

Staying informed is critical. Our goal is to communicate early and often with residents and businesses alike, so everyone is as prepared as possible. We have a number of resources available to ensure you are receiving information from Roseville Electric Utility.

With the dry, hot conditions expected throughout the summer, Roseville Electric is preparing for all scenarios. In the case of extended high temperatures leading to a high demand for electricity, Roseville Electric may be called upon to reduce the electric load. Although Roseville Electric Utility typically has a sufficient portfolio of resources to meet our customers' electric needs at peak demand, when a Peak Alert is issued we would ask customers to voluntarily conserve electricity. When customers reduce electricity use at critical times, it can prevent more dire emergency measures, including possible power outages.

There are also steps you can take now to make sure you are prepared for a power outage.

Update your contact information:

Update your contact information with Roseville Electric including e-mail addresses and mobile numbers.

Visit roseville.ca.us/billpay or please call us at (916) 774-5300.

Sign up for outage notifications:

Get real-time information about outages impacting your service. When you sign up for notifications, we'll let you know the cause and when power is restored.
