

California Air Pollution Control Officers Association
CalEEMemo Issue 4: Caltrans Grant Funding for CalEEMod Updates

Emissions Modeling • Climate Resilience • Health & Equity

New Project

Upload Project

CalEEMod quantifies ozone precursors, criteria pollutants, and greenhouse gas emissions from the construction and operation of new land use development and linear projects in California. The model integrates data from CalEnviroScreen®, Cal-Adapt®, and the Healthy Places Index (HPI)® to identify potential climate risks and environmental burdens within the project vicinity. Measures to reduce emissions, climate risks, and environmental burdens are available for user selection and analysis.
