
**CITY OF ROSEVILLE
DESIGN STANDARDS
January 2025**

Section 1: Purpose and Definitions

1-1.....PurposePD 1
1-2.....Design PracticePD 1
1-3.....DefinitionsPD 2
 A. Applicant.....PD 2
 B. Building DivisionPD 2
 C. Cadastral Surveys.....PD 2
 D. CityPD 2
 E. City EngineerPD 2
 F. Community Design GuidelinesPD 2
 G. Construction StandardsPD 2
 H. Consulting EngineerPD 2
 I. ContractorPD 2
 J. Department of Environmental Utilities.....PD 3
 K. Department of Public WorksPD 3
 L. DeveloperPD 3
 M. Development.....PD 3
 N. Development Services DepartmentPD 3
 O. Engineering DivisionPD 3
 P. Environmental Utilities DirectorPD 3
 Q. Fire Apparatus Access Roads.....PD 3
 R. Fire DepartmentPD 3
 S. Fire FlowPD 3
 T. Fire Prevention StandardsPD 3
 U. Grading OrdinancePD 4
 V. Improvements.....PD 4
 W. Laboratory.....PD 4
 X. California MUTCDPD 4
 Y. Soils ReportsPD 4
 Z. Standard DrawingsPD 4
 AA. StatePD 4
 BB. State Highway Design Manual.....PD 4
 CC. State Standard Plans.....PD 4
 DD. State Standard SpecificationsPD 4
 EE. State Traffic ManualPD 4
 FF. Subdivision Ordinance.....PD 5
 GG. Traffic Plans (Signal Plans).....PD 5
 HH. Water Efficient Landscape Requirements.....PD 5
 II. Zoning OrdinancePD 5
 JJ. Trench Cut OrdinancePD 5

Section 2: General Requirements

2-1.....	Plans by an Appropriate Engineer.....	GR 1
2-2.....	Accepted Plans.....	GR 1
2-3.....	Reference to City Specifications and Standards.....	GR 1
2-4.....	Work in City Right of Way and Easements.....	GR 1
2-5.....	Submission of Improvement Plans.....	GR 2
	A. Development Projects.....	GR 2
	B. Subdivision.....	GR 2
2-6.....	Submission of Development Plans.....	GR 3
2-7.....	Submission of Rough Grading Plans.....	GR 4
	Submission of Electrical Design, Landscaping and Irrigation Plans.....	GR 4
2-8.....	Submission of Final and parcel Maps.....	GR 5
2-9.....	Soils Reports.....	GR 6
2-10.....	Resubmittal Requirements.....	GR 6
2-11.....	Plan Check and Inspection Fees.....	GR 7
2-12.....	Plan Acceptance.....	GR 7
2-13.....	Expiration of Plans.....	GR 8
2-14.....	Improvement Plan Revision during Construction.....	GR 8
2-15.....	Record (As-Built) Plans.....	GR 9
2-16.....	Conflict, Errors, and Omissions.....	GR 9
2-17.....	Change In Consulting Engineer.....	GR 9
2-18.....	Other Agency Notification.....	GR 10
2-19.....	Inspection Requirements.....	GR 10
2-20.....	Final Inspection.....	GR 10
2-21.....	Acceptance of Improvements.....	GR 10
2-22.....	Special Notices and Permits.....	GR 11
2-23.....	Grading Permits, Encroachment Permits, Improvement Permits, and Subdivision Agreements.....	GR11
	A. Grading Permits.....	GR 12
	B. Encroachment Permits.....	GR 12
	C. Improvement Permits.....	GR 14
	D. Subdivision Agreement.....	GR 14
2-24.....	Submission of Lot Line Adjustments.....	GR 15
2-25.....	Submission of Dedication by Separate Instrument.....	GR 16
2-26.....	Bridges and Other Structural Items.....	GR 17
	A. Private Improvements.....	GR 17
	B. Public Improvements.....	GR 17
2-27.....	Deviation from Standards.....	GR 18

Section 3: Plan Sheet Requirements

3-1.....	General.....	PS 1
3-2.....	Plan and Profile Sheets.....	PS 1
	A. Drafting Standards.....	PS 1
	B. Scale.....	PS 1

	C. Title Block	PS 1
	D. Orientation.....	PS 1
3-3	Title or General Information Sheet	PS 1
3-4	Street Plan and Profile Sheets.....	PS 4
3-5	Detail Sheets	PS 5
3-6	Parcel and Final Maps	PS 6
	A. Preparation and Form	PS 6
	B. Certificate Sheet.....	PS 7
	C. Information.....	PS 8
	D. Additional Data Required.....	PS 10
	E. Subdivision Agreement.....	PS 11
3-7	Property of City of Roseville	PS 11

Section 4: VMT Impact Standards

4-1.....	General.....	TI 1
4-2	Purpose of Traffic Impact Studies	TI 1
4-3	Responsibility for Traffic Impact Studies.....	TI 1
4-4	Types of Traffic Impact Studies	TI 1
4-5	Traffic Study Format.....	TI 4
	A. Introduction.....	TI 4
	B. Project Trip Generation	TI 5
	C. Trip Distribution.....	TI 6
	D. Traffic Assignment.....	TI 6
	E. Level of Service	TI 6
	F. Site Access.....	TI 6
	G. Traffic Signals	TI 10
	H. Traffic Accidents	TI 12
	I. On-Site Circulation	TI 12
	J. Report Documentation	TI 12
4-6	Traffic Impact Study Preparation and Submittal Requirements	TI 12
4-7	Purpose of VMT Impact Studies.....	TI 16
4-8	Responsibility for VMT Impact Studies.....	TI 16
4-9	VMT Impact Studies	TI 16
	A. Qualitative Studies Screening.....	TI 16
	B. VMT Analysis.....	TI 18
4-10	VMT Analysis	TI 19
4-11.....	VMT Study Format	TI 20
	A. Table of Contents	TI 20
	B. Executive Summary	TI 20
	C. Introduction.....	TI 21
	D. Methodology	TI 21
	E. Results.....	TI 21
	F. Mitigation Measures.....	TI 21
	G. Conclusion	TI 22

4-12	VMT Impact Study Preparation and Submittal	TI 22
------	--	-------

Section 5: Site Access

5-1	General	SA 1
5-2	Driveway Locations on Minor and Primary Residential Streets	SA 1
5-3	Driveway Location on Collector or Arterial Streets	SA 2
5-4	Number of Driveways Serving a Parcel or Site	SA 2
5-5	Right Turn Deceleration/Acceleration Lanes for Driveways	SA 3
5-6	Left Turn Deceleration/Acceleration Lanes for Driveways	SA 3
5-7	Minimum Offset for Opposing Driveways	SA 4
5-8	Restricted Turning Movements for Driveways	SA 4
5-9	Signalized Driveways	SA 5
5-10	Minimum Required Throat Depth	SA 6

Section 6: Traffic Signals, Signs, and Striping

6-1	Traffic Signal Needs Assessment	TS 1
6-2	Design Standards	TS 1
	A. Signal Standard Types	TS 1
	B. Vehicle and Pedestrian Signal Types	TS 2
	C. Vehicle Signal Alignment	TS 4
	D. Number of Vehicle Signal Indications	TS 4
	E. Signal Phasing	TS 5
	F. Permissive Left Turn Phasing	TS 5
	G. Vehicle Detector Layout and Inputs	TS 5
	H. Traffic Signal Conductors	TS 8
	I. Traffic Signal Interconnect (SIC)	TS 10
	J. Traffic Signal Conduit	TS 14
	K. Traffic Signal Pull Boxes	TS 15
	L. Pedestrian Push Button (PPB)	TS 16
	M. Intersection & Arterial Roundabout Safety Lighting	TS 16
	N. Controller/Service Pad	TS 17
	O. Traffic Signs	TS 18
	P. Striping	TS 19
	Q. Right Turn Lanes	TS 22
	R. City Supplied Equipment	TS 22
	S. Contractor Supplied Equipment	TS 23
	T. Salvaged Equipment	TS 23
	U. Traffic Control	TS 24
	V. Signal Activation	TS 26
	W. Roadway Improvements	TS 27
6-3	Preparation of Plans	TS 28
	A. Title Sheet	TS 28
	B. Signal and Lighting Sheet	TS 29
	C. Interconnect Sheet	TS 29

