

**NOTICE OF INTENT
TO ADOPT A MITIGATED NEGATIVE DECLARATION FOR THE PROPOSED
NORTH AREA COLLECTION SYSTEM INTERTIE PROJECT**

Public Notice is hereby given that an Initial Study/Mitigated Negative Declaration (IS/MND) (environmental report) is available for public review for the North Area Collection System Intertie (NACSI) Project.

Project Description and Location: The project is a proposal by the City of Roseville Environmental Utilities Department to connect existing sewer lines on the north that flow to the Pleasant Grove Wastewater Treatment Plant (PGWWTP) to existing lines on the south that flow to the Dry Creek Wastewater Treatment Plant (DCWWTP). This would be accomplished by constructing two new 10-inch sewer line segments, refurbishing and utilizing existing sewer lines, constructing two new pump stations and two new pipeline under crossings of the Union Pacific Railroad. The two new pipeline segments would be located: 1) primarily along the west side of the Union Pacific Railroad within the "Telefunken" (formally NEC) campus located at 7503 Foothills Boulevard, and then west under the railroad to Industrial Avenue; and, 2) along the west side of Washington Boulevard beginning at a point approximately 300 feet south of the Washington Boulevard/Diamond Oaks Road intersection and continuing south crossing under the railroad and ending at a point approximately 380 south of the Washington Boulevard/South Branch Pleasant Grove Creek crossing (see map on reverse).

Document Review and Availability: The public comment period will extend for 30 days **from May 29, to June 27, 2012.** Copies of the IS/MND are available for public review at the following location:
