engineer. (Public Works)
64. The required width of fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. Minimum required widths and vertical clearances established by the Fire Code shall be maintained at all times during construction. Closure of accesses for fire apparatus by gates, barricades and other devices shall be prohibited unless approved by the Fire Chief. (Fire)
65. Temporary aboveground storage tanks may be used at construction sites for diesel fuel only and shall not exceed 1,000 gallon capacity. Tanks shall comply with all provisions found within the Fire Code. A Fire Department Permit shall be obtained prior to tank installation. The permit shall expire after 90 days from the date of issuance, unless extended by the Fire Chief. (Fire)
66. If site survey or earth moving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor or person responsible for the building permit must notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable or not and if site remediation is required. (Fire)
67. The location and design of the gas service shall be determined by PG&E. The design of the gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)
68. All commercial air conditioning units 5 tons or less (<65,000 btu/ h) shall meet the current Consortium for Energy Efficiency ("CEE") Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and

EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by the Electric Department's Retail Energy Services Department. (Electric)

69. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, project construction is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday, provided that all construction equipment shall be fitted with factory installed muffling devices and be maintained in good working order. (Building)
70. The developer (or designated consultant) shall certify that the building foundation location has been placed according to all approved setback requirements shown on the approved site plan. The developer shall prepare a written statement confirming building placement and provide an original copy to the City Building Division Field Inspector at the time of or prior to the foundation inspection. (Building)
71. Prior to Certificate of Occupancy, the applicant may apply for a Temporary Certificate of Occupancy (TCO) of the building. If a TCO is desired, the applicant must submit a written request to the Building Division a minimum of thirty (30) days prior to the expected temporary occupancy date and shall include a schedule for occupancy and a description of the purpose for the Temporary Certificate of Occupancy. (Building)
72. Concurrent with submittal for plan check and prior to a request for final building inspection, the applicant may request City approval of an occupancy phasing plan to allow individual or multiple building occupancies. This request shall be made in writing to the Building Division and shall include 10 copies of the following:
- a. A description of measures that will be undertaken to minimize conflict between residents/building occupants and construction traffic (e.g. fencing, etc.);
  - b. A phasing plan showing the proposed buildings, internal roads and access routes, landscaping, trash enclosure locations, and any other improvements planned for each phase; and
  - c. An estimated time frame for each phase and a specific date for the first phase. (Planning, Building)