D. Signing and Striping SheetTS 29
E. Intersection Lighting SheetTS 30

Section 7: Streets

7-1.....Street Classes and Design WidthsST 1
 A. 20-Foot Street (Alley)ST 1
 B. Residential StreetsST 1
 C. Collector/IndustrialST 2
 D. Minor ArterialST 2
 E. Major ArterialST 2
 F. Cul-de-SacST 2
 G. Partial Width Streets.....ST 3
 H. Private StreetsST 3
 I. Gated EntrywaysST 3
7-2Right-of-Way WidthST 4
7-3Roadway Signage and StripingST 5
7-4Structural SectionST 5
 A. Structural Street Sections at Signalized Intersections.....ST 8
7-5Curb and Gutter RequirementsST 8
 A. Type 1 Roll Curb and GutterST 8
 B. Type 2 Vertical Curb and GutterST 8
 C. Type 6 Modified V-GutterST 8
 D. Cross GuttersST 8
7-6Sidewalk RequirementsST 8
 A. WidthST 8
 B. SlopesST 9
 C. RadiusST 9
 D. Pedestrian Curb RampsST 9
 E. Sidewalk Barricades.....ST 9
7-7Pedestrian Walks and Bike PathsST 9
7-8Roadway Profile Standards.....ST 9
 A. GradesST 10
 B. Cross SlopesST 10
 C. Vertical CurvesST 10
7-9IntersectionsST 10
7-10Offset Intersections.....ST 10
7-11Elbow IntersectionsST 11
7-12.....Design Speed Sight Distances.....ST 11
 A. Stopping Sight Distance.....ST 11
 B. Sight Distances for Cars Entering Side Streets or Driveways via
 Left Turn inST 11
 C. Corner Sight Distances for Cars Exiting at Intersections and
 Driveways.....ST 12
7-13.....Centerline RadiiST 13

7-14.....	Driveways.....	ST 13
	A. Types, Widths and Grades	ST 13
	B. Location	ST 14
	C. Sight Distance	ST 14
7-15.....	Bus Stops and Turnouts.....	ST 14
7-16.....	Developer Responsibility for Improvements to Streets	ST 14
7-17.....	Trenching in Existing Paved Roadways.....	ST 16
7-18.....	Street Names and Street Name Signs	ST 16
	A. Location and Number Required	ST 17
7-19.....	Survey Monuments.....	ST 17
7-20.....	Benchmarks	ST 19

Section 8: Domestic Water Supply System Design

8-1.....	Introduction.....	W 1
8-2.....	Design Criteria	W 1
8-3.....	Current Standards	W 1
8-4.....	Water Supply Quality.....	W 1
8-5.....	Water Supply Pressure.....	W 1
8-6.....	Flow Determination.....	W 2
8-7.....	Peaking Factors.....	W 2
8-8.....	Required Fire Flows.....	W 2
	A. Residential Areas	W 3
	B. Multi-Family Areas.....	W 3
	C. Commercial, Business, Industrial or School District Areas	W 3
8-9.....	Location in Existing Streets.....	W 3
8-10.....	Location in Unpaved Areas.....	W 3
8-11.....	Transmission System Design.....	W 3
	A. Transmission Main Location	W 4
	B. Transmission Main Appurtenances.....	W 4
	C. Corrosion Protection.....	W 4
	D. Insulating Flange Test Station.....	W 4
8-12.....	Distribution System Design.....	W 4
	A. Hydraulic Analysis.....	W 4
	B. Pipe Sizes	W 5
	C. Stubs	W 5
8-13.....	Water Main Location	W 6
	A. Location	W 6
	B. Vertical Elevation Change.....	W 7
	C. Main Separation Alternative Request.....	W 7
	D. Cover	W 9
	E. Dead-End Mains	W 9
	F. Warranty Inspection of Water Main Stubs.....	W 9
	G. Public Lines in Commercial Development	W 9
8-14.....	Valves	W 10

