

Lead the projects that shape Roseville's water future

Join Roseville Environmental Utilities
as a Senior Engineer in the Water Utility Division

Salary up to \$161,002 annually DOE

Want to work on projects that make a real difference in the community?

As a Water Utility Senior Engineer, you'll take on meaningful engineering work, from planning through construction.

Technical Responsibilities

Dive into the core of Environmental Utilities by providing engineering and oversight support on a variety of water infrastructure and planning projects ranging from water treatment facilities to distribution systems, pipelines, wells, and water supply reliability. Your expertise will be used in designing, planning, and implementing projects to enhance and secure the City's potable water supply system.

Leadership and Project Management Responsibilities

You'll work across the City to develop positive and collaborative relationships within cross-functional teams, co-workers, consultants, contractors, City employees, vendors, and public agencies. If you enjoy solving problems, working with others, and turning plans into projects that serve the community, you may be a great fit for this role. Your work will help keep the Roseville community's potable water system reliable today and ready for the future.

About the department

Environmental Utilities is Roseville's service provider for water, wastewater, waste services, recycled water and stormwater quality services. As an integrated utility, our goal is to provide high-quality, reliable and low-cost utility services.

City ownership of these municipal utilities allows customers the dual benefit of reliable services and utility rates that remain among the lowest in the region. We have a workforce of more than 350 employees, ranging from field workers and plant operations to professional engineering, finance and program analysts and managers.

Together, the Environmental Utilities team operates and oversees:

- 100-million gallon per day water treatment plant
- Miles of pipes, hydrants, and water tanks
- Groundwater well program: 9 Aquifer Storage and Recovery Wells
- Two 30-million-gallon wastewater treatment facilities
- Miles of sewer mainlines, miles of sewer laterals, and 11,195 manholes
- Waste collection & recycling more than 100,000 tons annually
- Delivery of nearly 1.25 billion gallons of recycled water annually

About the City of Roseville

Roseville is the largest city in Placer County with about 165,000 residents. Roseville is nationally rated one of the best places to live in the U.S. and has been named one of the safest, healthiest and most playful cities in the country.

With housing choices for a wide range of incomes, top-rated schools, community-owned utilities and world class recreation, it's the perfect place for you and your family to call home.

The City of Roseville offers a competitive salary and comprehensive benefits package, a variety of training and leadership development programs and an engaging culture where innovation and collaboration thrive.
