Re: More Information About Gel Blaster Use

Dear Staff,

The Gel Baster Arena is much like laser tag. The gel blasters shoot a small gel pellet. The players wear a vest, that registers a hit on it's targets. Players wear goggles. The pellets almost completely dissipate after hitting a hard surface. The impact is similar to being hit with a rubber band at very close range. Like laser tag, we are tagging people, not shooting people.

There will be one employee. There can be up to 20 players. The sessions will be approximately 12 minutes. The attraction would be open between 10 a.m. and 10 p.m. We would be open until 11 p.m. or midnight on weekends, holidays, and in the summer. For the most part, this attraction would be used by people that are already at our facility. It will probably not draw people to just do this one attraction.

The area would have a cashier area, a vesting and instruction area, and the playing arena as shown on the plans. There is also a storage and vest maintenance area which is bigger than what we need, but it is probably the best use of that space.

We do have adequate parking. Last summer, there were only a handful of days when we were very close to being out of parking. We also have the ability to have more employees park off site. This summer, we will have 176 additional parking spaces available in our new parking lot that is on the other side of Taylor Road.

Please let me know if you need more information. We appreciate your help.

Sincerely,

Fred Kenney