	A. Locations.....	W 10
	B. Removal and Abandonment	W 10
	C. Valve Extension Stems.....	W 11
	D. Air Relief Valves.....	W 11
8-15	Hydrants and Blow-offs.....	W 11
	A. Location	W 11
	B. Spacing.....	W 11
	C. Cul-de-sacs and Dead-end Streets.....	W 11
	D. Valves	W 11
8-16	Water Service.....	W 12
	A. Location	W 12
	B. Curb Stamp	W 12
	C. Sizing.....	W 12
	D. Spacing.....	W 12
	E. Service Taps	W 12
	F. Water Meters	W 13
8-17.....	Restraint	W 13
8-18	Work Near Existing Water Mains.....	W 13
	A. Water Mains 16 Inches and Larger.....	W 13
8-19	Water Improvement Plan Requirements	W 14
	A. Water Study	W 14
	B. General Requirements	W 14
	C. Layout Sheet	W 14
	D. Plan and Profile Sheet.....	W 14
	E. Detail Drawings	W 15
8-20.....	Record (As-Built) Plans	W 15

Section 9: Sanitary Sewer Design

9-1	Design Criteria	SS 1
9-2	Average Flow Determination.....	SS 1
9-3	Design Flow	SS 2
9-4	Pipe Capacity, Slope, Velocity, Size, Depth and Material.....	SS 4
	A. Main Sizes.....	SS 4
	B. Slope and Velocity.....	SS 4
	C. Capacity.....	SS 4
	D. Hydraulic Grade Line	SS 5
	E. Depth.....	SS 5
	F. Material.....	SS 5
9-5	Sewer Location and Alignment Requirements.....	SS 5
	A. General.....	SS 5
	B. Location in New Subdivisions	SS 5
	C. Location in Existing Streets.....	SS 5
	D. Location in Unpaved Areas.....	SS 5
	E. Easements Sewer Lines.....	SS 6

	F. Public Lines in Commercial Developments.....	SS 6
	G. Water Well Clearance	SS 6
	H. Lines in Drainage Swales.....	SS 6
	I. Alignment	SS 6
	J. Sewer Main Stub.....	SS 7
9-6.....	Trench Loading Conditions and Pipe Design.....	SS 7
	A. Rigid Conduit Loading.....	SS 7
	B. Safety Factor	SS 7
	C. Bedding and Initial Backfill	SS 7
	D. Special Pipe Strength Requirements	SS 7
9-7.....	Manhole Criteria.....	SS 7
	A. General.....	SS 7
	B. Spacing.....	SS 8
	C. Invert Elevations.....	SS 8
	D. Manhole Sizing	SS 8
	E. Manhole Coating.....	SS 8
	F. Manhole Access.....	SS 8
	G. Connection City Mains.....	SS 8
9-8.....	Drop Connection Criteria	SS 8
9-9.....	Mainline and Dip Transitions.....	SS 9
9-10.....	Sewer Service Design	SS 9
	A. General.....	SS 9
	B. Sizing.....	SS 9
	C. Depth.....	SS 10
	D. Special Requirements in Developed Areas	SS 11
	E. Warranty Inspection of Sewer Main Stubs.....	SS 11
	F. Abandoning Existing Sewer Stubs.....	SS 11
	G. Grease Interceptor	SS 11
	H. Hydromechanical Grease Interceptors.....	SS 12
	I. Oil/Sand Interceptor	SS 12
	J. Automatic Car Wash.....	SS 12
	K. Dental Practices.....	SS 12
	L. Industrial Wastewater Monitoring Station.....	SS 13
9-11.....	Siphon and Creek Crossing Design.....	SS 14
	A. General.....	SS 14
	B. Gravity Mains.....	SS 14
	C. Design	SS 14
	D. Siphon	SS 14
9-12.....	Boring and Jacking Requirements	SS 14
9-13.....	Pump Station and Force Main Requirements	SS 15
	A. Location	SS 15
	B. Capacity.....	SS 15
	C. Wet Well.....	SS 15
	D. Pumps	SS 15

E. Station Piping	SS 16	
F. Odor Control	SS 16	
G. Force Mains	SS 16	
H. S.C.A.D.A.	SS 16	
I. Valves	SS 17	
9-14	Sewer Improvement Plan Requirements.....SS 17	
A. Sewer Study	SS 17	
B. General Requirements	SS 17	
C. Layout Sheet	SS 17	
D. Plan and Profile Sheets	SS 17	
E. Detail Drawings	SS 18	
F. Connection to Existing Facilities Where Bypassing or Stoppage of		
Existing Flow Will be Required	SS 19	
9-15.....	Multi-Parcel Commercial and Industrial Developments	SS 19
9-16	Record (As-Built) Plans	SS 19

Section 10: Drainage

10-1.....	General.....	DR 1
10-2	City Policies and Requirements	DR 1
10-3	Development In or Adjacent to a Regulatory Floodplain.....	DR 1
103A.....	Development Within Creek Channel or Along Creek Bank.....	DR 3
10-4	Federal Flood Program	DR 4
10-5	Drainage Diversions.....	DR 4
10-6	Drainage Easements	DR 4
10-7	Drainage Capacity/Design	DR 5
10-8	Design Peak Discharge Methods	DR 5
10-9	Unit Peak Discharge Method.....	DR 6
A. Criteria	DR 6	
B. Response Time	DR 6	
C. Unit Peak Discharge	DR 7	
D. Infiltration Factor	DR 7	
E. Connecting Separately Connected Areas	DR 9	
F. Procedure	DR 9	
10-10.....	Hydraulic Standards for Drainage Systems.....	DR 12
A. Hydraulic Grade Line	DR 12	
B. Manning’s Formula.....	DR 12	
10-11	Street Inundation Requirements	DR 12
10-12.....	Closed Conduits	DR 14
A. Size and Material	DR 14	
B. Cover Requirements	DR 14	
C. Alignment	DR 14	
10-13.....	Manholes.....	DR 14
A. Saddle Manholes.....	DR 15	
B. Covers.....	DR 15	

10-14.....	Inlets	DR 15
10-15.....	Junction Boxes.....	DR 15
10-16.....	Inlet and Outlet Structures.....	DR 16
	A. Headwalls, Wingwalls, and Endwalls.....	DR 16
	B. Trash Racks and Access Control Racks	DR 16
10-17.....	Drainage Pumps.....	DR 16
	A. Design Requirements.....	DR 16
	B. Maintenance Requirements.....	DR 17
10-18.....	Channels and Outfall Design	DR 17
	A. Open Channel Design Requirements.....	DR 17
	B. Interceptor Ditches	DR 18
	C. Outfall Profiles	DR 18
	D. Fencing.....	DR 18
	E. Access Roads.....	DR 18
10-19.....	Cross Culverts and Bridges	DR 18
	A. Design Storm	DR 19
	B. Computation of Flow	DR 19
10-20	Detention and Retention Basins.....	DR 20
10-21.....	Access for Maintenance	DR 20
	Standard Hydraulic Calculation Sheet	DR 21
	Submittal Requirements – HEC-1 Studies.....	DR 22
	Submittal Requirements – HEC-2 Studies or HEC RAS.....	DR 26
	Floodplain Encroachment Compliance Statements	DR 30

Section 11: Grading

11-1	Introduction.....	GR 1
11-2.....	Fees and Bonds	GR 2
11-3.....	Preparation	GR 2
11-4.....	Finished Grading Plan Requirements	GR 2
11-5.....	Rough Grading Plan Requirements.....	GR 4
	A. Improvements.....	GR 4
	B. Drainage.....	GR 4
11-6.....	Design Requirements.....	GR 4
	A. Rolling Terrain Grading.....	GR 4
	B. Boundary Grading.....	GR 4
	C. Interior Grading.....	GR 5
	D. Retaining Walls.....	GR 7
	E. Grading Near Trees.....	GR 7
	F. Stormwater Pollution Prevention plan (SWPPP).....	GR 10
	G. Mitigation Monitoring Requirement.....	GR 15
	H. Certifying Pad Elevations.....	GR 15
	I. Maintenance of Access to Utility Facilities	GR 16

