Chapter 9: Parks and Recreation

The City of Roseville's Parks and Recreation Master Plan requires a ratio of 9 acres of parkland per 1,000 residents. The 9 acres of parkland includes; 3 acres/1,000 residents for neighborhood/community parks, 3 acres/1,000 residents for citywide parks, and 3 acres/1,000 residents for open space. For Westbrook, this generates a requirement to provide 14.6 acres in each of these categories.

The parks program developed for Westbrook includes 14.6 acres of neighborhood parks, no citywide park, and 7.3 acres of credited open space. The project meets the neighborhood park dedication requirement with 14.6 acres. The project will pay a Citywide Park in-lieu fee for 14.6 acres of parkland that is required by the parks Master Plan, and an open space in-lieu fee for 7.3 acres (the shortfall between required and credited open space). This project will not have a citywide park in the plan, but through the in-lieu fee and the citywide park fee, it will contribute to the creation of other planned facilities in the City. **Table 9-1** shows the required park acreage under the City's current Master Plan and project population assumptions. The City will be responsible for the construction of all the parks.

Three neighborhood parks have been distributed throughout the project to maximize efficiency and need. **Map 2-1** shows the location of the neighborhood parks in the Westbrook project.

Parks Improvements

Facility Costs

Table 9-2 shows the total estimated park facility costs. The neighborhood parks program costs are estimated at roughly \$3.0 million. The cost of the parks and recreation facilities include, but are not limited to, the following types of facilities:

- Landscaping
- Restrooms
- Parking
- Recreational fields
- Playgrounds
- Picnic areas

Detailed park improvements and costs are provided by MacKay & Somps in a separate report.

Phasing

The development of Phase A would have park improvements that correspond to the amount of initial residential development. These improvements include one neighborhood/community park at a size of 4.4 acres. The estimated facilities costs for the park improvements for Phase A is approximately \$910,000.

Funding Strategy

Existing Fee Programs

The neighborhood/community park impact fee funds the neighborhood/community park improvements in Westbrook. **Table 9-3** creates an updated fee for the Westbrook project by allocating the total neighborhood/community park improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household that vary by unit size. **Table 9-4** shows the neighborhood park revenue by Phase A and Buildout.

There will be two citywide park fees. One fee will be to fund citywide park construction and the other is an in-lieu fee because Westbrook has a shortfall in citywide land dedication. The fee was calculated by using the City's current construction portion of its fee and then allocating it across the housing units to create a tiered fee. Using this approach, the base fee and revenue estimate for park construction was determined to be \$2,515,122 and **Table 9-5** allocates that revenue across the units for the tiered rate.

The citywide land in-lieu fee has been established in accordance with City standards for in-lieu fees and will go towards citywide park improvements or citywide park land within the City. **Table 9-6** estimates the total cost of Westbrook's obligation for land dedication. The cost is then allocated across the residential units on a person per household basis to establish the fee in **Table 9-7**.

Table 9-8 shows the citywide park construction fee and citywide in-lieu fee revenues for Phase A and Buildout.

Open Space In-Lieu

The Westbrook project is receiving a credit of 7.3 acres towards its 14.6 acre requirement for the 36.6 acres of open space that is to be dedicated. This leaves a dedication shortfall of 7.3 acres. An open space in-lieu fee is estimated in this report using the most recent appraisal done by the City for the Sierra Vista SP. The open space land is then estimated at 20% of the value of developable land the appraisal determined. **Table 9-9** shows the estimated in-lieu total for the shortfall of provided open space.

Table 9-10 creates a Westbrook project open space in-lieu fee by allocating the total value of the dedication shortfall across the different residential land uses based on the persons per household that vary by unit size. **Table 9-11** shows the open space in-lieu fee revenues for Phase A and Buildout.

Bike Trail Improvements

In the Westbrook project, the bike trail system is integrated within the open space parcel. The bike trail runs along the open space corridor. **Map 1-2** illustrates the proposed bike trail in the project.

Facility Costs

Table 9-12 shows the total estimated bike trail improvement costs. The bike trail costs are estimated at roughly \$98,800. The rough grading of the bike trail is the obligation of the adjacent parcel and will be completed with the grading of the parcel, either in its entirety or consistent with any proposed phasing of the parcel. The cost of the bike trail improvements include, but are not limited to, the following types of facilities:

- Bike Trail Entry Points
- Bike Trail Kiosks
- Bike Trail and Shoulder
- Post and Cable Fences

Detailed bike trail improvements and costs are provided by MacKay & Somps in a separate report.

Phasing

The development of Phase A would have no initial set of bike trail improvements.

Funding Strategy

Existing Fee Programs

The City's bike trail impact fee will fund the bike trail improvements throughout Westbrook and connect to adjacent developed bike trails. **Table 9-13** creates an updated fee for the Westbrook project by allocating the total bike trail improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household factors that vary by unit size.

Table 9-14 shows the bike trail impact fee revenues for Phase A and Buildout. The developer will be responsible for grading the bike trail (with each phase of construction) and the City is responsible for construction the bike trails in the project. The City will construct the bike trails as funding is available.