Section 12: Sound Barrier Design

12-1	General	SB 1
12-2	Sound Studies	SB 1
12-3	Location Requirements	SB 1
12-4	Design Requirements	SB 1

Section 13: Bikeways

13-1	General	BK 1
13-2	Design Criteria	BK 1
13-3	Plan Acceptance	BK 1
13-4	Class I Bikeways (Bike Paths)	BK 1
	A. Width	BK 2
	B. Clearance to Obstructions	BK 2
	C. Signing and Delineation	BK 2
	D. Intersections with Roadways	BK 3
	E. Entry Control	BK 3
	F. Separation between Bike Paths and Roadways	BK 4
	G. Design Speed	BK 4
	H. Grades	BK 4
	I. Horizontal Alignment and Super elevation	BK 5
	J. Stopping Sight Distance	BK 5
	K. Lateral Clearance on Horizontal Curves	BK 5
	L. Vertical Curves	BK 5
	M. Structural Section	BK 5
	N. Drainage	BK 6
	O. Access Points	BK 6
	P. Temporary Bike Path Closures	BK 6
	Q. Bike Bridges	BK 6
	R. Lighting	BK 7
13-5	Bike Paths in Floodplains	BK 7
13-6	Bike Bridges in Floodplains	BK 7
13-7	Class IA Sidewalk Bikeways	BK 8
13-8	Class II Bikeways	BK 8
	A. Signing and Pavement Markings	BK 8
	B. At-grade Intersection Design	BK 8
13-9	Class III Bikeways	BK 8

Section 14: Recycled Water Infrastructure Design

14-1	Determination of Use	RW 1
14-2	Design Information	RW 1
14-3	Current Standards	RW 1
14-4	Recycled Water Supply Quality	RW 2
14-5	Off-Site Recycled Water Facilities	RW 2
14-6	Private On-Site Recycled Water Facilities	RW 2

14-7	Water Supply Pressure	RW 2
14-8	Transmission System Design	RW 2
	A. Hydraulic Analysis	RW 2
	B. Specifications	RW 3
	C. Transmission Main Size	RW 3
	D. Transmission Main Location	RW 3
	E. Main Line Fittings and Connections	RW 4
	F. Recycled Water Transmission Main and Appurtenances	RW 5
	G. Booster Pump Stations	RW 5
	H. Air and Vacuum Valves and Blow-Offs	RW 5
	I. Corrosion Protection	RW 5
	J. Insulating Flange Test Station	RW 5
	K. Warranty Inspection of Recycled Water Stubs	RW 5
14-9	Service Lines	RW 6
14-10	On-Site Recycled Water Facilities Design	RW 7
14-11	Determination to Use Recycled Water or Potable Water	RW 11
14-12	Design of Recycled Water Facilities with Temporary Potable Water Service	RW 11
14-13	Backflow Prevention Devices	RW 11
14-14	Prohibition and Limitations	RW 12
14-15	Control of Runoff and Application Areas	RW 12
14-16	Minimum Depth to Top of On-Site Recycled Water Piping	RW 13
14-17	Data Required on Plans	RW 13
	A. Meter Data	RW 13
	B. Drinking Fountains	RW 13
	C. Irrigation Equipment Legend	RW 14
	D. Recycled Water Warning/Information Sign	RW 14
14-18	Location	RW 14
14-19	Plan Submittal and Approval	RW 14
14-20	Inspection	RW 14
14-21	Record Drawings	RW 15
14-22	Controller Access	RW 15
14-23	Blow-off Hydrants and Other Points of Public Access	RW 16
14-24	Detail Drawings	RW 16

Section 15: Solid Waste Design

15-1	Introduction	SW 1
15-2	Current Standards	SW 1
15-3	Design Criteria	SW 1
	A. General	SW 1
	B. Walls	SW 1
	C. Gates	SW 1
	D. Vehicle Approach and Floor	SW 1
	E. Signs and Striping	SW 2

F. LocationSW 2
G. Path of Travel.....SW 2
H. Back-up LengthsSW 2
I. Frontloading Compactors Enclosure.....SW 2
J. Detail Drawings.....SW 2
K. OrganicsSW 2
